There is bi-weekly communication by motor-car between Mbabane and Breyten (82 miles) and between Mbabane and Bremersdorp (23 miles) and between Piet Retief and Hlatikulu (50 miles). Elsewhere the communication is by cart or runners. There are 17 post offices, and telegraph and telephone offices at Mbabane, Pigg's Peak, Bremersdorp, Ezulweni, Hlatikulu, Mahanba, and Dwaleni.

THE SUDAN.

The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern boundary of Uganda, 3° 36' N. lat., and reaches from the French Sahara about 18° 15' E. (at 22° N.) to the north-west boundary of Eritrea (Italian) in 38° 30' E. (at 18° N.). The greatest length from north to south is approximately 1,300 miles, and from east to west 1,300 miles. The northern boundary is the 22nd parallel of North latitude; on the east lie the Red Sea, Eritrea and Abyssinia; on the south lie the British Protectorate of Uganda and the Belgian Congo; and on the west French Equatorial Africa. The total area is about 1,007,500 sq. miles, with a population of about 6,000,000, partly Arabs, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 3,000 Europeans. The Arabs and Nubians are all Muhammadans, as are some of the Negroes, but the latter are generally pagans. The *Gambela enclave* (within the boundaries of Abyssinia) is leased from the Abyssinian Government as a trading post. The Nile enters the plains of Fado, in the Mongalla Province, as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. From the Atbara confluence to the Mediterranean the river has a course of close on 1,600 miles, and from its sources to the confluence its length may be reckoned at 2,400 miles, giving a total waterway of 4,000 miles. Between Khartoum and Wadi Halfa occur five of the six *Cataracts*, the re-

maining (first) cataract being in Egypt at Assuan.

Government.—The Sudan is administered by a Governor-General, aided, since 1920, by a Council nominated from amongst the Officials of the Government. All Ordinances and Laws are made by the Governor-General in Council. No duties may be levied on imports from Egypt, and duties on imports *via* the Red Sea ports may not exceed those levied in Egypt. The import and export of slaves is prohibited. The Sudan is divided into 15 provinces (*mudirias*) under governors (*nudirs*), under whom are British District Commissioners in charge of two or more districts (*manurias*); a Sudanese official is in charge of each *manuria*. *Civil Justice* is administered by a Chief Justice and four puisne judges, one of whom is also Registrar-General of Lands. There are also Province and District Judges who are usually the Governors and District Commissioners of Provinces, but there are also District Judges who are professional lawyers in some of the more important centres. Appeals lie from the District Judges to the Province Judges or the High Court, and from the Province Judges and the High Court to the Court of Appeal, which consists of three judges of the High Court. The system of the law administered is "justice, equity and good conscience" in all cases in which there is no special enactment. There is no general code of civil and commercial law such as is in force in Egypt and many Continental countries. The religious law of Islam is administered by the Mohammedan Law Courts in matters of inheritance, marriage, divorce, and family relations generally amongst the Moslem population. There are District and Province Courts under District and Province Kadis, and a High (Mahkama) Court at Khartoum presided over by the Grand Kadi. *Criminal Justice* is administered chiefly by the Governors and District Commissioners and Mamours of Provinces and Districts, all of whom are magistrates. The Judges of the High Court and District Judges also have criminal jurisdiction as magistrates. The more serious offences are tried by courts consisting of three magistrates, and many native notables have been made magistrates for the purpose of sitting as members of such courts. The decisions of such courts require confirmation by the Governor of the Province or the Governor-General, who exercise powers similar to those of confirming officers in Courts Martial, and to them also appeals lie. Certain Nomad Chiefs have petty Civil and Criminal jurisdiction, and courts of Native Chiefs have been instituted in the Southern Provinces. The Sudan is garrisoned by native troops, forming the Sudan Defence Force. A small garrison of British troops is quartered at Khartoum. The Police are locally enlisted, and are under Provincial administration.

Education.—In addition to *kuttlabs* (vernacular schools) there are 10 primary schools, where instruction is given in English as well as Arabic, attended by about 1,100 pupils; a secondary school at Khartoum (Gordon College), and a training college (also at Gordon College); and technical or trade schools at Khartoum and Omdurman.

Production.—The Sudan is the chief source of the world's supply of gum and ivory. Egyptian cotton has been successfully established, and increasing quantities are being

produced annually. The Gezira Irrigation Scheme (by means of the Sennar Dam on the Blue Nile at Makwar, about 170 miles south of Khartoum) will enable 100,000 acres to be put under cotton every year. High grade long staple American cotton is also produced under irrigation in Berber and Dongola, and as a rain crop in other provinces. The total cotton area in 1924 was approximately 111,700 acres, and the 1924-25 crop is estimated at 185,000 kantars. The opening up of the Eastern Sudan by the new Kassala Railway is an event of much importance to the cotton cultivation of the Sudan. Other products include sesame, senna leaves and pods, ground-nuts, dates, hides and skins, salt, and gold. The principal grain crops are dura (great millet), the staple food of the people in the Sudan and used as cattle and poultry food outside the Sudan, and dukhn (bulrush millet). Large quantities of ivory are exported, and the cattle and sheep trade of the Sudan is capable of great development. For some years Egypt has depended to a great extent on the Sudan for its meat supply. The forests which line the Blue Nile River banks, rich in fibres and tanning material, extend to the frontier of Abyssinia. On the White Nile the forests contain valuable trees—the ebony tree, the gum acacia, the bamboo, the rubber creeper, and the sudds in the upper reaches are composed of an inexhaustible quantity of papyrus. The finest gum forests are in Kordofan, and the best rubber in the Bahr-el-Ghazal. Gold is being successfully exploited in the Sudan, a mine being worked at Gabait in the Red Sea Province. Natural salt fields on the Red Sea coast near Port Sudan supply the whole needs of the country, and considerable quantities are exported annually to Abyssinia. The output of these salt fields is capable of great expansion.

Transport.—In 1924 there were 1,706 miles of railways open for traffic. Since the opening of the eastern railway the Red Sea ports of Port Sudan and Suakin receive much of the trade which formerly passed northwards. The new line to Kassala, 217 miles in length, connects with the Red Sea line at Haia Junction, 126 miles W. of Port Sudan. South of Khartoum communication is established by steamers and boats on the Blue and White Niles, Sobat and Bahr-el-Ghazal, and inland chiefly by camels and donkeys. All the principal towns are in direct telegraphic communication with Khartoum, the total mileage of telegraph lines being 4,353 miles in 1920. There are 65 stationary and 11 travelling Post and Telegraph offices, and 11 wireless telegraphy offices.

Finance.—The revenue is derived mainly from land tax, animal tax, royalties on gum and ivory, customs and railways, posts, telegraphs and steamboat services.

CAPITAL, KHARTOUM, at the junction of the White and Blue Niles. The town has been rebuilt and now contains a large mosque for Muhammadans, a cathedral, and the Gordon College, with extensive Government buildings. Population 35,513. Opposite Khartoum, on the Blue Nile, is Khartoum North (19,124), and on the White Nile is Omdurman (81,776), the former Mahdist capital.

TANGANYIKA TERRITORY.

TANGANYIKA TERRITORY, formerly "German East Africa," was attacked by British and South African forces and conquered in 1918, the German forces surrendering near Abercorn in North-east Rhodesia on Nov. 23, 1918. Civil Administration was established *pari passu* with the conquest of the territory, and the whole

Colony passed under the effective control of the present Administration at the beginning of 1919.

Tanganyika Territory has a coast-line of about 500 miles and an estimated area of 365,000 square miles. The Sultan of Zanzibar's rights over the narrow strip of coast territory were acquired by Germany in 1890 for a payment of 4,000,000 marks. The coast-line extends from the mouth of the Umba to the mouth of the Rovuma River.

The native population consists mostly of tribes of mixed Bantu race, and was enumerated for the whole area (Jan. 1, 1913) at 7,659,898, the coloured population (other than native) being 14,898. The thickly populated provinces of *Ruanda* and *Urundi* are now under Belgian administration, so that the native population of Tanganyika Territory is about 4,107,000. The total white population is 2,447. According to German law every native born after 1905 is free, but a mild serfdom was continued under German rule. Legislation for the abolition of the status of slavery was enacted on June 9, 1922.

Education is not compulsory, but considerable progress has been made with the reorganization of a system suitable to the needs of the natives. In 1923 there were 65 Government schools, 1,455 Roman Catholic schools, and 737 Protestant schools, with a total roll exceeding 119,500 pupils. There are also three schools for the children of Dutch settlers in the Arusha district, but no other schools for European children have yet been established.

The total area under forests is about 2,700,000 acres, of which about 2,170,000 are included in the Government Forest Reserves. There are a number of plantations of coco-palms, coffee (on the higher lands), ground nuts, caoutchouc, sugar, cotton, cardamom and cinchona, while fibre plants (especially sisal) are successfully cultivated. In 1921 there were 3,147,442 cattle, and 3,405,103 sheep and goats in the Territory. Minerals known to exist within the Protectorate are coal, iron, lead, copper, mica, and salt. Agates, topaz, moon-stones, tourmalin, and quartz crystals are found, and garnets in large quantities.

The chief exports in 1924 were: Sisal, cotton, hides, skins, copra, coffee, ground nuts, ghee and grain; the chief imports in 1924 were cotton piece goods, foodstuffs, kerosene, cigarettes, tobacco, spirits, wines and beer.

	1922-23.	1924-25.
Estimated Revenue	£1,209,474	£1,324,670
Estimated Expenditure...	2,009,474	1,952,280
	1922.	1923.
Imports	£1,386,212	£1,733,229
Exports	1,441,584	1,799,038

The chief seaports are Dar-es-Salaam, Tanga, Bagamoyo, Pangani, Kilwa, Lindi and Mikindani, but few of these are accessible to ocean-going vessels, though gradual improvements are being introduced. There are three railway lines in the Territory—the Tanga railway from Tanga to Moshi (219 miles), commenced in 1905 and completed in Feb., 1912, the Central railway (772 miles), from Dar-es-Salaam to Kigoma, completed in Feb., 1914, and the Voi-Kake Railway from Moshi to Voi (92 miles) on the Uganda Railway. Dar-es-Salaam is in telegraphic communication with the coast towns, Zanzibar, Mombasa, and many inland centres. There are 75 post offices and telegraph stations. Two Battalions of the King's African Rifles are stationed in Tanganyika Territory.

In 1923, 417 steamers (exclusive of coastal boats) of 957,934 tons and 2,638 vessels (dhows) of 142,674 tons entered the various coast ports from places beyond the Territory.

TOGOLAND.

(Joint Franco-British Administration.)

The former German colony of *Togoland* was conquered by Franco-British forces during the war of 1914-18, and its administration has been entrusted to France and Great Britain jointly by the Supreme Council of the Allied Powers.

Togoland is situated on the Gulf of Guinea between the Gold Coast (British) and Dahomey (French), and is bounded on the south by the Atlantic and on the north by (French) Upper Senegal-Niger, and lies between 0° 15' W.-2° E. long. and 6° 11' N. lat. at its extreme limits, the coast line being only 28 miles in extent (1° 14'-1° 38' E. long.).

In 1920 the whole territory was divided into a *British Sphere* and a *French Sphere*.

The total area is about 43,040 square miles, with an estimated population of 920,000. The British Sphere consists of an area of about 13,040 sq. miles with an estimated population of 187,940. No portion of the coast is included in the British area. The mandated sphere is administered by the Government of the Gold Coast, and the revenue and expenditure are included in the totals for the Gold Coast. A trade school has been established by the administration at Yendi.

TRINIDAD and TOBAGO.

TRINIDAD is the most southerly of the West India Islands. It is close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. It lies between 10° 3'-10° 50' N. lat. and 60° 55'-61° 56' W. long.,

and is about 69 miles in length by 54 in breadth, with an area of 1,862 square miles (541,682 acres cultivated), and a population at the Census of 1921 of 365,923 (including Tobago). The island was discovered by Columbus in 1498, was colonised in 1588 by the Spaniards, and capitulated to the British under Abercromby in 1797. The chief town and port of entry, Port of Spain (pop. 63,954), is one of the finest towns in the West Indies, with sewerage, electric lighting, tram and telephone services. Other towns of importance are San Fernando (pop. 11,018), about 30 miles south of the capital; Princetown (pop. 5,181), and Arima (pop. 4,390). A remarkable phenomenon is the asphalt lake near the village of La Brea, 110 acres in extent, containing an apparently inexhaustible supply; in 1924, 166,758 tons (£385,949) were exported. The soil is rich and productive, the most important products being sugar, cocoa, mineral oil, molasses, rum, copra, limes, and coco-nuts, and various kinds of timber and fruits. The chief exports (1924) were cocoa £1,249,396; sugar £1,233,944; and petroleum £1,370,096. Coal is found in Mauzanilla, and is indicated in other parts. There are 123 miles of railway open, and the island is in communication with Tobago, and the mainland by telegraph and wireless. The Government is vested in a Governor, an Executive Council, and a Legislative Council, all of whom are nominated by the Crown.

	1923.	1924.
Revenue	£1,633,552	£1,586,834
Expenditure	1,625,441	1,572,765
Public debt	3,425,638	3,406,753
Imports	4,319,421	4,287,943
Exports	4,785,594	4,893,863

Tobago was annexed in 1889 to the Government of Trinidad, and on Jan. 1, 1899, it was constituted a ward of that island. It is between 11° 9' N. lat. and 60° 43' W. long., about 75 miles south-east of Grenada, 18 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados; is 26 miles long, and from 6 to 7½ broad, and has an area of 114 square miles, with a population (Census 1921) of 23,390. It is one of the most healthy of the West Indies; the temperature varies from 81° to 88°. There are two towns in the island, viz., Scarborough (pop. 1,463) and Plymouth (pop. 430).

TRISTAN DA CUNHA

is the chief of a group of islands of volcanic origin lying in lat. 37° 6' S. and long. 12° 2' W., discovered in 1505 by a Portuguese admiral (Trisão da Cunha), after whom they are named. The population numbers 127, and the inhabitants are said to be very long-lived. The principal settlement (Edinburgh) is in the north-west of the island. In spite of periods of distress the inhabitants refuse to leave the island for the Cape of Good Hope, to which they are attracted by offers of land.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and ¾ m. wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Numbers of seals and sea-elephants visit these islands.

GOUGH ISLAND (or Diego Alvarez), in 40° 20' S. and 6° 44' W., lies about 250 miles S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and has valuable guano deposits. There is no permanent population.

TURKS AND CAICOS ISLANDS.

These West India islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from the north-east of which they are distant about 450 miles. They have an area of about 170 square miles, and a population (1921) of 5,612, of which the principal island, Grand Turk, contains 1,568.

A Commissioner administers the government of the Dependency, assisted by a Legislative Board. This Board has control of local finance, and passes local ordinances, subject to the assent of the Governor of Jamaica, who is also the medium of communication between the Commissioner and the Colonial Office. The Legislature of Jamaica has the power to pass laws applying to the Turks

and Caicos Islands, and the jurisdiction of the Supreme Court of Jamaica extends to the Islands in matters of divorce and matrimonial causes, and is also a Court of Appeal.

	1923.	1924.
Revenue	£11,751	£9,693

Commissioner and Judge, H. E. Phillips		£700

Grand Turk, *vis* U.S., 13 days.

UGANDA.

(The Uganda Protectorate.)

The territories now comprised within this Protectorate came under British influence in 1890, and a portion of them was for a time administered by the Imperial British East Africa Company. In 1894 a British Protectorate was declared over the kingdom of Uganda and some of the adjoining territories. The present limits are approximately as follows:—On the north, the Uganda-Sudan boundary; on the east, a line drawn down the middle of Lake Rudolf, and along the west boundary of the Colony of Kenya and the eastern shores of Lake Victoria; on the south, by Tanganyika Territory (late German East Africa); and on the west, by the eastern boundary of the Belgian Congo. Within these boundaries lie part of the Victoria Nyanza, part of Lake Edward, the whole of Lake George, half of Lake Albert, the whole of Lake Kioga, the whole of Lake Salisbury, part of Lake Rudolf, and the course of the Nile from its exit from Lake Victoria to Nimule, where the Egyptian Sudan commences. Total area, 110,300 square miles, including 16,377 square miles of water.

For administrative purposes, the Protectorate is divided into 5 Provinces:—

(1) *Eastern Province*, comprising the districts of Busoga, Bugwere, Bugishu, Budama, Teso, Lango, and Karamoja.

(2) *Rudolf Province*, comprising the districts of Turkwel, Turkana, and Dabossa (this province, at present, only partially administered, and arrangements for its transfer to the administration of Kenya Colony are in progress).

(3) *Northern Province*, comprising the districts of Bunyoro, Gulu, Chua, and West Nile.

(4) *Western Province*, comprising the districts of Toro, Ankole, and Kigezi.

(5) *Buganda Province* (with islands in Lake Victoria) comprising the districts of Mengo, Masaka, Mubende, and Entebbe. Owing to sleeping sickness, the islands of Lake Victoria were entirely depopulated, and the inhabitants (about 20,000) settled on the mainland in fly-free districts; but the work of repopulating these islands has now been completed, and natives and their cattle have been repatriated.

With the exception of the Rudolf Province the whole Protectorate is now under direct administration; but the native kings or chiefs, whose rights are in some cases regulated by treaties, are encouraged to conduct the government of their own subjects. The province of Buganda is recognised as a native kingdom under a *Kabaka* (H.H. Daudi Chwa, grandson of the celebrated Mutesa). He is assisted in the government by three native ministers and a *Lukiko*, or native assembly. In Buganda (and in Bunyoro, Ankole and Toro, also ruled over by native "Kings"), purely native matters are dealt with by the various *Lukikos*, but in serious cases there is an

appeal to higher courts. For Europeans and non-natives justice is administered by His Majesty's Courts. The principal British representative is the Governor who (with the assistance of the Executive and Legislative Councils), makes Ordinances for the administration of justice, the raising of revenue, and other purposes. There are local and special courts of justice, and a High Court with civil and criminal jurisdiction. The Appeal Court consists of the judges of the High Courts of Kenya, Uganda, Nyasaland and Zanzibar. There is an armed constabulary force, under a British Commissioner of Police and British officers. There is also a volunteer reserve of Europeans.

In 1920 Executive and Legislative Councils were constituted, and these came into being in Jan. 1921. The former consists of 4 appointed members and the latter includes the former, with 2 unofficial members, and is presided over by the Governor.

The total population of Uganda (December, 1924) is given as 3,145,449, composed as follows: Natives, 3,136,769; Asiatics, 7,229; Europeans, 1,451 (including 500 females). Among the natives approximately 640,000 belong to the intelligent, civilised Baganda, a race converted to Christianity by British and French missionaries. Until recently educational work has been in the hands of the various Missionary Societies, who receive grants amounting (1924) to £12,846 towards scholarships, &c., for students and teachers; their efforts are now being supplemented by a Government scheme. About 1,700,000 natives speak Bantu languages; there are a few Congo pygmies living near the Semliki river; the rest of the natives belong to the Masai, Nilotic, and Sudanese groups.

In 1924 total exports, £3,897,395; the import figures are now merged in those of Kenya (*q.v.*). The export trade is mainly in cotton (£3,486,565), coffee, chillies, oil-seeds, rubber, ivory, and hides and skins. The trade is chiefly with Great Britain, the United States, and India.

	1923.	1924.
Revenue	£999,750	£1,239,790
Expenditure (excl. loans)	938,999	918,662
Poll-tax (1924), £406,000; Customs (1924), £427,000.		

The headquarters of the British administration is at ENTebbe; the native capital of Buganda is at MENGO (Kampala). Nile steamers ply to Rejaf, which is about eight days' march from Nimule, the Sudan port of the Lake Albert Marine Service. A regular steamer service is maintained by the *Uganda Railway Administration* between Kisumu, the railway terminus, and Entebbe, Port Bell, and Jinja, the principal Uganda ports on Lake Victoria. The *Busoga Railway Marine*, which, with the Busoga Railway, is controlled by the Uganda Railway, deals with the traffic on Lake Kioga. There are two steamers and a large number of lighters on that waterway. An additional steamer and subsidiary craft ply on Lake Albert and the Nile between Butiaba, Nimule and Belgian port of Kasenye at the south of Lake Albert. The *Busoga Railway*, of the same gauge as the Uganda Railway, 62 miles in length, runs from Jinja (on Lake Victoria) to Namasagali, a point on the Nile below the rapids, and deals with the cotton output in the regions round Lake Kioga, connecting that lake with Lake Victoria. A railway is under construction from

Mbulamuti (on the Jinja-Namasagali Railway) to join up with the Uganda Railway *via* Toroor, Turbo and Eldoret. There is a railway from Port Bell to Kampala, $7\frac{1}{2}$ miles in length. There is a fleet of Government motor vans.

Governor and Commander-in-Chief, His Excellency William Frederick Gowers, C.M.G. (1925) (and £1,000 duty) £3,000
Private Sec., Maj. F. W. Cavendish-Bentinck.

Conservator of Forests, R. Fyfe 800

Labour Commr., A. E. Weatherhead £800 to 1,000

Auditor, W. H. Smith 900

CAPITAL (Administrative Hdqrs.), Entebbe.

WEIHAIWEI.

The territory of Weihaiwei was leased to Great Britain by China by a convention made on July 1, 1898, and lies in latitude $37^{\circ}30'$ N., longitude $122^{\circ}10'$ E. It is situated in the Chinese province of Shantung, and comprises the island of Liu Kung, all the islands in the Bay of Weihaiwei, and a belt of land 10 English miles wide along the entire coast-line, with a total area of about 285 square miles, and a population in 1921 of 154,416, in which are included about 300 resident on the island of Liu Kung. In addition to the leased territory there is a zone which comprises that portion of the province of Shantung lying east of the meridian $121^{\circ}40'$ —an area of 1,500 square miles—within which Great Britain has the right to erect fortifications, station troops, or take any other measures necessary for defensive purposes. The winter is cold, but dry and bracing. The summer heat is not excessive, and the rainfall is, as a rule, small.

The government is administered by a Commissioner. Weihaiwei is a port of call for steamers running to and from the North of China, and there is regular steam communication with the ports of Shanghai, Hong Kong, Chefoo, and Tientsin.

Administrator, W. Russell Brown.
Judge of the High Court, Hiram Parkes Wilkinson.
Crown Advocate, Allan G. Mossop.
Senior District Officer and Magistrate, S. Wyatt-Smith.

* Members of Executive Council.

Junior District Officer and Magistrate, A. A. L. Tuson.

Senior Medical Officer, Dr. Francis Clark.

Financial Secretary, W. R. Hailer.

Inspectors of Police, A. Whittaker, F. Forcey, G. H. Jennings.

WINDWARD ISLANDS.

The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent. The total area is 508 square miles, with a population (1921) of 162,254. There is one Governor for the three islands; but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. Each island retains its own institutions, and in the Governor's absence is governed by an Administrator subordinate to him.

Governor and Commander-in-Chief, Sir

Frederick Seton James, K.B.E., C.M.G.

(1924) £2,500

Transit to Grenada from London about 14 days.

GRENADA AND THE GRENADINES.

Grenada is situated between the parallels of $12^{\circ}30'$ – $11^{\circ}58'$ N. lat. and $61^{\circ}20'$ – $61^{\circ}35'$ W. long., and is about 21 miles in length and 12 miles in breadth; it is about 66 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 85,120 acres; population (including some of the Grenadines), 66,302 (Census of 1921). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonised by the French, and was definitely ceded to Great Britain by the Treaty of Versailles in 1763.

The soil is very fertile, and cocoa, spices, rubber, cotton, coffee, and fruit are grown. The forests are rich in timbers. The imports chiefly comprise dry goods, bread-stuffs, hardware, &c. The Legislative Council consists of 16 members, 8 of whom are officials (3 nominated and 5 elected).

St. George's, on the south-west coast, is the chief town, and possesses a good harbour.

	1923.	1924.
Public revenue	£103,823	£117,453
Expenditure	113,095	106,003
Public debt	223,670	223,670
Total imports	284,706	272,291
Total exports	257,728	350,806

Colonial Secretary and Treasurer, Herbert

Ferguson, C.B.E. £960

Chief Justice, Sir George O'D. Walton 1,100

Attorney-General, N. J. Paterson, K.C. 800

Chief Medical and Health Officer, R. W.

Sutherland £600 to 700

Magistrates, T. M. Comissiong, W. Dist.;

T. W. S. Garraway, E. Dist., each £500;

H. Allau Otway, District Commr. of

Carriacou (and quarters) £350 to 420

Chief of Police, Maj. O. C. Heidenstam

(and quarters) £450 to 500

The GRENADINES are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop (1921) 7,104.

ST. LUCIA,

the largest and most picturesque of the Windward group, situated in $13^{\circ} 50'$ N. lat. and $60^{\circ} 58'$ W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 21 miles S.E. of Martinique, is 24 miles in length, with an extreme breadth of 12 miles. It comprises an area of 233 square miles, with a population (Dec. 31, 1924) of 54,304. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports (1924) are sugar, cocoa, coco-nuts, copra, limes, lime-juice, lime-oil, logwood, molasses and syrup. The chief places are Castries, the capital (pop. 1921, 5,899), and Soufrière (pop. 2,480).

Port Castries, one of the finest in the W.I., is a coaling depot. In 1924, 220 steamers (tonnage 473,828) entered Port Castries.

Treasurer, G. D. Mackie, M.B.E. £350 to 440

Chief Medical Officer, Maj. H. E. Sutherland Richards, M.C. £600 to 700

Registrar, J. E. M. Salmon 550

ST. VINCENT,

an island about 95 miles west of Barbados, situate in $13^{\circ} 10'$ N. lat. and $60^{\circ} 57'$ W. long., is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (Census of 1921) of 44,447. In 1846 a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are arrowroot, cotton, sugar, molasses, rum, cassava, cocoa, coffee, and spices. Its chief imports are linen, cotton and woollen manufactures, Canadian flour, fish, lumber, &c. Steps have been taken to settle the labouring classes on lands acquired for the purpose.

CAPITAL, Kingstown. Population (1921), 3,836.

Stanley Rae £600 to £700

Attorney-General, N. H. Turton 500

ZANZIBAR.

(The Zanzibar Protectorate.)

Sultan, H. H. Seyyid Khalifa bin Harub, K.C.M.G., K.B.E., succeeded his brother-in-law, Dec. 9, 1911. The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of

Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tunghi Bay and north as War-sheikh; but since the cession of the coast-line from Ruwuma to Wanga, including the island of Mafia, to Germany in 1890, and of the Benadir coast to Italy in 1904, they are now confined to the islands of Zanzibar and Pemba, a ten-mile coast-line from Wanga to Kipini, the islands of Lamu, Manda, Patta, and Siwa. The Zanzibar dominions on the mainland are under the administration of H.M. Government through the Governor and Commander-in-Chief in the Kenya Colony and Protectorate (q.v.). Zanzibar has been a British Protectorate since November, 1890. On July 1, 1913, the Protectorate was transferred from the Foreign to the Colonial Office.

By a decree of Sultan Hamoud (1897) the legal status of slavery ceased to be recognised in the islands of Zanzibar and Pemba.

As the centre of the Arab power, Zanzibar, from the beginning of the 19th century until quite recently, dominated the trade of East Africa. The islands possess practically a monopoly in cloves (the export of which was valued at £842,400 in 1924) and produce quantities of copra (exports in 1924, £353,190). In addition, Zanzibar serves as a storehouse for the East African coast, where both imports and exports are received and distributed.

Of late years the importance of Zanzibar as a port of transhipment and distributing centre has largely decreased, owing to the development of the mainland, to the opening up of the coast ports to direct steamship service with Europe, and to the transfer to Aden of the seat of trade with the Benadir coast. Recent figures, however, tend to indicate that the island, in spite of losing the main transhipment trade, will continue, from the very fact of its geographical position, to retain control of the local traffic—of that portion of the trade which goes to small towns up and down the adjacent mainland coast.

The principal imports are rice, grains, groceries, sugar, tobacco, copra, hardware, petroleum and piece-goods; the exports are cloves and copra, in addition to re-exports of previously imported rice, grain, copra and piece-goods.

The city of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities for shipping and trade generally. The population of Zanzibar and Pemba (Census of 1921) was 216,790, the area of the former 640 square miles, and of the latter 380 square miles.

Tonnage of ocean-going steamers (which entered the port in 1924, 930,628; and 5,042 dhows (95,863 tons).

BIRTHS AND DEATHS.

The annual compilation of mortality statistics for that part of the United States known as the "Registration Area" began with the calendar year 1900. This area at that time included 40.5 per cent. of the total population, and in 1923 87.6 per cent. The birth registration area was established in 1915; it included at that time 31.1 per cent. of the total population, and in 1923, 72.2 per cent. The following table shows the number of births and deaths in the respective Registration Areas, with rates per 1,000 of the estimated population, for the calendar years 1915 to 1923:—

CALENDAR YEAR.	BIRTHS.*		DEATHS.*	
	Number.	Rate per 1,000.	Number.	Rate per 1,000.
1915	776,304	25.1	909,155	13.6

* Exclusive of still-births.

IMMIGRATION.

From 1820 to 1920, 33,630,104 alien immigrants landed in the United States, the arrivals in 1913 being 1,197,892, and those from 1918 onward being (1918) 110,618, (1919) 141,132, (1920) 430,001, (1921) 805,228, (1922) 309,556, (1923) 522,919, (1924) 706,896.

MARRIAGE AND DIVORCE.

The Law of Divorce differs in many of the States, while South Carolina has no Divorce Law. In addition to adultery and cruelty of the husband or adultery of the wife, abandonment (desertion), habitual drunkenness, and imprisonment for felony are qualifying offences.

PHYSIOGRAPHY.

The Republic occupies the southern portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude 25° – 49° North and longitude 67° – 124° $30'$ West, its northern boundary being Canada and the southern boundary Mexico.

Its coast-line on both oceans has an estimated length of about 15,610 miles, besides 3,620 miles on the great lakes and 5,744 on the Gulf of Mexico. The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 4,500 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Nebraska, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Mobile and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a large river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the territory from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in great part of stony and sandy desert, and in which occurs the Great Salt Lake, extending to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the territory) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the wooded region which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilisation. The Mississippi valley is eminently fertile. The mineral kingdom produces in great abundance iron, copper, lead, zinc, and aluminium; the non-metallic minerals including immense quantities of coal, anthracite, petroleum, stone, cement, phosphite rock, and salt. Precious metals include gold and silver, raised mainly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah, and Idaho (silver); while precious stones are worked in great variety, including the turquoise, sapphire, tourmaline, and garnet.

GOVERNMENT.

The United States of America is a Federal Republic consisting of 48 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organisation as Territories, and 28 were admitted after such organisation), and of 2 organised Territories.

THE CONSTITUTION. By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to nineteenth Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 29, 1919, and Aug. 26, 1920), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE.

THE *Executive* power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on the second Monday of the January following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the second Wednesday of February by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex officio* President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession of the Secretary of State, Secretary of the Treasury, Secretary of War, Attorney-General, Postmaster-General, Secretary of Navy, and Secretary of the Interior, so that the State can never be without a Head or Ruler.

The President must be 35 years of age and a native citizen of the United States. He receives a salary of \$75,000, with a travelling allowance of \$25,000. Executive duties:—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and, with the approval of the Senate, negotiates Treaties with Foreign Powers. The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT.

President of the United States, Calvin Coolidge, of Massachusetts, born at Plymouth, Vermont, July 4, 1872; graduated from Amherst College in 1895; practised law at Northampton, Mass.; councilman; city solicitor; clerk of courts; chairman Republican City Committee; member General Court of Massachusetts; Mayor of Northampton; member Massachusetts Senate; Lieutenant-Governor of Massachusetts 1916-18; Governor of Massachusetts 1919-20; elected Vice-President Nov. 2, 1920; became President (on the death of Warren G. Harding) Aug. 3, 1923; re-elected for further term, Nov. 4, 1924. *Republican*.

1. *Vice-President*, Charles Gates Dawes, of Ohio (born Aug. 27, 1865), elected *Vice-President* Nov. 4, 1924. *Republican*.

THE CABINET.

(In order of succession to the Presidency, after the Vice-President.)

2. *Secretary of State*, Frank B. Kellogg, of Minnesota (born 1856), appointed Feb. 16, 1925.
3. *Secretary of the Treasury*, Andrew W. Mellon, of Pennsylvania (born 1855), appointed March 4, 1921.
4. *Secretary of War*, Dwight Filley Davis, of Minnesota (born 1879), appointed Oct. 13, 1925.
5. *Attorney-General*, John G. Sargent, of Vermont (born 1860), appointed March 17, 1925.
6. *Postmaster-General*, Harry S. New, of Indiana (born 1858), appointed Feb. 27, 1923.
7. *Secretary of the Navy*, Curtis D. Wilbur, of Iowa (born 1867), appointed April 7, 1924.
8. *Secretary of the Interior*, Hubert Work, of Colorado (born 1860), appointed Feb. 27, 1923.

Secretary of Agriculture, William M. Jardine, of Kansas (born 1879), appointed Feb. 18, 1925.
Secretary of Commerce, Herbert Clark Hoover, of California (born 1874), appointed March 5, 1921.

Secretary of Labour, James J. Davis, of Pennsylvania (born 1873), appointed March 5, 1921.

THE LEGISLATURE.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 211,877. The Senate consists of 96 members. The salary of a Senator is \$10,500 per annum, with mileage at 20 cents per mile, coming and returning, for each regular session. The House of Representatives consists of 435 representatives and territorial delegates. The salary of a Representative is \$10,000 per annum, with mileage as for Senators.

THE SIXTY-EIGHTH CONGRESS.

President, Charles Gates Dawes, *Illinois* \$15,000
 Speaker of the House of Representatives,
 (to be elected Dec., 1925) \$15,000

LIBRARY OF CONGRESS.

(National Library),

Capitol Hill, Washington, D.C.

The Library of Congress was established in 1800 and destroyed by fire in 1814. In 1815, purchase of Jefferson collection formed basis for a new collection. Partially destroyed by fire, 1851, and replenished in 1851-2. Since that date increased (1) by regular annual appropriations by Congress (now \$100,000); (2) by deposits under the copyright law; (3) by gifts and exchanges; (4) by the exchanges of the Smithsonian Institution, the library of which (40,000 volumes) was, in 1866, deposited in the Library of Congress, with the stipulation that future accessions should follow it. The collection is now the largest in the Western Hemisphere and third in the world; it comprises 3,179,104 volumes (gain in 1923-24, 89,763). The floor space of the building (erected at the cost of \$6,347,000, and first occupied in 1897) is 430,255 square feet, or nearly 10 acres. The book stacks, including the new stack built over the southeast interior court, contain about 103 miles of shelving, affording space for 3,540,000 octavo volumes and 84,000 volumes of newspapers. The library is maintained by Congress, the appropriation in 1924 being \$961,810.

Librarian of Congress, Herbert Putnam,
 LL.D. \$7,500
 Chief Assistant Librarian, Appleton P. C.
 Griffin 6,000
 Executive Assistant, Allen R. Boyd 3,800
 Secretary, Jessica L. Farnum 3,000

THE SMITHSONIAN INSTITUTION.

The Mall, Washington, D.C.

Secretary, Charles D. Walcott.
 Asst. do., C. G. Abbott; A. Wetmore.
 Chief Clerk, H. W. Dorsey.
 Accountant, Nicholas W. Dorsey.
 Editor, Webster P. True.

Board of Regents.

Chancellor, The Chief Justice of the U.S.
 Chairman, Executive Committee, George Gray.

NATIONAL COMMISSION OF FINE ARTS.

Interior Dept. Building, Washington, D.C.

The Commission of Fine Arts was created by Congress 17 May, 1910, to advise generally upon the location, selection, and erection of statues, fountains, and monuments in the District of Columbia, and also to advise generally upon questions of art when required to do so by the President or by any committee of either House of Congress. Under this latter provision its functions have been enlarged by Executive Order to cover all works of Art with which the Federal Government is concerned, including designs of public buildings, public parks, within the D.C. An expenditure not exceeding \$10,000 in any one year is authorised by Congress for travelling and other expenses. The members serve without remuneration.

Chairman, Charles Moore, *Detroit, Mich.*Vice-Chairman, James L. Greenleaf, *N.Y.*

Members, Louis Ayres, *N.Y.*; H. Siddons
 Mowbray, *Conn.*; Milton B. Medary, jr., *Pa.*;
 Wm. Adams Delano, *N.Y.*; Lorado Taft,
Illinois.

Secretary and Executive Officer, H. P. Caemmerer.

THE JUDICATURE.

The Federal Judiciary consists of three sets of Federal Courts: (1) The Supreme Court at Washington, D.C., consisting of a Chief Justice and eight Puisne Judges, with original jurisdiction in cases affecting Ambassadors, &c., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts. (2) The Circuit Courts of Appeal, dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit. (3) The District Courts, eighty-seven in number, each served by a District Court Judge.

THE SUPREME COURT

(The Capitol, Washington, D.C.).

Chief Justice, William Howard Taft,
Conn., born 1857, apptd. 1921 \$15,000

Associate Justices (each \$14,500).

DEFENCE.

The President is Commander-in-Chief of both Navy and Army, the former being controlled by a Secretary of the Navy, and the latter by a Secretary of War.

THE ARMY OF THE U.S.

Under the provisions of the Act of Congress, approved June 4, 1920, the enlisted strength of the Regular Army, including the Philippine Scouts, must not exceed 280,000, except in time of war or similar emergency, when the public safety demands it; the commissioned strength being placed at 17,726; however, recent legislation (Act of Congress of June 30, 1922) has limited the authorised enlisted strength, exclusive of the Philippine Scouts, to 125,000, and requires that the number of commissioned officers on the active list of the Regular Army and the emergency officers of the late war who are still in service undergoing treatment for physical reconstruction shall be restricted after Jan. 1, 1923, to 12,000. The present authorized strength of the Philippine Scouts is 7,953. The actual strength of the Army of the United States on June 30, 1925, included 12,462 commissioned officers, 1,030 warrant officers, and approximately 121,762 enlisted men, including the Philippine Scouts. The Army is made up entirely of volunteers.

PRINCIPAL WARS OF THE U.S.

Name of War.	Troops Engaged.
War of Independence, 1775-1784	300,000
North Western Indian, 1790-1795	8,983
War with France, 1798-1800	4,593
War with Tripoli, 1801-1805	3,330
War with Britain, 1812-1815	528,274
Creek Indian, 1813-1814	13,781

U.S. WAR PENSIONS.

(Exclusive of World War Pensions.)

Year.	Number of Pensioners on Roll.			Total Payments.
	Invalids.	Widows, &c.	Total.	
				\$
1900	752,510	241,019	993,529	138,462,130
1919	313,140	311,287	624,427	222,159,292
1920	285,110	307,080	592,190	213,295,314
1921	267,629	298,424	566,053	258,775,843
1922	256,918	290,098	547,016	253,807,583
1923	253,686	286,070	539,756	263,012,500
1924	248,049	277,490	525,539	229,994,777

The total disbursement in pensions since the War of Independence is \$6,836,351,399, of which \$5,427,106,586 has been paid on account of the Civil War. The cost of maintenance and expenses of administration in the fiscal year 1924, includ-

ing the cost of medical examinations and special field examinations, amounted to \$2,065,944.

World War Pensions.

Disbursements in claims arising out of service in the World War between April 6, 1917, and July 2, 1921, are not included in the above totals, as such claims are adjudicated in the U.S. Veterans' Bureau, which has jurisdiction over such matters. (See "Ordinary Expenditures" under "Finance," *post*.)

THE NAVY OF THE U.S.

No new construction has been authorised for the U.S. Navy since 1918. The three-year building programme initiated in the Act of August 29, 1916, provided for the following construction:—

	1916.	1917.	1918.	Totals.
Battleships	4	3	3	10
Battle Cruisers	4	1	1	6
Scout Cruisers	4	3	3	10
Destroyers	20	25	15	50
Fleet Submarines	—	—	9	9
Coast Submarines	30	18	10	58
Fuel ships	1	—	2	3
Repair ship	—	—	1	1
Transport	—	—	1	1
Hospital ship	1	—	—	1
Destroyer Tenders	—	1	1	2
Submarine Tender	—	1	—	1
Ammunition ships	1	—	1	2
Gunboats	1	—	1	2

Of the "all big gun" battleships the *Colorado* was completed during 1923. These ships carry eight 16-in. guns (with secondary batteries of 12 5-in. and eight 3-in. anti-aircraft guns), and are 624 ft. long, 97 ft. wide, and displace 32,600 tons; they are driven by four electric-drive turbines of 28,000 h.p. This leaves the *West Virginia* as the only remaining battleship under construction, as the other seven battleships will be disposed of in accordance with the terms of the *Washington Treaty* limiting naval armaments.

Of the vessels which were authorised in the 3-year programme, the following remain not ordered:—22 destroyers, 6 fleet submarines, and 1 auxiliary. Under the terms of the Naval Act of July 1, 1922, no part of the funds available may now be used toward the construction of these vessels. On July 1, 1922, the following vessels were under construction:—9 battleships, 6 battle cruisers, 10 light cruisers, 3 fleet submarines, 34 submarines, 1 gunboat, and 4 auxiliaries. Under the terms of the *Washington Treaty* limiting naval armaments work has been suspended on 7 of the battleships and 4 of the battle cruisers; the remaining 2 battle cruisers are being converted into aircraft carriers. The following were completed during the fiscal year ended July 1, 1923:—3 light cruisers, 13 submarines. Since July 1, 1923, 1 battleship, 1 light cruiser and 4 submarines have been completed. The following vessels, therefore, now remain under construction:—1 battleship, 2 aircraft-carriers, 6 light cruisers, 3 fleet submarines, 17 submarines, 1 gunboat, and 4 auxiliaries.

Information as to characteristics, costs, &c., available for publication concerning naval vessels, may be found in the *Ships' Data Book*.

EDUCATION.

State School Systems, 1919-1920.

In 1919-20 the total number of children in the United States 5 to 18 years of age was 27,728,788, of whom 21,578,316 (10,774,511 boys and 10,803,805 girls) were enrolled in public elementary and secondary schools, and 2,034,642 were estimated to be enrolled in private elementary and secondary schools, and in private commercial and business schools. The average daily attendance in the public schools was 16,150,035, the average length of school term was 161.9 days, and the average number of days attended by each pupil enrolled was 121.2 days. In 1919-20, 679,533 teachers (95,666 men and 583,867 women) were employed. The average annual salary of all teachers was \$871. The total number of buildings used as school houses was 271,319, and the estimated value of all public school property was \$2,409,719,120.

The total money received for school purposes, excluding balances on hand, was \$1,125,506,640. Of this amount, \$26,036,098 was received from permanent school funds and from the rent of school lands, \$134,278,753 from State taxes or State appropriation, \$758,896,551 from local tax or appropriation, \$2,474,717 from the Federal Government, and \$333,820,521 from all other sources, State and local. The total payments, excluding payments of bonds, were \$1,036,151,209. This amount includes expenditures for general professional and business control aggregating \$36,752,316; salaries of teachers, supervisors and principals, \$590,119,516; text-books and other instruction supplies, \$42,435,820; instruction in evening schools, \$3,276,593; miscellaneous current expenses, \$210,024,112 (composed of operation of school plant, \$115,707,229; maintenance of school plant, \$30,432,039; auxiliary agencies, \$36,387,302; fixed charges, \$9,285,711; and interest on indebtedness, \$18,211,831); and outlays—sites, new buildings and equipment, \$153,542,852.

Compulsory Attendance Laws, 1922.

Every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 14 years of age, and those from 14 to 16 must attend school or secure employment certificates. The required attendance each year varies from eighty days in two States to the full term in thirty-six States. In all States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

Universities, Colleges and Professional Schools, 1919-20.

Of the 670 universities, colleges, and professional schools, 153 were for men, 117 for women, and 400 were co-educational. There were 109 public institutions and 561 under private control or management. The total number of instructors in both private and public institutions was 42,882 (34,111 men and 8,771 women). The public institutions enrolled 156,626 undergraduate and graduate students (102,711 men and 53,915 women). The private institutions enrolled 200,068 undergraduate and graduate students (119,531 men and 80,537 women). In general engineering, 10,231 students were enrolled; in chemical engineering, 5,743; in civil engineering, 8,859; in electrical engineering, 9,469; in me-

chanical engineering, 11,789; and in mining engineering, 3,048.

The total number of baccalaureate degrees conferred in 1919-20 was 38,552 (23,272 men and 15,280 women); altogether 4,853 graduate degrees were conferred (3,457 men and 1,396 women); 989 honorary degrees were conferred.

The schools of theology enrolled 7,216 students and reported 588 graduates; law schools, 20,992 students and 3,273 graduates; schools of medicine, 14,242 students and 2,806 graduates; schools of dentistry, 8,809 students and 865 graduates; schools of pharmacy, 5,026 students and 1,023 graduates; and schools of veterinary medicine, 908 students and 219 graduates.

Teachers' Colleges and Normal Schools, 1919-20.

In 1919-20, 371 teachers' colleges and normal schools reported to the United States Bureau of Education. These schools are chiefly concerned with the training of elementary teachers. Of this number 138 are State institutions; 45 are teachers' colleges (schools granting a degree after four years' work beyond high school); 33 are city normal schools; 95 are county normal schools; and 60 are private normal schools. The 45 teachers' colleges were separated from the State normal schools, which accounts for the number of State normal schools in 1920, smaller than in 1918 when they were included. The total number of instructors in all teachers' colleges and normal schools was 9,587. The total number of students enrolled was 162,796 (29,149 men and 133,647 women). Of this total enrolment, 135,418 students are in normal training courses. The number of graduates from the normal training courses was 2,151 men and 18,861 women, making a total of 21,012. Practice or model schools are usually operated in connexion with these normal schools, or the public schools are used for this purpose. The total enrolment in these model schools, so far as reported, was 92,446. The total receipts for normal schools were \$31,395,389. The total number of volumes in the libraries was 2,385,238.

Nurse Training Schools, 1919-20.

The number of nurse training schools has increased very rapidly since 1900. At that time 432 schools reported to the Bureau of Education. In 1920 the number of such schools reporting was 1,775. The number of pupils enrolled in these schools in 1920 was 54,953, and the number graduated 14,980. Of the schools reporting, 88 are in hospitals for the insane. The capacity of the hospitals in which all nurse training schools reporting are located, is 321,619 beds, and the average daily number of patients is 252,823. In 1920 a large majority of schools required a minimum age requirement for admission of only 18 or 19 years. In general hospitals 539 schools required 8 hours of duty daily, 474 schools required 9 hours of duty, and 439 schools required 10 hours of duty. In hospitals for the insane, the number of hours of duty required was usually 10 or more. Twenty-two schools required 12 hours of duty, and 9 required more than 12 hours.

The remuneration granted the pupils in general hospitals is usually less than \$200. In the first year 54 per cent. of the schools pay under \$100, and 41 per cent. pay from \$100 to \$199; in the second year 35 per cent. of the schools pay under \$100, and 56 per cent. pay from \$100 to \$199; in the third year of the course 29 per cent. pay under \$100, and 60 per cent. pay from

\$300 to \$399. In the schools in hospitals for the insane the remuneration usually exceeds \$400. In the first year of the course 76 per cent. of the schools pay \$400 or more; in the second year of the course 79 per cent. of the schools pay \$400 or over; in the third year of the course 81 per cent. of the schools pay \$400 or more.

More than 85 per cent. of all the nurse training schools in general hospitals offer a three-year course. About 10 per cent. offer a two-year or two-and-one-half year course. In hospitals for the insane, more than 70 per cent. of the schools offer a three-year course, and the remaining schools offer a two-year course. Almost 43 per cent. of the general nurse training schools require one year of high school work for admission, 21 per cent. require two years of high school work for admission, 26 per cent. require a full high school course, and 10 per cent. require only the completion of the elementary grades for admission.

Of the nurse training schools reporting, 180 are affiliated with colleges or universities. By this co-operation an excellent opportunity is afforded to the training schools to secure for their pupils a high type of instruction in technical and academic subjects.

Public High Schools, 1919-20.

In 1919-20, 14,326 public high schools reported to the Bureau. The total number of teachers in these secondary schools was 97,654 (34,396 men and 63,258 women). The total number of pupils enrolled in these schools was 1,999,106 (891,469 boys and 1,107,637 girls). The total number of coloured pupils included in the preceding figures is 30,223. In the first year of the course 742,320 pupils were enrolled, in the second year 498,796, in the third year 346,684, and in the fourth year 269,355 pupils, including post-graduate and special pupils. In the 7th and 8th elementary grades organised as a part of junior high schools, 141,951 pupils were enrolled. The number of graduates reported by 12,326 schools was 230,902 (90,516 boys and 140,386 girls).

There were 10,821 high schools that reported a four-year curriculum. In these four-year high schools there are 80,864 teachers, and 1,678,823 pupils are enrolled (745,477 boys and 933,346 girls). In addition, in 402 three-year senior high schools, there are 3,651 teachers and 63,630 pupils (27,802 boys and 35,828 girls).

Private High Schools and Academies, 1919-20.

The number of pupils in private high schools and academies, in general, has increased slowly but steadily. The increase has been about proportional to the increase in population. In 1900 the number of students enrolled in these schools was 110,797. In 1919-20 the number enrolled was 184,153. The number of schools reporting in 1900 was 1,978, and the number reporting in 1920 was 2,093. The total number of instructors in these private high schools in 1920 was 14,946 (5,698 men and 9,248 women). In this group of schools more than any other, there is a tendency for the schools to be either for boys or girls exclusively, rather than co-educational. Of the 2,093 schools reporting in 1920, 385 were for boys only, 728 were for girls only, and 980 were co-educational. Altogether, about one-tenth of the schools had military drill in 1920, enrolling 24,056 students. Of this number 3,823 were girls.

In 1916 the number of boys taking this work was 10,324. Within the past four years the enrolment in military drill in these schools has been doubled. The number of coloured students enrolled in these schools in 1920 was 9,526. The total number of graduates from private high schools and academies was 24,166. The average size of the faculty was 7.1. The average number of students to a school was 88.0. The average number of students to a teacher was 12.3.

The number of students enrolled in the first year of these private high schools was 36.1 per cent. of the total number; in the second year, 26.8 per cent.; in the third year, 20.5 per cent.; and in the fourth year, 16.6 per cent.

566 of these private schools were non-sectarian, and 1,527 were denominational (976 Roman Catholic).

Of the total number of students enrolled, 45.7 per cent. were boys and 54.3 per cent. were girls.

The number of Negro girls enrolled in these schools was about twice as large as the number of Negro boys; 6,341 coloured girls were enrolled, and 3,185 coloured boys.

Private Commercial Schools, 1919-1920.

In 1920 reports were received from 902 private commercial and business schools. These schools are of two types: (1) those which are non-denominational, and which are run on a commercial basis; (2) those which are maintained by certain denominations and by Young Men's Christian Associations. The private non-denominational schools reporting were 841, the denominational and Young Men's Christian Association schools reporting were 61. The total number of instructors in these 902 schools was 6,165 (2,976 men and 3,189 women). The number of students enrolled was 336,032 (139,551 men and 196,481 women). The average daily attendance in these schools was 164,662. Altogether 902 schools reported 214,606 students enrolled in day courses. In night courses 121,426 students were enrolled in the 675 schools which reported such courses. In the commercial or bookkeeping course 106,852 students were enrolled; stenographic, 126,055; combined courses, 53,430; telegraphic (wire), 2,804; (wireless), 2,384; accountancy, 11,889; secretarial, 23,073; and in the salesmanship course, 15,167.

In 755 schools in which shorthand was taught 130,927 students or 56 per cent. of the shorthand students reported studied the Gregg system of shorthand; 35 per cent. of the shorthand students, or 87,618 students, studied some Pitmanic system of shorthand.

Schools for Feeble-minded and Sub-Normal Children, 1917-18.

Nearly all States provide schools for feeble-minded children; 43 schools of this type reported in 1918; 32 private schools also submitted a report. Altogether 121 cities have organised classes for the teaching of sub-normal and backward children. The children in these schools are not usually feeble-minded, but are retarded in their school work. The number of instructors in State institutions was 425, in private institutions 221, and in public day school classes of city schools 1,134. The total number of inmates in State institutions was 35,968 (18,353 boys and 17,615 girls); in private institutions, 983 (467 boys and 516 girls); in public day school classes of city schools, 18,133 (11,937 boys and 6,196 girls).

In State institutions 11 per cent. of the pupils take music, 26 per cent. home economics, 19 per cent. manual training, 11 per cent. agriculture, and 13 per cent. trade training courses. In city day school classes, 90 per cent. of the pupils take music, 27 per cent. home economics, 86 per cent. manual training, 10 per cent. agriculture, and 12 per cent. trade training courses. In private schools 43 per cent. take music, 24 per cent. home economics, 34 per cent. manual training, 14 per cent. agricultural courses, and 4 per cent. trade training courses.

1908	16,908,434	22	59,922,457	78	1921	67,946,336	49	70,124,833	51
1909	17,263,189	22	59,991,430	78	1922	59,756,486	48	63,159,285	52
1910	17,697,062	22	62,244,602	78	1923	61,293,398	46	72,196,133	54
1911	19,446,233	23	65,665,503	77	1924	58,315,580	43	77,225,010	57
1912	22,960,565	25	69,614,418	75					

The lowest American percentage was 19 in 1880, 1881 and 1882; the highest was 91 in 1825.

PRODUCTION AND INDUSTRY.

Agriculture.—The total land surface, excluding Island possessions and Alaska, is 1,903,215,360* acres, of which in 1920 955,883,715 were farms (503,073,007 acres improved). The total number of farms in 1920 was 6,448,343, of which 2,456,107 are between 100 and 500 acres, 1,474,745 between 50 and 100 acres, and 1,503,732 between 20 and 50 acres. The gross value of farm products of the United States in 1919 was \$21,425,623,614, as compared with \$8,494,230,307 in 1909. Crops in 1919 were valued at \$14,755,364,894, live-stock products (including animals sold or slaughtered) at \$6,178,122,273, and miscellaneous products at \$492,136,447.

Wool.—The total number of animals shorn in 1919 was 31,591,840, producing 228,795,354 lb.

Minerals.—The total value of metallic minerals produced in 1924 was estimated at \$1,231,500,000 (pig iron, \$665,078,972; copper, \$214,087,000; gold, \$51,912,000, and silver, \$43,540,369), and of non-metallic minerals the total value was \$4,080,500,000 (bituminous coal, \$1,513,327,000 (1923); Pennsylvania anthracite, \$506,786,768 (1923); petroleum, 707,265,000 barrels of 42 gallons, value \$986,000,000); clay products, 424,582,628 (1923); stone, \$159,936,000; natural gas, \$254,000,000; cement, \$260,325,559.

Manufactures.—The manufacturing establishments enumerated at the biennial Census of 1921 numbered 196,267, the value of their products

being \$43,653,282,833, as compared with a value in 1919 of \$62,418,078,773. The figures for 1920 do not include data for 53,999 establishments with products valued at \$136,926,075, each establishment reporting products under \$5,000 in value, but such data were included in 1919. The leading manufacturing States are New York, Pennsylvania, Illinois, Ohio, and Massachusetts. The principal industrial centres are *New York* (clothing, printing and publishing, bread and other bakery products, millinery and lace goods, tobacco, slaughtering and meat packing, sugar-refining); *Chicago* (slaughtering and meat packing, printing and publishing, clothing); *Philadelphia* (textiles, printing and publishing, clothing, sugar refining, petroleum refining); *Boston* (printing and publishing, sugar refining, clothing, confectionery and ice-cream, foundry and machine-shop products, boots and shoes); *Pittsburg* (iron and steel, slaughtering and meat packing); *Detroit* (automobiles, automobile bodies and parts, printing and publishing); *St. Louis* (slaughtering and meat packing, boots and shoes, tobacco); *Cleveland* (automobiles, iron and steel, electrical machinery, apparatus and supplies); *Baltimore* (clothing, smelting and refining copper, slaughtering and meat packing, printing and publishing, fertilizers); *Cincinnati* (slaughtering and meat packing, clothing, printing and publishing); *Buffalo* (flour-mill and grist-mill products, automobiles, slaughtering and meat packing); *Minneapolis* (flour-mill and grist-mill products, automobiles, printing and publishing); *San Francisco* (printing and publishing, automobiles, coffee and spice).

* Decrease in land area due to building of Pathfinder and Shoshone Reservoirs in Wyoming and several reservoirs in connexion with irrigation projects in Montana.

Automobile Industry.—The value of the cars and lorries manufactured in 1921 was \$1,671,386,976, of parts and accessories, \$408,016,532, and of tyres and tubes, \$446,075,960. The number of cars produced was 1,406,257, of lorries, 106,988, while 27,884,034 tyres were also manufactured in 1921. The automobile factories gave employment to 248,027 persons, who received \$406,491,414 in 1921. The number of automobile vehicles registered in 1921 in the U.S.A. was 10,465,995. The petrol produced in 1920 amounted to 4,882,546,699 gallons, and that consumed to 4,256,428,053 gallons. The taxes levied on the motor industry amounted to \$316,720,000. The number of motor vehicles exported in 1921 was 30,776.

FEDERAL EMPLOYMENT BUREAUX.

The following figures show the work done by the Federal Employment Bureaux during the past six fiscal years ending June 30:—

Statistics for the years ended June 30.	Number of applications for help.	Number of persons applied for.	Number of applicants for places.	Number referred to employment.	Number actually employed.
1917	189,491	418,810	413,649	263,189	283,799

PUBLIC ROADS.—On Dec. 31, 1924, the total length of public roads was 2,985,000 miles, approximately 460,000 miles of which were surfaced roads. In 1924 the total expenditures for construction and maintenance were approximately \$1,070,000,000.

SHIPPING.—On June 30, 1923, the mercantile marine of the U.S. consisted of 818 sailing vessels of 1,029,049 gross tons; 2,826 steam vessels of 12,322,247 gross tons, a total of 3,644 vessels of 13,351,296 gross tons. In the year ended June 30, 1923, sailing and steam vessels of 66,888,096 tons entered at the various ports of the U.S.; of this total 30,702,396 tons were American and 36,185,700 tons foreign. The tonnage cleared from the various seaports was 66,601,435, of which 30,591,002 tons were American and 36,010,433 tons foreign.

POSTS AND TELEGRAPHS.—On July 1, 1924, there were 51,266 post offices in the U.S. dealing with 18,501,679,236 "pieces" of mail matter of all kinds (letters, postcards, newspapers, packets, &c.). The telegraphs and telephones are not operated by the U.S. Government.

WEIGHTS, MEASURES, AND CURRENCY.

The *Weights and Measures* in common use are shown on page 426. The *Metric System of Weights and Measures* is permissive, but is little used. The unit of *currency* is the *dollar of 100 cents*. The rate of exchange on certain dates in 1924 will be found on p. 419.

INDIAN POPULATION.

In 1922 the Indian population of the United States, exclusive of Alaska, was 314,930 by blood (Oklahoma containing 93,171, Arizona 43,327, New Mexico 21,569, S. Dakota 23,448, California 17,725, Montana 12,648, North Carolina 11,853, Washington 10,920, and Wisconsin 10,498, and the 38 remaining States less than 10,000 each). Total disbursements authorised for the fiscal year ended 30 June, 1924, for Indian Service were \$11,317,655. In addition to this the sum of \$22,700,000 is to be paid over to the Indians from receipts for oil and other leases, interest on trust funds, &c. The total wealth of U.S. Indians under the nominal control of the Indian Bureau on June 30, 1922, amounted to \$727,746,397, of which \$198,065,171 was tribal, and \$529,681,226 individual.

RECLAMATION.

Commissioner, Elwood Mead, Interior Dept. Building, 10th and F. N.W., Washington, D.C. Employees: Washington Office, 77; Field, 3,000 to 3,500. Expenditure per year about \$10,000,000.

The Bureau of Reclamation was organised as a bureau of the Interior Department, under the Reclamation Act of June 17, 1902. It is engaged in the investigation, construction and operation of irrigation works in the 17 arid and semi-arid States of the far West. Twenty-five primary projects, comprising about 3,000,000 acres, are under construction or operation, and the major works aid in serving an additional 1,100,000 acres under private canals that generally get stored water from the government reservoirs. The funds for this work have come chiefly from the sale of public lands, from repayments by the water users, and more recently from royalties from oil and gas-leasing and other mineral operations and Federal power permits, and the money expended is returned to the fund by easy payments of settlers.

The Bureau has built about 15,700 miles of canals, ditches and drains (including 139,000 canal structures), involving the excavation of 241,000,000 cubic yards of materials. In connexion with this work there have been constructed more than 100 storage and diversion dams with an aggregate volume of 17,500,000 cubic yards, including the *Arrowrock Dam* (349 feet high), Idaho, on the Boise River, and the *Elephant Butte Dam* (366 feet high), New Mexico, on the Rio Grande. The Bureau has built 106 tunnels, 1,000 miles of road, 83 miles of railroad, 3,280 miles of telephone line, 30 power plants, and 1,500 miles of transmission lines. It is mining coal, and has manufactured over 1½ million

barrels of cement and sand cement. The construction cost to June 30, 1924, was \$152,000,000.

Over 465,000 persons are living on the 35,000 farms irrigated by the Bureau, and in the project towns and cities. Of the 3,000,000 acres above referred to, water was furnished in 1924 to 1,290,890 acres, and of this area 1,216,610 acres were harvested in 1924, producing crops worth over \$66,000,000, or an average of about \$55 per acre. The additional lands using stored water yielded crops worth \$40,000,000 more.

Public land farm units on the several projects are opened for settlement from time to time as canals are extended to make irrigation water available. Under present law, soldiers of the World War have a preference right to enter these farms, and at recent openings such soldiers have taken practically all units.

Information in regard to farms available for settlement may be obtained by addressing, Commissioner, Bureau of Reclamation Dept. of the Interior, Washington, D.C.

The Bureau issues the "New Reclamation Era," an illustrated monthly publication, containing articles of interest to irrigation farmers and engineers. An annual report is also issued.

An engineering library of about 5,000 manuscript and printed volumes on the subject of irrigation is maintained in the Washington office of the Bureau. This library contains descriptions of the construction and operation of the projects, with numerous photographs and maps, plans, specifications, cost data and results of original experimental investigations, and is available for consultation by those interested.

GOVERNMENT PRINTING OFFICE,

North Capitol Street, Washington, D.C.

The Government Printing Office of the United States was established by Congress in 1860 and has been in continuous operation since that time. The present buildings, having a floor space of 15 acres, together with the machinery and equipment which they contain, represent an expenditure of approximately \$8,000,000. The annual cost of operation and maintenance is about \$11,500,000. There are about 4,000 persons annually employed in the various divisions of the office at a total yearly compensation of \$7,600,000. In addition to doing all of the printing and binding ordered for Congress, the office executes all the printing and binding required by the various executive departments and independent establishments of the U.S. Government. The office has the largest battery of type-setting machines in the world, including 121 linotype machines, 120 monotype key-boards and 126 monotype casting machines, which produced about 2,100,000,000 ems of type in fiscal year 1925. The 169 presses of the office are credited with 2,111,000,000 chargeable impressions, not including 221,000,000 on money order forms and 1,680,000,000 on postal cards. During the year the office handled approximately 80,000 separate jobs. In addition to the execution of all kinds of printing and binding, this office produced 10,447,000 square inches of electrotypes and stereotypes, and manufactured its own printing and writing inks, rollers, glue, type and type metal. It also has one of the largest industrial cafeterias and recreational rooms in the United States.

Public Printer, George H. Carter, Iowa. \$6,000

Deputy Public Printer, John Greene, Mass. 4,500

Product. Man., Elwood S. Moorhead, Pa. 4,000

Dependencies of the U.S.A.

THE PHILIPPINE ISLANDS

are situated between $4^{\circ} 40' - 21^{\circ} 10'$ N. lat. and $116^{\circ} 40' - 126^{\circ} 34'$ E. long., and are distant about 500 miles from the south-east coast of the continent of Asia. Their total land area is 115,026 square miles, of which total 94,946 square miles are contained in the eight largest islands, the 3,130 other islands having a combined area of 14,572 square miles. At the Census of 1918 the population was ascertained to be 10,314,310, almost all of Malayan stock, of whom 7,790,937 are Roman Catholic, 1,417,448 are Aglipayan, 124,575 are Protestant, 443,037 are Muhammadan, 508,596 are Pagan, 24,263 are Buddhists, and all others 5,454. Of the foreign-born residents about three-quarters are Chinese, and of the white population over one-half are from the United States (6,931 in 1921).

The Philippine Islands were discovered in 1521 by the Portuguese navigator Magellan, who was slain by the natives of Mactan. In 1542 Spain undertook the conquest of the islands, which were named "Filipinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 the capital of the Spanish colony was occupied by a British force, but in 1764 the newly-acquired territory was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. Aguinaldo was deported, but on his return his assistance was accepted by Admiral Dewey, the commander of the American Pacific fleet, after the annihilation of the Spanish vessels in Manila Bay on May 1, 1898. Manila was captured by the American troops under General Wesley Merritt on Aug. 13, 1898, and the Islands were ceded to the United States by the *Treaty of Paris* of Dec. 10, 1898.

Sept. 1, 1923, the Philippine Scouts, which form a part of the United States regular Army, consisted of 104 officers (28 being citizens of the Philippine Islands), and 7,010 enlisted men. On the same date the regular Army in the Philippines (other than the scouts), consisted of 500 officers and 4,071 enlisted men, many of these officers being on duty with the scouts. The Philippine constabulary, which is under the Philippine Government, in Sept., 1923, consisted of 376 officers and 5,642 enlisted men. All enlisted men in the scouts and constabulary are natives of the Islands, while almost all the constabulary commissioned personnel are Filipinos.

In 1921 the income of the Philippine Government was \$34,001,101 and the bonded indebtedness \$34,750,000. The expenditure on education in 1921 amounted to \$7,058,502.64; the University had an enrolment of 4,718 students, and there were 943,364 pupils enrolled in the public schools. The principal exports are hemp, coconut oil, sugar and tobacco; the imports being cotton manufactures, and iron and steel manufactures. During 1922 the trade was valued at \$95,583,298 for exports, and at \$80,197,645 for imports, 56 per cent. of the imports being from U.S. and 67 per cent. of the exports being taken

by the U.S. Sugar was the principal article of export in 1921, being valued at \$25,013,310, Manila hemp \$19,540,915, coconut oil \$15,734,186, and leaf tobacco \$2,273,117.

Towns.—Capital, Manila, in the island of Luzon; population (Dec. 31, 1918), 283,613. The next largest towns are Cebu (63,500), Albay (53,105), and Iloilo (49,808); there are several others with populations from 25,000 to 40,000.

GUAM.

Guam, the largest of the Ladrone or Marianne Islands in the North Pacific Ocean, lies in $13^{\circ} 26'$ N. lat. and $144^{\circ} 39'$ E. long., at a distance of about 1,506 miles east of Manila, the capital of the Philippine Islands, and forms a naval station between that dependency and the United States. The area of the island is estimated at 225 square miles, with a population on July 1, 1925, of 16,648, of whom 15,246 are classed as native, 859 of the naval station, and 543 other than native. The natives are of Chamorro stock, mingled with Filipino and Spanish blood. The language is a Malay dialect containing many Spanish words, but English is fast becoming the language of the island.

CAPITAL, Agaña. Port of entry, Apra.

PORTO RICO.

Porto Rico (Rich Harbour) is an island of the Greater Antilles group in the West Indies, and lies between $17^{\circ} 50' - 18^{\circ} 30'$ N. lat. and $65^{\circ} 30' - 67^{\circ} 15'$ W. long., with a total area of 3,435 square miles and a population of 1,299,809 at the census of 1920. Almost all the inhabitants are Roman Catholics. The island is about 100 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,400 miles distant from New York, and 982 miles from Key West. Sugar is grown in the low-lying districts, and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, rice, and yams are also grown. The trade is principally with the U.S. About 460 miles of railroad were in operation in June, 1922, and there are good harbours at San Juan and Ponce. The capital, San Juan, had 71,443 inhabitants in 1920, other towns being Ponce (41,912), Mayaguez (19,124), Arecibo (10,039), Bayamon (10,411), and Caguas (12,149). The legislative functions are vested in a legislature which consists of 2 elective houses; the Senate, composed of 19 members (2 from each of the 7 senatorial districts and 5 senators at large), and the House of Representatives, composed of 39 members (1 from each of the 35 representative districts and 4 elected at large). The term of the Legislature is 4 years.

TUTUILA, AMERICAN SAMOA.

Under an agreement between Great Britain, the United States and Germany* (proclaimed Feb. 19, 1900), the first-named Power abandoned all claims to the islands of the Samoan Archipelago, which were then divided between the United States and Germany, the islands east of 171° W. long. being taken over by the U.S. The territory thus acquired consists of the island of Tutuila, Aunu'u, Ofu, Olosega, Tau, and Rose

* Under the *Treaty of Versailles*, 1919, the German Samoan Islands were allocated to New Zealand.

Islands, with a total area of about 56 square miles and a population of 8,058 in 1920.

Tutuila, the largest of the group, has an area of about 40 square miles and a population of 6,185, and contains a magnificent harbour at Pago Pago, the capital and seat of government. The remaining islands have an area of about 16 square miles and a population of about 2,000, Rose Island being uninhabited. Copra is the only export of importance.

WAKE AND JOHNSTON ISLANDS.

The flag of the U.S. was hoisted on Wake Island in 1899, and three other islands in the Pacific have been annexed (Johnston, Palmyra, and Midway).

ALEUTIAN ISLANDS.

The *Aleutian Islands*, or Catherine Archipelago (also known as the Santa Barbara group), lie westward of the district of Alaska, and consist of four groups of islands (Fox, Andreanof, Rat, and Near Islands) between 52°-53° N. lat. and 172° E.-163° W. long. They have a population estimated at 2,000. The principal settlement is at Iliulik, on Unalaska Island. The group forms a part of the district of Alaska, and was transferred to the U.S. by Russia in 1867.

VIRGIN ISLANDS.

The three islands, St. Thomas, St. John, and St. Croix, in the Virgin Island group, West Indies, formerly the possessions of Denmark, were purchased by the United States from Denmark for the sum of \$25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 132 sq. miles, with a population in 1917 of 26,051. *St. Thomas* (28 sq. miles) has a population of 10,191; *St. Croix* (84 sq. miles) has a population of 14,901, the capital being Christianstad (or Bassin); *St. John* (20 sq. miles) has a population of 960, the capital being Cruz Bay. *St. Croix* exports sugar and cotton.

The revenue is derived from customs, income tax, ground and building tax, trade tax, &c. The estimated revenue for year ending June 30, 1926, Francs 1,143,650. There is a regular weekly service from New York to St. Thomas, and from Porto Rico to St. Thomas and St. Croix. The islands of St. Thomas and St. Croix possess wireless installations.

CAPITAL, St. Thomas, contains one of the finest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refuelling station.

Governor, Philip Williams.

Government Sec., Cecil S. Baker.

THE PANAMA CANAL.

The first suggestion for a canal across the Isthmus of Panama was made by a Spanish engineer in 1530, and surveys were actively engaged upon by various private companies between the years 1825 and 1890. In 1876 a concession for the construction of a canal was granted to a French promotion corporation, which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Inter-oceanic Panama Canal Company, of which de Lesseps was nominal head. After two years of preparatory work, the first excavation was made on January 20, 1882. The amount of work to be accomplished proved to be greater than was estimated, and the conditions under which it was carried on more embarrassing. Sickness,

interference of local officials, and mismanagement by the administration in Paris, resulted in the failure of the company, and a receiver was appointed in 1889. Under direction of the French courts a new company was formed to carry on the work, and, after a period of surveys, excavation was resumed in 1894. This was continued until May 4, 1904, when the United States Government took possession of the effects of the French company in Panama.

Congress authorised the President in 1902 to purchase the effects of the French company for \$40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of \$10,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognised by the United States, and a treaty was signed on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the Isthmus, were ceded to the United States. The canal is built through the centre of this territory. In 1922 a treaty between Colombia and the U.S. provided for the payment to Colombia of \$25,000,000 in satisfaction of all claims arising out of the Canal controversy. The independence of Panama was recognised by this treaty.

Two years were spent by the United States Government in sanitation, the assembling of plant, and organisation and housing of a labour force; after which operations on a large scale were begun on all parts of the canal.

Including the purchase of rights, payments to Panama, and construction and operation of the canal and its adjuncts, the total appropriations by Congress to June 30, 1924, were \$463,247,203. Tolls and other revenues, from its opening until June 30, 1924, amounted to \$103,211,193.

The canal is fifty statute miles long (43.84 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. The least width is in Culebra Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The water depth when the surface of Gatun Lake is at 85 feet above sea-level varies from 85 feet in some parts of Gatun Lake to 41 feet in the Atlantic entrance. The depth through Culebra Cut is 45 feet.

The administrative organisation for the canal is known as "The Panama Canal," with the Governor of the Panama Canal (Col. Meriwether L. Walker, U.S.A.), at its head.

Vessels plying between the Atlantic and Pacific Coasts of the United States handled 50 per cent. of the total cargo shipped *via* the Canal in 1924, and the intercoastal trade is the most important part of the traffic at present. Four other major trades accounted for 35.5 per cent. additional (Europe and W. coast of N. America 11.5; East coast of U.S. and S. America 10; Europe and W. coast of S. America 7.4; and U.S.A. to Far East 6.6). Owing to the decline of petroleum production in California, which contributed more than 9,000,000 tons of cargo in the form of tanker traffic during fiscal year 1924; the total traffic in 1925 was less than in the previous year.

The following table shows the number and tonnage of commercial vessels which have passed through the Panama Canal. The Canal was opened to commercial traffic Aug. 15, 1914, and was closed from Sept. 18, 1915, to April 15, 1916.

(a) *Via* Jamaica. (b) *Via* New York. (c) *Via* Tahiti. (d) *Via* Wellington. (e) *Via* San Francisco. (f) *Via* Honolulu. (g) Liverpool to Valparaiso *via* Strait of Magellan 8,830.

Fiscal Year.	No. of Vessels.	Net Tons.	Cargo Tons.
1915	1,075	3,792,572	4,888,454
1916	758	2,396,162	3,094,114
1917	1,803	5,798,557	7,058,563
1918	2,069	6,574,073	7,532,031
1919	2,024	6,124,990	6,916,621
1920	2,478	8,546,044	9,374,499
1921	2,892	11,415,876	11,599,214
1922	2,736	11,417,459	10,884,910
1923	3,967	18,605,786	19,567,875
1924	5,230	26,148,878	26,994,710
1925	4,673	22,855,151	23,958,836

FIRE LOSSES IN THE UNITED STATES.(Estimated by the *Journal of Commerce*.)

In the following table the losses for 1906 include the losses from fires following the disastrous earthquake in San Francisco. The "National Board of Fire Underwriters" estimates the fire losses in 1923 at the higher figure of \$508,000,000. In 1923 the *Loss of Life* caused by fires was stated to amount to 15,000 persons.

Year.	Loss.	Year.	Loss.	Year.	Loss.	Year.	Loss.
1880	\$74,043,400	1891	\$143,764,967	1902	\$111,078,040	1913	\$203,703,550

Consuls-General		300	250
Commercial Secs., Grade II	800-1,000	250	200
Inspectors and Consuls		200	100-200
Commercial Secs., Grade III	600-800	100	100-200
Vice-Consuls	300-600	50-150	100-200

ABYSSINIA or ETHIOPIA.

Empress, Waizera Zauditu (daughter of late Emperor Menelek), born 1876; elected Sept. 27th, 1916.

Heir, H.H. Ras Taffari Makonnen, G.C.M.G. (Cousin of the Empress), born 1891.

The area of Abyssinia and its dependencies is estimated at 350,000 square miles, with an estimated population of 10 to 12 millions, of whom about one-half are Abyssinians and the remainder Gallas, negro tribes on the west and south frontiers, and Danakils and Somalis on the east. The political neighbours are the Sudan, the Italian colony of Massowah (Eritrea), the French colony of Djibuti, British Somaliland, Italian Somaliland, Kenya Colony and the Uganda Protectorate.

Abyssinia is volcanic and mountainous. It contains some mineral wealth; iron and coal are not uncommon, and gold is washed in various streams, while salt, saltpetre, and sulphur are also procurable. The lower country and deep valley gorges are very hot; the higher plateaus are well watered, with a genial climate. In the hotter regions, sugar-cane, cotton, coffee, rubber, &c., flourish; in the middle zone maize, wheat, barley, wild oranges and other fruit trees, tobacco, potatoes, &c., are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. There are two seasons in the year, a dry winter and a rainy summer from June to September. The chief river is the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also have their rise in the Abyssinian highlands. Horses, mules, donkeys, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people. Domestic slavery is general and has legal recognition.

The Abyssinians are Christian (a branch of the Coptic Church), and their rulers claim descent from Menelek, the son of Solomon by the Queen of Sheba. The form of govern-

ment is a feudal despotism. There is no popular literature, and little education. The potential army numbers at least 300,000, armed with rifles. The principal pursuits are agriculture and cattle breeding. The chief exports are coffee, civet, wax, hides, rubber, ivory, and gold. The total trade is valued at about £2,000,000 for imports and exports, but it continues to suffer severely from the prevalent depression. The import duty on all goods at Gambela is 10 per cent. *ad valorem*, and at Dire-Dawa and Harrar 8 per cent. *ad valorem*; in the interior the duty is variable, and 3 per cent. addition is imposed on goods brought to the capital. A railway (495 miles) has been built under French auspices from Jibuti to the capital, *via* Dire Dawa. The posts and telegraphs are under French management. The principal towns besides Addis Ababa, are Adwa (the capital of Tigre), Gondar, Debra-Markos, Saiyu, Aksum, Antalo, Ankober, Goré, Dembecha, Ijube, Jinna, and Harrar. There are ancient architectural remains at Aksum, Gondar, and Ankober; modern architecture is very poor.

CAPITAL, Addis Ababa (population fluctuates, but is ordinarily about 50,000). Harrar, in Eastern Abyssinia, has a population of about 45,000.

Imports from U.K. (1924) £11,600
Exports to U.K. (1924) 28,000
FLAG: Green, red, yellow.

BRITISH LEGATION.

Envoy Extraordinary, Minister Plenipotentiary and Consul-General, C. H. Bentinck, C.M.G. (1925) £3,150

Oriental Secretary, Ph. P. C. Zaphiro, C.M.G.

Secretary to Minister, E. W. Thomas.

BRITISH CONSULAR OFFICERS.

Addis Ababa—Consul, G. H. Bullock.

Harar—Consul, C. H. F. Plowman.

N.W. Ethiopia (Dangila)—Consul, A. D. Home.

Southern Ethiopia (Mega)—Consul, Maj. A. T. Miles, D.S.O., M.C.

Western Ethiopia (Gore)—Consul, Craven H. Walker, O.B.E.

S.W. Ethiopia (Magi)—Consul, Capt. Arnold W. Hodson, C.M.G.

Adis Ababa is 500 miles from Zaila, *via* Harar; letters from London are from 20 to 24 days in transit if the mail connects with steamer service from Aden; train from Djibouti takes 3 days; caravans take from 35 to 45 days.

AFGHANISTAN (see pp. 604-5).

ALBANIA.

(Shkiperia.)

President, Ahmed Bey Zogu, elected President Jan. 31, 1925.

Minister of Foreign Affairs, Hussin Bey Vrioni.

Minister in London, Ihar Bey Vrioni, 137, Beaufort Street, S.W. 3.

Albania (the former Turkish Province of Scutari and parts of Kossovo and Yanina), lies on the west of the Balkan peninsula of south-eastern Europe, the western boundary being the Adriatic; total area about 20,000 sq. miles; total population estimated (1922) at 1,000,000. The political neighbours are, on the north and east Yugo-Slavia, and on the south-east and south Greece. Albania was declared independent by a National Assembly at Valona, Nov. 28, 1912, and its independence was confirmed by the *Treaty of London* of Dec. 20, 1912. The first King of Albania (Prince William of Wied) abandoned the throne in Sept. 1914, and during the Great War the country was invaded by troops of the Central Powers and of the Allies. After the Armistice (Nov. 11, 1918) a National Council at Durazzo established a provisional government. The independence of the country was guaranteed by the Supreme Council of the Allies. The government is exercised by Regents, representative of the various religious bodies, the executive being entrusted to a council of Ministers, responsible to the elected diet. Cattle rearing and agriculture (grain and tobacco) are the principal industries and there is some mineral wealth.

CAPITAL, Tirana (pop. 12,000); other centres are Scutari (pop. 32,000); Elbasan (pop. 13,000); Berat (pop. 8,500); Korytza (pop. 18,000); Durazzo (pop. 5,000); and Valona (pop. 7,000).

British Envoy Extraordinary, Minister Plenipotentiary and Consul-General, William Edmund O'Reilly (1925), Durazzo. (And local allowance, £600) £1,200.
Durazzo—3rd Secretary and Vice-Consul, Robert Parr (acting).

ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 5,500; it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a judge, and two lay vicars appointed by France and the Spanish Bishop of Urgel.

ARABIA.

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30'—60° E. long. and 12° 45'—34° 50' N. lat. The north-western limit is generally taken from Akaba, at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which

encloses the Persian Gulf, contains a coastal range in the Sultanate of Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, and Dahna deserts), and the total population is believed to be about 5,000,000. The contending powers in Arabia, since the overthrow of Turkish authority in the peninsula, are the Wahabite Muhammadans (represented by the Sultan of Najd) and the Hashimite Muhammadans (represented by the King of the Hejaz). The various Arab States are shown below:—

THE KINGDOM OF THE HEJAZ.

King of the Hejaz, Ali ibn Hussein, assumed throne on the abdication of King Hussein, Oct. 1924.

On June 5, 1916, the Grand Sherif of Mecca (hereditary Keeper of the Holy Places) threw off the Turkish allegiance and declared the independence of the former vilayet of Hejaz. On March 7, 1924, following the deposition of Sultan Abdul Mejid and his expulsion from Constantinople, King Hussein of the Hejaz was proclaimed Caliph of the Muhammadan world by the Moslems of Transjordan and the Hejaz. In October, 1924, after an unsuccessful war with the Sultan of Najd, King Hussein abdicated in favour of his son, but shortly after assuming the throne his successor evacuated the capital which was occupied by the Sultan of Najd. The kingdom extends from Asir in S. to Palestine and Syria in N. and from the Red Sea, the Gulf of Akaba, and Palestine in the W. to the ill-defined boundaries of Central Arabia. The total area is about 112,500 sq. miles, with a population of from 350,000 to 400,000, including many nomad tribes.

Parallel with the Red Sea coast runs the Tehama range (Jebel Shar, or Mount Seir, 7,000 feet, and Jebel Radhwa, 6,000 feet). On the coast are the small ports of Muwela, Damgha el Wihj, Yambo, Rabigu and Jeddah (the chief port of the country and the pilgrims' port), which contains the reputed "tomb of Eve, the mother of mankind"; and inland are many settlements through which runs the Hejaz Railway. The *Oasis of Khaibar*, east of the railway, contains a considerable population, descendants of former negro slaves, with a Jewish centre at Kasr el Yahudi. The importance of the Kingdom of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. *Medina (Al Medina, "The City")*, 820 miles by rail from Damascus, and the present terminus of the Hejaz Railway, has a permanent population of about 20,000, and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabia, A.H. 11). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. *Mecca*, the birthplace of the Prophet, is 55 miles east of the seaport of Jeddah, by road, and about 200 miles south of Medina, and has a fixed population estimated at 60,000. The city contains the great mosque surrounding the *Kaaba*, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham," placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. *Jeddah*, the principal port, has a considerable trade in hides, mother-of-pearl, coffee and carpets.

The *Hejaz Railway* runs from Medina in S.

through the Syrian Desert to Damascus and Beirut, and is connected with the projected Baghdad Railway at Aleppo.

CAPITAL, Mecca (pop. 60,000).

THE SULTANATE OF NAJD.

Sultan, H. H. Abd-el-Aziz al Saud, G.C.I.E.

In the 18th century Najd was an independent State and the stronghold of the Wahabite sect. It subsequently fell under the Turkish yoke, but in 1913 the present ruler threw off Turkish rule and captured from the Turks the Province of Hassa. In 1921 he added to his dominions the territories of the Rashid family of Shammar, which he captured by force of arms. The capital of the Sultanate is Riyadh, and the principal trading centres are Hassa, Bulaideh and Anaizeh. The only ports are Qatif and Ojair, which are suitable only for sailing craft. In 1924 the Sultan defeated the King of the Hejaz in several engagements and advanced against Mecca, which was occupied by the Wahabite forces in October, 1924. Riyadh is a station on the Pilgrims' trans-Arabian caravan route from Hassa to Mecca, and contains a large mosque, the "Westminster Abbey" of the Wahabites.

THE PRINCIPALITY OF KUWEIT.

Ruler, Sheikh Ahmad al-Jabir as-Subah, C.I.E.

Kuwait (or Koweit) has been semi-independent for many years, and is in treaty relation with British India. It extends along the shore of the Persian Gulf from Mesopotamia to Nejd (El Hasa). The important harbour and gulf port of Kuwait, the capital (pop. 30,000), is an entrepôt for goods for the interior, and for the export of horses, pearls, wool, &c. It was designated as the terminus of the Berlin-Constantinople-Baghdad railway as originally projected in 1903.

Political Agent, Major J. C. More, D.S.O.

THE SULTANATE OF OMÂN.

Sultan, Seyyid Taimur bin Faisal bin Turki, O.S.I., born 1886, suc. 1913.

Omân (area 82,000 sq. miles, estimated pop. 550,000) is a Muhammadan State in S.E. Arabia with a coast-line of about 1,500 miles along the Persian Gulf, the Gulf of Omân, and the Arabian Sea from El-Katar to Ras Sair. The country, much of which is arid and desert, attains in Jebel Akhdhar an elevation of 10,000 feet. The population is chiefly Arab, but includes also a considerable foreign element—Indians, Persians, Baluchis and Swahili negroes. The Sultan is in treaty relations with, and subsidised by, the Government of India, who have a political agent at his capital. In 1913, at the end of the reign of the last Sultan, the tribes of the Interior rose in rebellion, and, having elected their own Imam or Spiritual Ruler, have since administered the whole of Omân proper, the efforts of the Sultan to establish his control having been, up to date, unsuccessful. This rebellion has, with the war, interfered with the prosperity of the country. The Sultan is pledged not to cede territory to any Power but the British Government. Muscat has a considerable trade, amounting in 1923-24 to £559,855. Dates are the chief export, and rice, wheat, coffee, cotton and silk goods the chief imports. The capital, Muscat (with the sister town of Matrah), has an estimated population of 22,000.

Muscat—British Consul and Political Agent, Lt.-Col. C. G. Crosthwaite, C.B.E.

per memem Rs. 2,250

THE IMAMATE OF ASIR.

Imam, Ali ben Muhammad, succeeded March 21, 1923.

The territory of the Idrisi (who claims the Imamate of Asir and part of Yemen), extends along the Red Sea littoral, approximately from Hali Point to Loheia. It includes part of Asir, part of Yemen and the Farsan Islands, and extends inland to the Dahna Desert. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. The capital is Sabia, a small inland town.

THE IMAMATE OF YEMEN.

Imam of Sana'a, Yahya Muhammad Hamid ed-Din.

Yemen occupies the S.W. corner of the Arabian peninsula, between the Imamate of Asir and the British dependency of Aden, with an estimated area of 74,000 sq. miles and a population of 600,000 to 700,000. It was formerly divided into the vilayets of Sana'a, Tais, Asir and Hodeida, and it extends inland to the Dahna Desert and to the tribal territories of Hadramut. Part of Yemen is now included in the territories of the Idrisi (Imam of Asir), and of the remainder the greater part is under the rule of the Imam of Sana'a. On the plateau between the coast and the Dahna Desert (a district known as *El Jebel*) are the most fertile parts of Arabia, where wheat, barley, millet and coffee are extensively grown. The sea port of *Mocha* has become associated with the coffee export trade, but in this trade (and in all others) it is of secondary importance to *Hodeida*. The trade of Yemen probably exceeds that of the remainder of Arabia. The capital is the walled city of Sana'a (pop. 20,000), and about 70 miles to the S. of the capital is Dhamar, an ancient seat of learning, and the headquarters of the Zaidi sect of the Muhammadans.

THE HADRAMUT TRIBES.

The coastal region of Southern Arabia, between Yemen and Aden on the west and Oman on the east, and extending inland (northwards) to the Dahna Desert, contains a coastal strip of some 550 miles. Parallel with the coast (at a distance of 50 miles from the Arabian Sea) is an extensive plateau inhabited by the Hadarim, an ancient people of Arabian stock (Hadoram was the son of Joktan, *Genesis* x., 27). There are many settlements on the coast and in the interior, but the latter are being steadily enveloped by the sand of the northern desert. There are sacred shrines near Kasm (Kabr Hud) and Shibâm (Kabr Sâlih). The eastern districts, known as Mahra and Gara, are very sparsely populated. The estimated area of Hadramut is 82,000 sq. miles, and its Muhammadan population, of independent Arab tribes, is estimated at 150,000. The most important Coastal Chief is the *Sultan of Shahr and Mokalla*, K.O.I.E., who is in treaty relations with Great Britain. Inland, the most important tribe is the Kathiri, whose chief towns are Sey yem and Terim. The Kathiri are noted as travellers and traders, and many of them are settled and carry on commerce at Singapore and Java. A long-standing feud between the Kathiri and the Ka'iti (by whom the former were expelled from the coast) was settled by treaty in 1919 on the initiative of the Aden Government. Under this Treaty the *Ka'iti Sultan of Mokalla* permits access to the

port of Mokalla on the part of Kathiri traders. Agriculture and cattle raising are the principal industries, together with the cultivation of dates, indigo and tobacco.

ARGENTINE REPUBLIC.

(República Argentina.)

President (1922-28), Dr. Marcelo T. de Alvear, assumed office, Oct. 12, 1922.....\$96,000
Vice-Pres. (1922-28), Dr. Elpidio Gonzalez 36,000

Minister of the Interior, Dr. José P. Tamborini.

Foreign Affairs, Dr. Angel Gallardo.

Finance, Dr. Victor M. Molina.

Justice and Public Instruc., Dr. Antonio Sagarna.

Agriculture, Señor Emilio Mihura.

War, General Agustín P. Justo.

Marine, Adm. M. Domecq-García.

Public Works, Dr. Roberto M. Ortiz.

Minister in London, Señor 'Dr.' J. Evaristo Uriburu, 30 Grosvenor Gardens, S.W. 1.

Counsellor of Legation, Señor Don Paulino Llambi Campbell.

First Secretary, Señor Don Carlos Miguens.

Financial 1st Secretary, Señor Don Carlos M. Dominguez.

Naval Attaché, Capt. Don Jorge A. Games.

Commercial Attaché, Señor Don Julián Duggan.

Civil Attaché, Señor Don R. C. Quesada.

Consul-Attaché, Señor Don. H. F. Beschtedt.

Chanc.-Attaché, Señor Don A. Scilingo.

Special Attaché, Señor Dr. Don Juan E. Richelet.

Consul-General, Dr. Perez, 7 Gower Street, W.C.1.

There is a Consulate-General at Dublin, and there are also Consulates at Liverpool, Southampton, Cardiff, Newcastle-upon-Tyne, Newport, and Glasgow; and Vice-Consulates at Aberdeen, Belfast, Bristol, Hull, Manchester, Middlesbrough, and Swansea.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. On the west the mountainous Cordilleras, with their plateaus, extend from the northern to the southern boundaries; on the east are the great plains, those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas, which together constitute *La Plata*, extending from the Bolivian boundary in the north to the Rio Negro; and south of the Rio Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Cordoba by the San Luis and Cordoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandil Hills (about 1,000 ft.) and the Sierra Ventana, near Bahía Blanca (about 3,000 ft.). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del

Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic.

The Republic is composed of 14 provinces and 10 territories, comprising in all about 1,132,000 square miles, with a population of 9,548,092 in 1924. Immigration is encouraged, and comes principally from Spain and Italy, but legislation, introduced in 1919, requires intending immigrants to produce certificates of good character and ability to work. In 1924 the immigrants numbered 160,127 and the emigrants in 1923 numbered 76,520. The climate is moderate and healthy. Spanish is the language of the country.

Government.—The estuary of La Plata was discovered in 1515 by Juan Díaz de Solís, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. In 1810 (May 25) Spanish rule was defied, and in 1816 (July 9) the Independence of Argentina was declared by the Congress of Tucumán. In 1853, after more than thirty years of disturbances and civil wars, the country settled down, and is now a well-governed and progressive Republic. The constitution dates from 1853 (revised 1859) and is modelled on that of the U.S. of America, but each province enjoys practically complete autonomy. The executive is in the hands of the President, who selects his Cabinet. The National Congress consists of a Senate of 30 members and of a House of Deputies of 160 members. Members of Congress receive \$18,000 (paper) *per annum*.

Production.—Of the total area about one-third is suitable for agriculture and cattle raising, and vast tracts are held by the Federal Government for sale or lease to colonists. The principal productions are wheat, maize, oats, linseed, sugar, wine, wool, hides, cattle, sheep, and horses. There were in 1922 37,064,850 cattle, 30,671,841 sheep, 9,366,455 horses (1920), 600,000 mules, (1920), 4,670,130 goats (1920), and 1,436,638 pigs, (1924). The exports are made up entirely of pastoral and agricultural products, with the exception of quebracho, copper, manganese, and wolfram. In 1923 the exports of wheat were 3,726,000 metric tons, oats 456,000, linseed 1,072,000, maize 2,870,000 metric tons, butter 1,081,000 cases, wool, 330,000 bales, sheep skins 35,000 bales, dried oxides 2,435,000, salted oxides 5,065,000, frozen beef 2,546,000 quarters, chilled beef 3,997,000 quarters, frozen lamb 1,468,000 carcasses, frozen mutton 1,761,000 carcasses. In 1920 there were 4,500 registered wine presses, handling about 600,000 tons of grapes, the output in 1919 being over 4,000,000 hectolitres (88,212,000 gallons). The export of wine to neighbouring South American States is increasing annually, and the importation of wine has almost ceased. Oil has been found in various parts of the Republic and is worked to a considerable extent in the neighbourhood of Comodoro Rivadavia, in the Department of Escalante.

Communications.—There were (1924) 22,225 miles of railroad open. The railroads are almost entirely in the hands of British companies, and absorb about £234,000,000 of British capital. Telegraphs about 43,153 miles, mostly Government lines. There are 22 wireless stations, of which one is reserved for communication between England and the Argentine. There are several aeroplane services between Argentine

centres. The principal ports are Buenos Aires, Rosario, La Plata, and Bahia Blanca. In 1923 2,231 ships of a total tonnage of 7,672,521 (45 per cent. British) entered the port of Buenos Aires.

Defence.—The Navy consists of 2 super-dreadnought battleships, 2 river monitors, 4 armoured cruisers, 3 cruisers (old), 4 torpedo gunboats, 7 destroyers, and 2 first class and 6 second class torpedo boats. Strength about 740 officers and 11,000 men. There is a naval port at Puerto Belgrano, near Bahia Blanca. The National Militia has a peace footing of about 30,000, with reserves of 250,000; on a war footing the Army would comprise 5 divisions of 20,000 each.

Education.—*Primary* Education is secular, free and compulsory from the ages of 7 to 14. The scattered population of the country districts constitute a problem in attendance which is being gradually solved. *Secondary* Education is controlled by the National Government in National Colleges, numbering 45 in 1923, with 15,500 students, average annual fees \$45 (paper); in Normal Schools, numbering 86 in 1923, with 14,000 students who pay no fees; and in 60 Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, etc. There are National Universities at Cordoba, Buenos Aires, La Plata, and Tucuman, and Faculties at Santa Fé, Rosario and Paraná.

Revenue (Budget Estimate)	1925. \$588,641,067
Expenditure (Budget Estimate)	588,641,067

The Argentine Debt.

According to official figures the Public Debt at Dec. 31, 1922, stood as follows:—

Federal (Paper Pesos)	\$2,187,712,000
Provincial (Paper Pesos)	483,383,000
Municipal (Paper Pesos)	173,923,000

Total.....\$2,843,018,000

The total was divided as follows:—

Federal—	
Unconsolidated	\$892,824,000
Consolidated:	
Internal	\$759,151,000
External	535,737,000
	1,294,888,000

\$2,187,712,000

Provincial (Consolidated)—

Internal	323,459,000
External	159,924,000
	\$483,383,000

Municipal (Consolidated)—

Internal	85,784,000
External	86,639,000
	\$171,923,000

The Unconsolidated Debts of the Provinces and Municipalities are estimated at \$150,000,000, which gives a total of approximately \$3,000,000,000.

	1922.	1923.
Total Imports (gold \$)...	\$689,645,000	\$868,430,000
Total Exports (gold \$)...	676,008,000	771,361,000
Exports to U.K.	£56,620,803	£66,084,756
Imports from U.K.	22,688,618	28,164,835

CAPITAL. Buenos Aires. Pop. (1922), 1,721,500. Other large towns are Rosario (270,000), Cordoba (160,000) and La Plata (160,000).

NATIONAL COLOURS: Blue and White (War Flag: 3 horizontal bands, blue, white, blue, with rising sun on white band).

Counsellor, Baron William Engerth.

Secretary, Karl von Zeileissen.

For Debt Clearing, Dr. Felix Weiser.

Consul-General, Sir Ernest Harvey, K.B.E., 9 George Yard, Lombard Street, E.C. 3.

Prior to the War the Austrian Empire, joined to the Kingdom of Hungary, was the largest

Empire, next to Russia, on the continent of Europe, situated between 42° – 51° N. lat. and 9° $30'$ – 26° $20'$ E. long. It embraced an area of 240,456 sq. miles, and a population (1914) of nearly 53,000,000, and included Upper and Lower Austria; Bohemia; Bukovina; Carinthia, Carniola, Dalmatia, Görz and Gradiska; Istria, Moravia, Salzburg, Silesia, Styria, Trieste, Tyrol and Vorarlburg; with Bosnia and Herzegovina as administered territories. At the conclusion of the War, the territories of the Austrian Republic comprised an area of 31,756 square miles, with a population (1920) of 6,067,000.

On June 28, 1914, the assassination of the Austrian Archduke Francis at Sarajevo (Bosnia) was presumed to be the outcome of a plot fostered by Serbia, and after negotiations an ultimatum was presented by the Empire to the Serbian Government (July 23), and non-compliance with its terms led to the European War of 1914–18. Before the armistice of Nov. 11, 1918, Hungary had seceded from the "Dual Monarchy," and a Republic was declared Nov. 12, 1918, the throne being abdicated by the Emperor Karl (Nov. 28, 1918).

Under the *Treaty of St. Germain* (Sept. 10, 1919) the political neighbours of the Austrian Republic are the Republics of Germany and Czechoslovakia on the N.; the Kingdom of Italy, and the Yugo-Slav Kingdom on the S.; Switzerland on the W., and Hungary on the E.

Under the new Constitution (Nov., 1920), Austria became a Republican Federation of eight Provinces:—Lower Austria and Vienna, Upper Austria, Carinthia, Styria, Salzburg, Tyrol, Vorarlberg and Burgenland (West Hungary); the Bundesrat and Nationalrat were constituted; a government formed, and a President elected; Vienna was later formed into a separate Province. The elections resulted in a majority for the *Christian Socialists* over the *Social Democrats*, the *Pan-Germans* coming next in order. In June, 1921, the Ministry resigned in favour of a non-party Government, which gave way (May, 1922) to a Christian Socialist Pan-German Coalition Government under Doctor Seipel (a priest). Elections were held again in October, 1923, and the same Government was returned.

Complete religious liberty is one of the fundamental laws of the new Republic. The prevailing religion is Roman Catholic.

Finance.—The finances of Austria went from bad to worse for four years after the Armistice, owing to heavy deficits and incessant inflation. The deficit on the State Budget was estimated in July, 1922, at considerably more than one billion crowns, and by Oct., 1922, the exchange value of the crown had sunk to about one-fifteen-thousandth of its nominal value, £1 being equal to 325,000 crowns (in place of 24'25). The circulation on Sept. 30, 1922, was over two billion crowns. In September and October, 1922, the League of Nations worked out a scheme for the restoration of the Austrian finances within two years under the control of a High Commissioner appointed by the League, the Governments of Great Britain, France, Italy, and Czecho-Slovakia agreeing to guarantee four-fifths of a loan of 520,000,000 gold crowns (about £25,000,000) in order to fill the deficit in the Budget during the two years. The guarantees for the remainder were given by other powers and a short term loan of £3,500,000 was issued in March, 1922. In the following June the big League of Nations loan was successfully floated,

nearly one-half in London, about £5,000,000 in New York, and the rest in various continental capitals. The sum actually received amounted to over £26,500,000. About £11,000,000 was used to repay the previous short term loans made in 1922 and 1923. The High Commissioner, Dr. Zimmermann, appointed by the League of Nations to supervise the carrying out of the scheme for the reconstruction of Austria entered on his office in Dec., 1922. Great progress has been made since in reducing Government expenditure and increasing the revenue. Thus about 79,000 superfluous officials were dismissed or pensioned off by the end of December, 1924. The issue of uncovered bank-notes was stopped on Nov. 18, 1922, and the Austrian crown was stabilised at about Crs. 320,000 = £1. In 1925 a new currency was introduced, the unit being the Austrian *schilling* (=10,000 paper Crowns), the exchange value of which will be found on p. 419. Since the Armistice (Nov. 11, 1918), the British Government has advanced about £10,000,000 to the Republic.

The following apportionment of the pre-War Debts of the Austro-Hungarian Monarchy has been suggested (1924):—

To	Austrian Debt.	Hungarian Debt.
Austria	38'827	1'581
Czechoslovakia	41'7	15'945
Fiume	0'748
Hungary	45'733
Italy	4'087	...
Poland	13'733	0'075
Rumania	1'61	21'802
Yugo-Slavia	2'043	14'116
Total	100'0	100'0

Industries.—The principal industry is agriculture, the chief products being wheat, barley, oats, rye, maize, and potatoes. Forestry and stock raising are important. The forests are principally coniferous trees. The live-stock includes horses, cattle, sheep, pigs, and goats. The vine is extensively cultivated. The most important mineral production is that of iron ore, magnesite, and salt; there are also lead, zinc, copper, common and brown coal, and graphite. The principal manufactures are wool, lins, cottons, steel, wood-work, brewing, and machinery.

Communications.—In Sept., 1919, there were about 3,800 miles of railway (exclusive of narrow gauge lines). The mercantile marine was considerable in 1914, but the new Republic is land-locked.

Defence.—During the War of 1914–18 about 5,000,000, all ranks, were passed into the common Army of Austria-Hungary. The total casualties exceeded 2,500,000, of whom over 700,000 were returned as killed. Under the *Treaty of St. Germain* the military, naval and air forces were demobilised and reduced to minimum requirements and all warships were surrendered to the Allies, those under construction being broken up. Service in the Republican Army is by voluntary enlistment for twelve years.

	1923.	1924.
Total Imports	£80,073,000	£99,734,000
Total Exports	£46,747,000	£57,022,000
Imports from U. K. ...	£1,807,000	£2,822,350
Exports to U. K. ...	£1,822,000	£2,470,000

CAPITAL, Vienna, on the River Danube. Pop. (1920) 1,841,326; other large towns are Graz (160,000), Linz (93,000), and Innsbruck (60,000).

Consul, Glasgow, P. S. Dunn, C.B.E.

A Kingdom of Central Europe, with a total area (1920) of 11,392 square miles and a population (Census of 1919) of 7,577,027. Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxemburg, and on the W. by the North Sea. The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary

king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 2, 1914, the Germans invaded Belgium and ultimately overcame the resistance of the fortresses and overran almost the whole country. In revenge for the heroism of its defenders the Germans sacked and destroyed many cities, burning Louvain (with its library), Termonde, and other places, and established a reign of terror. They levied a war contribution on Belgium of close on £100,000,000, apart from enormous fines on localities, firms, and private persons. On Friday, Nov. 15, 1918, at the great turn of the tide, Antwerp was re-occupied by the victorious Belgian army, and Brussels and the remainder of Belgian soil a few days later. About 10,000 persons were added in 1919 by the cession of Moresnet and part of Malmédy by Germany, and the district of Eupen, with the remainder of the district of Malmédy, were ceded by Germany and annexed by Belgium (Sept. 20, 1920) after a plebiscite, thus adding a further 50,000 to the inhabitants.

French and Flemish are the joint official languages, but while French is the language of the upper classes, Flemish is spoken by the majority, preponderating in Flanders, Limburg, and Brabant, including Antwerp. Nearly all the inhabitants are, at least nominally, Roman Catholics.

Belgium has a frontier of 831 miles, and a seaboard of 42 miles. The Meuse and its tributary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 536 feet. The principal rivers are the Schelde (Escaut) and the Maas (Meuse). Brussels has a mean temperature of 50° F. (summer 65°, winter 37°).

GOVERNMENT.—The constitution jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 120 senators (with the exception of 27 elected by the provincial councils) and 186 representatives are elected by the people, the former for eight, the latter for four years. Universal male suffrage, with plural voting up to three votes by property and educational qualifications, was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1900. In April, 1919, the Belgian Parliament decided as an emergency measure to hold 1919 elections on a "one man one vote" basis for Senate and Chamber. (Unmarried widows of soldiers killed before Jan. 1, 1919, or failing widows, the mothers; widows or mothers of civilians shot by enemy; women imprisoned by enemy for patriotic acts, also voted.) This Parliament, anomalous, and unconstitutionally elected, was required to make constitutional the machinery by which it was elected; i.e., to revise article 47 of the Constitution. This was done (Feb. 7, 1921) and a new Chamber is to be elected in 1925. Deputies receive 12,000 francs a year and a free pass over the railways. There are in addition representative Provincial and

Communal Councils, elected on a somewhat more liberal franchise.

PRODUCTION.—Agriculture and forestry are important industries, the chief crops being oats, rye, wheat, potatoes, barley and sugar-beet. Under Annex IV. of the *Treaty of Versailles* Germany undertook to deliver to Belgium certain live stock to replace the animals seized or destroyed during the War of 1914-1918. Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The mineral kingdom yields coal, iron, zinc, lead, and copper. The leading industries are collieries, quarries, and metallurgic (Mons, Charleroi, Liège, Namur, Hainaut, Brabant, and Limbourg), glass, textiles (Ghent and Verviers), lace (Brussels, Mechlin, Bruges, &c.), flour and starch mills, sugar, distilleries, breweries, &c.

DEFENCE.—In 1914 the Army on a peace footing consisted of about 50,000, all ranks. In the War of 1914-1918 over 500,000 passed into the armies, which were reorganised on French territory during the defensive period of the campaigns. An organised force of 200,000 co-operated with the Allies during the decisive offensive of the autumn of 1918. Those returned as dead or missing, during the War, numbered 102,382. In 1923 a new Recruiting Law was passed, entailing compulsory service for 12 months, with certain exceptions. The yearly intake of recruits is fixed at 49,500, and the Army consists of a First Army of 4 Corps and 8 Divisions, a Second (Reserve) Army of 8 Divisions, and 1 Cavalry Division. Belgium has a small force of torpedo boats.

EDUCATION.—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control, Roman Catholic largely predominating. There are 134 State high schools, including 44 for girls, and numerous private institutions. Special schools abound. The Universities of Ghent and Liège are maintained by the State; those of Brussels and Louvain are free institutions. Louvain University is to be rebuilt. After considerable opposition, and by way of a compromise, Ghent University, which had hitherto transacted its business and given its teaching in French, was in 1923 made bi-lingual, many Flemish lectures being substituted for French, and Flemish becoming the official language of the University.

	1925.
Revenue	Francs 7,724,000,000
Expenditure	8,827,000,000
Debt (Sept. 30, 1924)	40,684,000,000
Imports (1924)	27,581,108,000
Exports (1924)	13,932,504,000
Imports from U.K. (1924) ...	£22,643,769
Exports to U.K. (1924)	36,421,051

The imports in 1924 were: manufactured articles (4,515,892,000 francs), raw materials (8,531,155,000), foodstuffs and beverages (63,687,000), and live animals (4,456,820,000); the exports were: raw materials (4,701,005,000 francs), manufactured articles (7,817,358,000), and foodstuffs and beverages (1,234,797,000).

COMMUNICATIONS.—In 1924 there were 4,770 kilometres of State railways (normal gauge) and 4,383 kilometres of narrow gauge. In 1924 there were 46,187 kilometres of telegraph wire and 2,259 offices. The navigable rivers and canals have a length of 1,231 miles (1919), and there are 6,177 miles of roads. Most of the maritime trade of

Belgium is carried on in foreign bottoms, the mercantile marine only consisting (1924) of 183 vessels (381,650 tons), in addition to which there were 453 fishing boats. In 1924, 14,373 vessels entered at Belgian ports (tonnage 22,316,522). The principal port and commercial entrepôt is Antwerp, on the River Scheldt. Other ports are Ostend, Ghent, Bruges, Nieuport, Blankenburg and Zeebrugge (blocked by the British Fleet April 23, 1918, and since reopened for traffic). The vexed question of the Scheldt, of which the right bank is in Netherlands territory and the left in Belgium, appears likely to be settled by negotiation between the respective Governments. The navigation is to be free to both countries, from the mouth to Antwerp, and the Netherlands war vessels are to be removed from the river.

The Capital, BRUSSELS, had a population (Dec. 31, 1923) of 807,962 (with suburbs). Other towns with over 100,000 inhabitants are Antwerp, the chief port (300,677); Ghent (163,877), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; and Liège (165,096) the centre of the iron industry. Brussels is 224 miles from London; transit, 8 hrs.

THE BELGIAN CONGO.

Governor-General, His Excellency Martin Rutten, G.C.V.O.

The Independent State of the Congo became a Belgian Colony by a law of Oct. 18, 1908.

The total area amounts to 909,654 sq. miles, with a native population estimated (1924) at

12,000,000. The total European population (Jan., 1923) was 10,037, of whom 5,853 were Belgians, 704 were British, 365 Americans, 527 Italians, 724 Portuguese, 110 Swedes, 66 Russians, 267 French, 235 Dutch, 115 Swiss, 381 Greeks, 40 Luxemburgers, 33 Danes, 26 Norwegians, 22 Spaniards, and 569 others of various nationalities.

The Congo River is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and re-charge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 249 miles in length. A narrow-gauge line runs from Boma to Lukula, the cocoa planting district of Mayumbe. Above Leopoldville the river and its numerous affluents are navigable by steamer for about 5,000 miles the falls on the Upper River being avoided by a metre-gauge line from Stanleyville to Ponthierville (125 kilometres), and another from Kindu to Kongolo (355 kilometres). Another line from Kabalo to Albertville on Lake Tanganyika (273 kilometres) was completed in 1926, connecting the West Coast of Africa with Belgian East Africa and the East Coast. The Katanga Railway reached Bukama in May, 1928, thus linking up the Rhodesian Railway system with the steamers plying on the Upper Congo River, connecting with both the East and the West Coast. Within eight years, 450 miles of railway have been constructed, 200 of which have been laid during the War. It is now possible to travel by train direct from Cape Town to the river Congo, a distance of 2,650 miles. Work has been started on the Stanleyville-Lake Albert Railway, which will run between the Congo River and the Nile, providing the last link to direct river and rail communication between the Cape and Cairo. Two new lines will run from the copper mining district of Katanga towards the West Coast, one of them reaching Lobito Bay (Portuguese Angola), the other linking the Katanga Railway with the Matadi-Leopoldville Railway, a portion of the latter, between Bukama and the Kasai river, being now under construction; at Bukama a temporary bridge over the Lualaba was opened for traffic in 1924 and considerable progress has been made. In addition, there are many carriage and motor roads. The most important motor road is the *Route Royale Congo-Nil*, 900 kilometres in length, from Djamba, on the Rubi, to Redjaf, on the Nile, 500 kilometres of this road being now in use. Another runs from Bukama (*via* Kanda-Kanda and Luebo) to Djoko-Punda, on the Kasai, a distance of 1,000 kilometres, which can be covered in 5 days by touring car as against 40 days by porter. A telegraph line connects Banana to Coquilhatville (805 miles); Boma with Tshela (85 miles); Stanleyville with Ponthierville (79 miles); Kasongo with Uvira (265 miles); Kindu with Kongolo (219 miles); Kabolo with Albertville (166 miles); Sakania with Bukama (448 miles), and Buta with Bambili (138 miles), a total length of 2,208 miles. There is telegraphic communication with Europe. Fifteen wireless stations connect the West Coast with the principal Government stations throughout the Colony. A great inter-Continental wireless station is being erected at Kanga to communicate direct with Brussels. The West Coast District has a rather scanty rainfall (40 inches), but on the Maimbe Hills and in the whole interior the rainfall averages between 60 and 80 inches, and the country is very fertile

and productive. Sleeping sickness, once very prevalent and destructive, is now decreasing. Extensive forests cover the central districts; oil palms are plentiful everywhere, and supply an ever-increasing trade in palm-oil and palm-kernels. Wild rubber and wild coffee are common; coffee, cocoa, Pará and Ceara rubber and cotton are successfully planted. Mines are very extensive. Extensive radium deposits have been discovered in the Katanga. The copper district of Katanga has enormous deposits of copper ore, and the smelters at the Lubumbashi produce about 6,000 tons of copper monthly (1924); plant has also been erected at Panda for the extraction of nickel. A rich tin-belt extends from Bukama towards Lake Tanganyika. The gold-bearing districts of North-eastern Congo are being prospected by the Government, and contain both alluvial and reef gold. Diamond-bearing gravels are worked in the south. The exports are mostly palm-kernels and palm-oil, ivory, rubber, gum-copal, cocoa, copper, gold, and diamonds. Capital, Leopoldville (Leopoldville-Kinshasa) (pop. 1,100 whites, 17,000 natives). Principal towns, Boma (pop. 400 whites, 2,300 natives); Elisabethville (Katanga) (pop. 2,100 whites, 12,500 natives); Stanleyville, Eastern Province (270 whites, 7,500 natives); Coquilhatville (300 whites, 10,000 natives).

Revenue (1924)	Francs 141,603,040
Expenditure (1924)	167,949,290
Debt (1923)	542,410,235
Imports (1922)	268,719,988
Exports (1922)	294,579,815
Imports from U.K. (1924)	47,203,013
Exports to U.K. (1924)	30,527,221

By the *Anglo-Belgian Agreement* of July, 1919, the districts of Ruanda and Urundi, portions of the former territory of German East Africa (see "Tanganyika Territory"), which adjoin the Belgian Congo on the E., were assigned by Great Britain to Belgium. Ruanda and Urundi formed the N.W. corner of German East Africa from 5° S. lat. to the S. borders of (British) Uganda and have an area of about 15,000 square miles, with an estimated population of 3,000,000. They lie W. of the Victoria Nyanza and N.E. of Lake Tanganyika, through which are their respective outlets. The soil is poor, and the only exports are live stock and hides. The administrative capitals are Niasa (Ruanda) and Kitega (Urundi), the commercial capitals being Kigali (Ruanda) and Usumbura (Urundi).

Education and Agriculture, Dr. Anze Soria.

Envoy Extraordinary, Minister Plenipotentiary in London, (vacant). 19 Gloucester Place, W.1.

Secretary of Legation and Chargé d'Affaires, Señor Don Mamerto Urriolagoitia.

Consulate-General, 5 Fenchurch Street, E.C. 3.

The Republic of Bolivia extends between lat. 8° and 23° S. and long. 57° 30' and 73° W., and its area is about 597,460 square miles*, with an estimated population of 2,825,439. The Republic was formerly comprised in the Spanish Vice-Royalty of *Alto-Peru*, and derives its present name from its liberator, Simon Bolivar, (born 1783, died 1830).

The chief topographical feature is the great central plateau (6,500 square miles) over 500 miles in length, at an average altitude of 12,000 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu (Sorata), and Illimani, two of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenes, Beni, Mamoré, and Madre de Dios.

Mining and agriculture are the principal industries, the mineral productions being very valuable. The ancient silver mines of Potosi are now worked only for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is, after that of the Straits Settlements, the largest in the world, while copper, antimony, wolfram, bismuth, salt, and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, India-rubber, cacao, potatoes, cinchona bark, medicinal herbs, &c. Manufactures are in a very undeveloped state. The principal exports are tin and silver ores, crude rubber, copper ores, bismuth, lead ores, wolfram, wool, coca, hides, and antimony; the chief imports are iron and steel products, textiles, machinery, sugar, flour, and coal. There are about 1,175 miles of trunk lines of railways in operation, and 205 miles under construction; and 4,000 miles of telegraph wire. There are wireless services between Riberalta, La Paz, Cobija, Capitandí (Chaco). There is direct railway communication to the sea at Antofagasta (2 days), Arica (1 day), and Mollendo (2 days), and also (with a gap of 125 miles) to Buenos Aires (5 days); branch lines run from Oruro to Cochabamba, and from Rio Mulato to Potosi. Construction on the railway between La Quiaca (on the Argentine frontier) and Atocha (in Bolivia), which, when completed, will allow through railway communication with Buenos Aires, is, after many delays, now being pushed forward by an American corporation. The gap between Tupiza and La Quiaca is crossed by an automobile service, taking six hours. Communication with Peru is effected by rail to Guaquí and thence by steamer across Lake Titicaca to the railroad at Puno. The principal line is the Antofagasta and Bolivia railroad (719 miles), and a line from La Paz to the province of Yungas (the first section of which is open) may eventually connect with the steamers on the

rivers Beni, Mamoré, and other tributaries. A line from Potosi to Sucre, the legal capital, is under construction, and trains run to Betanzos.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, Mejillones, and Antofagasta by the "Pacific War" of 1879-1882 (see Chile). The Peace Army amounts to about 5,000, all ranks, the War Effective being about 105,000.

Estimated revenue (1925)	Bs. 39,003,257
Estimated expenditure (1925)	43,873,742

Naval Attaché, Commr. Roberto Guedes de Carvalho.

Commercial Attaché, J. Barboza Carneiro.

Consul-General in London, Senhor Francisco Garcia Leão, Coventry House, 20 South Place, Finsbury, E.C. 2.

Consul-General in Liverpool, Senhor M. P. de Souza Dantas.

* The country has not been completely surveyed, and the area is officially estimated at 594,460 square miles; other estimates give an area of 708,195 square miles.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean; and extends between lat. $5^{\circ} 10' N.$ and $33^{\circ} 45' S.$ and long. $34^{\circ} 40' W.$ and $73^{\circ} 15' W.$, being 2,600 miles from north to south, and 2,500 from west to east; with a coast-line on the Atlantic of 3,700 miles. The Republic comprises an area of 3,298,870 square miles, with a population (Census 1920) of 30,635,605.

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central state of the Matto Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. In the extreme south, towards the interior, the land rises by gentle gradations to the height of 2,000 to 5,000 feet above sea level. The principal ranges are *Serra do Mar* in São Paulo; the *Serra do Mantiqueira* (Itatiaia, 9,000), and the *Serra do Espinhaço* (Itacoluni, 6,000 feet), in the south-east of Minas Geraes; the *Serra do Parandé*, between Goyaz and Minas Geraes, the *Serra dos Amores*, which divide Espírito Santo from Minas Geraes; and the *Serra da Guapeia*, *Branca* and *Araripe*, which envelop Piahy.

Brazil is unequalled for the number and extent of its rivers. The *Amazon*, the largest river in the world, has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its northern tributaries are the *Rio Branco*, *Rio Negro*, and *Japurá*; its southern tributaries are the *Juruá*, *Purus*, *Madeira* and *Tapajós*, while the *Xingu* meets it within 100 miles of its outflow into the Atlantic. The *Tocantins* and *Araguaya* flow northwards from the Plateau of Matto Grosso and the mountains of Goyaz to the Gulf of Pará. The *Parnahyba* flows from the encircling mountains of Piahy into the Atlantic. The *São Francisco* rises in the South of Minas Geraes and traverses Bahia on its way to the Eastern coast, between Alagoas and Sergipe. The *Paraguay*, rising in the south-west of Matto Grosso, forms a boundary with Bolivia on its way through Paraguay to its confluence with the *Parandé*, which rises in the mountains of that name and divides Brazil from Paraguay. On the Iguaçu, which unites with the Uruguay at the Argentine boundary, are the majestic *Falls of the Iguaçu*, and on the São Francisco are the no less famous falls of *Paulo Afonso*.

GOVERNMENT.—Brazil was colonised by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King João VI. of Portugal, the centenary of Brazilian independence being celebrated by an International Exhibition at the capital (Sept. 7, 1922, to July 2, 1923). On Nov. 15, 1889, Dom Pedro II., second of the line, was dethroned and a republic was proclaimed. The constitution rests on the fundamental law of Feb. 24, 1891, which established a federal republic under the name of *Estados Unidos do Brazil*. The President and Vice-President are elected for 4 years by the direct votes of all male Brazilians over 21 years who can read and write; they are ineligible for the succeeding term. They are aided, as an

executive, by a Council of Ministers, who are responsible to the President and not to the legislature. Congress consists of a Senate of 63 members and of a Chamber of Deputies of 212 members; members of both houses are paid. The language of the country is Portuguese, foreign languages being read and spoken in the following order:—French, Italian, English, German and Spanish.

PRODUCTION.—The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. The immense iron deposits have been scarcely touched. Manganese is exported, and there are important deposits of monozite sand. Low-grade coal deposits are in the south. Its agricultural produce is abundant and its forests are immense. Cattle-raising is an important industry, the number being 34,270,324 (Census of 1920). The chief products of the country are coffee, sugar, raw cotton, hides and skins, cocoa, oleaginous fruits, *hera-maté*, rubber and tobacco: the rubber comes from the more northern provinces, especially the valley of the Amazon, and is shipped from Pará and Manaós; coffee coming chiefly from São Paulo. Tobacco and cocoa are grown largely, especially in Bahia. Cotton is being largely cultivated. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. The exports include also meat, hides, maize, beans, and *hera-maté* (tea). The imports consist principally of every description of manufactured articles, but the annual production of home industries is estimated at £45,000,000, of which about half were textiles (1922). Foreign capital to the amount of £200,000,000 has been invested in Brazilian undertakings in the ten years 1908-1917. The protective duties were again increased in 1887, 1893, 1896, 1906, and 1916. In 1922 the exported merchandise was classified: (1) animals and their products, £5,398,269; (2) minerals and their products, £1,060,076; (3) vegetables and their products, £62,119,265.

In 1922 the foreign trade of Brazil was shared as under:

Exports to:	Exports to:
Europe—	America—
France	U.S.A.
U.K.	Uruguay
Italy	Argentina
Germany	
Netherlands..	All countries £73,183,948

DEFENCE.—The peace effective of the Army is about 50,000 all ranks. The Navy consists of 2 Dreadnoughts, 2 old battleships, 5 protected cruisers, 2 scouts, torpedo boats, and some small vessels and aircraft.

EDUCATION.—Primary education is carried out by private initiative and at the cost of municipalities and States, in some cases with a Federal subsidy; there were over 1,000,000 pupils in 1920. Secondary and Technical education is carried out by Federal, State and Municipal authorities, with 42,000 pupils in Federal schools and 40,000 in State and Municipal institutions in 1920. Higher education (12,000 students in 1920) is carried out by Federal and State governments at the State University of Rio de Janeiro, and at the University colleges at Manaós (Amazones) and Curitiba (Paraná) and other private colleges.

COMMUNICATIONS.—In December, 1923, there were 18,703 miles of railway open. Length of

telegraph wires, 55,000 miles. In 1922 steam and sailing vessels of 27,459,975 tons (of which 6,344,712 were under the British flag) entered Brazilian ports, the principal harbours being Manaus, Pará, Maranhão, Pernambuco, Maceio, Bahia, Victoria, Rio de Janeiro, Santos, and Rio Grande.

Minister in London, M. Haji Micheff, 24 Queen's
 Gate Gardens, S.W. 7.

Counsellor of Legation, M. Petroff-Tchomakoff.
 and Sec., M. Dimitri Naoumoff.

The Kingdom of Bulgaria is bounded on the
 north by Rumania, on the west by Yugo-Slavia
 and Greece, on the east by the Black Sea, and
 on the south by Greece. The total area is stated
 at 40,000 square miles, with a population (1922)
 of 4,861,439. The prevailing religion of the
 Bulgarians is the Orthodox Greek Church, with
 a Gregorian (Western) Calendar (since 1916).

A Principality of Bulgaria was created by the
Treaty of Berlin (July 13, 1878), and in 1885
 Eastern Roumelia was added to the newly-
 created principality. In 1908 the country was
 declared to be an independent kingdom, the area
 at that date being 37,202 square miles, with
 a population of 4,337,500. In 1912-13 a successful
 war of the Balkan League against Turkey in-
 creased the size of the kingdom, but in August,
 1913, a short campaign against the remaining
 members of the League reduced the acquired
 area, and led to the surrender of about 2,000
 square miles to Rumania. On Oct. 12, 1915,
 Bulgaria entered the War on the side of the
 Central Powers by declaring war on Serbia. She
 thus became involved in the defeats of 1918, and
 on Sept. 29, 1918, made an unconditional sur-
 render to the Allied Powers. On Nov. 29, 1919,
 she signed the *Treaty of Neuilly*, which ceded
 the S. Dobrud to Rumania and E. and W.
 Thrace to Greece.

GOVERNMENT.—The executive power is vested
 in the Tsar, and is exercised by a Council of
 Ministers, appointed by him. The legislature is
 a single chamber National Assembly or *Sobranie*
 of 246 representatives, elected for a maximum
 term of four years by adult manhood suffrage.
 Metropolitan members receive 15 leva, and
 others 20 leva, a day and travelling expenses.

PRODUCTION.—Agriculture is the principal
 industry of the people and employs over half
 the population, the principal crops being wheat,
 rye, barley, oats, tobacco and fruit. The live
 stock includes sheep, goats, cattle, pigs, horses,
 asses and mules. Coal of good quality is mined

at Pernik and Trevna, and stone, iron, gold, silver, lead, manganese and copper are worked, but the mineral development is in its infancy. The chief manufactures are woollens, cottons and cigarettes. The exports consist principally of cereals (especially wheat), live stock, essence of roses, woollens, skins, cheese, eggs, timber, cocoons, and tobacco; the principal imports being textiles, metal goods and machinery, colonial wares, leather, building materials, petroleum and other oils, paper, salt fish, rice, and coal.

DEFENCE.—Before the War of 1914-1918 service in the Army was universal and compulsory, and on a peace footing it numbered about 58,000, all ranks. During the War (Oct. 1915-Sept. 1918) about 560,000 passed into the ranks of the Army, and of those over 250,000 became casualties. By the *Treaty of Neuilly* the Bulgarian Army is limited to 20,000 all ranks.

EDUCATION is free and compulsory and the proportion of attendances is good; the number of illiterates in Bulgaria is very small. There are few technical schools. Sofia has a University.

COMMUNICATIONS.—There were 1,845 miles of railway open in 1919 and about 250 miles under construction; 4,000 miles of telegraph line and 1,254 of telephone line. In 1921 there were 932 post and telegraph offices. The principal Black Sea ports are Varna and Bourgas; and Rustchuk, Sistor and Vidin on the Danube. In 1922 the vessels entered at Black Sea Ports numbered 3,934 (1,345,353 tons), and at the Danube ports 4,193 (587,182 tons).

Consul, Vicente Echeverría L., 2 York Gate, Regent's Park, N.W. 1.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Sama to Cape Horn south, between lat. 17° 15' and 55° 50' S., and long. 66° 30' and 75° 48' W. Extreme length of coast-line about 2,485 miles. Its extreme length is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a great height—the highest being, in Aconcagua Provincia, 7,019 metres (23,025 feet) with many others over 20,000 feet. The chain, however, lowers considerably towards its southern extremity. There are no rivers of great size, and none of them are of much service as navigable highways. In the north the country is arid. Chile is divided into 23 provinces and 1 territory, the aggregate area of which is estimated at 289,798 square miles.

The population (June 1, 1924) was 3,885,966. Included in the population are four distinct racial divisions; (a) the Spanish settlers and their descendants; (b) the indigenous Araucanian Indians, Fuegians, and Changos; (c) mixed Spanish-Indians; and (d) European immigrants, who were represented in 1910 by 20,000 Spaniards, 15,000 Italians, 14,000 British and Irish, 11,000 Germans, and 10,000 French. In 1923, the births numbered 151,805 (39·2 per 1000); marriages, 25,912 (6·7 per 1000); and deaths, 126,877 (32·8 per 1000).

GOVERNMENT.—Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1810, when a revolutionary war, culminating in the *Battle of Maypu* (April 5, 1818) achieved the independence of the nation. The present constitution was voted by an overwhelming majority at the plebiscite held on Aug. 30, 1925, and superseded that of May 25, 1833. It was drafted by a Committee appointed *ad hoc* by the *Junta de Gobierno* after the return of President Alessandri.

* President Alessandri (elected 1920) resigned Sept. 20, 1924, and the *Vice-President* (General Luis Altamirano) became *President of the Junta de Gobierno*. At the invitation of the *Junta*, President Alessandri returned to Chile on March 21, 1925, formed a new Cabinet in supersession of the *Junta*, and, on Oct. 1, 1925, handed over the Presidency to Don Luis Barros Borgoño, who remained in office until the election of his successor on Oct. 24, 1925. The members of the *Junta* (formed Sept. 10, 1924) were General Luis Altamirano; Admiral Francisco E. Nef; General Juan Bennett.

In accordance with the new Constitution, the President is to be elected by direct vote of all Chilean citizens who have the right to vote. The National Congress consists of a Senate of 45 members, and of a Chamber of a number of Deputies to be fixed by a new electoral law in 1925. There is universal adult male suffrage. From 1879-1882 Chile was at war with Peru and Bolivia, and Peru renewed her application for the return of the provinces of Tacna and Arica which were taken from her by Chile in the "Pacific War." Bolivia also demands an outlet to the Pacific. In 1922 Chile and Peru signed a Treaty to submit the Tacna-Arica question to the arbitration of the President of the United States, in accordance with whose decision a plebiscite Commission, composed of representatives from both nations, met at Arica in Aug. 1925 (under the Presidency of Gen. Pershing, U.S.A.) to organize the plebiscite for the final settlement of the matter at issue.

PRODUCTION, &C.—Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, flax, hemp, Chile pepper, and potatoes are grown extensively; the vine and all European fruit-trees flourish; the exportation of fruit to the United States is still in the experimental stage. The live stock includes (1922) 1,995,538 cattle, 4,569,166 sheep, 329,454 horses, 525,106 goats, and 263,336 pigs. The mineral wealth is considerable, the country being extremely rich in copper-ore and iron-ore; the production of copper in 1923 was 182,384 metric tons. The rainless north yields more especially nitrate of soda, iodine, borate of soda, gold and silver, a large number of mines yielding both being in actual work in Tarapacá, Guanaco, and Cachinal in Atacama, and Caracoles in Antofagasta; the centre, copper and silver; and the south, iron and coal (1,164,028 metric tons of coal were mined in 1923, and 146,817 tons of foreign coal were imported). In 1923 the production of nitrate was 1,903,524 metric tons. There are smelting-works for copper and silver, tanneries, corn and saw-mills, starch, soap, biscuit, rope, glassware, paints, mineral waters, boot and shoe, hosiery, hat, cloth, cheese, furniture, candle, match, brush, cordage and paper factories, breweries and distilleries; and the domestic industry furnishes cloth, embroideries, baskets, and pottery. The many ports favour commerce, and 13 lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to Liverpool occupying from 30 days. The staple articles of export are nitrate of soda, iodine, &c., copper bars and ores, silver ores, corn, flour, hides, wool, barley, honey and beans. The imports include silks, woollens and other textiles, food, and agricultural and mining machinery.

No. of industrial establishments (1922) 3,042, employing 64,740 persons, wage bill \$103,025,898, capital invested \$997,137,740, industrial production \$1,939,031,014, consumption of raw materials \$629,150,052 (including fuel).

COMMUNICATIONS.—There were (1922) about 5,080 miles of railway, of which 1,383 miles are British controlled. In April, 1922, a convention was signed by Chile and the Argentine for the construction of two more Trans-Andine lines. In 1922 there were 25,836 kilometres of telegraph, 979 post-offices, and 84,357 kilometres of telephone, some worked by English companies, with 4 public wireless stations.

The commercial marine numbers (1923) 120 steamers (83,788 tons) and 19 sailing vessels (19,864 tons). In 1923, 3,253 vessels (9,676,919 tons) entered Chilean ports from abroad, and 16,247 coasting vessels (13,038,074 tons); legislation was passed in February, 1922, reserving the coasting traffic to vessels of the Chilean mercantile marine.

DEFENCE.—All able-bodied male citizens from 20th to 45th year must serve in the militia. The peace effective of the active army is 24,962. The Air Force has a peace strength of 2 squadrons, with 60 pilots and 200 mechanics. The navy consists of 1 battleship, 1 ironclad, 6 cruisers, 12 destroyers, 5 torpedo-boats, and 6 submarines, with a complement of 6,560, all ranks.

EDUCATION is free, and in July, 1920, elementary education was made compulsory, and 64 per cent. of the children attended the 3,225 schools in 1923. There is a State University at Santiago. The National Library contains 293,085 volumes. The language of the country is Spanish and the religion is Roman Catholic. (The State subsidy to the Church is to be discontinued at the expiration of 5 years from the date of the new Constitution.)

FINANCE.—The estimates for the financial year 1925 (given below) show a gold surplus of \$66,916,917 and a paper deficit of \$244,534,000, a net deficit of \$50,474,942 (with the gold \$ converted at 190); but revised estimates have since been published in which a balance is struck and the deficit is wiped out.

Attaches, K. V. Dzung; Y. C. Tsao; K. S. Fu.
Consul-General, London, Wu Huang, 31 Eaton Square, S. W. 1.

AREA AND POPULATION.

Territory.	Square miles.	Population.
China Proper.....	1,532,800	414,011,519
Manchuria.....	363,700	22,083,434
Mongolia.....	1,367,953	3,000,000
Tibet.....	463,320	6,500,000
Chinese Turkestan ...	550,579	2,491,000
Total	4,278,352	448,085,953

The estimated foreign population of China was as follows in 1923: British, 14,775; Japanese, 201,704; Russian, 85,856; American, 9,356; Portuguese, 3,424; German, 2,233; French, 3,361; the total being 324,947. Out of a total of 7,921 foreign firms in China, 725 were British, 1,141 Russian, 3,940 Japanese, 184 German, 377 American, and 229 French.

China became a Republic on Feb. 12, 1912, with a President and Vice-President and an Executive Ministry, and a Legislature of a Senate (*Tsan Yi Yuan*) of 264 members and a House of Representatives (*Chung Yi Yuan*) of 596 members. The government of the 18 provinces is entrusted to civil and military governors, the latter (*Tuchun*) ranking first and holding practically all the powers of government; under them each province is subdivided into circuits superintended by *Taoyins* or intendants, and again into districts. All the territorial officials are appointed by the central Government, and the provincial governors, though free to act independently in many matters of local detail and finance, are responsible to the central Government at Peking in all important questions, and especially so in foreign affairs. The *Treaty of Kiakhta*, 1915, between China, Russia, and Outer Mongolia recognises the Hutukhta Khan as Ruler of Outer Mongolia, while China, as the Suzerain Power, appoints Residents at Urga and three other towns. *Mongolia* has since developed into an independent self-governing republic, and is in alliance with the Soviet Government at Moscow. The civil government of the three Manchurian provinces and of Turkestan is now similar to that of the province of China proper. The exact status of Tibet is still unsettled.

Chinese politics are not easy to understand, as they seem to consist in personal struggles between two or more armed parties, the admitted aim of the victors being personal gain. The revolution of 1911 brought out a victorious general in the person of Yuan Shih-kai, and since his death in 1916 his subordinates and their successors have been fighting for supreme power. Presidential elections have been held and their results disputed, and the Parliament elected in 1913 held occasional meetings in 1924, but its measures were not carried into effect. In 1924 the military struggle between Chang Tsoo-lin (the military dictator in Manchuria) and Wu Pei-fu which had turned in favour of the former since the spring of 1922, ended in the defection of the "Christian General," Feng Yu-shiang, who occupied Peking and declared his intention to put an end to the Civil War; but Wu Pei-fu, who had fled to the south, announced his intention to resist any such attempts, and to make a coalition of the Provinces against the Central Government. The Peking Provisional Government under Feng Yu-shiang have accepted the resignation of President Tsao-Kun, and the Emperor (who had lived in the Imperial Palace since his enforced abdication) has been stripped of his title and driven out of the Capital. In November, 1925, the Great Powers were in conference with the Peking Government on the tariff question, but the authority of the Peking Government is not very extensive, as Sun Chang-fan (the Tu Chün, or Military Governor, of Chekiang) is in opposition and has driven northwards Chang Tsoo-lin (the Tu Chün of Manchuria), who remains the champion of the Peking Government. General Wu Pei-fu appeared to be

collaborating with Sun Chang-fan in opposition to Peking. Feng Yu-hsiang, the Christian General, appeared to be more or less inactive, with a leaning towards the enemies of Peking, who are opposed to a successful outcome of the negotiations with the Great Powers, as such success would strengthen the Peking Government and curtail the power of the Provincial rulers.

EDUCATION.—Many changes in administration and development are under discussion, including a proposal to establish universal compulsory primary education. In 1918-19 there were 134,000 schools in operation, with 4,500,000 pupils. There is a University in Peking. In 1922 there were upwards of 1,250 Chinese newspapers and magazines, published at regular periods, in Peking, Shanghai, Tientsin, and the other large centres, in addition to English and other Foreign daily newspapers.

COMMERCE.—The net trade of the open ports is stated as follows, in *Haikwan taels* (in 1923 the *Haikwan tael*=3s. 9d.)

Year.	Imports.	Exports.	Total.
1914	569,241,382	356,226,629	925,468,011
1920	762,250,230	541,631,300	1,303,881,530
1921	906,122,439	641,255,537	1,507,377,976
1922	945,049,650	654,691,933	1,599,941,583
1923	923,000,000

The import of Indian opium is now prohibited.

External Trade, 1923.

Haikwan Taels.

Country.	Imports from.	Exports to.
Great Britain	120,397,229	43,207,130
India	55,240,982	12,329,306
Hong Kong	248,083,456	175,796,249
Straits Settlements.....	9,213,722	17,927,812
France	7,548,654	39,577,659
Germany.....	32,456,067	11,914,718
Italy	3,735,472	9,467,800
Japan	211,024,297	198,517,346
Russia	5,858,531	1,611,981
U.S.A.	154,447,651	126,803,772

COMMUNICATIONS.—*Railways.*—About 7,000 miles were open in Jan. 1922, inclusive of the Manchurian lines, while 2,500 miles more are projected or under construction.

Shipping.—The China Merchants Steam Navigation Co. have a fleet of 31 ships of an aggregate tonnage of 60,000. Besides this, there are a large number of small vessels engaged in the coasting trade and on the Yangtze. In 1922 the total tonnage of the 186,428 vessels and junks entered and cleared at Chinese ports was 124,131,361 tons. Of these ships 40,075 (47,698,139 tons) were British, 111,119 (32,857,745 tons) Chinese, 25,281 (32,961,333 tons) Japanese, and 4,670 (4,846,437 tons) U.S.A. In June, 1918, a vessel of 14,750 tons, constructed at the Kiangnan Dock and Engineering Works at Shanghai, was launched and supplied to the order of the United States Shipping Board.

Telegraphs are being rapidly constructed by the Central Government, and Peking is in communication overland with Europe and Tibet, the line being extended to Lhasa. In 1922 there were about 50,000 miles of land lines and several high-power wireless installations.

CUSTOMS AND POSTS.—The Chinese Maritime Customs is the controlling service; this body

consists of nearly 1,000 Europeans, a large proportion of them British subjects, all under the control of the *Inspector-General*. By an Imperial Decree of May, 1906, the Maritime Customs Dept. was transferred from the Foreign Board to the Board of Revenue, and two Chinese Administrators-General were appointed. But the change has not materially affected the powers hitherto exercised by the *Inspector-General*. In addition to the collection of dues at the Treaty Ports, this service manages the lighting and navigation thereof, and keeps a small fleet of cruisers to enforce its regulations. The Chinese Post Office, formerly a branch of the Customs, was transferred in 1911 to the Ministry of Communications, and a Foreign Co-Director General, with a considerable foreign staff, was appointed; letters can be sent all over the 18 provinces at a uniform rate of 3 cents for 20 grammes. The number of Chinese post offices (1921) was 2,429, and of postal agencies 8,877. In 1922, 426,363,616 postal packets and 4,791,420 parcels were handled.

BUDGET (July 1919-June 1920).

Ordinary Revenue	Taels 400,838,001
Extraordinary Revenue	80,581,785

Total	490,419,786
Ordinary Expenditure.....	Taels 271,289,205
Extraordinary Expenditure	224,473,681

Total 495,768,888

Chinese Debt (Jan., 1920).

War Loans outstanding	£30,000,000
Boxer Indemnity do.	48,000,000
Railway Loans do.	40,000,000
General Loans do.	50,000,000
Japanese Loans do.	30,000,000
Short term Loans do.	17,000,000

£215,000,000

About 10s. 2d. per head of the population.

At the end of September, 1922, according to the official statement of the Ministry of Finance, the total debt was *taels* 1,906,000,000, or less than 5 *taels* (11s.) per head of the Chinese population.

Included in the expenditure is the sum of 214,000,000 *taels* towards repayment of debt.

MANCHURIA lies to the north of China Proper, and has a total area of about 360,000 square miles, with a population estimated at 11,000,000. The capital is Mukden (pop. 250,000), a station on the Manchurian railroad and connected with the Russian system. Indigo, opium, cotton, tobacco, and various cereals are grown, and there is great mineral wealth.

MONGOLIA has a total area of 1,076,000 square miles and a population estimated at about 3,000,000, the desert of Gobi being within its borders. Outer Mongolia, by the Treaty of Kiakhta of 1915, is an autonomous state under Chinese suzerainty, with seat of government at Urga. Its ruler (Khan) has lost practically all political power and Mongolia has become a self-governing Republic, in alliance with the Soviet government at Moscow. A Bolshevik garrison is now maintained at Urga. The principal industry is cattle and sheep raising and the provision of transport animals.

TIBET (area, 750,000 square miles; pop. 3,000,000) borders on British India, see p. 606.

CHINESE TURKISTAN (or Sinkiang) has a total

area of 600,000 square miles and a population estimated at 2,000,000. It includes Zungaria and Chinese Tartary, and provides sheep, cattle, and transport animals for the caravan routes. The chief centres are Kashgar and Urumchi.

CAPITAL OF THE CHINESE REPUBLIC, Peking.
Population (1921), 1,300,000. The population of the principal ports in 1919 is estimated as follows:—Amoy, 400,000; Canton, 1,370,000; Changsha, 1,272,000; Chingkiang, 500,000; Chungking, 1,011,600; Foochow, 1,500,000; Hangchow, 729,950; Hankow, 290,000; Harbin, 365,000; Ichang, 450,000; Kiukiang, 380,000; Kinnchow, 590,000; Nanking, 900,000; Ningpo, 2,200,000; Shanghai, 1,600,000; Soochow, 1,100,000; Tientsin, 838,000; Tsingtau, 310,000; Wanhien, 752,000; Wenchow, 1,750,000; Wuchow, 350,000.

FLAG: Five horizontal bands, red, yellow, blue, white, black.

COLOMBIA

(República de Colombia).

President (1922-1926), General Pedro Nel Ospina, assumed office Aug. 7, 1922.
Government, Dr. Ramón Rodríguez Diago.
Foreign Affairs, Dr. Eduardo Restrepo Sáenz.
Finance, Dr. Jesus M. Marutanda.
War, Dr. Francisco Sorzano.
Instruction and Public Health, Dr. José Ignacio Vernaza.
Industries, Dr. Carlos Bravo.
Public Works, Dr. Laureano Gómez.
Posts and Telegraphs, Dr. Francisco Carbonell Gonzalez.

Envoy Extraordinary and Minister Plenipotentiary in England, Señor Dr. Don Luis Cuervo Marquez, 10 De Vere Gardens, Kensington, W. 8.
Secretary, Señor Dr. Don Jesus M. Yepes.
Consul-General, Señor Don Joaquín Orrantía, 7 Sicilian Avenue, Southampton Row, W.C. 1.
Cons.-Gen. in Liverpool, Señor Don Genaro Payan.

The Republic of Colombia lies in the extreme north-west of South America, having a coastline on both the Atlantic and Pacific Oceans. It is situated between 2° 40' S. to 12° 25' N. lat. and 68° to 75° W. long., with an estimated area of 461,666 square miles, and a population (Census 1918) of 5,855,000, of whom more than one-half are whites and half-castes. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic.

The principal rivers are the Patia, Cauca, Magdalena, Caquetá and Putumayo. The Patia flows through the famous *Mimica Gorge* of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guatara) is spanned by the Rumichaca Arch, or *Inca's Bridge*, of natural stone. On the Funza is the *Great Fall of Tequendama*, 480 feet in height.

The Colombian coast was visited in 1502 by Christopher Columbus, and in 1536 a Spanish expedition under Quesada established a government of certain coastal communities under the name of New Granada, which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811-1824. In 1819 Simon Bolivar (born 1783, died 1830) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829-1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and is now a separate Republic.

The Colombian forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; petroleum is available in large quantities but is unworked. The principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Manufactures, for home consumption, consist of woollen and cotton stuffs. The chief exports are coffee, precious metals, hides, india-rubber, and bananas. All religions are tolerated.

The standing army consists of about 6,000 men; the navy has been nearly abolished. Railroads are in their infancy, about 750 miles being open in 1920, with 8,680 (1907) miles of telegraph. There is a bi-weekly passenger and mail aeroplane service (German) between Barranquilla and Girardot, the transit to the coast from Bogotá being thus reduced to two and a half days; a similar service, by same company, is in operation between Cartagena and Barranquilla. The rate of exchange is about \$5 gold = £1 (approximately).

Spanish is the language of the country.

	1924.	1925.
Revenue (estimate) gold	\$38,285,396	\$36,326,066
Expenditure (est.) "	42,965,902	40,440,132

COSTA RICA.

(República de Costa Rica.)

President (1924-8), Ricardo Jimenez, assumed office May 8, 1924.

Minister of Foreign Affairs, Juan Rafael Arguello de Vars.

Treasury, Tomas Soley Quell.

Interior, Rafael Castro Quesada.

Education, Napoleon Quesada.

Works, Carlos Vello.

Public Safety, Pompilio Ruiz.

Minister in London (vacant).

Consul-General, Percy G. Harrison, 7 Crosby Square, E.C. 3.

The Republic of Costa Rica, the most southern State of Central America, extending across the isthmus, between 8° 17' and 11° 10' N. lat. and from 82° 30' to 85° 45' W. long., contains an area of about 23,000 English square miles, and a population (1924) of 507,193.

For nearly three centuries (1530-1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country joined in the War of Independence, and from 1824-1839 it was one of the United States of Central America.

The principal agricultural products are coffee, bananas, rice, maize, sugar-cane, potatoes, cocoa and beans, the soil being extremely fertile. The chief exports (1924) are coffee (£1,881,132), bananas (£1,353,884), cacao, gold and silver bullion, skins and hides, fresh fruit, timber and sugar. The imports are dry goods, hardware, provisions, railway materials, machinery, paints, and general merchandise (in 1924, 57 per cent. from United States, 17 from United Kingdom, 8 per cent. from Germany, 3 from Central America, and 7 from Hispano-America).

The chief ports are Limon, on the Atlantic coast, through which passes the whole of the important banana trade with the U.S. and U.K., as well as by far the larger part of the other exports and imports; and Puntarenas on the Pacific coast. In 1924, 504 foreign vessels (1,048,262 tons) entered at Costa Rican ports. About 415 miles of railway were open in 1924. In 1924 there were 276 post offices, dealing with 3,110,363 packets, and 150 telegraph offices (one wireless), with 2,279 miles of telegraph and telephone line. A considerable amount of English capital is embarked in the Republic. Spanish is the language of the country.

The island of Cuba (the largest of the "West India" Islands) lies between 74° and 82° W. long., and 19° and 23° N. lat., with a total area of 44,178 sq. miles and a population of 2,889,004 (Nov. 1919).

The island of Cuba was visited by Christopher Columbus, during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. The slave trade was abolished early in the 19th century, and the slaves were emancipated from 1880-1886. The government of Spain was marked by a generally corrupt administration, complicated by internal unrest fomented by external influences, and the various attempts at independence met with severe military repression. The separatist and autonomous agitation culminated in the closing years of the 19th century in a fierce and bloodthirsty war, and although a conciliatory movement was evinced by the Madrid authorities in 1897, the struggle was continued by the party of separation in the island. In 1898 the government of the United States put into execution a threat of interference by the despatch of the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which appears likely to remain an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment

of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from July to Sept., 1906, when the U.S. Government resumed control. On Jan. 28, 1909, a republican government was again inaugurated.

Of the total area of 28,000,000 acres, only about 1,375,000 acres are cultivated, 50 per cent. of these being under sugar cane and 30 per cent. under tobacco, sweet potatoes and bananas. Rice, coffee, cocon and maize are also grown and tropical fruits (oranges, coco-nuts, pine apples, &c.) flourish. The chief agricultural products of the island are tobacco and sugar (sugar crop in 1924-5, 5,070,347 tons; 1923-4, 4,066,642 tons); the chief product of the forests is mahogany, while cedar is also used for boxing the tobacco crop. The live stock includes about 4,500,000 cattle and 600,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

3,600 miles of railroad are open and about 6,000 miles of telegraph line; there are about 1,500 miles of roads.

Spanish is the language of the island.

Part of the Austro-Hungarian Monarchy declared its independence on Oct. 18, 1918, as the Czechoslovak Republic, and ten days later the *Národní Výbor* (National Council) of Czechoslovakia took over the administration of the independent territories. The political neighbours of the Republic are the Austrian and Hungarian Republics on the S., the German and Polish Republics on the N., the German Republic on the W., and the Ukraine Republic on the E. Within these limits are the former Austrian Provinces of Bohemia and Moravia and part of the Province of Silesia; and Northern Hungary from the Danube (at Bratislava, on the Austrian frontier) to the Carpathians (at the headwaters of the Ung River in the eastern slope of Mt. Vereczka)—a total area of about 54,877 sq. miles, with a population (Census of 1921) as under:—

Bohemia	6,781,936
Moravia	2,633,027
Slovakia	2,926,824
Silesia	650,442
Ruthenia	596,601

Total..... 13,588,830

Of the total population 8,760,957 (65·5 per cent.) are Czechoslovaks, 3,123,448 (23·3 per cent.) Germans, 747,096 (5·5 per cent.) Magyars, 461,466 (3·4 per cent.) Ruthenians, and 75,852 (0·5 per cent.) Poles. The new State was recognised by Austria in 1918 and by Hungary on March 10, 1919. The National Assembly, consisting of a Senate and a Chamber of Deputies, is elected by universal adult suffrage of both sexes. The executive power is exercised by a Council of Ministers, appointed by the President. The present Ministry is a Coalition of 5 parties (Social-Democrats, Agrarians, National-Socialists, National-Democrats, and People's Party (Clericals), which (as the result of the 1923 elections, supplemented by the elections in Ruthenia in 1924) control 165 votes in a Chamber of 298. The principal Opposition groups are the various German-Bohemian parties and the Communists. The Constitution guarantees religious and political freedom.

About 75 per cent. of the people are Roman Catholics.

As regards both natural resources and industrial development, Czechoslovakia is one of the richest territories in Europe. By the Peace Treaty it has acquired about 80 per cent. of the whole industry of the former Austrian Empire. It has several rich coalfields, and possesses valuable mineral resources which, notably in Slovakia, have not yet been fully developed. Radium, gold, silver, iron, graphite and lead, are all mined successfully, while the whole country is abnormally rich in mineral and thermal springs. Oil is found in Slovakia, and Bohemia has rich deposits of clay, kaolin and sand. The whole country is well farmed, and agricultural production is on a very high level of excellence. In foodstuffs, however, the country is not self-supporting. Thirty-three per cent. of the total area of the country is forest land, and both in the productiveness of the forests and the quality of the timber the forest wealth of the Republic is enormous. In its industrial development Bohemia may be compared to Belgium. In Bohemia, Moravia and Silesia, which have a total population of ten millions, more than four million people are engaged in industry. The various industries are well organised, and as regards both machinery and modern improvements the factories are as well equipped as any in Europe. Outside of Slovakia illiteracy is almost unknown, and both the German and Czech elements which compose the working-class population are hard-working and in many cases highly skilled. The new Republic possesses, therefore, many valuable economic advantages, and it is no exaggeration to state that Czechoslovakia is in a far more flourishing state than most of its neighbours.

Czechoslovakia has no direct access to the sea, but has a right of access over the Elbe and Oder to Hamburg and Stettin, for which purpose the Government proposes to canalise the Upper Elbe in order to connect it with the Oder and the Danube. If this proposal is carried out, the country will be traversed by a waterway affording a communication from the North Sea and Baltic, via the Danube, to the Black Sea.

Liberec (Reichenberg)—*Vice-Consul*, S. P. Elliott.

DANUBE COMMISSIONS.

The *International Danube Commission*, with its present headquarters at Bratislava (Pressburg), Czechoslovakia, was created by the Treaty of Versailles (1919), the States represented under the Treaty being Austria, Bavaria, Bulgaria, Czechoslovakia, France, Great Britain, Hungary, Italy, Rumania, Württemberg, and Yugo-Slavia. The Commission maintains the liberty of navigation and the equal treatment of all flags of the Danube from Ulm (Württemberg) to Braila (Rumania) and its international system, obtaining funds for administrative expenses from equal contributions of all the States represented. From Braila to Sulina (the mouth of the Danube), the navigation is controlled by the *European Commission of the Danube*, created by the Treaty of Paris 1856, after the Crimean War; the representation on this Commission is confined to France, Great Britain, Italy and Rumania. The river is connected by canals with the Main, a tributary of the Rhine (Ludwig Canal); this canal will be deepened to permit the passage of larger craft than at present, thus linking up the whole Rhine and Danube systems across Europe from the North Sea to the Black Sea. The total length of the river is about 1,738 miles, and ocean-going vessels reach Braila, where transshipment into river barges is necessary. A pilotage and river-improvement service is maintained by the International Commission at the Iron Gates (headquarters, Orsova), the expenses being met by shipping dues.

The chief towns on the Danube are the Black Sea port of Sulina, with Galatz (confluence of the Sereth), Braila, Turnu-Severin and Orsova (Iron Gates), in Rumania; Russchuk, Vidin and Lom Palanka, in Bulgaria; Belgrade, the capital of Yugo-Slavia; Buda-Pest, the capital of Hungary; Bratislava (the present seat of the Commission), in Czechoslovakia; Vienna, the capital, and Linz, in Austria; Passau and Regensburg, in Bavaria; and Ulm, in Württemberg.

THE INTERNATIONAL DANUBE COMMISSION.

British Delegation, Col. J. G. Baldwin, C.B., Min. Plen. (Delegate); R. T. Smallbones, M.B.E., H.B.M. Consul, Bratislava (Asst. Delegate).

EUROPEAN DANUBE COMMISSION.

British Delegate, Col. J. G. Baldwin, C.B., Minister Plenipotentiary.

DANZIG.

(Freie Stadt Danzig.)

Under Articles 100 and 102 of the Treaty of Versailles, the City of Danzig with the surrounding territory (constituting a total area of about 726 sq. miles, with a population estimated at 356,000) was cut off from Germany in favour of the Allies who undertook to set up a Free City, under the protection of the League of Nations, Poland undertaking to conduct her Foreign Affairs. The Free City was constituted Nov. 15, 1920, with an executive Senate and an elected Legislature of 120 members. The harbour is administered by a mixed board of Poles and Danzigers under a neutral President, and the League of Nations is represented by a resident High Commissioner. In Jan., 1922, the Free City entered the Polish Customs Union. The principal exports are timber and sugar, and the imports herrings, coal, machinery, artificial manures, fats, foodstuffs and textiles. The tonnage of ships entered in 1924 was 1,647,329 tons, and of those cleared 1,648,025 tons.
Danzig—*High Commissioner of League of Nations*, Mervyn Sorley Macdonnell, O.B.E.

Consulates at Hull, Liverpool, Manchester, Belfast, Falmouth, Newcastle-on-Tyne, and Leith.

A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zealand, Funen, Lolland, &c., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34'—57° 44' N. lat. and 8° 5'—12° 40' E. long., with an area of 25,042 square miles, and a population (July 1, 1921) of 3,283,000, an increase of 210,000 since 1920 (164,500 being due to the inclusion of Slesvig). Nearly one-half of the population live exclusively by agriculture, and one-fourth by manufactures and trade.

In 1864 Denmark was attacked by Prussia and Austria and deprived of Schleswig-Holstein (Prussia taking the whole territory after a further war with Austria in 1866). At the conclusion of peace between the Central Powers and the Allies in 1919, the question of Schleswig-Holstein was subjected to a plebiscite of the inhabitants, and North Schleswig is now part of Denmark.

The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter. Its manufactures are, for the most part, for home consumption. Its principal imports are coals, manufactured goods (woollens, silks, cottons), iron, hardware, wine, fruit, tea, maize, and colonial produce. In 1924, 1,254,536 hectares were under corn crops, 473,789 sugar and other beets, and 878,413 hay crop. In July, 1924, the live stock numbered 547,937 horses, 2,666,584 cattle, 302,366 sheep, and 2,868,139 swine. The crops in 1924 included 9,174,650 hkg. (hkg. = 100 kilogrammes) of oats, 7,450,290 of barley, 2,650,210 rye, 4,790,300 mixed corn, and 1,595,810 qrs. of wheat. Its chief exports are agricultural produce, including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn-meal and oil-cake, horses, and cattle. There is a sea-going mercantile marine of 623 steamers, with a tonnage of 452,413. There are (1924) 4,969 kilometres of railway and 15,059 miles of telegraph line.

DEFENCE.—The Army consists of about 12,000 trained men, the vote for 1923-24 amounting to Kr. 33,000,000 (including supplementary estimates of Kr. 2,000,000). The Navy consists of 4 coast-defence ironclads and 1 completing, 2 small cruisers, 23 torpedo-boats (built and building), 14 submarines (built or building). Vote, 1923-24, Kr. 17,000,000.

EDUCATION is free and compulsory, the schools being maintained by local taxation. Special schools are numerous, horticulture and agriculture predominating. The University is at Copenhagen.

Consul, Octavio Ventura.

Vice-Consul, A. M. Ventura.

The Republic of Santo Domingo, formerly the Spanish portion of the island of that name, is the oldest settlement of European origin in America, having been founded in 1496 by Bartolomeo Columbus, who named it Hispaniola. The island was peopled by the Spaniards with imported African slaves, who soon exterminated the "Indian" tribes. In 1821 an independent republic was proclaimed and the Spaniards abandoned the country. The present republic

of San Domingo broke away from Haiti in 1844 and its independence is secured under a law of Nov. 6, 1844. The Dominican Republic comprises an area of 19,322 square miles, with a population of 897,405.

On Nov. 29, 1916, American Military Forces landed in Santo Domingo and a military Government was proclaimed. From Oct. 21, 1922, a provisional Dominican government was in office until July 12, 1924, when a properly elected Constitutional Government was installed, with complete authority over all matters except the collection of the customs and the redemption of the Foreign obligations, which continue to be administered by an American official.

Sugar and cocoa are the most important crops, and coffee and tobacco are grown in fair quantities, the other products being mahogany, furniture woods, cotton, wax, honey, logwood, turtle-shell, hides, maize, lignum vitae and divi-divi. There are about 150 miles of public railroad, and telegraphic (2 wireless stations) and telephonic communication has been established throughout the Republic, which is connected by cable with North and South America, New York, Curacao, Porto Rico and Cuba. The programme of highway construction is being actively pursued, and in addition to the highway (already completed) across the island, a direct road from Santo Domingo to Port au Prince, the capital of Haiti, is well advanced. Up to Oct. 31, 1924, there were 343 miles of first-class road constructed and opened.

Of the import trade in 1924, 68 per cent. came from U.S. and 5 per cent. from Great Britain. British trade is hampered by distance (as compared with U.S.), by lack of resident British merchants, lack of British industrial undertakings in the Republic, and by indifferent and slow steamship services from Europe.

	1923. (U.S. \$)	1924. (U.S. \$)
Imports	\$10,118,910	\$11,207,731
Exports	5,265,206	10,979,222
Imports from U.K.	18,245,082	21,580,571
Exports to U.K.	26,042,821	30,262,666
Imports from U.S.	13,412,210	13,534,276

EQUADOR.

(República del Ecuador.)

President (1924-1928), Dr. Gonzalo S. Cordova, assumed office Sept. 1, 1924.

Foreign Affairs, Señor José Rafael Bustamante. Interior, Señor Alberto Larrea Chiriboga. Finance, Señor Miguel Angel Alborno. Public Instruction, Señor Dr. Camilo O. Andrade. War and Marine, Señor Leonardo Sotomayor.

Minister in London, Señor Don Gonzalo Zalumbide.

Consul-General in London, Señor Don Ernesto Chacon, 23 College Hill, Cannon St., E.C. 4.

Consuls at Liverpool, Birmingham, Southampton, Glasgow, and Cardiff.

An equatorial State of South America, extending from lat. 1° 38' N. to 6° 5' S., and between 60° 20' and 81° W. long. (according to the Ecuadorian geography, but there are boundary disputes with Peru), comprising an area of 276,000 English sq. miles.

The former Kingdom of Quito was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Vice-Royalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822).

The Republic of Ecuador is divided into 17 provinces and one territory. It has a population of about 2,000,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizos. The territory of the Republic extends across the Western Andes, the highest peaks of which are Chimborazo (20,702 ft.), Illinza (17,405 ft.), Carihuairazo (16,515 ft.), Cotacachi (16,301 ft.) and Pichincha (16,000 ft.) in the Western Cordillera; and Cotopaxi (19,498 ft.), Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,690 ft.) and Sincholaque (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common.

Its chief products are cocoa, vegetable ivory, cotton, coffee, india-rubber, sugar, orchella weed, straw hats and hammocks, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, silver, iron, copper, lead, zinc, and sulphur.

and sulphur is found in many parts. The chief exports are cocoa, caoutchouc, vegetable ivory and gold, cinchona bark, Panama hats, coffee, and cattle; the chief imports are textiles and other manufactured goods. A railroad connecting Guayaquil and Quito was opened in 1908. The Galapagos (Tortoise) Islands (2,870 square

The language of the country is Spanish.

3rd Sec., Aly Badawy.

Egypt lies between 22° and 32° N. lat. and 24°–37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is continuous with the Sudan. The western boundary runs from a point on the east, N. of Sollum (long. 25° E.), inland in a south-westerly direction for some distance and then turns S. along a meridian line approximately in long. 24° E. until it meets the parallel of 22° N. lat., which forms the N. boundary of the Sudan. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15' E. long.) to the head of the Gulf of Aquaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aquaba and the Red Sea. Within these boundaries is enclosed an area of about 363,181 sq. miles, with a population (Census

of 1917) of 12,718,255, estimated (1923) at 13,895,000.

Physical Features.—The Nile valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country. The Nile has a total length of 3,470 miles from the Victoria Nyanza to its mouth. In the 660 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 13 feet. Westward from the Nile Valley into Tripoli stretches the Libyan Desert. Though as a whole it constitutes one of the most arid and inhospitable regions of the world, the Libyan Desert contains a number of depressions wherein wells and springs furnish water in sufficient quantity to irrigate small areas and to support populations of several thousands. These depressions are the Oases, of which the principal from S.E. to N.W. are known as Kharga, Bahariya, Bahariya, and Siwa. On the eastern edge of the Libyan Desert, a few miles south-west of Cairo, stand the Pyramids of Giza, of which the highest, the Great Pyramid, is 451 feet high. Close to the pyramids is the Great Sphinx, 180 feet long. In the Eastern Desert a great back-bone of high and rugged mountains extends north-westward from Abyssinia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux of sandstones and limestones, dissected by wadis (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main wadis from well to well, and here and there are to be found small encampments of wandering Arabs. The north (Mediterranean) coast of Sinai is flat and sandy. Inland, the ground gradually rises into a highly dissected limestone plateau, which extends southward for about 150 miles and terminates in the great scarp of El Tih. South of El Tih the character of the country abruptly changes, the southern third of the peninsula being formed of rugged granitic mountains intersected by deep ravines. Springs and wells occur in fair abundance, mostly in the wadis, and running water (mostly brackish) is found at a few points.

Native Population.—There are three distinct elements in the native population of Egypt. The largest, or "Egyptian" element, is a Hamito-Semitic race, known in the rural districts as *Fellahin* (*Fellah* = ploughman, or tiller of the soil). The *Fellahin* have been mainly Muhammadans since the conquest of the country in the 7th century, but 834,474 Coptic Christians are enumerated in the towns and villages. These Egyptian townsmen and peasantry numbered 12,404,942 in the total of the Census of 1917 (including 126,432 local subjects of foreign origin). A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts (32,663 Bedouins and

107,364 Sudanese and Berbarin), of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated land of the Nile Valley and the Fayum. The third element is the *Nubian* of the Nile Valley between Aswan and Wadi-Halfa, of mixed Arab and negro blood. The Bedonins and Nubians are Muhammadans.

Foreign Population.—At the Census of 1917 the foreign residents were 205,998, of whom 30,797 were Turks, 56,731 Greeks, 40,198 Italians, 24,354 British, 21,270 French and Tunisians, 2,789 Austro-Hungarians, 4,225 Russians, 157 Germans, 23,932 other Europeans and Americans, and 1,496 Persians.

Religions.—At the Census of 1917 there were 11,623,753 Muhammadans, 1,026,107 Christians, 59,581 Jews and 8,814 other religions.

Government.—From B.C. 30 to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire, and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from among the Mamelukes, or bodyguard. *Mohammed Ali*, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811, and was eventually made hereditary governor of Egypt and the Sudan by a *firman* from the Sultan of June 1, 1841. *Ismail* (1863-1879), was granted (by *firman* of May 14, 1867) the title of *KHEDIVE*, the previous rulers having held the title of *Vali*, or Governor. The wild extravagance of *Ismail* drove him to raise enormous loans in Europe, which plunged the country into such financial embarrassment that the Governments of France and Great Britain intervened and forced *Ismail* to abdicate, appointing his son *Tewfik* (1879-1892) to succeed him. A series of reforms was initiated, but further progress was interrupted by a military revolt, headed by an officer of the Egyptian Army (*Ahmed Arabi Pasha*). The revolt assumed alarming proportions, but the French Government declined to intervene, and a British expedition was despatched to re-establish the authority of the Khedive. The British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohammed Ahmed, of Dongola, who proclaimed himself a *Mahdi* of Islam. In 1892 *Tewfik* was succeeded by his elder son *Abbas II.*, who declared himself an adherent of the Central Powers and was deposed in 1914. *Hussein Kamil Pasha* being appointed in his stead. On November 18, 1914, a British Protectorate was declared over Egypt, which was therefore taken from the suzerainty of the Sultan of Turkey, and the Khedive assumed the title of Sultan. Sultan Hussein Kamil died October 9, 1917, and was succeeded by his brother, the present King. In March, 1922, Egypt was declared to be an independent kingdom. The Constitutional régime was elaborated on April 19, 1923, by Royal rescript and general elections took place for a Parliament, consisting of two houses, which assembled March 15, 1924.

Local Government.—The chief towns constitute governorships (*muhāfazas*), and the remainder of the occupied country is divided into provinces (*mudiriyas*), which are subdivided into districts

(*markaz*), each under a *mamār*, who controls the head man (*onda*) of each village in his district. By the law of 1883 provincial councils were instituted, consisting of two representatives from each *markaz*, under the presidency of the *mudir* (or governor) of the province. These councils were reorganized in 1910 and were made the elementary education authority for the province, with certain restricted powers of local government.

Defence.—The defence of Egypt is reserved by the Constitution and remains under British control, the British garrison (under the command of a British general officer) amounting to 3 cavalry regiments, 9 batteries of artillery, 2 companies of engineers, 7 battalions of infantry and 1 armoured car company. Service in the *Egyptian Army* is nominally compulsory on all Egyptian subjects between the ages of 19 and 27, the recruits required each year being chosen by ballot; but certain classes (professors, students, Government employees, &c.) are exempt, and exemption may also be purchased for £220, if paid before the ballot. Natives of the Sudan are enlisted voluntarily for service in the Egyptian Army, which consisted of 992 officers and 20,762 men in 1923.

There is no *Navy* in the proper sense of the term; there are 3 small cruisers belonging to the Coast Guard and Fisheries service, and 4 vessels under the Ministry of Communications, while the different Government Departments possess steamers on the Nile for inspection purposes.

The *Egyptian Police* (under the Ministry of the Interior) consists of City and Provincial Police, the former comprising 306 officers (75 Europeans), 476 European constables, and 6,585 men, the latter 359 officers and 6,162 men. There are also 60,859 *ghaffirs*, or native night-watchmen.

Education on native lines has long been given in elementary vernacular schools. The native system of education is completed by the more promising pupils at the Azhar University in Cairo, the principal University of the Moslem world. In 1922-3 there were 151 *Elementary Schools* (*Maktabs*) under Government supervision, with 23,996 pupils and 3,710 *Maktabs* under inspection for grants-in-aid with 279,409 pupils; there were also 54,528 pupils in other elementary schools. The government primary schools give a 4-years' course and prepare for admission to secondary, agricultural and other special schools. There were also 1,148 Egyptian institutions with 111,935 pupils and 569 foreign institutions with 56,916 pupils. There are *Colleges* of Medicine, Law, Education, Engineering, Commerce, Veterinary Science and Agriculture at Cairo. Much assistance is given to education by private enterprise and benevolence and foreign schools abound. A National University was founded in 1908 at Cairo.

Agriculture.—The total area of Egypt is estimated at approximately 222,400,000 English acres, of which about 8,450,000 acres are formed of the alluvium brought down by the Nile from the Abyssinian hills, the remainder being chiefly limestone desert. Only the former are cultivable, and only the portion that can be irrigated from the waters of the Nile—this portion amounts at present to 5,400,000 acres (1919), and is capable of extension (to 7,600,000 acres) by the improvement of water storage facilities and means of distribution. By these works, and by the construction of a vast network of canals with controlling masonry works,

a small part of the excess waters of the river have been stored and distributed at all seasons of the year, and perennial irrigation has been extended throughout Middle and Lower Egypt. The increase in the value of the land has been enormous, and some 2 million acres have been added to the cultivable land of Egypt. Although nearly the whole population is directly or indirectly connected with agriculture, the total given in the census return of 1917, under the headings of proprietors, tenants and labourers, &c., amounts to 4,003,900 persons, representing only 30.5 per cent. of the population. In 1921 the land was held as to 5,029,919 *feddans* by 1,923,396 native owners, and as to 565,788 *feddans* by 8,021 Europeans. The agricultural land is of two kinds. The first is that which is under the basin irrigation system, by which the land receives one watering only. This watering consists of a flooding at high Nile: as the flood decreases, the seeds of the various crops are sown, and the basin fields are left without further watering. Harvests of wheat, barley, beans, clover, vetches and lentils are gathered in due course. The second kind of land is that which is perennially irrigated by means of canals, and receives waterings according to rotations laid down by the Irrigation Department. In these lands, which are for the most part in Lower Egypt, cotton, maize, wheat, rice, beans, barley, sugar cane, clover, vegetables and fruit are the chief crops. The agricultural year is divided into three seasons or periods. *Saifi* (summer) commences about March and ends about October, the exact dates of sowing and harvesting varying according to the crops and to the localities. The principal crops grown during this period are cotton, rice, sugar cane, and Sorgho (a variety of maize). *Nili* (flood), part of the preceding one, has the date of its commencement fixed by the Irrigation Department according to the quantities of water available before the flood, which reaches its highest level in September—it generally commences in July. The principal crops are maize and rice. *Chitwi* (winter) commences in November and ends in June. The principal crops are cereals, berseem (a variety of clover) and—mainly in Upper Egypt—beans, lentils, onions and helba. In 1923 there were 1,588,000 *feddans* under cotton, the crop being estimated at 6,531,000 *kantars*. In 1923 the cotton exports were 7,472,611 *kantars*, valued at £49,516,369.

Live Stock.—In 1923 the cattle numbered 634,459, buffaloes 656,288, horses 36,573, mules 22,235, donkeys 603,389, and pigs 15,768.

Minerals.—The riparian districts of the lower Valley of the Nile are ill-provided with workable mineral deposits, with the exception of abundant building materials. The mineral resources of Egypt, therefore, are situated in its otherwise barren deserts. Known deposits are chiefly situated at great distances from one another and from the Nile. This fact has retarded exploration and development, but of late years considerable progress has been made. Owing to lack of knowledge of mining, consequent upon their pursuit being entirely agricultural, the local industrial classes have had very little hand in the existing enterprises, whose capital and organisation are chiefly foreign.

Manufactures and Industries.—The principal articles of Egyptian manufactures are cotton and woollen fabrics, silks, embroideries, brass, silver and copper ware, leather goods, rugs,

pottery, alcoholic beverages, sugar, perfumery, and cigarettes. The principal Egyptian industries are dyeing, tanning and cement.

Railways.—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta, and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to Shellal, the First Cataract. At this point a steamer connection runs to Wadi Halfa, connecting the Egyptian State with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line, which it is hoped to extend eventually to the frontier at Sollum, thus joining Tripoli to Egypt. The total length of the Egyptian State Railways (excluding the Auxiliary Railways of Upper Egypt and the Western Oases Railway) on March 31, 1924, was 1,923 miles: 27,585,000 passengers and 5,780,491 metric tons of merchandise were carried during 1923-4, the net receipts being £11,810,487. The gauge is standard (4 ft. 8½ in.), with the exception of 138 miles between Luxor and Shellal, which are 3 ft. 6 in. gauge. There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 282 miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oasis of Kharga with the Nile Valley. In addition to the Government lines, there are 818 miles of light railways exploited by public companies.

Caravan Routes.—The principal caravan routes lead to the Oases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the Darb el 'Arbain, leading to Dar Fur and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir being probably the most frequently used.

Shipping.—For the SUEZ CANAL see pp. 791-2 and p. 85.—Apart from the three great seaports of Alexandria, Port Said, and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollum and Matruh on the Mediterranean, Tor, Abu Zenima, Zeitia, Jemsa and Hurghada in the Gulf of Suez, and Safage, Qosseir and Halaib on the Red Sea. The Khedivial Mail Steamship Line (which is under British management) has its headquarters at Alexandria and a depot at Suez. The principal port is Alexandria, where 1,766 vessels (3,729,446 tons) entered and 1,772 vessels (3,734,332 tons) cleared in 1923. The traffic through Port Said amounted in 1922 to 565 vessels entered and 584 cleared.

Posts and Telegraphs. There were in 1923 3,030 post offices and stations, dealing with 57,166,000 letters and post-cards, and 22,742,000 newspapers, &c., and a total foreign correspondence of 38,000,000. There were on March 31, 1923, 125,080 miles of telegraph and telephone wire. A system of savings banks has been introduced, under the control of the Post Office, the actual deposits being collected in rural districts by the *sarrâf* (village tax-collector).

	1923-24.	1924-25.
Revenue	£36,252,939	£34,400,000
Expenditure	31,466,479	34,275,483
	1923.	1924.
Total Imports ...	£45,276,941	£50,736,918
Total Exports ...	58,387,327	65,733,935
Imports from U.K.	14,771,823	15,122,000
Exports to U.K.	28,354,293	38,268,000

Debt.—The *Caisse de la Dette*, a body representing the creditors of the Egyptian Treasury, has considerable powers and special privileges. The *Caisse*, appointed during an era of bankruptcy, succeeded in protecting the interests of the bondholders, but as Egypt became solvent and prosperous, its stringent regulations prevented the development of the country out of surplus revenue, a large part of which was held in suspense as contingent security for the service of the debt. Though the *Caisse* still exists, its duties are now limited to receiving the revenues necessary for the interest and for the payment of the coupons as they become due, while it also holds a considerable reserve fund, the interest on which reduces the amount of the Treasury contribution. The Egyptian debt was stated as follows (in £ sterling) on April 1, 1923 and 1924:—

Debt.	1923.	1924.
Guaranteed Debt, 3 per cent.	£ 3,465,300	£ 3,271,200
Privileged Debt, 3½ per cent.	31,127,780	31,127,780
Unified Debt, 4 per cent.	55,971,960	55,971,960
Total	92,565,040	92,370,940

The Cost of the Debt (in the Budget for 1924-25) inclusive of £E664,826 assigned to the service of the Ottoman Loans of 1855, 1891 and 1899, which were guaranteed on the Egyptian Tribute, was stated at £E4,614,692.

CAIRO, the capital (population about 800,000), stands on the E. bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century. The bazaars are always interesting, especially the Khān-el-Khalili, the Hamzāwi, and the Brass Bazaar, though the Muski, which leads to them, is fast losing its oriental character.

ALEXANDRIA (population about 480,000), founded B.C. 332 by Alexander the Great, was for over 1,000 years the capital of Egypt. Its great Pharos, or lighthouse, was one of the "Seven Wonders of the World" (see p. 85). It now contains two royal palaces, Ras-el-Tin and Montaza, while almost the entire cotton trade of the country is here controlled by the big dealers and brokers. At the census of 1917 the towns of Tanta (74,195), Port Said (75,192) and Assiut (51,431) also exceeded 50,000 inhabitants.

CAPITAL, CAIRO.

FLAG: Green, with 1 white crescent (convex side to flagstaff), and three 5-pointed white stars (arranged in an equilateral triangle) between the horns.

via Trieste, 5 days; via Marseilles, 6 days.

ESTONIA.

(Eesti Wabariik.)

Head of the State, M. Juri Jaakson.
Foreign Affairs, M. A. Birk.

Minister in London, Dr. Oskar Kallas, 167
Queen's Gate, S.W. 7.

1st Secretary and Consul-Gen., R. A. Müllerson.
2nd Sec., E. Kirotar.

The most northerly of the Baltic provinces, is bounded on the N. by the Gulf of Finland, on the S. by Latvia, on the W. by the Baltic Sea and on the E. by Lake Peipus and Soviet Russia (along a line roughly parallel with the eastern shore of the lake). The islands of Dago, Osel and other smaller islands in the Baltic form part of the Republic. It has an area of about 17,953 sq. miles (within the boundary settled by agreement with Soviet Russia), with a population (1920) of about 1,002,000 (91 per cent. Estonians, 5·3 per cent. Russians, 1·3 per cent. Germans, and 2·4 per cent. Jews and others). A large portion of the surface consists of forests, moors, and small lakes. Agriculture is the chief industry, rye, oats, barley, and flax being the chief crops, and dairy farming is carried on. There are important manufactures, including distilling, oil pressing, woollen, cotton, tobacco, cork, soap, and petroleum. There were (1924) 677 miles of broad gauge and 462 miles of narrow gauge railway in operation.

Legislature consists of a single-chamber Assembly (Riigikogu) of 100 members elected for 3 years by universal adult suffrage. The executive is entrusted to a council of Ministers, the Prime Minister being the Head of the State.

Revenue	1925. Estonian Marks 7,103,000,000
Expenditure	7,293,000,000
External Debt:—	
To Great Britain	£917,200
To U.S.A.	\$18,370,704
To Denmark	Dan. Kr. 463,930
To Sweden	Swe. Kr. 425,875

Exports	1924. E.M. 7,865,800,000
Imports	8,050,300,000

Of the Imports 36 per cent. came from Germany, 14 from U.K., 13 from U.S.A. (grain), and 13 from S.S.S.R. (grain); of the Exports, 33.5 per cent. were taken by Great Britain (flax and butter), and 22.5 per cent. by Germany (butter).

CAPITAL, Reval (Tallinn, pop. 1922, 125,000), an important Baltic port, connected by railway with Leningrad; other towns are Dorpat (50,000), the seat of the University; Narva (35,000), the chief manufacturing centre; and Parnu (25,000), on the Gulf of Riga.

FLAG: Blue, black, white.

Consul-General, Capt. L. Norrgren, 57 Gordon Square, W.C. 1.

A country situated on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and united to the Russian Empire, as an autonomous but not sovereign Grand-Duchy, in 1809. When the Russian Empire broke down in 1917 Finland declared herself an independent, sovereign state (Dec. 6, 1917). The following year the country suffered severe disturbances on account of the aggression of Russian Bolshevism, but succeeded in restoring order, and the relations between Finland and Russia were finally settled by the Treaty of Dorpat (Oct., 1920). The area is 149,989 square miles, with a population (1920) of 3,105,103, of whom 2,574,228 are

Finns, 340,963 Swedes, and 1,603 Laps, leading a nomadic life in the north. Nearly all the inhabitants are Lutherans. The *Åland Archipelago*, a group of some 300 small islands at the entrance to the Gulf of Bothnia (area 210 square miles, population about 27,000), forms part of the Republic. There are 3 universities, 1 at Helsinki (Helsingfors) and 2 at Turku (Åbo); the university of Helsinki (founded 1640) has 3,000 students, of whom 800 are women. In addition, there are 1 technical and 2 commercial high schools. The leading crops are rye, barley, oats, potatoes. Saw mills, wood pulp, cellulose and paper manufacture provide the chief industry, and the forests (62,400,000 acres) are a great source of wealth; there is no European country so wealthy in forests except Russia, the exports of timber in 1924 being 1,888,559 standards (chief customer U.K., 759,599 standards); dairy produce is also exported, the butter exports (1924) being 8,228 tons (U.K. 6,883 tons). There are (1924) 2,822 miles of railroad and about 3,550 miles of telegraph, with a well developed telephone system. There is railway connection with Sweden and Russia and telephone connection with Estonia, Russia, Sweden and Norway. The merchant fleet (1924) consists of 4,865 vessels (mostly small), of which 637 are steamers.

Service in the Army is universal and compulsory, the peace effective being about 36,600 all ranks; there is also a volunteer organisation of Civic Guards with an enrolled strength of about 100,000.

The country was formerly governed by the Finnish Senate, of 22 members, with a Diet of 4 estates elected by the people, but under the Constitution of Jan. 1, 1907, there is a single Chamber elected by universal suffrage of both sexes, women being likewise eligible for election to the Chamber. Finland was thus the first country to concede woman suffrage and representation, and it is noteworthy that it was gained without agitation.

Finnish and Swedish are the official languages.

FRENCH PRESIDENTS.—M. Doumergue is the eleventh
President of the Third Republic. (1) Marshal Mac
 Mahon (May 24, 1871, resigned Jan. 30, 1879); (2) M. Jules
 Grévy (1879, resigned Dec. 2, 1891); (3) M. Sadi Carnot
 (Dec. 3, 1891, assassinated at Lyons, June 25, 1894); (4)
 M. Casimir-Perier (June 27, 1894, resigned Jan. 15, 1895);
 (5) M. Félix Faure (Jan. 17, 1895, died Feb. 16, 1899); (6)
 M. Emile Loubet (Feb. 18, 1899, until Feb. 18, 1906); (7)
 M. Armand Fallières (Feb. 18, 1906, until Feb. 18, 1913);
 (8) M. Raymond Poincaré (Feb. 18, 1913, until Feb. 18,
 1920); (9) M. Paul Deschanel (Feb. 18, 1920, resigned
 Sept. 19, 1920); (10) M. Alexandre Millerand (Sept. 20,
 1920, resigned June 11, 1924).

There are also Consuls at Southampton, New-
 castle-upon-Tyne, Cardiff, Glasgow, Dublin, and
 in Jersey.

The most westerly State of Central Europe,
 extending from 42° 20' to 51° 5' N. lat., and from
 7° 45' E. to 4° 45' W. long., bounded on the north
 by the English Channel and Straits of Dover (Pas
 de Calais), which separate it from England. Its
 circumference is estimated at about 3,000 miles,
 and its area (in 1924) at 207,076 square miles,
 divided into 87 departments, including the island
 of Corsica, in the Mediterranean, off the west
 coast of Italy. The territory ceded by the
Treaty of Frankfurt (May 10, 1871) amounted to
 5,602 square miles; that regained by the *Treaty*
of Versailles (June 28, 1919) to 5,819 square miles,
 making the present area of France (exclusive of
 Algeria) 212,895 square miles, with a population
 (census of March 6, 1921) of 39,209,666 (inclusive
 of Alsace and Lorraine). In 1923 there were
 761,861 births, 356,501 marriages, 23,600 divorces,
 and 666,990 deaths; in 1920 the excess of women
 over men was 2,500,000.

France has always been attractive to foreigners
 of whom (1921) 1,550,449 were resident there,
 including 470,873 Italians, 415,546 Belgians,
 303,141 Spanish, 55,456 British, 34,027 Russians,
 and 30,948 Americans.

GOVERNMENT.—The monarchical system of
 government was overthrown by the *French*
Revolution (1789-1793), and the First Republic
 endured until the Great Napoleon (born Aug. 15,
 1769, died May 21, 1821) founded the First Empire
 in 1804. The monarchy was restored in 1814,
 and also after the "Hundred Days" of Napoleon
 (March 20-June 29, 1815), until the Second Re-
 public of 1848, which became the Second Empire
 on Nov. 22, 1852. On Sept. 4, 1870, the Emperor
 Napoleon III. (nephew of the Great Napoleon)
 was deposed, and the Third Republic was set up.
 The head of the Republic is the President,
 elected for 7 years by the National Assembly of
 the two houses of the Legislature, the *Senate*
 of 314 members (elected by indirect vote for
 9 years, one-third being renewable every 3 years)
 and the *Chamber of Deputies* of 597 members
 (elected by direct vote for 4 years). Members
 of the legislature receive 27,000 francs a year
 and travelling facilities over the railways.

PRODUCTION.—The chief agricultural products
 are wheat, barley, rye, maize, oats, potatoes,
 beetroot (for the manufacture of sugar), hops, &c.
 Fruit trees abound, and are very productive, the
 principal being the olive, chestnut, walnut,
 almond, apple pear, citron, fig, plum, &c.
 The agricultural production in 1913, 1921 and
 1923 is shown in the following table:—

Crop.	Production.		
	1913.	1921.	1923.
Wheat.....	86,919,050	88,034,290	75,000,000
Rye	18,714,750	11,276,110	9,280,000
Barley.....	10,437,600	8,342,850	9,800,000
Oats	51,826,010	35,482,950	48,910,000
Potatoes...	125,859,652	83,096,559	99,190,000

The extent of land completely devastated by
 artillery fire in France was 3,306,350 hectares,
 comprising 4,329 communes. There were 794,000
 dwellings destroyed or damaged, of which on Oct.
 10, 1922, about 408,000 had been reconstructed.
 Forestry is an important industry, the principal
 forests being those of the Ardennes, Compiègne,
 Fontainebleau, and Orléans, consisting chiefly of
 oak, birch, pine, beech, elm, chestnut, and the

cork-tree in the south. The vine is cultivated to a very great extent (1,257,611,000 gallons of wine were produced in 1923), as the names Bordeaux, Burgundy, Champagne, &c., universally testify; cider-making is also an important industry, and the production in 1923 amounted to 353,782,000 gallons. The live stock (1923) included 13,749,200 cattle, 9,925,310 sheep, and 5,405,840 pigs. The mineral resources include coal, pig iron, copper, lead, silver, antimony, and salt. Under Article 50 of the *Treaty of Versailles*, the coalfields of the *Saar Basin* are ceded to France for 15 years, at the end of which time the inhabitants are to decide by a *plébiscite* whether they will remain French, return to Germany, or become a self-governing community. The coalfields abut on Lorraine, and have an area of 217 square miles, with a population of 640,000, and they include the towns of Saarbrück (60,000), Saarlouis (16,000), and Merzig (10,000), on the River Saar. In 1911 the mines of France produced 30,000,000 tons, but in spite of the damage done to them it reached 37,682,000 metric tons in 1923. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, woollens, carpets, linen, silk, and lace. Glass manufacture and pottery are also important, and the sardine fisheries and the culture of oysters are a source of wealth.

DEFENCE.—The *National Army* of France consists of the Metropolitan Army, the Colonial Army, the Gendarmerie, and Republican Guard, and of the partly native armies of Algeria, Morocco, and Tunis. These forces have a total strength on a peace footing (in 1923) of 356,600 all ranks (exclusive of the Armies of Occupation in the Ruhr, the Sare and in Syria, which absorbed 132,000 all ranks). In the War of 1914-1918 over 20 per cent. of the French people were mobilised, and 9,717,000 all ranks passed into the Armies of France (exclusive of troops from Algeria, Tunis, and Morocco). Of this total over 1,500,000 were returned as killed or missing. By law of 1919, the French Army consists of 350,000 all ranks on a peace footing, and of 1,300,000 on a war footing, with a reserve (including Territorials) of 2,000,000 all ranks. The *French Navy* was manned in 1920 by 56,000 officers and other ranks, and consisted in 1923 of 6 Dreadnought and 3 Pre-Dreadnought battleships, 6 cruisers, 5 light cruisers, 51 destroyers, and 47 submarines, 20 airships and 98 aeroplanes.

ARMISTICE MONUMENT.—In the Forest of Compiègne is a *Carrefour de l'Armistice*, from which the *Clairière de la Victoire* leads to the Armistice Monument, unveiled Nov. 11, 1922. The monument marks the spot where the Germans signed the armistice terms presented by *Maréchal Foch*, and bears the inscription *Ici le 11 Novembre 1918 succomba le criminel orgueil de l'Empire Allemand vaincu par les peuples libres qu'il prétendait asservir*.

EDUCATION.—The educational system is highly developed. *Central Administration* comprises (a) Ministry of Public Instruction; (b) Superior Educational Council, charged with the actual administration; (c) Consultative Committee (advisory); (d) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. *Local Administration* comprises (a) Territorial Academies, with inspecting staffs for all grades, and (b) Departmental Councils, presided over by the *préfet*, charged especially with primary educa-

tion. By the Law of July, 1904, all congregational institutions are to be suppressed within 10 years, and many were at once closed, some re-opening under lay management. (i.) *Primary: Secular, comp. and free. Age 6-13.* Schools include (a) infants; (b) lower primary; (c) higher do. Supplementary courses, and courses for adults. Lower and higher primary certificates granted. Numerous private courses are aided from local funds. Schools are for boys, for girls, or mixed. (ii.) *Secondary:* State lycées, communal colleges, and many private establishments, 7-yrs. course, either (a) purely classical; (b) purely modern; (c) Latin and sciences; or (d) Latin and modern languages. Degree of Bachelor conferred on completion. For females, a similar organisation, course 5-6 yrs. *Sèvres school* and the *Sorbonne Association* well-known. (iii.) *Special Schools* are very numerous, many public institutions being dependent on ministries other than that of Public Instruction. (iv.) *Universities* (State universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix, Algiers, Angers, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Marseilles, Montauban, Montpellier, Nancy, Nantes, Paris, Poitiers, Rennes, and Toulouse.

COMMUNICATIONS.—The length of the *Routes Nationales* in 1921 was 23,838 miles in France, and 728 miles in Alsace-Lorraine. The principal rivers of France are the Seine, Loire, Garonne, and Rhône; the navigable waterways having a length of (1922) 4,512 miles, with 3,031 miles of canals. The system of railroads in France is very extensive; they are almost entirely *concedées*, and become State property after the expiration of the concession. The length of lines of general interest, inclusive of local lines, open for traffic on 31 December, 1924, was 25,808 miles, the total receipts from passenger and goods traffic, &c., being 86,521,574 francs. In 1922 there were 50 fatal accidents on French railways, with 96 killed and 544 injured; in 1921, 72 accidents with 137 killed and 656 injured; and in 1920, 122 accidents with 122 killed and 1,064 injured. The length of telegraph wires is 118,129 miles, and of telephone lines 123,000 miles.

Shipping.—The gross tonnage of the French mercantile marine in 1922 was 3,560,000 gross tons, of which 366,000 gross tons were sailing vessels. Under the Armistice clause France has received 109 ex-German vessels (445,543 gross tons). During the year 1924 the tonnage of French and foreign vessels entering French ports amounted to 42,575,400 tons, of which 12,411,000 tons were French; while the total clearings amounted to 32,644,000 tons, of which 8,806,000 tons were French. The chief ports are Marseilles, Rouen, Bordeaux, Le Havre, Calais, Boulogne, Dunkirk, and Cherbourg. A bill was passed by the Chamber in 1921 for the canalisation of the Rhone, which will make the river navigable for 1,200 ton vessels from the sea to Switzerland, and will also provide electric power and irrigation to the surrounding departments.

COMMERCE.—The principal imports are wool, cotton, coal, silk, oleaginous fruits and seeds, machinery, raw skins, cereals, timber, caoutchouc, copper, petroleum oils, coffee, and wines. The principal exports are cotton tissues, silk tissues, wool, woollen tissues, wines, smallwares, automobiles, &c., silks, raw skins, millinery and artificial flowers, dressed skins, tools and metal goods, machinery, pig iron, butter, table fruits, refined sugar, brandy and liqueurs, fish, and cheese.

Alsace-Lorraine.—*High Commission.* M. Mirhan (1920). Alsace-Lorraine, formerly a part of the Holy Roman Empire, was ceded to France in 1648 at the Peace of Westphalia, and was ceded to Germany by the Treaty of Frankfurt (May 10, 1871), after the Franco-Prussian War. At the close of the War, 1914-1918, the Provinces were regained by France under the Treaty of Versailles (June 28, 1919). They comprise the fertile plain between the Rhine and the Vosges, and stretch beyond these mountains as far as Luxembourg. Wine, tobacco, hops, iron, and coal are among the leading productions, and the cotton industry is most flourishing. The area is 5,605 square miles; the population in March, 1921, was 1,709,749. Principal towns, Strassburg (pop. 166,767), Mulhausen, and Metz.

Algeria.—The three departments of Algeria—Algiers, Oran, and Constantine—form an integral

part of France, under a Governor-General, assisted by a Consultative Council. These departments lie between 4° 36' W. to 6° 16' E. longitude, 37° 6' N. to an undetermined S. limit, about 30° N., covering an area estimated at 222,120 square miles, with a population (1921) of 5,806,090, of whom 829 were Europeans and 4,976,262 natives. The revenue in 1925 was estimated at francs 519,800,824, and the expenditure at francs 519,788,955. The bulk of the trade is with France, the exports to France amounting in 1924 to francs 1,475,130,000 (total exports fr. 1,990,494,000), and the imports from France to francs 2,274,750,000 (total imports fr. 2,793,744,000). The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates, cork wood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron, copper, quicksilver, zinc, and lead mines are being worked. In 1923 there were 2,480 miles of railroad open for traffic; and in 1924 the number of ships engaged in foreign trade entering Algerian ports was 3,843 of a net tonnage of 5,851,698 tons. The principal town is Algiers, the capital (population, 1921, 551,949), a most important coaling station and much frequented as a health resort; other large towns are Oran, Constantine, Bône, and Tlemcen. Governor-General, M. Théodore Steeg (1921).

CAPITAL, Paris, on the Seine. Population (1921), 2,906,472; there are 82,127 houses and 1,149,366 families according to the census of March 1921. Fourteen other cities exceed 100,000—Marseilles 586,341, Lyons 561,592, Bordeaux 267,409, Lille 200,952, Nantes 183,704, Toulouse 175,434, St. Etienne 167,967, Strasbourg 166,767, Nice 155,839, Le Havre 163,374, Rouen 123,712, Roubaix 113,265, Nancy 113,226, and Toulon 106,331. Mulhouse, Amiens and Limoges exceed 90,000, and 30 others exceed 50,000.

FLAG: The "tricolour," three vertical bands, blue, white, red (blue next to flagstaff).

BRITISH EMBASSY.

Embassy, 39 Faubourg St. Honoré, Paris.
Ambassador Extraordinary and Plenipotentiary,
 His Excellency The Most Hon. Marquess of Crewe, P.C., K.G. (1922) £16,500
Minister Plenipotentiary, E. C. E. Phipps, C.M.G., C.V.O.
1st Sec., O. G. Sargent, C.M.G.
" H. Knatchbull-Hugessen, C.M.G.
" R. F. Wigram.
3rd Secretary, F. R. Hoyer-Millar.
Hon. Attachés, Capt. A. Paget, M.C.; Mansfield Markham.
Commercial Counsellor, J. R. Cahill.
Commercial Sec. (and Grade), A. H. S. Yeames.
Naval Attaché, Capt. J. M. Pipon, C.M.G., M.V.O., O.B.E., R.N.
Military Attaché, Maj.-Gen. G. S. Clive, C.B., C.M.G., D.S.O.
Asst. do., Major R. L. Sherbrooke, D.S.O.
Air Attaché, Wing-Com. J. R. W. Smyth Piggott, D.S.O.
Secretary to H.M. Ambassador, Hon. G. Chichester.
Archivist, W. E. Fuller, O.B.E.
" (Assistant), E. J. Moignard.

BRITISH CONSULAR OFFICES.

Paris—Cons.-Gen., H. G. A. Mackie, C.B.E.
 „ Vice-Consuls, E. A. Cleugh; C. O. Harrey.
Paris—Pro-Consuls, Horace J. Dorey; John W. M. Gray; F. H. Wyborn.
Reims—Vice-Consul, G. H. Oliver.

Gerba & Zarzis, Cons. Agent, F. Farrugia.
Mehdiah—Cons. Agent, G. Violante.
Sfax—Vice-Consul, Silvio Leonardi.
Susa and Kairouan—Vice-Cons., Harry Engerer.
 „ Pro-Consul, Jules Engerer.

BRITISH CHAMBER OF COMMERCE, 6 Rue Halevy, Paris, IXème. President, H. C. Weinman. There are also British Chambers of Commerce at 2, Rue Beauvau, Marseilles, and 4, Avenue Massena, Nice. Paris is distant from London 267 miles; transit, 7 to 8 hours.

FRENCH COLONIES.

Colony, &c.	Area	Population
Indo-China	257,000	18,000,000
Asia Minor	150,000	4,500,000
Africa	4,100,200	43,550,000
America	33,200	500,000
Oceania	10,000	100,000
Total	4,550,400	66,650,000

In ASIA.—French India includes Pondicherry, on the Coromandel coast; Chandernagore, on the Hooghly; Karikal, in the Cauvery delta; Yanam, in the Godavery delta; and Mahé, on

the Malabar coast—the total area being 200 square miles with an estimated population of (1922) 268,000. French Indo-China comprises the possession of Cochin-China and the four protectorates of Cambodia, Annam, Tonkin, and Laos. In 1898–9 the port of Kwang-Chow-Wan was also acquired on lease from China. The capital is Hanoi, in Tonkin, and the total area is 309,979 square miles, with a population (1922) estimated at 19,983,203, including the civil European population of about 17,500.

IN ANA MINEE—The French mandatory sphere of *Syria, Cilicia and Lebanon* has a total area of about 150,000 square miles, with an estimated population of 4,500,000 (see also pp. 794–5).

IN AFRICA—*Algeria* (see above) is an integral part of France. *Morocco* (see p. 766–7) is a French (and partly Spanish) protectorate.

Tunis (Bey of Tunis, Sidi Mohammed ed Habib, acceded 1922) has been a French protectorate since 1881. It lies between Algeria and Tripoli, and extends southwards to the Sahara, with a total area of about 45,000 sq. miles and an estimated population of 2,000,000, of whom about 600,000 are Berbers and 500,000 Arabs. The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated. The principal minerals are coal, copper, lead, zinc and iron, and phosphates and marble are also worked. The chief exports are phosphates, olive oil, wheat, esparto grass, barley, beans, blankets, sponges, and dates; the chief imports are textiles and other manufactures, iron, steel, machinery and provisions. Eighty per cent. of the trade is with France and Algeria. Tunis, the capital, has a population of 230,000; other towns are Sfax (84,000), Bizerta (30,000), Susa (30,000), Kairwan (22,000), Gabes (16,000), and Monastir (6,000). French West Africa extends from Mauritania to Dahomey, and has a total area of 1,509,733 square miles, and a population of 11,344,076. It consists of *Senegal* (94,000 sq. miles, pop. 1,250,500), capital, St. Louis; *Upper Senegal Niger* (304,000 sq. miles), and the *Niger Military Territory* (533,000 sq. miles), which have a total population of about 6,036,200; *French Guinea* (92,600 sq. miles, pop. 1,737,350); *Ivory Coast* (126,100 sq. miles, pop. 1,216,300); and *Dahomey* (38,000 sq. miles, pop. 878,500); adjoining Dahomey is the French Sphere of the former German colony of *Togoland* (23,400 sq. miles, pop. 800,000); while the hinterland of these colonies forms the *French Sahara*, which has an estimated area of 924,160 sq. miles and a population of about 450,000. French Equatorial Africa consists of the *French Congo* (513,000 sq. miles., pop. 9,000,000) and of the French Sphere in the former German territory of *Cameroon* (267,000 sq. miles, pop. 2,750,000). French East Africa consists of the *Somali Coast* (46,300 sq. ms., pop. 208,000) and of the large island of *Madagascar* (226,000 sq. miles, pop. 3,153,500) with its dependencies (Nossi Bé, Sainte Marie, Réunion, and the Mayotte-Comoro Islands, and St. Paul, Amsterdam, and Kerguelen Islands). Agriculture and cattle raising are the principal industries; the minerals include gold, silver, iron, copper, lead, and zinc. The chief exports are gold, cattle, bark, manioc (for arrowroot), beans, hides, skins, fibre, rice, timber and rubber; the chief imports are cottons, metal manufactures, wines and spirits, coal, clothing, lime and cement. The capital,

Antananarivo, has a population of 75,000; other towns are Tananave (the chief port), Majunga, Diego-Suarez, Mananjary, Tuléar, Andovoranto and Vohémar. Off the south-east coast are the uninhabited islands of St. Paul, Kerguelen and Amsterdam. There is now direct communication across French and British territory in Africa, with posts on the Atlantic and Indian ocean.

IN AMERICA—Off the south-east coast of Newfoundland are two small groups of islands, of which the largest are St. Pierre and Miquelon. In the West Indies, Martinique and Guadeloupe, with Basse Terre, Marie Galante, Ile des Saintes, Petite Terre, St. Bartholomew, and St. Martin; and in South America, Cayenne or French Guiana. The total area of French possessions in North and South America is 35,320 square miles, with a population of 428,850.

IN OCEANIA—New Caledonia (7,200 sq. ms., pop. 50,500) is a large island with dependencies, the Isle of Pines, the Wallis Archipelago, the Loyalty Islands (Maré, Lifou, Uvéa, &c.), the Huon Islands, and Futuna and Alofi. The Society Islands (Tahiti, Moorea, &c.) have an area of about 650 square miles, and a population of about 14,000; the Marquesas (Nukahiwa, Hivasa, &c.) 500 sq. miles, pop. 2,500. Leeward Isles (Huahine, Raiatea, Tahaa, Bora-Bora, Maupiti, &c.); the Gambier Islands (Mangareva, &c.); the Tubuai Islands (Rurutu, Raiavae, Rimatava, &c.); Rapa Island; Makatea; and Maiao Island. The New Hebrides are under joint Franco-British administration.

GERMANY.

(Deutsches Reich.)

President of the German Reich, General Field-Marshal von Hindenburg, born Oct. 2, 1847, assumed office, May 12, 1925.

MINISTRY.

Chancellor, Dr. Luther.
Foreign Affairs, Dr. Stresemann.
Interior, (vacant).
Labour, Dr. Brauns.
Justice, Dr. Frenken.
Finance, (vacant).
Food, Count von Kanitz.
Communications, Dr. Kruhne.
Defence, Dr. Gessler.
Posts, Dr. Stingl.
Industry, (vacant).

Ambassador in London, Dr. Friedrich Sthamer, 9 Carlton House Terrace, S.W. 1.

Consular Dept. of the Embassy, 21A Bedford Place, W.C. 1 (removing to 9 Carlton House Terrace in March or April, 1926).

The area of Germany is approximately 182,200 square miles, with a population on June 16, 1925 of 62,474,872 (without Saar district), of whom 30,169,973 were males and 32,304,899 were females. The population on Dec. 1, 1910 was 64,925,993. Births in 1923 numbered 1,340,154 and deaths 900,603, births being 21·7 per 1,000 of population, deaths 14·6 per thousand.

Religious confessions in the present area were in 1910:—Protestants 38,117,501, Roman Catholics 19,326,306, Jews 538,912, others 472,132.

There are 43 large towns with over 100,000 inhabitants, and of these 29 are in Prussia, 4 in Saxony, 3 in Bavaria, 2 each in Baden and Hesse, 1 each in Württemberg and Brunswick, and three Hanse Towns.

At the outbreak of war, Aug. 1914, "Ger-

many" was a Confederate League, bearing the name "German Empire," under the hereditary presidency of the King of Prussia, holding the title of "German Emperor."

By the *Treaty of Versailles* the "Reichsland" of Elsass-Lothringen and the Saar coal basin (temporarily) were ceded to France; parts of Posen and West Prussia to the newly-formed Republic of Poland; North Schleswig to Denmark; and Moresnet and Malmédy to Belgium. Plebiscites held in June 1920 in parts of East and West Prussia yielded majorities for Germany. A plebiscite to decide the fate of Upper Silesia, which was held under the Peace treaty, resulted in division between Poland and Germany. Memel City with adjoining territory has been ceded to Lithuania.

The Colonial possessions of the German Empire extended over 1,035,086 sq. miles in Africa, 96,210 sq. miles in the Pacific, and 2,943 sq. miles in Asia—a total of 1,134,239 sq. miles, with a population estimated in 1914 at 15,000,000. By the *Treaty of Versailles* Germany renounced her overseas possessions, with all rights and titles therein, and the delegates to the International Council at Paris allocated Togoland and Kamerun to Great Britain and France; German East Africa to Great Britain; German S.W. Africa to the Union of South Africa; the German Pacific possessions N. of the Equator to Japan; and those S. of the Equator to Australia and New Zealand.

On Nov. 9, 1918, the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. On Nov. 11, 1918, Germany was granted an armistice, and on June 28, 1919, peace was signed at Versailles. In Jan. 1919, elections were held to a National Assembly on the basis of universal adult suffrage (male and female), and on Feb. 11, 1919, the first President of the German *Versammlung* was elected at Weimar. Under the new Constitution of August 11, 1919, the federal legislature consists of a *Reichstag* representing the whole nation and elected by popular suffrage (male and female), with proportional representation, and a *Reichsrat* representing the separate States. The people possess the right of initiative and the referendum. Bills dealing with economical questions or social issues arising thereout must first be submitted to the new advisory Economical Council (*Reichswirtschaftsrat*).

PRODUCTION AND INDUSTRY.—Germany, up to the commencement of the War, was becoming more and more a manufacturing country. In 1907, 32.6 per cent. of the population were supported by agriculture, 37 per cent. by industry and mining, 11.5 per cent. by trade and communications. Of the total area in 1907, 78,632,140 acres were under cultivation, and 34,272,141 acres were woods and forests. The Live Stock (Dec. 1, 1922) included 3,650,804 horses, 16,316,725 cattle, and 14,679,030 pigs; Germany supported about nine-tenths of her population by her own produce in 1914. The mineral produces was valued in 1912 at £592,250,000, and included 190,109,440 tons of coal, 87,233,084 of lignite, and 28,607,903 of iron ore; potash, rock-salt, lead-ore, gold and silver ore, graphite, asphalt, petroleum, Epsom-salts, boracite, tin-ore, quicksilver-ore, antimony-ore, cobalt-ore, nickel-ore, arsenic-ore, manganese-ore, bismuth-ore, uranium-ore, wolfram-ore,

pyrites, vitriolic-ore, and alum-ore are also worked. Crefeld, Elberfeld-Barmen, Chemnitz, Augsburg, and the provinces of Westphalia and Silesia are the great centres of the textile industries. Bylaws of 1919 and 1920, all coal, heavy iron and steel, potash and coal-tar producing concerns were compulsorily fused into All-German Syndicates, governed by assemblies representing Producers, Traders and Consumers, with equal representation for Employers and Employed.

Under the stimulus of the falling mark exchange, which favoured competition abroad and induced the home public to convert its depreciating currency into solid goods, industry flourished almost uninterruptedly between 1919 and late 1923, after which (in connection with currency stabilisation) business suffered temporary depression. As compared with 1919 production of all industrial goods has recovered, and in many cases has reached that of 1913. Bankruptcies for a time almost disappeared, but increased again rapidly in 1924, and at present average slightly less than the pre-war number.

OLD AGE AND INFIRMITY INSURANCE.—The German scheme of social legislation gives all subordinate bread-winners in Germany a legal right to pecuniary subvention when unfitted for work through sickness, accident, premature infirmity, or old age. Insurance is compulsory. This National Insurance is based on mutual insurance and self-administration. The Infirmary Insurance Act came into force Jan. 1, 1900. The insured include all persons working for wages or salary as workpeople, artisans, journeymen, apprentices, domestic servants, laundresses, dressmakers, sempstresses, housekeepers, charwomen; overseers, foremen, engineers, assistants, clerks and apprentices in merchants' offices (excepting assistants and apprentices in chemists' shops), schoolmasters, schoolmistresses, tutors and governesses, including foreigners working in Germany under these categories. Pensions for premature infirmity are given to insured persons when unfit for work; old age pensions to all insured persons on attaining the age of 70, though still capable of work. A comprehensive project of reform of the State insurance legislation became law in 1911. The new law codified previous legislation, established new Insurance Authorities, reduced working-class influence in the Accident Insurance organisations, provided pensions for widows and orphans, and made other changes of importance. Another Bill extending Insurance benefits to private officials, clerical employes and others above the class of manual workers, became law in 1911. A Bill establishing Federal Unemployment Insurance for industrial workers and employes (not farm labourers or domestic servants) is before the Reichstag.

DEFENCE.—By Article 160 of the *Treaty of Versailles* the German Military Forces, as from March 31, 1920, must not comprise more than seven divisions of infantry and three divisions of cavalry, a total force of 100,000 all ranks. By Article 181 of the Treaty, the German Naval Forces must not exceed 6 battleships of the Deutschland or Lothringen class, 6 light cruisers, 12 destroyers, and 12 torpedo boats. No submarine vessels are to be included in the naval forces, and all war vessels in excess of the above numbers are to be broken up or devoted to commercial purposes. Under the terms of the Armistice of Nov. 11, 1918, the German High

Sea Fleet surrendered to the Allies (Nov. 21, 1918) and was interned in Scapa Flow, manned by German naval crews. It was scuttled by its crews in Scapa Flow, while in custody, on June 21, 1919. In consequence of this breach of the Armistice agreement by the German crews the Allies (Nov. 10, 1919) called upon the government to surrender 5 light cruisers, and certain floating docks, cranes, and dredgers, in addition to the previous naval surrenders. By Article 198 of the Treaty the armed forces of Germany must not include any military or naval Air Forces, and no dirigible balloons, aeroplanes, sea-planes or flying boats.

COMMUNICATIONS.—The total length of the *Railroads* at end of 1922 was 55,350 kilometres, of which all except 3,628 kilometres belonged to the Republic. Under the *Dawes Reparation Scheme* all state railways are transferred to a joint stock company. The number of registered automobiles (July 1, 1924) was 132,179, and motor cycles 97,965, and motor lorries 60,629. Length of *Telegraph and Telephone Lines* (1923) 362,000 kilometres (length of wires, 11,294,000 kilometres); telegrams transmitted, 59,336,000; post offices, 32,623; telegraph offices, 42,207; wireless stations, 588; telephone subscribers, 2,242,000; letters carried, 3,233,000,000; cash on delivery orders, 40,493,000; money orders, 41,064,000. The number of employes in the service of posts, telegraphs, and telephones was 334,756. The postal services have been financially separated from the general administration. In addition to some 6,000 miles of navigable rivers there are over 1,500 miles of canals and 1,600 miles of ship canals. At the outbreak of the War of 1914-1918 Germany ranked second to Britain in the list of maritime countries. On January 1, 1913, the Mercantile Marine consisted of 2,098 sea-going steamers of 17'65 register tons and upwards (4,380,348 tons gross register), and of 2,420 sailing vessels (447,870 tons gross register); number of seamen, 77,746. As a result of the War and of the Peace Treaty shipping in 1919 sank to 419,000 tons, but there has since been a rapid recovery, due mainly to native building, but partly to purchases from abroad. Finished new constructions of vessels exceeding 100 gross tons were in 1919, 134,535 tons, 1920 241,985 tons, 1921 509,064 tons, 1922 575,264 tons, 1923 358,000 tons, 1924 249,788 tons. On June 30, 1925, shipping had increased to 2,993,000 tons. Recovery was helped by the establishment of eleven new yards during the War. The chief ports of Germany are Hamburg, on the Elbe; Bremen, on the Weser; Stettin, on the Oder; Königsberg, on the Pregel; Kiel, on the Baltic (connected with the Elbe by the Kaiser Wilhelm Canal); and Lübeck, on the Baltic. Kiel is being converted into a free port. Under the Peace Treaty Danzig became a Free State, subject in its foreign affairs to the Polish Republic. Traffic in the chief ports has increased since the War at a great rate, and now exceeds that of 1913. Arrivals at Hamburg were: 1913, 14,195,496 net tons; 1924, 15,622,000 net tons. Bremen shipping traffic also exceeded that of before the War.

FINANCE.—Under Articles 248-263 of the *Treaty of Versailles* the German Government undertook to pay the cost of the Armies of Occupation from Nov. 11, 1918, until they shall be withdrawn, the occupied area extending to the Rhine (with "bridgeheads" on the right bank

from Eiten, on the Netherland's frontier, in the north, to the junction of the German-Lorraine frontiers, in the south. The amount of the reparations due by Germany under the Treaty was fixed in January, 1921 (by the Financial Council of the Allies at Brussels) at 132 milliards of gold marks (£6,600,000,000) payable in bonds, to be redeemed by annual payments of 2 milliard gold marks, together with a sum equivalent to 26 per cent. of German exports. Of the amounts thus payable the various shares from 1921-1929 were apportioned to France 52 ninety-second parts, Great Britain 22, Italy 10 and Belgium 8 ninety-seconds; from 1929-1932 the shares are varied to France 130 two hundred and thirtieth parts, Great Britain 55, Italy 25 and Belgium 20 two hundred and thirtieths; and for the succeeding 31 years France 156 two hundred and seventy-six parts, Great Britain 66, Italy 30 and Belgium 24 two hundred and seventy-six parts. A new *Reparations Scheme* was agreed to by Germany and the Allies in August, 1924, providing for standard annual payments of 2,500 million gold marks, liable to increase according to an index of prosperity, the money to be supplied from (1) taxation, (2) railway bonds, and (3) bonds imposed on private industry. The total capital Reparations liability was not refixed.

In November, 1923, was put through a *Currency Reform*, consisting in the creation of a *renten-mark*, nominally worth 1 gold mark, and in the stabilisation of the depreciated paper-mark at 1 billion paper-marks to 1 gold-mark. These values have since been maintained, but both currencies are being gradually exchanged for new gold-mark notes, issued by the Reichsbank as reconstituted under the Reparations settlement. Although the currency reform of 1923 was only provisional it reacted beneficially on the Finances, stopping the rise in the cost of administration and preventing depreciation in the value of the taxes received. For covering the deficits in the weeks intervening between stabilisation and complete balancing of the budget, the Republic obtained limited credits from the new Rentenbank. In the last financial year 1924-25 a complete budget balance was attained, and surpluses remained for extinction of debts arising out of the Ruhr occupation. The *Budget Estimates for 1925-26* (in which are not included the separately financed Railways and Posts) were:—

General Administration Budget:—

	1,000,000 Gold Marks.
Ordinary revenue	5,513
" expenditure	5,513
Extraordinary revenue	433
" expenditure	433

Budget for War Burdens:—

Revenue	1,400
Expenditure	1,400

The German Debt.

The Debt of the Republic contracted in stable currencies since 1923, and including the Reparation Loan of 800,000 marks, totalled (on Dec. 31, 1924) 2,894,000,000 gold marks. The *Old Debt*, consisting of pre-War and War borrowings (and including Debts taken over from the States in connexion with the expropriation of the State railways) totals 70 milliard marks. All this Old Debt was regarded in law as a *paper-*

mark liability, and had therefore no value. Under a law of July 16, 1925, this Debt is valorised in such way that bondholders who acquired before July 1, 1920, will ultimately receive 12½ per cent. in gold marks of the nominal value of their holdings with interest. Bondholders who acquired later will receive 2½ per cent., but this will bear no interest until Reparations are paid.

German Trade.

	1923.	1924.
Total Imports	6,081 mill. gold marks.	9,317 mill. gold marks.
Total Exports	6,079 mill. gold marks.	6,568 mill. gold marks.
Imports from U.K.	£53,836,000	£71,557,000
Exports to U.K.	35,001,000	36,897,000

GERMAN FEDERATED STATES.

PRUSSIA.

GOVERNMENT (April, 1925).

President, Herr Braunn.
Interior, Herr Severing.
Finance, Herr Hopker-Aschoff.
Agriculture, Herr Steiger.
Trade and Commerce, Herr Schreiber.
Instruction and Worship, Herr Becker.
Minister of Justice, Herr am Zehnhoof.

The Republic of Prussia comprises the larger portion of Germany, with a total area in 1924 of 113,750 sq. miles and a population on June 16, 1924, of 38,801,000 (Saar district excluded).

The number of births in 1923 was 819,815, against 1,209,500 in 1913. The number of deaths in 1923 was 549,779, against 656,490 in 1913. Marriages were 364,104, against 323,709. The surplus of births over deaths in 1923 was 270,036.

Prussia possesses a large number of navigable rivers intersecting the country—viz., the Pregel, Oder, Elbe, Weser, and Rhine. The coasts of the Baltic and North Seas form a number of gulfs and bays. The principal mountains are the Harz and the Giant Mountains, the latter reaching an altitude of 5,255 feet. The forests are extensive, occupying an area of 18,053,000 acres, chiefly consisting of fir. Minerals consist of coal, iron, copper, lead, potash, alum, nitre, zinc, cobalt, sulphur, nickel, arsenic, baryta, amber, agate, jasper, onyx, &c., and, to a small extent, silver. Salt (from the brine springs of Prussian Saxony) is abundant. Metallic ores, coal, salt, precious stones belong partially, and amber totally, to the Crown. Agriculture and the rearing of cattle are the industries employing the largest number of persons, but Prussia has long ceased to be a mainly agricultural State. Wheat, rye, oats, barley, peas, millet, rape-seed, maize, linseed, flax, hemp, tobacco, sugar-beet, hops, &c., are extensively cultivated. Prussia's manufactures comprise practically all branches. The cotton works are extensive, and there are numerous manufactories of silk, woollen, mixed cotton and linen fabrics, including shawls, carpets, &c., and woollens, with leather, earthenware, glass, paper, and tobacco manufactures, as well as metallurgical works of great importance and large output. Brewing is a business of great importance.

Revenue (Estimate) 1923-24	2,761,444,100 Gold Marks.
Expenditure do.	2,761,444,100

The whole of the old *Funded Debt* of Prussia was taken over by the Republic under the

arrangement for transfer of the Prussian State Railways. It will be valorised on the same conditions as those laid down for the Federal Debt under the law of July 16, 1925.

CAPITAL, Berlin, on the Spree. In 1920, by fusion of suburban municipalities and of some adjacent rural communes, was created Great Berlin with a population on June 16, 1924, of 3,968,388.

Other largest cities are Cologne, on the Rhine (690,114), Breslau, on the Oder (551,200), Essen, on the Ruhr (462,428), Frankfurt, on the Main (457,831), Düsseldorf, on the Rhine (429,516), Hannover, on the Leine (414,392), and Dortmund on the Emscher (313,245).

BAVARIA.

Minister-President, Dr. Held.

The Republic of Bavaria is divided into two unequal parts. The eastern portion, comprising eleven-twelfths of the whole, is situated between 47° 16'—50° 34' N. lat. and 9° 01'—13° 50' E. long.; the western part, forming the Palatinate, on the left bank of the Rhine. The total area is 29,486 sq. miles, and the population on June 16, 1924, 7,493,000. The rivers are the Danube, Rhine, Main, Lech, Isar, and Inn. The Bavarian forests are extensive, covering nearly a third of the country; the soil is highly productive, wheat, rye, oats, and barley being the chief products; buckwheat and maize are also grown, and tobacco is one of the staple articles. Wine is produced in the Palatinate, in Lower Franconia, and in Middle Franconia. The hop-plant is most extensively cultivated. Many important manufactures are carried on. The brewing of beer is carried to great perfection. The chief imports are sugar, coffee, woollens, silks, stuffs, drugs, hemp, cotton, tobacco, and flax; the chief exports are timber, grain, wine, hops, beer, leather, glass, jewellery, &c. The Thuringian Duchy of Coburg was incorporated in Bavaria in 1921.

Budget, 1924-25	562,167,400 Gold Marks.
-----------------------	-------------------------

CAPITAL, Munich, on the Isar. Population (1925), 671,548. Other large towns are Nürnberg, N.W. of Munich (384,272), and Augsburg, on the Wertach-Lech (162,135).

SAXONY.

The Republic of Saxony has an area of 5,856 English square miles, with a population on June 16, 1924, of 4,970,301. More than one-half of the surface is arable, and has always been in a high state of cultivation, producing the usual cereals and leguminous plants, with rape, buckwheat, flax, and fruits. The forests supply timber of excellent quality; minerals are rich and abundant (coal, silver, tin, bismuth, cobalt, iron, zinc, lead, nickel, arsenic, &c., besides marble, porcelain, earth, and various gems); special manufactures of Saxony are:—Machinery, cottons, worsted yarns, soft wool tissues, carriages, furs, clothing, jute, furniture stuffs, hosiery, gloves, and other knitted goods, laces, embroideries, curtains, paper, wood and straw pulp, bottle glass, musical instruments, chocolates, sweets, cigars, and Meissen porcelain. The imports are chiefly corn, wine, salt, cotton, silk, flax, hemp, wool, coffee, tea, &c. Its chief town, after the capital, is Leipzig (pop. 660,140), the great book-market, with, next to those of Berlin and Munich, the most frequented University of Germany (having 5,925

matriculated students in 1912-13; Planen (pop. 109,953), and Chemnitz (pop. 323,153), the Manchester of Saxony.

Gold Marks.

Budget, 1924-25 461,398,500

CAPITAL, Dresden. Pop. (1925), 608,025.

WÜRTTEMBERG.

The Republic of Württemberg has an area of 7,534 English square miles, and a population (in 1925) of 2,591,340, of whom 30 per cent. are Roman Catholics. It possesses rich cultivated fields, orchards, gardens, and hills covered with vines; the forest, grain, and pasture-land being nearly equally distributed throughout. Spelt, wheat, rye, oats, barley, hemp, hops, potatoes, beans, maize, and turnips are the principal agricultural products. The minerals, consisting chiefly of salt, iron, granite, limestone, ironstone, fireclay, &c., abound in the kingdom; mineral springs are also numerous. The principal rivers are the Neckar and the Danube. The manufactures generally are linen, woollen and cotton fabrics, carpets, paper, leather, gunpowder, firearms, tobacco, iron and steel goods, pianos, clocks, pottery, cabinet work, &c. There are also many oil mills, breweries, and brandy distilleries. The principal exports are grain, cattle, wood, gunpowder, firearms, pianos, clocks, salt, oil, leather, woollen, hosiery, cotton and linen fabrics, stays, beer, wine, &c.

Gold Marks.

Budget, 1924-25 180,511,800

CAPITAL, Stuttgart. Population (1925) 337,199.

MINOR STATES.

Baden, separated by the Rhine from France (Alsace) and Switzerland, has an area of 5,819 square miles, with a population (1925) of 2,319,581. A great part of the surface is mountainous and covered with forest trees, including the Schwarzwald (Black Forest) and the Odenwald, but more than three-fifths of the total area is under cultivation, corn, wine, fruit, potatoes, tobacco and hops being the chief agricultural products. The principal manufactures are cigars, cotton and silk stuffs, brushes, jewellery and trinkets, clocks, chemicals, paper and machinery. More than half the population are Roman Catholics. Capital, Karlsruhe, pop. (1925) 144,700. Other large towns are Mannheim (242,235), Friburg (87,946), Pforzheim (73,839), and Heidelberg (69,806).

Land Thüringen. The Thüringian States, Saxe-Weimar-Eisenach, Saxe-Meiningen, Saxe-Altenburg, Schwarzburg-Rudolstadt, Schwarzburg-Sondershausen, Reuss-Greiz, Reuss-Gera, and Gotha, have been constituted into a single state under the title Land Thüringen, with an area of 4,541 square miles, a population of 1,624,675, and two seats in the Federal Reichsrat. In size Land Thüringen is sixth among German states. The new state is governed by a "Volksrat." Capital, Weimar (37,233).

Hesse, in the West Centre, consists of Northern and Southern portions, nearly equal in size, on either side of the Main River, with a total area of 2,968 square miles and a population (1925) of 1,350,986, of whom more than half are Protestants. The country is mountainous but fertile, and agriculture is flourishing. Capital, Darmstadt, pop. (1919) 82,367. Other large towns are Mayence (Mainz) at the confluence of the Main and the Rhine (107,930), Offenbach (75,580), Worms (44,285), and Giessen (33,402).

Mecklenburg-Schwerin, between the Elbe and the Baltic, has a total area of 5,068 square miles, with a population (1925) of 685,123. Agriculture and stock raising are the principal industries, the Mecklenburg breed of horses being famous. The chief manufactures are bricks and machinery. Capital, Schwerin, pop. (1919) 45,645.

Oldenburg, on the North Sea, between the estuary of the Weser (at Bremen) and the Prussian province of Hanover, has detached territories in Lübeck (between Holstein and Mecklenburg) and Birkenfeld (Rhine Province of Prussia). The total area is 2,479 square miles, with a population (1925) of 551,805. The chief industries are agriculture, bee-keeping and stock-raising; the principal manufactures are brewing and distilling, tanning, tobacco and corks. Capital, Oldenburg, pop. (1919) 32,540.

Brunswick, 1,418 square miles, pop. (1925) 508,322; in Northern Germany. Capital, Brunswick, pop. (1919) 139,539.

Anhalt, 906 square miles, pop. (1925) 351,471, is in Central Germany. Capital, Dessau, pop. (1919) 57,658.

Lippe, 470 square miles, pop. (1925) 165,621. Capital, Detmold (15,301).

Mecklenburg-Strelitz, between Mecklenburg-Schwerin, Pomerania and Brandenburg, has a total area of 1,130 square miles, with a population (1925) of 111,821. Chief industries are agriculture and wood products. Capital, Neustrelitz, pop. (1919) 11,246.

Waldeck, 438 square miles, pop. (1925) 58,641. Capital, Arolsen (2,793).

Schannburg-Lippe, 130 square miles, pop. (1925) 48,661. Capital, Bückeburg (6,745).

The **Free Hanse Towns** comprise the three cities of **Lübeck**, on the Trave (area 115 square miles, pop. 127,460), **Bremen**, on the Weser (area 99 square miles, pop. 311,381), and **Hamburg**, on the Elbe (area 160 square miles, pop. 1,134,112). Each has a small rural territory and has full Federal independence, with a Council of State (under the Presidency of a Burgomaster).

TRADE FLAG: Black, red and gold.

Education, M. Livathynopolis.

National Economy, M. Sechiotis.

Communications, M. Tavoularis.

Health and Social Assistance and Refugees, M. Filandros.

Agriculture, M. Stamoulis.

Envoy Extraordinary and Minister Plenipotentiary in London, Monsieur D. Caelamanos.

Legation, 51 Upper Brook St., W. 1.

Counsellor (vacant).

Secretaries, M. G. V. Melas; M. Jean Roinanos.

Consul-General, M. S. Constantinidis, 36 Gordon Square, W.C. 1.

A maritime Republic in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Ionian Sea, and on the E. by the Aegean and Turkey, with an estimated area of 49,036 sq. miles and an estimated population (1922) of 6,386,000 (or, including Greeks expelled from Turkey, 7,000,000).

Prior to the Balkan Wars of 1912-13 the area was less than 25,000 sq. miles, the addition of portions of Macedonia and Epirus, Crete (2,950 sq. miles, pop. 336,151), and certain Aegean Islands increasing the area to 43,522 sq. miles. During the War of 1914-1918 Greece eventually declared for the Allies against the Central Powers, and her territories were increased by the occupation of Thrace (including the monastic republic of Mount Athos), and the islands of Imbros and Tenedos. Under an arrangement with Italy, to come into effect after the ratification of the Treaty of Sevres, the Dodecanese (12 islands) were surrendered by Turkey, and these were to be handed over to Greece by Italy with the exception of Rhodes, for which a special arrangement was made: this arrangement was, however, repudiated by Italy, and the fate of the island is in abeyance. Greece also received under the Treaty a mandate for the occupation and administration of the town and district of Smyrna, but military operations by forces of the Angora Government, under Mustapha Kemal Pasha, recovered the mandated region in Sept. 1922, the Greek forces being annihilated, and Smyrna was evacuated on Sept. 8, 1922, and that part of the Greek population of Asia Minor which escaped massacre by the Turks took refuge in Greece. By the Treaty of Lausanne (1923) Greece lost Eastern Thrace (that part lying E. of the Maritza river) and the islands of Imbros and Tenedos, which were retroceded to Turkey. The country is thus composed of a continental portion (the southern part of the Balkan Peninsula), and of islands in the Aegean, Mediterranean, and Ionian Seas. The surface is nearly all mountainous; the coasts are elevated, irregular, and deeply indented.

Government.—Greece became independent in 1830, after a successful insurrection against the Turkish government, to which the country had been subjected since the 15th century, and after a succession of rulers of the Glucksburg dynasty was declared a Republic by the Constituent Assembly on March 25, 1924. The legislature consists of a Senate of 40 members, and of a Chamber of Deputies (or *bouls*) elected for 4 years by universal manhood suffrage. Members of the legislature are paid 4,000 drachmes annually.

Production.—Agriculture is the principal industry and employs more than half the population. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-vine. The principal minerals are silver, lead, zinc, emery, copper, magnesium, sulphur, salt, and marble. The chief manufactures are smelting, textiles, and shipbuilding. The imports are cotton and other manufactures, corn, timber, cattle, hides, sugar, salt fish, and coal. The exports consist of wine, olives, olive oil, tobacco, currants, figs, cognac, hides, lead, iron ore, magnesite, iron pyrites, chrome ore, emery, marble, and sponges. The imports in 1920 were, from Gt. Britain, 320 million drachmes; U.S.A. 287 million; Italy 125 million; France 209 million; and other countries 333 million. The exports were, to U.S.A., 40 million; Gt. Britain, 37 million; Italy 26 million; France, 20 million; and other countries 178 million.

Defence.—Service in the Army is universal and compulsory between the ages of 21 and 57. Both the land and sea forces were reorganised during the War of 1914-1918, and about 150,000 all ranks fought with the Allied Armies. The

Navy consisted (July, 1919) of 6 ironclads, 1 modern cruiser, 14 destroyers, 6 torpedo-boats, and 2 submarines.

Education is free and compulsory, maintained by local taxation supplemented by State grants. Secondary education is somewhat backward, particularly in the country districts. The University at Athens is of some repute.

Finance.—The debt in 1912 was 1,040,900,000 drachmæ, and the Balkan Wars of 1912-13 added 354,960,000 drachmæ, the Great War added 1,028,000,000 drachmæ, and subsequent military operations to March, 1921, were responsible for 1,776,140,000 drachmæ.

Communications.—There were (1920) 1,470 miles of railroad open for traffic. There is a ship canal cutting through the Isthmus of Corinth for ships up to 1,500 tons. The post offices (in Old Greece) number 1,150, dealing with 36,000,000 postal packets; telegraphs, 4,951 miles. The mercantile marine consists of 110 sailing vessels above 100 tons capacity, and 298 steamers (449,184 tons). The principal harbours are the Piræus (port of Athens), Syra, Patras, Salonica, Volo, Corfu, Kalamata, Laurium, Cavalla, and Canea (Crete).

Budget, 1924-25.	Drachmæ.
Ordinary revenue	3,458,757,000
Extraordinary do.	499,824,000
Ordinary expenditure	2,906,075,000
Extraordinary do.	1,569,223,000
Public Debt (March 31, 1924)	*9,288,000,000

Total Imports	Dr. 6,035,346,000
Total exports	2,545,110,000
Imports from U.K. (1924)	862,601,185
Exports to U.K. (1924)	703,315,512

CAPITAL, Athens. Population, 1923 (including the Piræus), 550,000. Other large towns are Salonica (170,321), Patras (52,174), Corfu (28,000), Candia (25,000), Canea (25,000), Volo (30,000), Cavalla (23,000).

FLAG: 9 horizontal bands, alternately blue and white, with white cross, on blue ground, in corner.

GUATEMALA.

República de Guatemala.

President (1922-1928), José María Orellana, assumed office Dec. 9, 1921.

Minister of Foreign Affairs, Señor Don Roberto Lowenthal.

Minister in London, Dr. Francisco Sánchez Latour.

Consul in London, D. Bowman, 11 Queen Victoria Street, E.C. 4.

Guatemala, the most northerly of the Republics of Central America, is situated in N. lat. from 13° 45' to 17° 49', and in W. Long. from 88° 12' 49" to 92° 13' 43" and comprises an area of 42,456 square miles, and a population in 1921 of 1,600,535. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital was destroyed by an upheaval in Jan., 1918. The country is well watered by numerous rivers; the climate is hot and somewhat malarious near the coast, but very temperate and healthy in the higher regions. About 620 miles of railway were open for traffic in 1917. There were 4,543 miles of telegraph working in 1921. The chief ports are San José de Guatemala and Champerico on the Pacific, and Livingston and Puerto Barrios on the Atlantic side. The principal export is coffee, other articles being bananas, sugar, timber, chicle (chewing gum), hides and beans, Spanish is the language of the country.

Revenue (Budget)	1924-25. Pesos 370,675,000
Expenditure (do.)	358,405,920
External Debt (Dec. 31, 1922)	£1,908,563

HAÏTI.

(République d'Haïti.)

President, M. Louis Borno, assumed office

May 15, 1922 £4,800
Foreign Affairs, Léon Dejean.

Minister in London, M. Auguste Magloire.

Consul, J. G. Dalzell, 76, Victoria Street, S. W. 1.

The Republic of Haiti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the "West India" Islands.

The island was visited on Dec. 6, 1492, by Christopher Columbus, who named it *Espaynola*, the native name being *Haïti* (mountainous) or *Quisquia* (vast). The Spaniards explored the island and almost exterminated the 2,000,000 native Indians, whom they replaced with African negroes. By the Treaty of Ryswick (1697) the western portion of the island was ceded to France; and in 1803 the territory was abandoned by the French; and a republic was proclaimed under the aboriginal name of Haïti. In 1822 the rule of the Haitian President was extended over the whole of the island, the eastern portion having declared its independence of Spain in 1821. Since 1844 the eastern portion has formed a separate republic (see Dominican Republic).

The area of the republic is 10,200 square miles, with a population estimated at 2,500,000. The mountains are richly and heavily timbered, and susceptible of cultivation nearly to their summits; it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, logwood, cocoa, cotton, hides, sugar, honey, gums and oilseeds, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. In November, 1915, both Houses of the Congress ratified a treaty with the U.S.A., establishing a virtual protectorate over the Republic, which came into effect in May, 1916. An armed Constabulary, rural and urban, under American officers, has been constituted, and a coastguard service is attached. On Nov. 17, 1920, some prominent Haytians met and formed the "Union Patriotique," an association for raising funds by public subscription all over the country for the purpose of sending delegates to plead the cause of the Haytian people. It was arranged to send a delegation of three members to New York and Washington, and on February 6, 1921, two of them left the third following two months later. It appears that the Haytian cause has found supporters there, and as a result of the visit of this delegation a Senatorial Commission of enquiry visited the

island (Nov.-Dec. 1921), and in their subsequent report advised the U.S. Government to maintain the occupation and to appoint a High Commissioner. The Constitution was amended in June 1921, and under its provisions the President is elected for four years, and governs with the advice of a Council of State of 21 members appointed by him. The principal foreign trade is carried on with the United States, Great and Greater Britain, France, and Germany; the principal articles imported from Great Britain in 1921-22 were piece-goods, jute bags, hardware, and agricultural tools. French is the language of the country.

HONDURAS.

(República de Honduras.)

President, Dr. M. Paz Baraona.

Consul-General in London, Dr. Juan M. Fiallos.
Consul, Señor Don H. Blanco Fombona, Craven House, Kingsway, W.C.2

The Middle State of Central America, stretching in N. lat. between 13° 10' and 16°, and W. long. between 83° 10' and 88° 40'; containing 44,275 English square miles, with a population estimated at 673,408 (1922).

Christopher Columbus landed at Cape Honduras in 1502, and in 1524 the country was settled by the Spaniards. In 1525 *Hernando Cortes* founded the city of Puerto Cortes and from 1539 to 1821 the country formed part of the Captaincy-General of Guatemala. From 1821 to 1839 Honduras was included in the Confederation of Central America.

The Republic of Honduras has a coast-line of nearly 400 miles on the Caribbean Sea, chief ports, Truxillo, Puerto Castilla, Puerto Cortes, Omoa, Roatan, Tela, and La Ceiba; but only about 40 miles on the Gulf of Fonseca, on the Pacific side, chief port, Amapala. (NOTE.—Amapala is on Tiger Island; port on mainland is San Lorenzo, 2 hours in gasoline launch from Amapala. From San Lorenzo by auto to capital, Tegucigalpa, 88 miles, good road, 5 1/2 hours. Road from Tegucigalpa to the Atlantic coast has now been completed as far as Lake Yojoa, and is in fair condition. The journey to the lake takes from 9 to 10 hours in automobile. The lake is crossed by gasoline launch in 1 1/2 hours. From there to the head of the railway

* U.S. \$. Gourde on gold basis = 5 Gourdes \$s.

at Portrerillos the road is still in very poor condition, but cars travel thereon in the dry season, taking from 2 to 3 hours. Potrerillos is 2 hours by rail from San Pedro Sula, and 3 hours from Puerto Cortes. By taking express automobiles and an express car on the railway, it is now possible to make Puerto Cortes from Tegucigalpa in 24 hours, thus reaching New York in 5 or 6 days. There is also an aeroplane service from Tegucigalpa to Tela, connecting up with the direct steamers for Avonmouth from the latter. There are railway connections between San Pedro Sula, and Tela and La Ceiba. The country is mountainous, being traversed by the Cordilleras. The soil is very fertile, the products being bananas, mahogany, fruit, cattle, sugar, rice, tobacco, coffee, indigo, sarsaparilla, hides and skins, indiarubber, cedar, fustic, rose, and Lima wool (Kapok). There is an immense amount of uncultivated land. The number of cattle in 1920 was approximately 500,000. The forests are extensive, but there is a lack of communications and transport. Its mineral wealth is great. In 1924 there were 1,300 kilometres of railway open, all on the North Coast. The language of the country is Spanish.

	1922-23.	1923-24.
Revenue	£1,537,974	£1,361,785

Hungary was declared a Republic on Nov. 17, 1918, its territories being decreased from the area of the former Kingdom of Hungary (which was united to the Austrian Empire by the identity of sovereigns) through the transfer of Transylvania to the Rumanians and of Croatia and Slavonia to the new Yugo-Slav Kingdom (*q.v.*) and of Slovakia and Ruthenia to Czechoslovakia (*q.v.*). The area of Hungary is about 36,179 sq. miles, with a population (almost entirely Magyar) of 8,160,000 (Dec. 1924). The political neighbours are Czechoslovakia on the N., Yugo-Slavia on the S., Rumania on the E., and Austria on the W.

On the declaration of Republican institutions in 1918, Count Károlyi assumed office as Provisional President, but on March 22, 1919, Count Károlyi resigned, and was succeeded by a "Bolshevik" administration with a "Soviet" (Workmen's Council), in which Bela Kun (or Cohen) was the dominant personality. This administration was driven out of power by the successes of the Rumanian military forces (which invaded Hungary and occupied Budapest) and was followed by a Socialistic Government under Julius Peidel (Aug. 1, 1919). Six days later the Socialistic Government was superseded by an administration appointed by the Archduke Joseph, who accepted office as Provisional President, Aug. 7, 1919, but resigned in consequence of the protests of the Supreme Council in Paris.

On March 21, 1920, Admiral Nicholas von Horthy of Nagybánya was elected Governor of Hungary by vote of the National Assembly, which gave him sovereign rights, with certain restrictions.

In 1921, the ex-king Karl made two efforts to regain the throne, remaining in the country from March 26 to April 5, and from Oct. 21 until removed under escort. On each occasion the Hungarian Government was informed that a Hapsburg restoration would not be tolerated by the European Powers.

All religions are tolerated; the greater number of Magyars are Roman Catholics, but there is a large Protestant minority. The parcelling out of the great estates, which was forcibly attempted during the Károlyi régime, has been continued to a small extent, but on an economic basis and at the initiative of the owners; a land-reform bill aiming at the forced sale of the properties exceeding a given area is in process of execution.

A single chamber National Assembly (introduced Jan. 4, 1920, in place of the Upper and Lower Houses of the former Parliament) is elected by universal suffrage. The question of providing a Second Chamber from a reformed House of Magnates (which ceased to function after the revolution) is under discussion.

The greater part of the area of present Hungary consists of the Alföld or Great Plain, parts of which may be considered as among the most

fertile for agricultural purposes in the world, producing grain of excellent quality and supporting a number of horses, cattle and swine. The mountainous districts having been ceded to surrounding states by the Peace Treaty, Hungary has lost the greater part of the forests and mines, which formerly contributed so largely to the national wealth.

Finance and Trade.—During the period following the War the Hungarian currency rapidly depreciated and touched its lowest point in August, 1923, when it was quoted at 380,000 crowns to the £, as against 24 before the War. In 1924 an international loan of £10,000,000 sterling was granted to Hungary, its use being subject to a Reconstruction Plan elaborated by the League of Nations, under which State finances must be stabilised in 30 months. A Hungarian National Bank was also set up with the sole right of issuing banknotes. According to special arrangements made with the Bank of England, the Hungarian currency was stabilised upon the £, at 345,000 crowns = £1 sterling, and it now automatically follows the latter's fluctuations. The carrying out of the reconstruction scheme is being supervised by a Commissioner-General on behalf of the League. The results of the first year of reconstruction were very satisfactory, and the financial situation in July, 1925, was far in advance of the Reconstruction Plan, which contemplated a budget deficit for this period of 100 million gold crowns (about £4,000,000), whereas the accounts show a surplus of 63 million gold crowns.

The total imports of the country amounted in 1924 to £30,500,000, of which £665,000 were from the United Kingdom, and the total exports amounted to £25,000,000, of which £400,000 were taken by the U.K. There is an increasing opening for British textiles and other British goods.

No part of Hungary touches the sea. The length of navigable rivers is 687 miles; there are about 5,000 miles of railways and 5,800 miles of telegraph in the present Kingdom.

CAPITAL: Budapest, on the Danube, has a population of 1,184,626 (1921). The other large towns are: Szeged (110,000), and Debreczen (103,000); there are 34 other towns with a population over 20,000.

Hungarian and German are the languages of the country, but English is increasing in commercial use.

FLAG: Red, white, green (horizontally), arms (without supporters) in centre.

ICELAND.

(Island.)

King, Christian X. (see Denmark).

Presidents of Al-thing, H. Steinsen; Benedikt Sveinsson; Johannes Johannesson.

Iceland is a large, volcanic, and treeless island in the North Atlantic Ocean, extending from 63° 23' to 66° 33' N. lat., and from 13° 22' to 24° 35' W. long., with an estimated area of 40,497 square miles, or greater than that of Ireland. The population was 94,866 in 1920.

An Act for the creation of a Danish-Icelandic Federal Constitution, Denmark and Iceland to be free and independent States under the same Sovereign, came into force on Dec. 1, 1918, but since the constitution granted in 1915 the assembly (Al-thing) had been more or less independent of the Government at Copenhagen in internal questions. The principal products of the island are sheep, cattle, ponies, and fish, and the imports consist of almost all the necessities of life, the chief items being grain and meal, sugar, coffee, salt, cotton goods, tobacco, spirits, hardware, and timber. Total imports (1923): estimated, £2,816,190; exports, £3,194,548. Iceland is in direct telegraphic communication with Great Britain.

CAPITAL, Reykjavik. Population, about 20,000.

Other towns are Isafjörður, Akureyri, and Seydísfjörður.

FLAG: Blue, with white-bordered red cross.

Reykjavik—Consul, Asgeir T. Sigurdsson, O.B.E.

Transit, 5 days.

IRAQ.

(Mesopotamia.)

King of Iraq, Faisal, elected King of Iraq, Aug. 10, 1921, acceded Aug. 23, 1921.

Prime Minister (July, 1925), Abdul Muhsin Beg al Sa'dun.

Iraq, or Mesopotamia, "the land between the rivers" (Euphrates and Tigris), extends from Kurdistan on N. and N.E. to the Persian Gulf on the S. and S.E. and from Persia on E. to Syria and the Arabian Desert on W. the approximate position being between 37½° to 48½° E. long., and from 37½° to 30° N. lat. The territory was freed from Turkish rule during the War of 1914-18 by Anglo-Indian and British Dominion troops under Generals Nixon, Maude, and Marshall (Gen. Maude succumbing to cholera after the capture of Baghdad). Under the Treaty of Lausanne, ratified on Aug. 6, 1923, Turkey renounced the sovereignty over Mesopotamia, and its future administration has been entrusted to Great Britain by the Supreme Council of the Allies. A provisional Arab Government was set up by the High Commissioner in Nov., 1920, and in Aug., 1921, the Emir Faisal (son of the King of the Hedjaz) was elected King of Iraq, to be enthroned on Aug. 23, 1921. By Treaty between Great Britain and Iraq (Oct. 10, 1922) the former undertakes to exercise its good offices to secure the admission of Iraq to the League of Nations, and as soon as that admission has been accomplished all the responsibilities of Great Britain as the mandatory power will be terminated; by a protocol signed April 30, 1923, the duration of the treaty was cut down from 20 years to 4. In March, 1924, a Constituent Assembly met in Baghdad, ratified the treaty between Great Britain and Iraq, and passed an organic law and an electoral law for

the summoning of an electoral assembly. The constitution thus instituted is a Constitutional Monarchy, hereditary in the family of King Faisal, with a Senate of 20 members nominated by the King, and an elective Assembly chosen by the people. The first Parliament under this Constitution was opened by King Faisal on July 16, 1925.

The total area of the districts comprised within the British Mandatory Sphere is about 150,000 sq. miles, the distance from Basra in the south to Mosul in the north being approximately 500 miles. The sphere comprises the former Turkish vilayet of *Mosul*, *Baghdad* and *Basra*. At the Census of 1920 the population was ascertained to be 2,849,282, as under:—

Baghdad vilayet	1,360,304
Basra vilayet	785,600
Mosul vilayet	703,378
Total	2,849,282

The *Baghdad* vilayet include the Baghdad, Samarra, Diyala, Kut, Diwaniyah, Hillah and Dinlaim Divisions; *Basra* vilayet include Basra, Amara and Muntafik; and *Mosul* include Mosul, Arbil, Kirkuk and Suleimani. (Mosul covers a great part of the ancient kingdom of *Assyria*, the ruins of Nineveh, the Assyrian capital, being visible on the banks of the Tigris, opposite Mosul.)

Of the total population there were in 1920 1,146,685 Sunni Muhammadans, 1,494,075 Shiite Muhammadans, 87,488 Jews, 78,792 Christians, and 43,302 other religious.

Mesopotamia is capable of supporting a population many times in excess of its present inhabitants if irrigation is developed and extended. In 1908 certain works were undertaken, following on the report of Sir W. Willcocks, and since the British occupation notable improvements have been effected; the Irrigation Department is at present confining itself to small and immediately remunerative schemes. The wealth of the country depends entirely upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley and beans, and rice, peas and Indian corn; wheat averages 454lb. per acre, barley 612lb., and rice over 1,000lb. In 1918-19 there were 1,547,000 acres (deriving their water from the Tigris and Euphrates) under general cultivation, an increase of 64 per cent. on the previous year. Cotton growing is a developing industry and it is estimated that Mesopotamia could yield 300,000 bales annually if sufficient labour is forthcoming. The Iraq Government granted in July, 1924, an important agricultural and irrigation concession which includes a scheme for putting many thousands of acres under cultivation for cotton in the Diyala river valley. A concession for the exploitation of the oil in the Baghdad and Mosul vilayets was granted to the Turkish Petroleum Company in March, 1925. The country is being opened up and existing communications improved and secured. Schools, hospitals and dispensaries have been established under British auspices. Basra was equipped with wharves, railway sidings, &c., for military purposes, and is thus suited for commerce. The chief imports are textiles, sugar, and tea, and the chief exports are dates and piece goods.

The approximate total revenue in the financial year 1923-24 was £3,841,100, and the expenditure £3,624,000. The following table shows the ap-

proximate annual net revenue obtained by the Iraq Customs Administration during the years of British occupation:—

1915-16	£114,839	1920-21	£1,426,288
1916-17	358,573	1921-22	1,622,232
1917-18	410,510	1922-23	1,412,035
1918-19	388,333	1923-24	1,213,130
1919-20	1,388,233		

The *Euphrates* (which has a total length of 1,800 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles), the latter rising in the north-west of Erzerum in the Dumlul Dagh. The *Tigris* has a total length of 1,150 miles from its source to its junction with the Euphrates at Garmat Ali, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the vilayets of Diarbekir, Van and Bitlis conjoin.

The *Baghdad Railway*.—In 1899 the Anatolian Railway Company obtained a concession from the Sultan of Turkey for the construction of a railway from Konieh (the eastern terminus of the Anatolian Railway), to the Persian Gulf at Koweit, *via* Baghdad, a total length of 1,550 miles, with a single track of 4 ft. 8½ in. gauge. Its projected course was from Konieh to Adana, thence S.E. to Aleppo, Jerablus (where it would cross the Euphrates and enter Mesopotamia), and Mosul, and thence S. down the right bank of the Tigris to Baghdad and the Persian Gulf. The section Konieh-Eregli-Bulgurlu (124 miles), was opened in Oct. 1904, and at the outbreak of the Great War about 1,200 miles (out of the total of 1,550 miles) were in operation, with gaps in important sections (notably in the hills N.W. of Aleppo, and in the Mesopotamian desert W. & S. of Mosul). The line crosses the Euphrates on a wooden bridge at Jerablus. At Aleppo there is a connexion with the Pilgrims' line from Medina (through Damascus and Homs to Aleppo) and, if it is completed, the railway will be served by the port of Alexandretta (Iskanderun) in Cilicia. The first through train from Basra to Baghdad left Basra on Jan. 13, 1920. The total length of line open at that date was 945 miles compared with 1,113 miles during the War, some unimportant lines having been disused since the cessation of hostilities with Turkey; since that time lines have been laid from Baghdad to Kerbala and Baghdad to Kirkuk. The line to Kirkuk will be extended to Mosul, and should be completed by the end of 1926.

The chief city is Baghdad, the former capital of the Abbasside dynasty, one of the Caliphs of that dynasty being Haroun al Rashid of "the Arabian Nights." Baghdad has an estimated population of 170,000, other towns being Basra, 85,000, and Mosul (opposite the site of Nineveh), 90,000.

CAPITAL, Baghdad.

Baghdad is 840 miles by air from Cairo, Egypt. Official Mails between London and Baghdad are sent by fortnightly Air Mail Service *via* Cairo—Heliopolis—Ramleh—Amman—Kasr Asrak—Ramadi, with a saving of about 14 days in transit over the normal service. A motor service runs twice weekly between Damascus and Baghdad.

ITALY.

(Regno d'Italia.)

King, Victor Emmanuel, born November 11, 1869; *married, Oct. 24, 1896,* Princess Helen of Montenegro; *succeeded to the throne* July 29, 1900.

Heir Apparent, H.R.H. Humbert, Prince of Piedmont, born Sept. 15, 1904.

CABINET (June 30, 1924: reconstructed 1925).

*Premier and Minister of Foreign Affairs, War and Marine,** Signor Benito Mussolini.

Colonies, Prince Lanza di Scalea.

Justice, Signor Rocco.

Finance and Treasury, Count Volpi.

Education, Signor Fedele.

Public Works, Signor Guirali.

Interior, Dr. Luigi Federzoni.

National Economy (Agriculture, Labour, Industry and Commerce), Signor Belluzzo.

Communications, Signor Costanzo Ciano

Ambassador in London, His Excellency Marchese della Torretta, 20 Grosvenor Square, W. 1. (Nov. 1922).

Counsellor, Signor Augusto Rosso.

1st Secretary, Signor Ugo Sola.

2nd Sec., Don Filippo dei Duchi Caffarelli.

3rd Sec., Conte di Roasenda Vittorio.

Hon. Attaché, Signor De Facci Negrati Gaetano.

Air Attaché, Generale Alessandro Guidoni.

Naval Attaché, Capt. Conte Raineri Biscia.

Military Attaché, Colonel Amigo Coppi.

Commercial Attaché, Signor G. B. Ceccato.

Special Attaché, Signor G. Falliccia.

Chancellor, Signor Guiseppe de Grossi.

Archivist, Signor Ugo Catani.

Consul, Signor G. A. Pirelli, 144 Queen Victoria Street, E.C. 4.

Vice-Consul, Cavaliere P. Righetti.

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba, and about 70 minor islands (with certain dependencies hereinafter noted). It is bounded on the N. by the Republics of Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Istria, &c., and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area of the kingdom of Italy in 1914 was 110,623 sq. miles, and by the Treaty of Versailles (June 28, 1919) Italy gained from Austria-Hungary the Trentino (about 4,000 sq. miles) and Trieste (with about 1,000 sq. miles of the Adriatic Sea-board).

* Signor Mussolini is the accredited leader of *Fascism*, the *Fascisti* representing a revolutionary movement against the alleged inactivity of post-War Italian statesmen. The uniform of the movement is a black shirt, and the name is derived from *fascio* or band (cf. the *fascus* of the Roman lictor) in which the movement was organised.

By a treaty signed at Rome (Jan. 27, 1924), the *Free State of Fiume* came to an end. Yugo-Slavia's sovereignty over Port Baros and the Delta is established by the treaty, and Italy acquired the town and harbour works of Fiume, together with a narrow strip of hinterland. Italy agreed to lease to Yugo-Slavia the Thacon di Revel quay at a rental of one gold lira for 50 years, the railway station being established as an international frontier station. Fiume is now the capital of the newly created Italian Provincia del Carnaro, and has the status of an Italian provincial town.

The total area of the Kingdom of Italy was estimated (Jan. 1920) at 120,450 square miles, with a population of about 38,500,000. There is a large settled and floating population of Americans and English.

The Italian peninsula is traversed throughout its length by the chain of the Apennines; the Alps form its northern limits, dividing it from France, Switzerland, Germany, Austria and Yugo-Slavia. *Mont Blanc* (15,782 feet), the highest peak of the Alps, is in the French Pennine Alps, but within the Italian borders are Monte Rosa (15,217 feet) and several peaks from 12,000 to 14,000 feet. The chief rivers are the Po, the Adige, the Tiber, and the Arno.

GOVERNMENT.—Italian unity was accomplished under the House of Savoy, after an heroic struggle from 1848-1870, in which the great patriots *Mazzini* (born 1805, died 1872) and *Garibaldi* (born 1807, died 1882) were the principal figures. It was completed when Lombardy was ceded by Austria in 1860 and Venice in 1866, and through the evacuation of the Papal States by the French in 1870. In 1872 the King of Italy entered Rome, and that city was declared to be the capital. The government is that of a constitutional monarchy with a legislature of two houses—the *Senate* (of 385 life members appointed by the King), and the *Chamber of Deputies* of 510 members (elected by adult manhood suffrage). The maximum duration of Parliament is 5 years; Deputies receive 15,000 lire annually.

PRODUCTION.—Agriculture (including the growing of grapes, olives and chestnuts) is the principal industry. Italian wines are numerous and celebrated, and olives and olive-oil are furnished by Tuscany, Liguria, and the province of Bari; while fruit abounds and is largely exported. The cultivation of the silkworm forms an important industry. Among the principal minerals are iron, lead, zinc, copper, manganese, and antimony ores, sulphur, gypsum, amianthus, alum, and boracic acid. Silver is found in Sardinia, and some gold in the Alps. Salt is a Government monopoly.

The principal exports are cotton, silk and woolen tissues, motor cars, olive-oil, wine, candied citron, sienna earths, pastes, coral, rags, boracic acid, raw and thrown silk, hemp, cattle, straw hats, rice, iron, zinc and copper ores, sulphur, marble, fruit, vegetables, fresh and prepared meats, poultry chemical products, woods, roots, &c., for dyeing and tanning, artistic works, &c. The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, silk and manufactured goods, woollens, raw silk, silkworms' eggs and cocoons, machinery, iron and steel in bars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthenware, &c. The manufactures are woollen, cotton, silk,

hemp, and linen yarns and tissues, motor cars, rubber tyres and tubes, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption.

DEFENCE.—The Army consists on a peace footing of 310,000 all ranks. On May 23, 1915, Italy declared war on Austro-Hungary, and on Aug. 27, 1916, a state of war was declared to exist with Germany. The cost of the war to Oct. 31, 1918, amounted to 48 milliards of lire (£1,920,000,000). During the War of 1914-1918, over 15 per cent. of the population were mobilised, and 5,250,000 men passed into the Armies of Italy. The killed and missing amounted to 650,000. The Navy includes 3 modern and 6 pre-Dreadnought battleships, 3 armoured cruisers, 30 destroyers, 100 torpedo boats, and 80 submarines. The peace personnel of the Italian Navy is about 40,000 all ranks. Spezia and Pola, the chief naval and military ports of the kingdom, are securely fortified.

EDUCATION.—Primary Education is free and compulsory, and evening continuation classes are also compulsory for military recruits. It is maintained by local taxation and State grants. Secondary education is generally State-maintained, and schools are increasing in number. Several of the Universities are of very ancient foundation.

COMMUNICATIONS.—On June 30, 1924, there were 10,210 miles of railway open for traffic, 858 being electrified; the post-offices (1919) numbered 11,376, and there were 34,518 miles of telegraph line. The sea-going commercial marine (1922) consisted of 1,016 steamers (2,693,722 tons) and 397 sailing vessels (167,613 tons). In 1921 (including coasting traffic) 34,406,285 tons entered and 33,696,401 tons cleared at Italian ports.

Terme, Rome; 12 Via Silvio Pellico, Milan; Scall d'Azeglio, Leghorn; Via A. Depretis, Naples).

Rome, transit, 44 hours.

ITALIAN COLONIES, &c.

Libia.—The Turkish vilayet of Tripoli and the mutessarifat of Benghazi on the northern coast of Africa, were occupied by Italy in 1911-12, and under the Treaty of Ouchy (Oct. 1912) the sovereignty of the province was transferred to the King of Italy, the spiritual headship over the Muhammadan population being retained by the Caliph. Tripoli is the most easterly of the Barbary States, extending from the frontiers of Tunis to those of Egypt, a distance along the coast-line of nearly 1,100 miles, and inland to the south a distance of about 800 miles. The transferred territory comprises the four sub-provinces or Mutesariflik of Tripoli, Khoms, Jabel-el-Gharb, and Fezzan, and also of Benghazi or Cyrenaica, a total area of 810,000 square miles, with a population of about 1,000,000. There are no rivers in the country, and the rainfall being precarious, a good harvest can only be reckoned on every four or five years. Barley, dates, olives, oranges, lemons, and vegetables are produced, and the principal imports are metals, British and other European manufactures, tea, beads, wine and spirits, besides a number of articles for barter in Wadai, Bornu, and the Western Sudan, whither caravans proceed from Tripoli. The principal articles of exports are ostrich feathers, ivory, skins, sponges, hides, esparto grass, wool, cattle, and horses. The ancient ruins in Cyrenaica, i.e., at Cyrene, Ptolemais, and Apollonia, are interesting to explorers, as well as those at Leptis Magna, which is close to Khoms, or 70 miles from the city of Tripoli. The population of Benghazi consists of Arabs, Greeks, Maltese, and a few Levantines. The commerce in cereals, wool, cattle for Malta, and other agricultural produce, is considerable, when a sufficient rainfall causes good harvests. The capital of "Tripolitana" is Tripoli (population 50,000), and of Cyrenaica, Benghazi (population 35,000).

Governor of Cyrenaica, General Mombelli.
Governor of Tripolitana, General de Bono.

Eritrea is a Red Sea colony, and extends from Ras Kasar, 18° 2' N., to Ras Demoiira, 10° 42' N., and is bounded on N.W. by the Anglo-Egyptian Sudan, on S. by Abyssinia, and on S.E. by French Somaliland. It consists of a triangular portion of barren and sandy lowland with a coast-line along the Red Sea of about 700 miles, and covers a total area of 64,000 square miles, with a population of about 380,000, of whom about 3,000 are Europeans. The capital is Asmara, Massawa being the chief port, where there is a good harbour. The principal products are potash, skins, and salt, of great value as being the monetary currency of Southern Abyssinia.

Governor of Eritrea, Dr. Jacopo Gasparini.

Somaliland.—Italian Somaliland comprises a coastal strip on the Gulf of Aden and the Indian Ocean, from 12° N. lat. to the Equator, and is bounded on the N. by the Gulf of Aden, on E. by the Indian Ocean, and on W. by British Somaliland, Abyssinia, and British E. Africa. The total area, including the territory of Jubaland (and the port of Kismayu) transferred from Kenya by Great Britain in 1925, is about 220,000

sq. miles, and the population is estimated at 320,000. Agriculture and camel and cattle rearing are the principal industries. The capital is Mogadisho, on the Indian Ocean.

Governor of Italian Somaliland, Cesare de Vecchi.

Tientsin.—Italy obtained in 1902 a concession of land fronting the Peiho river (China), with a total area of 20 square miles and a population of about 10,000 natives.

The Dodecanese.—These 12 islands (occupied by Italy in 1912 during the war with Turkey) are Stampalia, Scarpanto, Caso, Piscopi, Nisiro, Callimno, Liro, Patino, Cos, Simi, Calchi, and Lipsa. The total population is about 100,000.

JAPAN.

(Nippon.)

Emperor, Yoshihito, K.G.; born Aug. 31, 1879; succeeded July 30, 1912; accession ceremony, Nov. 10, 1915; mar. Princess Sadako, May 10, 1900, and has issue 4 sons.
Heir Apparent and Regent, Prince Hirohito, G.C.B., G.C.V.O., born April 29, 1901; married (1924) Princess Nagako, daughter of Prince Kuniyoshi Kuni; (appointed Regent, Nov. 25, 1921).

CABINET (Aug., 1925).

Prime Minister, Viscount Takaaki Kato, G.C.M.G.
Minister of Foreign Affairs, Baron Kijuro Shidehara, K.B.E.
Minister for Home Affairs, Reijiro Wakatsuki.
Minister of Finance, Yuko Hamaguchi.
Marine, Admiral Hyo Takarabe.
War, General Kazushige Ugaki.
Justice, Yokui Yegi.
Education, Ryohai Okada.
Commerce and Industry, Chokunon Kataoka.
Agriculture and Forestry, Seiji Hayami.
Communications, Kenzo Adachi.
Railways, Mitsugu Sengoku.

Ambassador in London, Baron Keishiro Matsui, G.C.V.O., 10 Grosvenor Square, W. 1.
Chancery of the Embassy, 37, Portman Square, W. 1.

Counsellor, Isaburo Yoshida, C.B., G.C.V.O.

1st Secretary, Takezo Okamoto.

2nd Secretaries, Kuramatsu Murai; Shu Tomii.

3rd Secretaries, Kikuji Yonezawa; Takemi Miura.

Attaches, Shoichi Kanki; Itsuo Goti; Nobuo Fujimura; Nogao Kita.

Naval Attaché, Capt. Teijiro Toyoda.

Asst. Naval Attaché, Comdr. Seichi Iwamura.

Military Attaché, Maj.-Gen. Harushige Ninomiya.

Asst. Military Attaché, Capt. Tasuku Okada.

Financial Attaché, Kengo Mori.

Commercial Secretary, Shinjiro Matsuyama,

1 Broad Street Place, E.C. 2.

Asst. do., Torao Wakamatsu.

Chancellors (37 Portman Square, W. 1), Sokichi Sakurai; Kunikata Ishisuka; Motokichi Hasegawa; Tsuneo Hattori; Kuichi Yoshihara.

Consul General (London), C. Mogaki (acting), 1, Broad Street Place, E.C. 2.

Consul (Liverpool), K. Tamaki.

" (Glasgow), A. Scott Younger.

" (Middlesbrough), Wayman Dixon.

" (Cardiff), E. H. Trimby.

This ancient and extensive Empire consists of four large and many small islands, said to comprise in all above 4,223, the principal of which are Honshu, Shikoku, Kiu-shu, Hokkaido or Yezo, situate to the north of the main island, from which it is separated by the Tsugaru straits, and Formosa, called by the Japanese, Taiwan. The Ainu, an undomestic but harmless tribe, who in ancient times occupied the greater part of the country, are still found in Yezo, but in diminishing numbers. The Kurile islands have belonged to Japan since 1875, and in 1876 she incorporated the Luchu (Riu-kiu) Islands under the name of "Prefecture of Okinawa." The empire, with its dependencies, comprises an area of 260,783 square miles, with a population (Dec. 1923) of 80,704,800. The islands are eminently volcanic, and 18 of the summits are still active; the chief of these, Fuji-san, or Fujiyama, the loftiest and most sacred mountain of Japan, about sixty miles from Tokio, is 12,320 ft. high, and has been dormant since 1707. Japan is also liable to frequent, and occasionally disastrous, earthquakes. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, sulphur, lead, manganese, tin, tungsten, molybdenum, antimony, zinc, agate, cornelian, and rock crystal are found. Gold is found in the island of Sado, and silver mining is prosecuted on a small scale; while there is a good supply of middling coal. Petroleum is also being produced in quantities, especially in the Province of Echigo. Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, and a lacquer-tree, which furnishes the celebrated "lacquer" of Japan. The principal timber trees are the *Cryptomeria japonica*, *Pinus Massoniana*, and *Zelkova Keaki*; the *Paulownia imperialis* is largely used for fancy boxes and works of art; the maple is merely for ornament. Chestnut, oak, beech, and elm are comparatively rare and little used. The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; rice is the staple food of the people, 346,000,000 bushels being consumed annually (in 1924 the home grown crop amounted to 283,565,000 bushels). Agriculture, upon which the Japanese bestow great care, is their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit is abundant, including the orange, persimmon and loquat; European fruits, such as apples, strawberries, pears, grapes, figs, and peaches are produced, and the American navel orange is extensively grown.

Commerce and Industry.—The chief manufactures are silk and cotton woven goods, cotton yarn, matches, paper, glass, lacquer ware, porcelain, earthenware, mats, matting, hemp-brands, knitted goods, vegetable oil, crude camphor, camphor oil, straw-plaits, and bronze, while ship-building is an important industry in the yards; the cotton-spinning factories increased from 152 in 1913 to 177 in 1923. The chief imports are raw cotton from India, U.S., Egypt, and China; flour from the U.S.; and piece goods, metals, manures, woollens, wool, drugs, rails, locomotives, and machinery from the U.S.A. and Europe. Sugar is largely imported from the Dutch East Indies, Philippine Islands and Formosa; indigo from Germany, British India and Dutch East

Indies; kerosene oil from U.S. and the Dutch Indies; beans, peas, and pulse from China, Kwantung Province, and Korea; and rice, principally from British India, French India, Korea, Siam, and China. The chief exports are silk, cotton fabrics, cotton yarns, tea, refined sugar, knitted goods, copper, matches, coal, camphor, straw plaits, porcelain, earthenware, and marine products.

Communications.—There were 9,155 miles of railroad open in Dec., 1923. In addition to 1,777 miles open in Korea, 870 miles in Formosa and 138 in Saghalien, while the South Manchurian Railway in China (686 miles) is under Japanese control. The mercantile marine of Japan and her dependencies consisted in 1925 of steamers and motor vessels of 3,741,000 tons, in addition to small craft and wooden ships. The total tonnage entered and cleared at open ports in 1923 was 142,686,063 (80,736 vessels). The three great ports are Kobe, Yokohama and Osaka, the first named having a large transhipment trade, in addition to direct imports and exports. In March, 1923, there were 9,492 post offices dealing with 4,469,038,080 postal packets, and 179,833 miles of telegraph line carrying 79,475,299 messages outwards.

Defence.—Service in the Army is universal and compulsory between the ages of 20 and 40. The peace strength was reduced in 1925 to 200,000 all ranks, organized in 17 Divisions, of which 2 are stationed in Korea, and 1 in the Manchurian leased territory. The Army includes 6 battleships, 4 battle cruisers, 11 coast defence, 23 light cruisers, 88 destroyers and 77 submarines (Sept., 1925). Japan declared war against Germany on Aug. 23, 1914, and captured the German fortress of Tsingtau in November, 1914. Her fleet was active throughout the war, while her troops took part in the operations in Siberia.

Education is in the lower grades free and compulsory. High schools are State-aided, and prepare for a 3 years' course at the Universities. There are high schools for girls, and the technical and special schools are well attended. There are six State Universities of Tokio (2), Kyoto, Tohoku (at Sendai), Hokkaido and Kiushu (at Fukuoka), and 5 medical universities.

Estimated Revenue:— 1923-24. 1924-25.

Exports to U.K.	7,452,000

Formosa.—The island of Formosa (Taiwan) was ceded by China to Japan (June 2, 1895) in accordance with the Treaty of Peace. Its total area is 13,500 square miles, with 3,904,692 inhabitants (1922). Imports, Yen 36,921,874; exports, Yen 30,563,429, in 1922. The colony has been self-supporting since 1906. Estimated

rev. and exp. (1923-24), Yen 99,883,648. Capital, Taihoku; pop. (1922), 180,362.

Saghalin (Karafuto).—The southern half of this island was ceded by Russia at the close of the Russo-Japanese war. The ceded territory has a total area of 9,824 sq. miles with a population (1922) of 133,900. The Japanese Government is encouraging the settlement of agriculturists, and there is a large fishing industry. Estimated revenue and expenditure (1923-24) Yen 18,098,256.

The **Kwantung Peninsula** (capital, Dairen, formerly Dalny), which had been leased to Russia by China, was similarly leased to Japan after the Russo-Japanese war. Area, 1,220 sq. miles; population (1923) 978,766. Dairen provides Japan with a mainland port, ice-free all the year round, and the peninsula is fertile. Imports (1924), £15,025,500; exports, £26,156,500. Estimated revenue and expenditure (1924-25), £16,385,866. Capital, Dairen; pop. (1922), 142,156.

The **Pescadores (Bokoto)** consists of about 63 islands, with a total area of 85 square miles, and a population of (1922) of 59,384.

Korea (Cho-sen).—By a treaty of Aug. 23, 1910, Korea was annexed to Japan and became part of the Japanese Empire.

Korea is situated between 122° and 128° E. long., and between 34° and 43° N. lat., and the coast is fringed with innumerable islands, of which the largest is Queipart. Total length, 600 miles from north to south, and greatest breadth 135 miles from east to west, with an area of about 85,156 square miles. Population estimated at 18,313,800 (Dec. 1922); there are 386,493 (Dec. 1922) Japanese in the country. The soil is fertile, but mountainous except in the river valleys. The staple agricultural products are rice and other cereals, beans, cotton, tobacco, and hemp; the other natural products are chiefly gold and hides. Ginseng, a medicinal root much affected by the Chinese, is largely grown under Government supervision in the province of Pyeng-An, and, being a Government monopoly, forms a rich source of revenue. Gold, copper, coal, iron, and other minerals are distributed throughout the country. The principal exports are beans, rice, fish, livestock, cowhides, ginseng, wheat, barley, iron ores, and raw cotton. Manufactures are as yet in a primitive condition, the principal being hemp cloth, brass ware, and an excellent quality of paper resembling the Japanese article, but stouter. The greater part of the sea-borne trade is carried in Japanese bottoms. Considerable progress is being made in the direction of the proper lighting of the coast. The total railway mileage open to traffic is (1923) 1,777 miles. Estimated rev. and exp. (1924-25), Yen 140,823,701. Capital, Seoul (Keijofu); pop. (1922) 271,474.

Imports into Korea, 1924 Yen 309,593,336

Exports from Korea, 1924 " 329,039,094

Pacific Islands.—Under the *Treaty of Versailles*, 1919, Germany renounced the sovereignty of all her over-sea possessions, and the German Pacific Islands N. of the Equator have been placed under Japanese mandate. These islands, in Micronesia, are the Pelew, Caroline, Marshall, and Ladrone groups, with a total area of about 800 sq. miles, and a population of 47,713 natives and 3,310 Japanese (1922).

CAPITAL OF THE JAPANESE EMPIRE, Tōkiō, formerly called Yedo, the residence of the Em-

peror; population estimated at 2,265,300 (Sept. 1923). On Sept. 1, 1923, a disastrous earthquake destroyed great portions of the cities of Tokio and Yokohama. Other cities are—Osaka, 1,384,700; Kiōto, the ancient capital, 657,800; Nagoya, 655,200; Kōbē, 594,900; Yokohama, 446,600; Hiroshima, 168,700; Nagasaki, 185,000; Hakodate, 167,500; Kanazawa, 145,200; Kure, 150,000; Senda, 128,400; Otaru, 113,900; Kagoshima, 117,300; Sapporo, 117,300; and Yahata, 151,600.

FLAG: White, charged with rising sun (red).

KERAK, OR TRANSJORDANIA.

Emir, H. H. Abdullah, second son of King Hussein of Hejaz, appointed April, 1921.

Kerak (or Transjordan) is bounded on the west by Palestine, on the north by Syria, on the east by Iraq, and on the south by Hejaz and Nejd, and has access to the Red Sea a few miles south of Akaba. The Emirate has an Arab population of about 240,000, of whom almost all are Muhammadans. The area is unknown as the boundaries are not definitely determined. The extreme west of the country is fertile, and agricultural and pastoral industries are carried on, but the rest of the country is almost entirely desert. The Hejaz Railway runs (with the exception of the first few miles) through Transjordan territory from Deraa to Kalaat el Muduwara, where it enters Hejaz territory and continues to Medina.

CAPITAL, Amman.

Chief British Representative, Lt.-Col. C. H. F. Cox, D.S.O.

KHIVA. See Russia.**KURDISTAN.**

Sultan, Selim Effendi, proclaimed Feb. 1925.

Kurdistan is a mountainous district of Eastern Asia Minor, between Armenia (N.), Syria and Mesopotamia (S.), Persia (E.), and Turkish Anatolia (W.). The Kurds are a semi-nomadic tribe inhabiting the mountainous regions of Turkish Asia Minor and of N.W. Persia. They are believed to be the Karduchi of Xenophon's *Anabasis*, and for centuries they lived in quasi-independence, punctuated by raids and subsequent punitive expeditions. In 1920 the autonomy of Kurdistan was recognised by Turkey and Persia, and by the Supreme Council of the Allied Powers.

The area of the country is estimated at 65,000 to 70,000 square miles, with a population of 2 to 3 millions. The chief centres are Diarbekr, Bitlis, Van (to the east of Lake Van) in the former Turkish dominions, and Urmia (to the west of Lake Urmia) and Kermanshah, in the Persian dominions. Lake Van (2,000 sq. miles in extent) occupies the central portion of the former Vilayet of Van; Lake Urmia (1,600 sq. miles in extent), across the Persian border, is about 4,000 feet above sea level, and its waters are so salt that fish cannot live therein.

The climate is severe, with a short hot summer and long and severe winter; but cereals, vines and fruit are abundantly cultivated on the slopes of the mountains; rice is grown in the hot, well-watered plains, while the rich pasture-lands of the slopes and valleys support large herds of horses, mules and sheep. The mineral wealth of the country is almost entirely undeveloped, but it is believed to be very great, and there are numerous hot and cold mineral springs; salt is obtained in large quantities in the neighbourhood of Lake Van.

The Kurds are Muhammadans and fierce persecutors of the Christians in their districts and in the neighbouring territory of Armenia.

LATVIA.

(Republika Latvija.)

President, Jahnis Tschakste.

Premier and Minister of Foreign Affairs, Hugo Celmins.

Envoy Extraordinary and Minister Plenipotentiary in London, Monsieur F. Vesmans, 87 Eaton Place, S.W. 1.

Sec. of Legation, Karlis Students.

Consul-General, Ed. Birins, 329 High Holborn, W.C. 1.

Vice-Consul, Charles E. Jumutz.

A Baltic Republic at the eastern and southern shore of the Gulf of Riga, formerly part of the Russian Empire. Latvia was proclaimed an independent state on Nov. 18, 1918. Its frontiers are common with Esthonia, Russia, Poland and Lithuania. The constitution is that of a democratic republic, with universal suffrage and proportional representation. Parliament (*Saeima*) consists of a single chamber of 100 members. The area ~~between~~ about 41,000 sq. miles, with a population of about 2,000,000.

The surface of the country is generally flat with marshy areas, interspersed with many lakes. Agriculture and dairy farming are the principal occupations of the people, and there are many flourishing industries. The fisheries

are also of importance. The chief exports are flax, timber, butter, paper and glass; chief imports are agricultural machinery and implements and wood and metal machinery. The tonnage of ships entered in 1924 was 1,488,523 tons. The chief ports are Riga, Libau and Windau. In 1924 there were 1,807 miles of railway in operation.

Consul, Manchester, T. R. Campbell.

Consul, Glasgow, John Dallas.

Consul, Cardiff, A. J. Bovey.

An independent Negro Republic of Western Africa, occupying that part of the coast of North Guinea which is between the rivers Cavalla, S.E., and Mano, N.W., a distance of about 350 miles, with an area of about 48,000 square miles, and extending to the interior to latitude 8° 50', a dis-

tance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1820, and has been recognised since 1847 as an independent State. The population is estimated at 1,500,000 to 2,000,000, including about 12,000 Americo-Liberians. The principal exports are palm-kernels, piassava, palm-oil, coffee, cocoa, ivory and kola nuts. The chief imports are rice, tobacco, Manchester goods, provisions, spirits, salt, hardware, glass and earthenware and building materials. The executive power is vested in a President elected for four years, assisted by a ministry; there are two houses of Legislature, the Senate, with eight members elected for six years, and the House of Representatives with fifteen members elected for four years. There is no regular army, but there is an enlisted frontier force of about 600 men under native officers. The control of the customs is in the hands of a General Receiver (who is also Financial Adviser) lent by the Government of the U.S.A. There are 10 ports of entry along the 350 miles of coast and 12 interior ports. In 1921, 263 vessels (622,668 net tons) entered and cleared at Monrovia; of these 82 (249,228 net tons) were British.

Premier, L. Bistras.

Foreign Affairs, M. Reinsys.

Minister in London, Dr. Ernest Galvanauskas.

Legation, 10 Palace Gate, W. 8.

Secretary, V. K. Rackauskas.

Consul, K. Gineitis.

The independence of the Lithuanian Republic (Lietuva) was proclaimed at Vilna on Feb. 16,

1918. The Republic consists of the former Russian Government of Kovno and portions of the Suvalki and Vilna Governments, and is bounded on the N. by Latvia, on the S. by the German district of Königsberg and Poland, on the E. by Poland, and on the W. by the Baltic Sea, the total area included in the Republic (including Memel Territory) being about 20,000 sq. miles, with an estimated population of 2,000,000. Memel Territory was occupied by Lithuania in Jan. 1923, and negotiations as to its final status took place between the Lithuanian Government and the Conference of Ambassadors. An agreement was not arrived at and the Conference referred the question to the League of Nations. A committee appointed by the League drew up a Convention which has been signed by the four Great Powers and by Lithuania. Lithuania ratified the Convention in Aug. 1924, and similar action by the other signatories is expected.

The legislature consists of a single chamber Assembly (*Seim*) of 78 members, elected by universal adult suffrage, the Executive being entrusted to a council of ministers. A new currency was issued in Oct. 1922 to supersede the depreciated German mark. 1 Lit of 100 cents = one tenth U.S. gold \$. Rate of exchange (Sept. 1925) *lits* 49.10 = £1.

Memel.—Under the Treaty of Versailles Germany renounced the sovereignty over the town and territory of Memel, and a French High Commissioner, with a small garrison, governed the Territory in the name of the Allies until Jan. 1923, when the Territory was invaded and occupied by the Lithuanians. The sovereignty of the Territory has been transferred to Lithuania, as set out in the Convention signed at Paris (May 8, 1924) and ratified Aug. 1925. The total area administered is 945 square miles, with a population of about 150,000, of whom about 42,000 inhabit the town of Memel.

Revenue	<i>Lits</i> 240,969,400
Expenditure	232,324,700

(Grand-Duché de Luxembourg.)

Grand Duchess, H.R.H. Charlotte, born Jan. 23, 1896, succeeded (on the abdication of her sister) Jan. 9, 1919; married, Nov. 6, 1919, Prince Felix of Bourbon-Parma. *Heir Apparent*,

Prince Jean, born Jan. 5, 1921.

Minister of State, P. Prüm.

Charge d'Affaires in London, M. A. B. Pescatore.
Consul-General in London, 37 Bedford Square,
W.C.1.

A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation, 1815-66, and was included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose decease, Nov. 23, 1890, it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the commencement of the war in 1914, but was liberated in 1918. U.S. troops entering the capital on Nov. 22. By the Treaty of Versailles, 1919, the country is declared to be free from all ties with Germany. The area is 999 square miles; the population (1916) 263,824, nearly all Roman Catholics. The principality is rich in iron-ore. The revenue in 1924 was estimated at 102,674,000 francs, expenditure 104,345,700 francs; debt (Jan. 1, 1921) 128,000,000 francs. There are 328 miles of railway. The army numbers about 300 men. The capital, Luxemburg (population 45,676), is a dismantled fortress.

FLAG: Red, white, blue.

Consul-General in London, (Closed).
Liverpool-Consul, (Closed).
Glasgow-Consul, (Closed).

Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 15° to 32° 30' N. lat. and 87° to 117° W. long., and comprising one of the richest and most varied zones in the world. It comprises 27 states, 3 territories, and the federal district of Mexico, making in all 31 political divisions, comprehending an area of 768,883 square miles, with a population of (1920) 15,063,207.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards the narrowing Isthmus of Tehuantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of California, with a mountainous surface, separated from the mainland by the Gulf of California. The Sierra Nevada, known in Mexico

as the Sierra Madre, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltépete on the east, the intermediate and highest peaks being Ixtaccihuatl (17,879 feet) and Popocatepetl (19,784 feet). The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 feet), the higher levels form the *Tierra Templada*, or temperate region (from 3,000 to 5,000 feet), and the summit of the plateau with its peaks is known as *Tierra Fria*, or cold region (above 5,000 feet). The only considerable rivers are the *Rio Grande del Norte*, which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the *Rio Grande de Santiago*, which runs from Lake Chapala to the Pacific. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "barrancas." The largest fresh-water lakes are Chapala, some 50 miles in length, and Patzcuaro and Xochimilco. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude. Yellow fever sometimes occurs at Merida, Yucatan.

The earliest invaders, or *Toltecs*, gave place in the 13th century to the *Aztecs*, who were conquered in the 16th century by Spanish adventurers under *Hernan Cortes*. Spanish rule was established at Tenochtitlan, a 14th century Aztec city (now Mexico), and Mexico remained a Spanish dominion until its freedom was asserted by a revolutionary war, 1810-1821. From 1837-1848 the province of Texas gave rise to hostilities with the United States, terminating in a three years' war and a cession of the disputed territory to the victorious northern States. In 1820 a Republic was proclaimed, but Iturbide declared himself Emperor in 1821. He was shot in 1824, and a Republic was again established. In 1862 the French troops came to Mexico, and in 1864 an Empire under Ferdinand Maximilian of Austria was declared. In 1867 the downfall of the Empire and the death of the Emperor gave rise to the new Republic, which has endured to the present day. The most prominent of modern Presidents is Porfirio Diaz, who ruled (except during 1880-4) from 1876 to May 25, 1911. Since the fall of Diaz internal disturbances, in which eleven Presidents have figured, have continued with varying degrees of intensity, and considerable friction (amounting almost to a state of war) has arisen with the United States. On July 15, 1914, Venustiano Carranza assumed control of the executive, but his anti-foreign attitude and legislation, together with the seizure of many properties (a few of which belonged to British subjects) led to a refusal of the British Government to grant recognition of his administration. The degree to which Carranza departed from his declaration of neutrality during the Great War undoubtedly influenced the British Government when this policy was adopted. Carranza was overthrown by a further revolution in 1920, and is believed to have been shot by the insurgents. After the fall of Carranza the executive power was assumed by de la Huerta as provisional President, and on Dec. 1, 1920, General Obregon, whose coup d'état had caused the downfall of Carranza, became head of the Republic. The

• The remains of *Hernan Cortes* have been definitely buried in the Cathedral of Mexico City. They are contained in a marble vault, with the funeral garments.

determination of the new government to uphold the Carranza constitution of 1917, which has led to confiscatory measures in connection with nationalization of the petroleum of the country, and contains (among other departures from the accepted comity of nations) provisions which restrict the rights of foreigners, caused the British, American, French and Belgian governments to adopt a policy of non-recognition of the Obregon administration. The expropriation, without payment of compensation, of several hundreds of private properties, in pursuance of the Obregon agrarian policy, has called forth strong protests from foreign Powers, but all the Powers except Great Britain eventually recognised the Obregon administration.

Acapulco, Manzanillo, Mazatlan, Salina Cruz, and Guaymas are the chief ports on the Pacific; and Vera Cruz, Tampico, Progreso, and Puerto Mexico on the Atlantic or Gulf of Mexico. There were 15,804 miles of railroad open on Sept. 16, 1912, and 40,687 miles of telegraph. The railroads have in a large measure been built by American and English companies.

The principal agricultural crops are maize, wheat, barley, Chile-pepper, sugar, coffee, cotton, tobacco, vanilla, flax, grapes, and all kinds of tropical fruit. The maguey, or Mexican aloe, yields a favourite beverage, "pulque"; other species of the same plant supply pita-flax and sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony, and caoutchouc trees. The mineral wealth is very great; silver and gold, copper, lead, and quicksilver, iron and coal, are the leading products of the mines. Woollen and cotton spinning and weaving, and other branches of industry, are encouraged by high protective duties. The imports, nevertheless, consist very largely of textile manufactures. Of the exports 45 per cent. consist of silver and gold; sisal hemp (henequen), coffee, hides and skins, timber, logwood, vanilla, tobacco, dyestuffs, sugar, and drugs ranking next in importance.

The monetary system has recently been placed on a gold basis, with a gold peso=50 cents U.S. currency. In Sept. 1922, the Mexican Government undertook to set aside for the service of the debt the sum of 30,000,000 gold pesos in 1923, rising by 5 million gold pesos annually to 50 million gold pesos in 1927. The total of the debt in Sept. 1922, was stated at 508,830,300 gold pesos (= \$254,415,150 U.S.) of which about one-half was raised for railroad purposes.

The language of the country is Spanish.

MONACO.

(Principauté de Monaco.)

Sovereign Prince, Louis Honoré Charles Antoine, born July 12, 1870, acc. June 25, 1922.
Heir apparent, Hereditary Princess Charlotte Louise Juliette (Duchess de Valentinois), born Sept. 30, 1898; mar. March 19, 1920, Prince Pierre de Monaco (Count de Polignac), and has issue, a daughter, Princess Antoinette, born Dec. 1920, and a son, Prince Rainier, born May, 1923.
Minister of State, Monsieur Maurice Piette.
Secretary of State, M. François Roussel.

Consul-General in London, Paul Crémieu-Javal, 39 Euston Road, S.W. 7.
Vice-Consul, C. N. Foreman.
Chancellor, Edwin C. Isbell.
Consular Office, 37, Conduit Street, W. 1.

A miniature Principality on the Mediterranean, between France and Italy, consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the famous casino, and comprising a narrow strip of country extending from the Monaco Cemetery on the west to St. Roman on the east; it is about 3 miles long and 1½ miles broad, with (1913) 22,990 inhabitants, and a yearly average of over 1,500,000 visitors. The whole available ground is built over, so that there is no cultivation. There is a small harbour (24 ft. alongside quay) and the import duties are the same as in France. There is a local police force of 200 men.

CAPITAL, Monaco.

FLAG: Red and white.

MOROCCO.

(Maghreb el aksa.)

French and Spanish Protectorate.

Sultan, Mulai Yusef, G.C.M.G., proclaimed Aug. 18, 1912.

Morocco, the largest of the Barbary States, is situate in the north-west of the African Continent, between 27° – 35° N. lat. and 1° – 12° 40' W. long, with a total area estimated at 314,000 square miles, and a population of about 7,000,000. Morocco is traversed from the Atlantic coast in the south-west to the Algerian frontier in the north-east by five parallel ranges, known generally as the *Atlas Mountains*. Between the various ranges lie well-watered and fertile plains, the lower slopes of the northern flanks of the mountains being well-wooded, while the southern slopes are exposed to the dry winds of the desert and are generally arid and desolate. The most northerly point of Morocco is the peninsular of Ceuta, which is separated from the Continent of Europe by the narrow strait of Gibraltar. The Jebel Musa dominates the promontory, and with the rocky eminence of Gibraltar was known to the ancients as *The Pillars of Hercules*, the western gateway of the Mediterranean. Between 32° N. and 30° N. is the headland Ghir, which encloses a bay containing the port of Agadir formerly known as the "Gate of the Sudan." This port formed the bone of contention between France and Germany in 1911–1912.

The climate is generally good and undoubtedly healthy, especially on the Atlantic coast, the country being sheltered by the Atlas Mountains from the hot winds of the Sahara. The extremes of temperature in Tangier and Mogador are 92° Fahrenheit in the summer and 37° in the winter, with a rainy season from October to May. The Mediterranean coast is drier and less temperate, but not unhealthy, while the plains of the interior are intensely hot.

Government.—France is the paramount power, and the Government of the greater part of the country is administered by the French Republic, which is recognised as the "protecting power." In addition to France, the kingdom of Spain has had relations with Morocco for many centuries. The northern portion of Morocco, as defined in the Franco-Spanish Treaty of 1912, forms a Spanish "sphere of influence." In this Spanish zone, which extended over the whole of Northern Morocco, with the exception of the International zone round Tangier) there were tribal risings in 1921, and during the operations to quell these risings the Spanish Expeditionary force met with serious reverses in the neighbourhood of Melilla. A Civil High Commissioner was appointed in 1922 over the Spanish zone to inaugurate a policy of pacification. In 1924 the military forces of Spain met with further reverses, and were withdrawn to a line running west from Rio Martin (on the Mediterranean) to within fifteen miles of the Atlantic Coast, and thence southwards to the French zone, near Alcázar el Kebir. In 1925 Abd-el Krim, the Sultan and leader of the Riff tribes, attacked certain French posts, and a considerable force was despatched from Algeria and France to strengthen the French army in Morocco. A general advance, in which French and Spanish forces co-operated, established a line of military posts from which

further operations against the Rifians may be undertaken; but the outcome of the operations was favourable to Abd-el Krim, as a *Maréchal de France* was recalled by Paris, and a French army of 160,000 was forced into winter quarters. Ceuta (on the Mediterranean Coast, opposite Gibraltar), in 35° 54' N. lat. and 5° 18' W. long., has been a Spanish possession since the close of the 16th century, and forms part of the administrative province of Cadiz, and the adjacent Alhucema and Zaffarin islands are Spanish possessions. A special international régime was designed for Tangier before the War by negotiations between the British, French and Spanish Governments, but the outbreak of the War prevented this régime from being put into operation. A new Convention has been agreed upon by the 3 Governments, but pending its application the town and zone are administered by the Sultan's representative and the diplomatic body.

Among the agricultural products are wheat, barley, maize, beans, peas, birdseed, linseed, coriander, cummin, fenugreek, esparto, and hemp, and the northern slopes of the Atlas produce many fruits, principally figs, almonds, pomegranates, lemons, olives, oranges and dates, the latter growing also on the southern slopes and in the plains. The live stock includes large quantities of horses, cattle, sheep and goats, while the poultry and egg industry is of increasing importance. Antimony, iron, coal, copper, lead and tin (the last three in considerable quantities) are known to exist, and gold and silver are also found. Rock salt and brine are exported in large quantities. The trade of Morocco is chiefly with France and Algeria, Great Britain and Spain, the chief imports being cottons, sugar and soft goods, the exports being grain, eggs, hides and skins, and wool. The unit of currency in the French protectorate is the franc, while in the Tangier zones the franc, the Spanish and the *Hassani peseta* are all current, and in the Spanish zone the two last of these currencies.

Communications.—The French have built some narrow gauge military railways from Casablanca to Rabat, to Kinitra and Mequinez, and to Settet, while the Franco-Spanish treaty provides for a line from Tangier to Fez. Telegraphic communication is established by submarine cables from Tangier to Cadiz, Tarifa and Oran, and there are wireless stations at Tangier, Rabat, and Casablanca; inland lines have been built by the French to Fez and to some of the ports, as well as to the borders of the Spanish zone, and the latter line will shortly be extended to Tangier. Roads have also been constructed in the French zone, and it is now possible to go to Fez or Marrakesh by motor-car.

The principal *harbours* are Tetuan, Tangier, El Arach, Rabat, Casablanca, Mazagan, Safi, Melilla, and Mogador. In 1922 the number of vessels entered at Tangier was 1,834 (995,724 tons).

Chancery, 42 Seymour Street, W. 1.

Counsellor, R. C. T. Roosmale-Nepveu.

Director of the Chancery, H. N. Brouwer, 3 Atney Road, Putney, S.W. 15.

Commercial Attaché, F. B. s' Jacob.

Horticultural Adviser, B. Gerritzen.

Consul-Gen., Dr. J. Steyn Parvé, 28 Langham Street, W. 1.

Vice-Consul, Dr. H. G. von Oven.

A maritime Kingdom of Central Europe, situate on the North Sea, in lat. 50° 46'—53° 34' N. and long. 3° 22'—7° 14' E., consisting of 11 provinces, and containing a total area of 12,761 square miles, with a population in August, 1923, of 7,212,739. The majority, about three-fifths, belong to the several Reformed Churches; and the remainder are Roman Catholics, with about 107,000 Jews. The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Schelde. The chief native products are herrings and other fish, cattle, horses, swine, sheep, poultry, eggs, seed, potatoes, oats, rye, wheat, barley, beans, peas, buckwheat, beetroot, chicory, flax, hemp, tobacco, and dairy produce. The principal manufactures are shipping, bricks, margarine, cocoa, chocolate, linen, rich damasks, cottons, woollens, cigars and other manufactured tobacco, candles, confectionery, earthenware and pottery, glass bottles and ware, chemical and pharmaceutical products, matches, perfumery, sugar, bicycles and automobiles, boots and shoes, starch, potato flour, engines, metal substances, works of art in gold and silver, incandescent lamps, machinery, motors, paper, printing, oils, beer, "geneva" and other liqueurs. Diamond-cutting employs numerous hands in Amsterdam.

Communications.—The total extent of canals is about 2,000 miles. There were 2,217 miles of railroad open in 1918, and 5,249 miles of telegraph line. The mercantile marine, on Jan. 1, 1925, consisted of 575 steam and motor vessels and 173 sailing vessels, &c. In 1923, 16,659 vessels (54,699,700 cubic metres) entered, and 16,728 vessels (54,431,864 cubic metres) cleared at the various ports. An Act for the damming and draining of the Zuyder Zee was passed in 1918.

Defence.—The Home Forces consist of a conscript army, with an annual levy of 19,500 men, producing a first-line army of 270,000, or (including reserves) 350,000 all ranks. The Royal Navy consisted, on July 1, 1925, of 84 ships (4 of them ironclads, and 2 protected cruisers).

Education.—Private State-aided primary instruction is encouraged rather than public, though the latter is provided if required, by local taxation. The average attendance at primary schools is 96 per cent. Secondary schools for working classes are numerous, well equipped and attended. The principal Universities are at Amsterdam, Groningen, Leiden, and Utrecht, and there are technical universities at Delft (polytechnic), Rotterdam (commercial), Wageningen (agriculture), and Utrecht (veterinary).

NETHERLANDS COLONIES.

TOTAL AREA, 832,473 square miles.

POPULATION (1920), 49,514,038.

The possessions of the Kingdom of the Netherlands in the EAST INDIES (Administrative Capital *Batavia*, pop., 1920, 253,818) are very considerable, comprising the whole of the SUNDA ISLANDS and *MOLOCCAS: Sumatra* (area, 162,000 sq. miles), *Java* and *Madura* (51,000 sq. miles), *Netherlands Borneo* (115,000 sq. miles), *Celebes Island* (72,000

sq. miles), *Moluccas* (44,000 sq. miles), *Timor Islands* (18,000 sq. miles); with the exception of a portion of Borneo and Eastern Timor, together with WESTERN NEW GUINEA. *JAVA* and *MADURA* have a population (1920) of 34,984,171, and furnish sugar (29,272,103 piculs produced in 1922), tobacco, tea, coffee, tin, and other products for exportation (customs receipts, 1922, 43,367,388 fl.). The "outlying" islands are frequently administered by their own princes, subject to the directions of a Netherlands Resident. There was (1923) a colonial army of 1,260 officers and 32,129 men. The colonial revenue for 1926 was estimated at fl. 661,362,000 and the expenditure at fl. 713,222,000. The exports, for private account, amounted in 1922, for Java, Madura, and the other outlying islands, to 1,142,415,000 florins, while the imports for the same year amounted to 696,272,000 florins.

In South America the colony of *SURINAM*, or *Netherlands Guiana* (imports, 1923, 7,885,161 guilders; exports, 8,388,338 guilders), embraces 49,845 square miles and contains (1924) 112,818 inhabitants; and in the West Indies, *CURACAO* (imports, 1923, 28,203,903 guilders; exports, 18,138,659 guilders; population, 35,083) and five other small islands belong to the Netherlands, having an area of 436 square miles, with a population of 21,288 (imports, 1,343,815 florins; exports, 508,792 florins).

Trade of Colonies with U.K.

	1921.	1922.
Exports to U.K.	fl. 51,800,000	59,700,000
Imports from U.K.	144,400,000	101,900,000

NICARAGUA.

(República de Nicaragua.)

President, Señor Dr. Carlos Solorzano.

Minister of Foreign Affairs, Dr. Daniel Gutierrez Navas.

Minister in London, Señor Don Eduardo

Perez-Triana, 90 Holland Park, W. 11.

Consul in London, Señor Dr. Noel E. Pallais, 16 Wormwood Street, E.C. 2.

The largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situate between 9° 45'–15° N. lat. and 83° 40'–87° 38' W. long., containing an area of 51,660 English square miles and a population (census of 1920) of 638,119, of whom about three-quarters are mixed blood and the rest Indians; including the Mosquitos, who dwell on the Atlantic littoral and were formerly under British protection.

Nicaragua was discovered by Columbus in 1502, and was overrun by the Spaniards under Davila in the first quarter of the 16th century, forming part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. The present constitution rests on the fundamental law of Nov. 10, 1911 (amended 1913) and is that of a centralised republic. The President is elected by direct suffrage for four years.

The chief products are coffee, bananas, sugar, timber (cedar, mahogany, rosewood, &c.), tobacco, maize, rice, beans, cocoa, hides, gold and silver. Considerable quantities of foodstuffs are imported as well as cottons and other manufactures, principally from the United States, which also take the greater part of the exports.

There are 146 miles of railway, 2,500 miles of

telegraph and 1,240 miles of telephone, and a powerful wireless station was completed at Managua in 1924. Good roads are very few, and transportation, especially in the rainy season (May-Nov.), is attended with great difficulties.

Corinto, on the Pacific coast, is the chief port of the country, handling about 75 per cent. of the total trade. Bluefields is an important port on the Atlantic coast, whence considerable quantities of bananas and timber are shipped to New Orleans. Owing to defective communications the Atlantic littoral is practically isolated from the rest of the Republic and the chief centres of population.

Education is backward, at least 50 per cent. of the population being illiterate.

The official language of the country is Spanish.

	1922.	1923.

Vice-Consul, Th. V. Aass.

Norway, an independent kingdom, founded in 872 (fundamental law of May 17, 1814), was united with Sweden under the same King from Nov. 4, 1814, to June 7, 1905, when the union was dissolved. The Parliament of 150 members is called the "Storting," which is divided into two sections, chosen by itself to discuss projected Bills, called "Odelsting" and "Lagting." Norway, the western and northern portion of the Scandinavian peninsula, is about 1,100 miles in length, its greatest width about 250 miles. It is divided into 20 provinces, or fylker, and comprises an area of 124,130 sq. miles with a population (1920) of 2,649,775. The coast-line is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. The cultivated area is about one-thirtieth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains.

Agriculture gives employment to a large part of the population but is unable to furnish sufficient produce for home consumption; hence it has been necessary to import considerable quantities of corn, meat, and pork. Fishing and forestry are important industries and manufactures are aided by great resources of water power, calculated at 12 to 13 millions of horse power, of which about 10 to 11 per cent. are utilized. The imports consist chiefly of the necessary articles of consumption. The chief exports consist of fish, oil, and other products of the fisheries, timber, matches, pulp, paper, skins and furs, nails, minerals, stone; i.e., calcium carbide, condensed milk, butter, margarine, tinned goods, saltpetre, &c. Norway voted for prohibition of alcoholic beverages in 1919 (385,000 for prohibition, 275,000 against).

Defence.—Service in the National Militia is universal and compulsory. The peace strength is about 60,000 all ranks, and the war effective is about 360,000 of all ranks. In time of war all males between the ages of 18 and 55 are liable for service. The Navy consists of 4 ironclads, 27 torpedo-boats, 1 gunboat, 3 destroyers, 8 submarines, and several minelayers.

Education is compulsory and free between the ages of 7 and 14, schools being maintained by local taxation with State grants in aid. The attendance is high. Secondary schools are provided by the State, by local authorities, and privately. There are many special schools and industrial and technical institutes. The University of Christiania was attended in 1922 by 2,300 students.

Communications.—The total length of railways open in 1923 was 2,148 miles, of which 271 miles were private lines. The length of telegraphs and telephones belonging to the State in June, 1923, was 17,210 miles. The mercantile marine, Jan. 1, 1924, consisted of 3,668 vessels, of 1,573,530 net tons. The gross earnings of the Norwegian mercantile marine in foreign traffic amounted in 1923 to about 483,000,000 kroner.

Budget, 1924-25.	Kroner.

SPIITSBERGEN AND BEAR ISLAND.

(Svalbard.)

By Treaty (Feb. 3, 1920) the sovereignty of Norway over the Spitsbergen archipelago was recognised by the Great Powers and other interested nations.

The Spitsbergen ("Pointed Mountain") Archipelago lies between 76° 25'–86° 50' N. lat. and between 10° 20'–32° 40' E. long., with an estimated area of 25,000 square miles. The archipelago consists of a main island, known as West Spitsbergen (15,200 sq. miles); North East Land,

closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the main land by Olga Strait; Barents and Edge Islands, separated from the main land by Stort Fjord (or Wybe Jansz Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the S.; with many similar islands in the neighbourhood of the main group.

The principal mineral is coal. In 1924 the coal export was about 440,000 tons. The wintering force in 1923–24 was about 1,200 strong; the archipelago is also visited by hunters for seal, foxes and polar bears.

South Cape is 370 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsø, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsø to Green Harbour (the postal station, with a high-power Telefunken wireless station) 2½ to 3 days; from Aberdeen 5 to 6 days.

OMAN. See Arabia.

PANAMA.

(República de Panama.)

President (1924–1928), Rodolfo Chiari, assumed office, Oct. 1, 1924.

MINISTRY (Oct. 1, 1924.)

Secretary of Government and Minister of Justice, Señor Carlos L. Lopez.

Foreign Affairs, Señor Horacio F. Alfaro.

Finance, Dr. Eusebio A. Morales.

Public Instruction, Señor Octavio Mendez Pereira.

Public Works (Fomento), Señor Tomas Gabriel Duque.

Minister in London, Señor Dr. Don Belisario Porras.

Consul in London, Don Demetrio Porras, 232 Finsbury Pavement House, E.C. 2.

Vice-Consul, Señor C. J. Dunbar MacConnell.

Consul-General, Liverpool, Señor J. Luis Hernández.

Consul in Birmingham, S. Sauri.

Panama, formerly one of the nine Departments of Colombia, revolted in Nov. 1903, and established a separate Government. The area of the Republic is 31,890 square miles, the population 442,486 (excluding Canal Zone). The soil is extremely fertile, but there is little cultivation and nearly one half of the land is uncultivated. The chief crops are bananas, coconuts, cacao, coffee, and cereals. The imports are almost entirely manufactured goods and foodstuffs. A railway 47 miles in length joins the two oceans.

	1922–23.	1923–24.
Revenue	£1,100,783	£2,039,842
Expenditure	£1,257,426	£1,513,635
	1924.	1924.
Imports	£2,534,875	£2,497,384
Exports	477,946	493,283
Imports from U.K.	274,051	292,537
Exports to U.K.	19,993	20,687

The total value of supplies purchased for the Canal Zone Commissaries for the fiscal year ended June 30, 1924, was \$5,159,529 (U.S. \$.).

The language spoken is Spanish.

CAPITAL, Panama. Population (1924), 59,635. Colon had a population in 1924 of 31,285.

FLAG: Quarterly, white with blue star, red, blue, and white with red star

PAPACY, The.

Sovereign Pontiff (260th), His Holiness Pope Pius XI. (Achille Ratti), born at Desio, March 31, 1857, elected Pope (in succession to Benedict XV.) Feb. 6, 1922.

The office of the ecclesiastical head of the Roman Catholic Church is vested in the Pope of Rome, who is the Sovereign Pontiff of the Western Church, and claims temporal power over the Papal States which were incorporated with Italy from 1860 to 1870, the territory of the Papacy now being confined to the palaces of the Vatican and the Lateran and the Villa of Castel-Gandolfo, which are guaranteed to the Pope (with a yearly indemnity of 3,250,000 lire, which is neither claimed nor paid) by the Italian Government.

British Envoy Extraordinary & Minister Plenipotentiary, Hon. Sir Odo Russell, K.C.V.O., C.B. (1922). (*Via* San Nicola de Tolentino 67, Rome 5.)

1st Secretary, C. J. F. Dormer, M.V.O.

Temporary Secretary, R. Thynne.

'PARAGUAY.

Justice and Instruction, Dr. Adolfo Aponte.

War and Marine, Dr. Luiz A. Riart.

Interior, Señor Belisario Rivarola.

Minister in London, (vacant).

Chargé d'Affaires and Consul-General in London, Dr. Venancio B. Galeano, 14 Chiswell House, Finsbury Pavement.

An inland State of South America, situate between 20°-6° 30' S. lat. and 54°-62° W. long. The area of Paraguay (exclusive of the Chaco) is computed at 61,600 square miles, and it contains a population of about 700,000.

Paraguay was visited in 1527 by Sebastian Cabot, and in 1535 was settled as a Spanish possession. In 1811 Paraguay declared its independence of Spain, and from 1814-1840 was governed by Francia, a Paraguayan despot, who was succeeded by Lopez, 1840-1862. In 1862 Francisco Solano Lopez succeeded his father, and in 1864 declared war against Brazil, Argentina and Uruguay being involved in the struggle. Against these three nations Lopez conducted a five years' war, which terminated in his defeat and death at the Battle of Cerro Corá, March 1, 1870. This dogged struggle reduced the country to complete prostration, and the population,

which was 800,000 in 1857, is alleged to have fallen in 1870 to 250,000, of whom barely 30,000 were men. The present constitution was adopted at the close of the war, and under its provisions the head of the executive is the President, elected by an electoral college for four years and ineligible for office for eight consecutive years after the expiration of his term. A Vice-President is similarly elected, and succeeds automatically in the case of the death, expulsion or absence of the President. There is a Cabinet of 5 members.

Paraguay proper consists of a series of plateaus, intersected by abrupt ranges of hills, some of which reach an altitude of 2,000 to 3,000 feet above sea level. The Paraguay and Alto Paraná rivers are navigable at all seasons for vessels of 6 to 7 feet draft. Many of the tributary streams are also navigable for much of the year. The Pilcomayo river is navigable for small craft for 180 miles from Asuncion; but is liable to shrink unduly with drought. The plateaus are covered with grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills are covered for the most part with immense and valuable forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confluence are extensive marshes, one of which, known as "Neembucu," or endless, is drained by Lake Ypoa, a large lagoon, south-east of the capital. The Chaco, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Brazil, forms the subject of a long standing dispute with Bolivia; it is practically a dead level, though a slight and uniform rise westward is now known to exist, and suffers much from floods and still more from drought.

The chief agricultural products are tobacco, oranges and cassava (manioc), maize, rice, sugarcane, ground-nuts, and other tropical and sub-tropical plants. The forests contain many varieties of timber, but only cedar and a few of the best known hardwoods find a market abroad. Stock-raising, lumbering, cotton and tobacco growing, and the gathering of Yerba (Paraguay tea), are the principal industries. The chief articles of export are hides, timber, yerba maté, tobacco, quebracho extract, cattle and meat products, oranges, and petit grain oil. The Army numbers 2,000 to 3,000 men. A railway, 232 miles in length, which belongs to an English company, connects Paraguay with the Argentine railway system. The journey from Asuncion to Buenos Aires (985 miles) occupies 53 hours. Train ferries enable the run to be accomplished without break of bulk. The language is Spanish.

	1923-4.	1925-6.

Consul-General in London (*vacant*).

Consul, Morteza Gazvini, 4 Broad Street Place, E.C. 2.

Persia—called by the natives Irân—comprises an area of 630,000 sq. miles, with a population estimated at 10,000,000.

Persia is mostly an arid table-land, encircled, except on the east, by mountains, those in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert. The only navigable river is the Karun, which was opened to foreign navigation from Mohammerah to Ahwaz in 1888. There are 98 miles of railway open, and travelling is mostly by caravans, and transport by pack-animals, but motor transport of passengers and goods on the road between Tehran-Khanikin, Tehran-Pahlevi (Euzeli), and to a lesser extent Tehran-Bushire, has made great progress during the past few years, while the German Junker Company has recently secured a contract for the carriage of mails and passengers by aeroplane between Tehran-Khanikin, Tehran-Pahlevi (Euzeli) and Tehran-Bushire. An option for the construction of a railway from Khanikin to Tehran *via* Kermanshah and Hamadan (with a branch to Euzeli on the Caspian) was granted in 1920 to the Persian Railways Syndicate.

The chief products are cereals, cotton, gums, dried fruits, silk, tobacco, and opium. The minerals (little worked) are salt, iron, coal,

copper, lead, sulphur, &c., with turquoise. Oilfields in Southern Persia have been successfully worked by an English company since 1902. The only important manufacture is that of woollen carpets (mostly a domestic industry), but shawls, silks, and cotton fabrics are also produced. There are extensive forests in the north and west. Sheep and goats are numerous, and good wool is produced. The Persians are mostly Shiah Muhammadans; but there are many adherents of Bahlism (an eclectic form of Deistic religions), and Armenian Christians. The laws and popular education are based on the precepts of the Koran. Persia is divided into provinces, of which the principal are under Governors or Governors-General.

Owing to increasing popular discontent with a corrupt and incompetent administration and an extravagant Court, a nationalist movement began in Dec., 1905. In Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted a Constitution. He was succeeded in 1907 by his son Muhammed Ali Shah who was deposed by the National Assembly in 1909, to be succeeded by his son, Sultan Ahmad Shah (under the regency of Nasr-ul-Mulk, until 1914). As a result of the energy of Prime Minister H.H. Reza Khan the authority of the Persian Government has been re-established over almost the whole of Persia by means of a disciplined army of 8,000 cavalry and 22,000 infantry, with 94 guns and 200 machine guns, and a number of aeroplanes and armoured cars.

The revenue (£1,480,780 in 1913-14) is derived from land tax, Crown lands, customs, opium, salt, and lease of monopolies, while the recently enacted law concerning a surtax on sugar and tea is calculated to bring in over £1,000,000 annually, and this sum is being earmarked for the construction of railways. The foreign debt of Persia amounted (Dec. 31, 1916) to £6,325,700. British commercial interests in Persia much exceed those of any other country, the trade between the British Empire (including India and Mesopotamia) and Persia amounting to more than 80 per cent. of the total trade of the country. The sea-borne trade of Persia passes chiefly through the ports of Bushire, Bunder Abbas, and Mohammerah, and *via* Baghdad and Duzdap. The shipping of the Persian Gulf is principally British.

Persia's Foreign Trade.

(In thousands of Krans.)			
	Imports.	Exports.	Total.
1913-14.....	647,165.....	455,840.....	1,103,005
1914-15.....	499,323.....	396,958.....	896,281
1921-22.....	609,775.....	502,044.....	1,111,820
1922-23.....	613,009.....	726,643.....	1,339,652
1923-24.....	672,164.....	740,758.....	1,412,923

The value of the kran has varied (since 1900) from 18 to 70 krans to £1 sterling; in 1924-25 the exchange value was about 6d.

In 1921-22 the leading imports into Persia were cotton fabrics, sugar, iron and steel goods and tea; the principal exports were heavy oils, benzine, petrol and fruits.

Imports from U.K. (1924).....£1,881,000
Exports to U.K. (1924).....8,100,000

Foreign Relations.—By the Anglo-Russian Convention of Aug., 1907, Great Britain and Russia mutually engaged to respect the integrity and independence of Persia, while marking out certain regions in S.E. and N.W. Persia respectively in

* On Oct. 31, 1925, the Shah of Persia (Sultan Ahmad Mirza), who had been absent from the country for some time, was deposed by the National Assembly, which handed over the government to the Prime Minister (Reza Khan Pahlevi). The Crown Prince (Mohammed Hassan Mirza), left the country on Nov. 1.

which each had, for geographical and economic reasons, special interests.

In March, 1921, Persia signed a treaty with the Russian Soviet Republic, which provides (*inter alia*) for mutual diplomatic and consular representation, restores to Persia Firuzesh and Ashurade, annuls all concessions previously granted to Russians in Persia, hands over the Russian Discount and Loan Bank to the Persian Government, cancels all Persian debts to Russia, denounces all previous Russo-Persian treaties, abolishes the "capitulations" as regards Russian subjects in Persia, and denounces all treaties made between Russia and third Powers regarding Persia.

In 1922 the Persian Government engaged a number of American advisers (under Dr. Mills Paugh) for the supervision and direction of the country's finances. Considerable strides have been made by the country under this new régime, a balanced budget and a programme for gradual development of the country's resources having been evolved.

CAPITAL, Tehran (pop. 210,000); other large towns are Tabriz (180,000), Isfahan (80,000), Meshed (80,000), Kerman (50,000), Yazd (60,000), and Shiraz (60,000).

FLAG: White, bordered with green (top) and red (bottom), with arms (lion and sun) in centre.

Peru is a maritime Republic of South America, situated between 1° 31' 20" and 19° 13' S. latitude and between 69° and 81° 19' W. The territory between 17° 47' S. and 19° 13' S. is occupied by Chile, as the result of the Pacific War of 1879-1882; in 1922 this "Tacna-Arica" question was submitted to arbitration by treaty, and in 1924 it was agreed that Chile should restore the two provinces to Peru in return for a payment of \$10,000,000. The area of the Republic is estimated at 352,000 square miles, and the population (1921) at 5,550,000. It is bounded on the north by Ecuador and Colombia, as the latter claims a territory in the Amazonian basin; on the east by Brazil and Bolivia, and on the south by Chile and Bolivia.

Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541), who subjugated the Incas (a tribe of the Quichua Indians), who had invaded the country some 500 years earlier, and for nearly three centuries Peru remained under the Spanish rule. A

revolutionary war of 1821-1824 established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 18, 1856 (amended Nov. 25, 1860), and is that of a democratic Republic under a newly drawn constitution of 1919. The President is elected for five years by direct vote of the people.

The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points being *Huascarán* (22,000 feet), *Huandoy* (21,100 feet), *Arequipa* (or *Misti*) volcano (20,013 feet), *Hualcan* (20,000 feet), and *Lirina, Toccoa*, and *Sarasara*, all over 19,000 feet. There are four distinct regions: the *costa*, west of the Andes, the *sierra* or western slopes of the Andes, the *punas* or mountainous wastes below the region of perpetual snow; and the inward slopes (*montaña*) and boundless forests of the Amazonian basin. The coastal area, lying upon and near the Pacific, is not tropical, though close to the equator, being cooled by the Humboldt-Current; its chief products are sugar, cotton, petroleum, wool, hides and skins, and it contains the chief towns and most of the white population. In the barren mountain section are to be found minerals in great richness and variety which await improved transport facilities before their production can be considerably increased; it is inhabited by Indians in a low state of civilization. Upon the eastern slope of the Andes are to be found very large tracts suitable for cultivation and stock raising, at present almost wholly unexplored owing to lack of communication. This part of the country should show most interesting developments in the future. The tropical lowlands lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. There are here dense jungles, of which the principal commercial product is wild rubber. The gold production in 1921 was valued at £326,458, and in 1920 at £265,972. The Lobos and other islands on the Pacific coast provide guano.

The principal imports are coal, cotton, woollen, linen and silk goods, drugs, earthen and stone wares, machinery, explosives, metals and manufactures thereof, oils, stationery, paper manufactures, timber, and wheat. The chief exports are cane sugar, cotton, petroleum and copper. In 1924 the U.S.A. sent 40 per cent. of the imports and took 33 per cent. of the exports, while the U.K. sent 19 per cent. and took 28 per cent.

The total length of the railways open (1924) was about 2,067 miles, of which 1,084 miles are under the control of the Peruvian Corporation. There is also steam navigation on Lake Titicaca and the River Desaguadero. The eastern rivers are also navigated to some extent by steam craft. Wireless telegraphy stations have been established in many places.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription, and numbers about 8,000 of all ranks; the Navy includes two cruisers built at Barrow, a destroyer bought from the French Government, and 2 submarines under construction in U.S.A. There is a military aerodrome at Chorillos (near Lima) and a seaplane station at Ancón.

Language.—Spanish is the official language of the country, but native dialects (of which Quichua is the most important) are spoken by a considerable portion of the Indian population.

* Peruvian £100 = (Sept. 1922) £100.

The Republic of Poland was proclaimed at Warsaw in November, 1918, and under the *Treaty of Versailles* (June 28, 1919) the assentors to the Covenant of the League of Nations, and the signatories of the Treaty of Peace, guarantee the independence of the Republic, which is reconstituted within the limits of the 18th-century "Polish Commonwealth." This state extended in the year 1772 over an area of 740,000 sq. kilometres, and included a population of about 13,000,000. The political neighbours of the Republic are the Baltic Sea, the German Republic (Prussian Königsberg District), and the Republic of Lithuania, in the N.; the Republic of Czecho-Slovakia in the S.; the Kingdom of Rumania in the S.E.; Soviet Russia in the E.; and Germany in the W. The present area of the Republic may be estimated at 386,273 sq. kilometres, with a population, at the 1921 census, of 27,160,000 (of whom 18,660,000 are Poles, and 8,500,000 other nationalities). The predominant religion of the people is Roman Catholic, but all faiths enjoy equality, and there are a considerable number of Protestants and a very large number of Jews.

In 1919 hostilities broke out between Poland and Soviet Russia, and after initial successes the "Red" armies of Bolshevik Russia appeared (in August, 1920) likely to deal a crushing blow at Polish independence, the capital (Warsaw) being in peril of capture. A dramatic counter-attack by the Polish troops at the critical period reversed the nature of the campaign. Poland was enabled to conclude peace on favourable terms, and claimed the renunciation by the Soviet at Moscow of about 120,000 sq. kilometres, containing a population of about 3,610,000 (1,048,000 Poles).

Government.—A Republican form of government was adopted by the Constituent Assembly in 1919, the Chief of State exercising the executive authority through a Ministry responsible to the Legislature. The Legislature consists of a Diet (*Sejm*) elected by universal adult (male and female) suffrage, and of a Senate elected by adult (male and female) suffrage of those over 30 years of age. The Constitution voted on March 17, 1921, is very Liberal.

Production.—Mining, cotton, metal work, agriculture, forestry and stock raising are the principal industries, the chief crops being rye, wheat, oats, barley, potatoes, and sugar-beet; the live stock includes cattle, horses, sheep, and pigs. There are valuable coal mines in Upper Silesia, Congress Poland, and Little Poland (Galicia); zinc, lead ore, mineral and potassium salts, and in Galicia (Boryslaw) are famous oil fields; the output of crude oil (1924) was 750,900 tons. The chief manufactures are textiles, those of minor importance being machinery and metal works, chemicals, and leather. The exports in former years were principally agricultural produce and textiles, the imports being raw wool, cotton and jute, woollen and cotton goods, and machinery.

Defence.—The peace effective of the army is 17,000 officers and 250,000 other ranks. A small navy, for coastal defence, has been organized.

Education.—Education is compulsory and free, and there is considerable voluntary effort in addition to the work of the State. Secondary education is conducted on a high level, with good attendances, and there are universities at Cracow (founded 1364), Warsaw, Lwow, Poznan,

Lublin, and Wilno; Polytechnics at Warsaw and Lwow, and an Academy of Science at Cracow.

Communications.—There are about 10,000 miles of railway and over 25,000 miles of telegraph line, with well-developed telephone systems in all the large centres. Over 4,000 miles of navigable waterways exist on the Vistula, Narew, Bug, Warta, and Pilica, of which about 1,100 are navigable by steamers. The free city of Danzig is within the Polish Customs area, free transit for Germany being guaranteed.

Minister Counsellor, Dr. Antonio Patricio.

1st Secretary, Senhor José Jorge dos Santos.

and Secretary, Senhor H. G. da Silva.

Attaché, Lieut. J. R. Alves da Cruz.

Commercial Counsellor and Consul-General (London), Senhor O. G. Potier, 40, Woburn Sq., W.C. 1.

Portugal lies in 37°—42° 8' N. lat. and 6° 15'—9° 30' W. long., being 360 miles in length from N. to S., and averaging about 100 in breadth from E. to W. Continental Portugal contains an area of 35,500 square miles, with a population in 1920 of 6,399,355, and the Portuguese Colonies a total area of 804,841 square miles, with a population estimated at 9,675,000. The Azores and Madeira are regarded, not as colonies, but as a part of continental Portugal. The chief products are wheat, barley, oats, maize, flax, hemp, and the vine in elevated tracts; in the lowlands, rice, olives, oranges, lemons, citrons, figs, vines, and almonds. There are extensive forests of oak, chestnut, sea-pine, and cork, the cultivation of the vine and the olive being among the chief branches of industry; the rich red wine known to us as "port" is shipped from Oporto. Its mineral products are important—copper, lead, tin, antimony, coal, manganese, iron, slate, and bay-salt, which last, from its hardness and purity, is in demand. Its manufactures consist of gloves, silk, woollen, linen, and cotton fabrics, metal and earthenware goods, tobacco, cigars, &c. The exports consist to the extent of 50 per cent. of wine, which is the chief industrial product of the country; others are cork, cattle, copper-ore, fruits, oil, sardines, and salt. The imports are manufactured goods—hardware, cotton and woollen stuffs, machinery, wheat, sugar, dried fish, coal, &c. The commercial marine (1917) numbered 104 steam and 102 sailing vessels, with a tonnage of 123,726. In 1920, 9,909 steam and sailing vessels, of 16,101,695 tons, entered the ports of the Republic. Railways 1,827 miles in extent were open for traffic in 1917, and there were 5,351 miles of telegraph line in 1917. For many years the national income was considerably less than the expenditure; this deficiency has added to the national debt.

Defence.—Service in the militia is universal and compulsory. The peace effective is about 32,000. War strength, about 150,000. The Navy consists of a few small ships of old pattern.

Education is free and nominally compulsory between the ages of 7 and 15, but is not strictly enforced, and over 75 per cent. of the population above 7 years old are illiterate. Secondary education is conducted in State lycées. There are also military, naval and other special schools. The University of Coimbra (founded A.D. 1291) had 1,100 matriculated students in 1910.

	1925-26.

Vice-Consul (Hon.), M. N. Gologan, 28 Crescent Road, Norbiton.

Commercial Attaché, M. Gr. Michaelescu.

Rumania is a kingdom of South Eastern Europe in the classical *Dacia* and *Seythia Pontica*, the territory roughly defined by the three great rivers Danube, Theiss, and Dniester, whose central point is the line of the Carpathians. The territory is known as Wallachia (Munténia and Oltenia), Moldavia, Dobruja, Bessarabia, Bukovina, Transylvania, with parts of the Banat, Crizana and Maramuresh. The kingdom has its origin in the union of the Danubian principalities of Wallachia and Moldavia (and the addition thereto of a strip of Southern Bessarabia) under the *Treaty of Paris* (April, 1856). The principalities remained separate entities under the suzerainty of the Turkish Empire until 1859, when Prince Alexandru Ion Cuza was elected Prince of both Principalities, still under the suzerainty of the Porte. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown is now vested. By the *Treaty of Berlin* (July 13, 1878) a new Principality (consisting of the two above mentioned) was recognised as an independent State, and part of the Dobruja (which had been occupied by the Rumanians) was incorporated in the new Principality. On March 27, 1881, the former Principality was recognised by the Great Powers as a Kingdom. Rumania is not a "Balkan" State. She took no part in the military operations of the Balkan League against Turkey in 1912-13. Her unexhausted military power secured for her a readjustment of her south-eastern (Dobruja) frontier in 1913. In the War of 1914-1918, Rumania fought on the side of the Allies from Aug. 27, 1916, and after many vicissitudes (due mainly to the sudden collapse of the Russian Armies in 1917), she emerged in triumph at the cessation of hostilities. Her territories were greatly increased as a result of the War, and the *ante bellum* area of the Kingdom (74,461 sq. miles) may now be estimated at 159,269 sq. miles, and the 1915 population of 7,897,311 has been increased to nearly 18,000,000. The dominating religion is that of the Greek (Orthodox) Church.

GOVERNMENT.—The government is that of a Constitutional Monarchy, the legislative assembly consisting of a Senate (56 members) elected for 4 years, and of a Chamber of Deputies (361 members) elected for 4 years by universal suffrage, provision being made for the proportional representation of minority parties. The executive is entrusted to a council of ministers.

PRODUCTION.—The soil of Wallachia, Bessarabia, and Moldavia is among the richest in Europe, and it was stated in August, 1921, that "from a comparative point of view Rumania would probably be one of the first war convalescents to attain complete recovery." The wheat crop for 1923 was 2,779,000 metric tons. The agricultural produce consists of wheat, maize, millet, oats, barley, rye, beans, and peas. Vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax, and hemp, and the rich lands of Bessarabia produce wheat, maize, barley, flax, tobacco, water melons, fruit, and grapes. Agriculture and sheep and cattle raising are the principal industries of the kingdom, but the climate of this part of South-Eastern Europe is of the Continental character, with intense

winter cold and summer heat, and fierce summer droughts sometimes defeat these principal industries. The forests of the mountainous regions are extensive (17,795,353 acres), and the timber industry is important. The country is rich in minerals, and produces petroleum, salt, coal, lignite, iron, gold, and mica; the workers in the oilfields are the largest single unit of workers in any one industry; the production of petroleum was 1,885,225 tons in 1913, and 1,860,471 tons in 1924. Manufactures are in their infancy, and the imports are chiefly manufactured goods, textiles, machinery and metals; the exports consist principally of wheat, barley, maize, oats, petroleum, timber, cattle, salt and hides. All large estates have been expropriated and divided among the peasants.

DEFENCE.—Service in the Army is universal and compulsory. In the War of 1914-1918 over 900,000 all ranks passed into the Armies of Rumania, and of this number over 25 per cent. were killed or returned as "missing." At the resurgence of Nov. 1918, an army of 400,000 was again in the field. This force was the deciding factor in the Rumanian-Hungarian question, and it drove the Bolshevik dictator (Bela Kun) into exile from Buda Pest. There is a small Navy on the Black Sea (30 vessels) and on the Danube.

EDUCATION is free and nominally compulsory, there being 19,374 schools with 1,612,763 in attendance. Secondary schools are well attended. There are also special schools and Universities at Bucharest, Jassy, Cluj, and Cernauti. A Government High School of Commerce was opened in 1913.

COMMUNICATIONS.—In 1919 there were about 7,131 miles of railway open for traffic in the whole kingdom; railway communication requires great development in order to cope with the problem of carrying the cereal crops to the shipping ports. There are 19,715 telegraph and telephone offices. The mercantile marine consists of about 120 steamers and 600 sailing vessels. The Black Sea ports are Sulina and Constantza, the latter is linked with the interior by a railway.

The Union of Socialist Soviet Republics.—The Union covers the greater part of the area of the former Russian Empire, from which the independent states of Finland, Poland, Estonia, Latvia and Lithuania have also been formed. The greater part of the remaining territory forms the Russian Socialist Federal Soviet Republic (R.S.F.S.R.), which is in union with other Soviet Republics in Russian territory to form the Russian Union. The total area of the Union is approximately 7,519,315 square miles, with a population (partly enumerated and partly estimated) in 1923 of 138,000,000, the rural population forming 80 per cent. and the urban 20 per cent. Prior to the War of 1914-18 the Russian Empire of the Tsar Nicholas II. covered more than 8,500,000 square miles, with a population of about 183,000,000.

The constituent Republics of the Union are:—

Republic.	Sq. miles.	Population.
I. R.S.F.S.R.	7,238,533	103,000,000
II. Ukraine	183,655	28,000,000
III. Transcaucasia	74,105	5,769,400
IV. White Russia.....	23,022	1,650,000
	7,519,315	138,419,400

The R.S.F.S.R. consists of 50 Governments and includes 11 Autonomous Republics and 10 Autonomous Provinces, constituted on the principle of national autonomy. *Autonomous Republics* are: Bashkir, Tartar, Kirghiz, Mountain, Daghestan, Turkestan, Crimea, Yakut, Karelia, Buriat-Mongol and Volga Germans. *Autonomous Provinces* are: Chuvash, Kalmuick, Mari, Votlak, Zyrian (Komi), Oirad, Kabardian-Balkarsk, Karachai-Circassian, Adighe-Circassian, Tchetchen.

The Transcaucasian Federation consists of three Socialist Soviet Republics, namely:

Republic.	Sq. miles.	Population.
Azerbaijan	33,570	2,097,000
Armenia	15,065	1,300,000
Georgia.....	25,470	2,372,400
	74,105	5,769,400

The Socialist Soviet Republic of Georgia includes two autonomous Republics (Abkhasia and Adjaria), and one Autonomous Province (Southern Ossetia).

The federal system of Russia was adopted by the 10th All-Russian Congress of Soviets on the 31st of December, 1922, and did not embody within its scope the *Khiva* (Khorezm) and *Bokhara* republics. The independence of the National Khorezm Soviet Republic has been recognised by Soviet Russia by treaty of September 30, 1920, and the independence of the Bokhara National Soviet Republic was recognised by treaty of March 4, 1921.

The Union is governed by the Congress of Soviets of the Union, and during the intervals of sessions the supreme authority is vested in the Central Executive Committee of the Union, which consists of the Council of the Union and the Council of Nationalities. The regular session of the Union Soviet Congress is convened by the Central Executive Committee ("Tsik") of the Union once a year. The Council of the Union consists of 371 members elected by the Soviet Congress of the Union from among the representatives of the several constituent republics, counted in proportion to the population of each republic. The Council of Nationalities is formed of representatives of the constituent and autonomous Soviet Socialist Republics on the basis of 5 representatives from each, and of representatives of the autonomous Provinces of the R.S.F.S.R. on the basis of 1 representative thereof. The composition of the Council of Nationalities as a whole must be confirmed by the Congress of Soviets of the Union.

(The autonomous Republics of Ajaria and Abkhasia and the autonomous Province of Southern Ossetia send one representative each to the Council of Nationalities.)

The regular sessions of the Tsik meet three times a year, and in the intervals the supreme authority is vested in its *Presidium*, formed by the Tsik of the Union, of 21 members, amongst whom are included the whole of the Union-Council *Presidium* and the *Presidium* of the

Council of Nationalities. The Tsik of the Union elects, in accordance with the number of republics, 4 Chairmen of the Tsik of the Union from members of its *Presidium*.

Chairman of Presidium, M. T. Kalinin, G. T. Petrovsky, A. G. Tcherviakov, and N. N. Narimanoff.

Secretary, A. S. Yenukidze.

Representatives are elected to the Soviet Congress of the Union by indirect voting, each village Soviet sending representatives to a *Volost Soviet*, the *Volosts* to *Uyezd* (district) *Soviets*, the *Uyezds* to Government *Soviets*, and the last-named to the Congress of Soviets of the Union. The cities and townships *Soviets* send representatives to the Congress of Soviets Union on the basis of 1 deputy for each 25,000 electors, whereas the provincial *Soviets* send 1 deputy for each 125,000 inhabitants.

The principal executive and administrative organs of the Tsik of the Union are: The Council of People's Commissaries, the Council of Labour and Defence, and the Supreme Court of the Union.

The People's Commissariats of the Union are divided into (1) *Federal People's Commissariats* for the entire Union, and (2) *Joint People's Commissariats* of the Union. *Federal People's Commissariats* of the Union are: (1) War and Marine, (2) Foreign Affairs, (3) Foreign Trade, (4) Transport, (5) Post and Telegraph. The *Joint People's Commissariats* are: (1) Supreme Council of National Economy, (2) Finance, (3) Internal Trade, (4) Labour, (5) Workers' and Peasants' Inspection. The *Federal Commissariats* have their representatives in the constituent republics, who are directly subordinated to them. The *Joint Commissariats* exercise their functions through corresponding Commissariats of the several constituent republics on their territories.

Each of the constituent republics has within its territory its own Congress of Soviets, its Central Executive Committee (*Tsik*), and Council of People's Commissaries (*Sovmarkom*), the latter consisting of Chairman, Vice-Chairman, and the following Commissaries: (1) Chairman, Supreme Council of National Economy, (2) Finance, (3) Internal Trade, (4) Labour, (5) Workers' and Peasants' Inspection (all these are subordinated to the People's Commissaries of the Union), (6) Agriculture, (7) Education, (8) Health, (9) Social Welfare, (10) Justice, (11) Internal Affairs (the latter six independent), and also including, with an advisory or deciding vote, according to the decision of the respective *Tsik*, the representatives of Federal Commissariats of the Union, i.e., of Foreign Affairs, Foreign Trade, War and Marine, Transport, Post and Telegraph.

The Council of Labour and Defence (*Soviet Truda i Oborony*, or S.T.O.) is attached and subordinated to the *Sovmarkom*, and in addition to a general direction of commissariats in their economic and military activity, has the power to ratify statutes of joint-stock companies and trusts. The Chairman of the S.T.O. is L. B. Kameneff.

The Supreme Court of the Union is attached to the Central Executive Committee, and has power and jurisdiction (1) to promulgate authoritative opinions on questions concerning general Federal legislation to the constituent republics, (2) to adjudicate controversies between the constituent republics, (3) to try charges against high officials of the Union for offences committed in the discharge of their duties. The Supreme Court consists of 11 members.

To the Council of People's Commissaries (*Sovnarkom*) of the Union is attached a Joint State Political Department, formerly known as the *Tcheka*, but since 1922 as the O.G.P.U. (*Obiedinonnoje Gosudarstvennoje Politicheskoe Upravlenie*), which is designed to combat political and economic counter-revolution, espionage and brigandage. The Chairman of the O.G.P.U. is a member of the Council of People's Commissaries of the Union. The O.G.P.U. is directed by special rules and regulations, which have not been promulgated. The control of the legality of the acts of the O.G.P.U. is exercised by the Attorney-General of the Union in accordance with a special decree issued by the *Tsik*.

The Chairman of the O.G.P.U. (*Tcheka*) is F. E. Dzerzhinsky.

Area and Population.—The area is 7,238,533 square miles, with a population (1923) of about 103,000,000, representing 87 per cent. of the total area of the Union and 80 per cent. of its population. From the economic point of view this vast territory is usually divided into "Black Soil" and "Other Zones," the *Black Soil Zone* being subdivided into (1) Central Agricultural Region (2) Middle Volga Region, (3) Lower Volga Region, (4) Northern Caucasus, (5) Siberia, (6) Kirghiz Autonomous Republic, (7) Crimea; while the *Other Zones* are (1) Western Region, (2) North-Western Region, (3) Central Industrial Region, (4) North-Eastern Region, (5) Basin of the rivers Viatka and Vetluga, (6) Ural.

The R.S.F.S.R. arose out of the "November Revolution." The discontent of all strata of the Russian people had already found vent in the revolution of 1905, but was then put down by military force. The Tsar Nicholas II. proclaimed a new governmental and state order, on a constitutional basis, by his manifesto of Oct. 30, 1905, but the promises therein contained were not entirely kept, and although the period 1905-1917 is marked by an obvious development of industrial life, it may at the same time be characterised as very turbulent, with a systematic struggle of the Liberal *Duma* against the autocratic tendencies of irresponsible Cabinets and agrarian agitations among the peasantry, while strikes of workers did not cease up to the outbreak of the Great War. Involved in the war from Aug. 1, 1914, the forces of the Tsar fought against the Central Powers with varying success. On March 12, 1917, a second revolution was followed by the abdication of Nicholas. The Grand Duke Michael, nominated by him to be his successor, was not admitted to power, and a Provisional Government was set up under Prince Lvov. On May,

1917, this administration was taken over by the Cabinet of Alexander Kerensky, but Kerensky failed to establish a settled Government, and on Nov. 7, 1917, the "Military Revolutionary Committee" of the Petrograd Soviet seized the authority of Government and transferred it to the All-Russian Congress of Soviets. The Tsar Nicholas II., with the Tsaritsa, Tsarevitch Alexis (heir-apparent), and the Princesses (and such faithful adherents as remained to them) were arrested by order of the Kerensky Cabinet. They subsequently fell into the hands of the Bolsheviks, and on July 16, 1918, the Tsar and his family and attendants were shot in cold blood in Ekaterinburg.

The Russian peasantry had never reconciled itself to the serfdom established as a system at the end of the 16th century. Some of the malcontents preferred to take to the prairies of Southern and East-Southern Russia (the basins of the Dniepr, Don and lower part of Volga), and here they established half-independent military Cossack republics. Among those who remained, agrarian tumults were unceasing, now and then bursting out into formidable risings, which threatened the very existence of the Russian State, the most turbulent periods being the years 1610-13, before the accession of the Romanoffs to the throne; the riot of Stephen Razin in the middle of the 17th century, and the Pugatcheff riot of Cossacks and peasants during the reign of Catherine II. (1770-74). From the end of the 18th century, especially after the French Revolution and Napoleonic Wars, and during the 19th century, Liberal and Socialist ideas began to penetrate the Russian educated classes. Free masonic lodges and secret military organisations spread all over the Empire, and on Dec. 26, 1825, they even tried to seize the supreme power. Nicholas I. succeeded in putting down the mutiny (Movement of the Decabristy), but the sullen under-current of unrest continued. The abolition of serfdom by Alexander II. and an agrarian reform (1861) did not soothe the ferment among the peasantry, who had to pay by instalments high prices for their allotments, the distribution of which developed into a hidden form of economic serfdom; while the educated classes demanded constitutional guarantees against arbitrary administration. In consequence of the irreconcilable position of the reactionary Government and the Emperor himself, on one hand, and the inhuman methods with which the antagonists of the Government were treated, the party *Narodnaya Volya* (=Liberty of the People), representing the bulk of the original *Zemlya i Volya* (Land and Freedom) party, resolved to have recourse to terrorism and assassination, and on March 14, 1881, Alexander II. was murdered by terrorists (the term *Nihilists*, set in circulation by I. S. Turgeneff in quite another sense, was afterwards wrongly applied as a nickname for Russian revolutionaries, who were credited in Western Europe with a desire to reduce rule to anarchism and substitute for existing authorities "nothing"). During the reign of Alexander III. the activity of the *Narodovoltsy* was almost destroyed by the secret Imperial police (*okhranka*), and political movements did not revive until the end of the 19th and the beginning of the 20th centuries. In the year 1898, under the influence of the Socialist theories of Karl Marx, was established the Russian Social-Democratic Workers' Party,

which at the Conference of 1903 split into two factions—*Bolsheviks* and *Mensheviks* (from the words *bolshe*=more, and *menshe*=less; the nick-names originating in the precarious majority of Lenin's adherents at that conference). The *Bolsheviks* are of the opinion that the proletariat must seize and retain the supreme political power and that no collaboration with other classes may be admitted; they demand from their party comrades absolute obedience up to the annulling of their individuality. The *Mensheviks* admit of compromises with the *bourgeoisie* on the basis of preserving control over the trade unions' and workers' movement, and are against autocratic tendencies within the party itself. The Russian party of "Socialists-Revolutionaries," successors of "Narodovoltsy," aimed chiefly at nationalisation of all land estates for distribution in allotments among the peasants without any compensation; in their political tendencies they were embittered antagonists of the autocratic system, and all terrorist acts in the period 1898-1912 were executed by their *Boyevaya Druzhina* (military detachment), including the assassination of the ministers Bogolyepoff, Ssiptiaghin, Plehve, the Grand Duke Sergius, &c. Until 1917 all these parties played a clandestine part and were but little known to the masses, though it is quite certain that they contributed largely to the organisation of industrial strikes. In the wake of the March revolution they appeared in the open and overwhelmed the more moderate political parties. The Duma Cabinet of Prince Lvov was soon replaced by the Cabinet of the Socialist Revolutionary Kerensky, who in his turn was accused by the *Bolsheviks* of betraying the proletariat. In July, 1917, the *Bolsheviks* made their first attempt to obtain the supreme power by means of revolt, but the attempt was abortive. In the autumn of 1917 they succeeded in gaining a majority in the *Soviets* (Councils of Workers' and Soldiers' Deputies) of Petrograd, Moscow, and some other places, and on Nov. 8, 1917, after severe street fighting in Petrograd and Moscow, they achieved their aim. In Jan. 1918, they dispersed the Constituent Assembly, where the Social Revolutionaries enjoyed an absolute majority.

The *Bolsheviks* claimed to act in the name not only of the Russian people, but of the "Proletariat of the World," and formed plans for a world revolution.* The military revolution of 1917 was accompanied by a *débâcle* in the field, and many of the soldiers abandoned their arms and returned to their homes, while the armies of the Central Powers advanced victoriously into Russian territory, and, after granting an armistice, they imposed on the Soviet Government the crushing conditions of the *Treaty of Brest-Litovsk* (March 2, 1918), which remained effective until the military strength of Germany and Austria was broken by the Allies. The *Bolshevik régime* had been fostered by the Central Powers and was opposed by the Allies, who sent such naval and military help as could be afforded to various bodies who were stemming the tide of Bolshevism in Siberia (Admiral Kolchak), South Russia (Denikin), and North Russia (Tchaikovsky),

mainly with a view to create a diversion on the eastern German-Austrian front, and in response to a declaration of war by the *Soviets* against Governments which were held by them to be representative of *Menshevik* rule and of the *bourgeoisie* they had pledged themselves to eradicate. But the victorious close of the European War caused a growing reluctance among the allied nations for further military adventures, and the reinforcements sent in 1918 were withdrawn during the autumn and winter of 1919 from Archangel and Murmansk in the north, from Odessa in the south, and from Vladivostok in Siberia. The withdrawal preceded a collapse of the "White" resistance to the "Red" (*Bolshevik*) armies. In 1920 war broke out between the Republic of Poland and the Soviet armies, in conjunction with operations under General Vraihgel, the successor of Denikin in the south. After initial successes the Polish armies were driven back, and Warsaw appeared to be in imminent danger, when a dramatic recovery saved the Polish capital and brought about negotiations for peace on terms favourable to Poland, under the *Treaty of Riga* (March 19, 1921).

Government.—The Central Government of the former Russian Empire developed out of a primarily autocratic system, in virtue of which the country was regarded as the patrimony of the autocrat and the State's revenues as his private income, from which the expenses of administration were met. In the 19th century the property and revenues of the State were separated from the private property and incomes of the Tsar. Other reforms of various kinds were introduced from time to time. The peasants, who constitute 80 per cent. of the inhabitants, were freed from the condition of serfdom in 1861 by the Tsar Alexander II., and land was allotted to them in communal ownership. The unsuccessful war with Japan offended all classes, and the Government was accused of responsibility for the military disasters. Partial strikes in the capital and in the country culminated in a general strike of railwaymen, which paralysed the life in the Empire and compelled the Tsar Nicholas II. and the Camarilla to issue a manifesto promising the establishment of a parliament and constitutional guarantees. But the new parliament, called *Gosudarstvennaya Duma*, opened in 1906, never played any authoritative rôle, and its recommendations were usually ignored, while it was liable to be dissolved at the will of the Tsar. The Government in force at the outbreak of the war of 1914 was "constitutional" in name alone, as the limits to the power of the ruler were subject to the possibility of an immediate and complete resumption of the former autocracy at the will of the autocrat.

The Soviet Government, although composed of representatives indirectly elected by the masses, cannot be called representative, as no provision is made for "the opposition" to the executive power; and although the rural population (i.e., 80 per cent. of the population) elects usually a very small number of Communists (= *Bolsheviks*), nevertheless the Congress of the *Soviets* consists almost entirely of Communists. As to the cities and towns, only candidates nominated or approved by the *Bolsheviks* can succeed in these elections. Under Soviet rule individual liberty is considerably less than in the time of Tsardom, while freedom of speech and the liberty of the Press are definitely denied to the people.

* *Bolshevik* propaganda work has been extensively carried on in Europe and the United States, chiefly through the Third International (*Comintern*), but has gained few adherents in democratic countries. In 1920 the sum of £75,000 was offered by the Soviet Government as a subsidy to the London Labour organ, *The Daily Herald*, but was refused by the directorate.

Local Government was, and still remains, highly developed. The villages in Imperial Russia had their assemblies (*skhod*) under the presidency of a mayor (*starosta*); they were grouped into "volosts," the latter into districts (*uyezd*), and these into governments (*guberniya*). The districts and governments had their elective councils (*zemstvos*) for the administration of local affairs. Combined with this system of village communities was a highly organised system of co-operative trading, the population being grouped into voluntary local associations usually corresponding with local government areas. The produce of the soil was disposed of in return for manufactures obtained by the society and distributed at the co-operative shops. Municipalities were also administered by elective councils (*dumas*) under the presidency of a mayor (*golova*); but in many cases the local authority of such municipalities and local land councils (*zemstvos*) was overshadowed by the superior authority of the *bureaucratic* governor. After the Revolution, the village and other administrative units set up *soviets* of workers and peasants, and the provincial councils send representatives to the All-Russia Congress, municipalities having a double representation from their own *soviet* and from that of the province (or district) in which the municipalities are situated.

Education was not widespread in the Tsar's dominions. Primary schools afforded only the most elementary instruction and the attendance was voluntary, while they were closed in rural districts during the summer months. Gymnasias, commercial colleges, technical and "real" schools (with not less than 300,000 pupils) existed in all provincial capitals and a great number of district (*uyezd*) towns. The eleven universities had only 40,000 students of both sexes. Fully 90 per cent. of the peasants (*i.e.*, 72 per cent. of the people) were illiterate. A rural *starosta* (mayor) who could neither read nor write was in no way unusual, and accounts were frequently kept for the local branch of the co-operative society by the village school-mistress, or by the priest. Under the Bolshevik *régime* popular education is administered by a commissary, in whose charge have been placed all educational institutions, theatres, museums, and galleries. Beyond this, the State has monopolised the photo-cinematographic industry and the publishing of manuals for schools of all types; and as the Soviet Government possesses almost all the printing houses, it practically controls the printing and publishing trades. The education of the workers in the towns is facilitated by lectures and school teaching; but among the peasants in the rural districts even the inadequate provision formerly made has in many places been discontinued. Generally speaking, only children of workers and officials are allowed to attend the primary schools in towns, and only those who belong to the Communist youth or are members of the Communist party may enter secondary school and universities; exceptions to this rule are reduced to the minimum. The average salary of a village schoolmaster does not exceed £2 a month, which very often is not paid regularly. Very often professors of universities and higher schools get a remuneration of £4 to £7 a month. Only schools established by the Communist party for special party purposes are well supplied in every regard. According to the data of 1923 there existed in the

R.S.F.S.R. alone more than 1,200 Communist party schools, beginning from primary institutions and including the universities. In 1922 there were stated to be 5,000,000 pupils in the 55,000 elementary and secondary schools, and about 300,000 in 4,000 advanced and technical schools; while there were (in 1922) two universities in Moscow and one in each of twenty other large cities.

Religion.—The Orthodox Church was disestablished by the Bolsheviks and all its property confiscated. All ecclesiastic schools, seminaries and academies have been abolished, and the teaching of religion to persons under 18 years of age forbidden. Communism declared war on religion, which it described as "opium for the people," and endeavoured to provoke discord in the Orthodox Church. "The Living Church," "The Renewed Church," and other dissenting bodies, have little hold upon the people, and contribute to the chaotic state of the Orthodox Church. But the law does not forbid the exercise of religion, and churches remain open in virtue of contracts concluded between the congregations and the local authorities. A recent questionnaire addressed to the soldiers of the Red Army shows that 70 per cent. of them believe in a Deity. The clergy live on voluntary donations from their parishioners. On Feb. 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar.

Finance.—The Bolsheviks had at their disposal after the November Revolution (1) a gold reserve in the State Bank of about 1,000,000,000 roubles, (2) paper currency left over by the previous Imperial and Provisional Governments, (3) cash, foreign securities, and jewels confiscated in banking-houses, (4) all the nationalised industries, and (5) immense stocks of raw materials and supplies inherited from the old *régime*. But the nationalisation of industrial plant has almost paralysed industry. According to official figures their exploitation caused (in 1920) a commercial loss of about 63,000,000 gold roubles. At the same time, the income from customs and from the State liquor operations (*i.e.*, 30 per cent. of the Tsarist budget) disappeared. Normal taxes could not be collected at all. The revenues of the Bolshevik Treasury in 1920 were reduced to about 32,000,000 gold roubles, against expenditures extending to 303,000,000 gold roubles. The finances of Soviet Russia culminated in chaos, and since Communism had declared war on capital, and the possibility of getting credits abroad was totally excluded, the Government was compelled to have recourse to printing presses for the production of paper money. These presses also provided payment for the Army and Government officials, until the paper rouble, which was exchanged at about ten to £1 sterling in 1914 had ceased to possess any value after reaching grotesque quotations of 500 billions to £1 in the spring of 1924.

At the liquidation of the civil war a new economic policy (known as N.E.P.) was inaugurated early in 1921. Private enterprises were allowed to enter the lists as competitors in the open market, and the restrictions on hoarding of money by individuals and co-operative societies were abolished. The State retained the means of transport and all essential enterprises, and put them on the basis of economic management, *i.e.*, they were removed from the State budget as items of expenditure and had to be "self-supporting." The system of taxes in

cash, both direct and indirect, was also restored under the new policy. In October, 1921, the State Bank was re-established with a capital of 25,000,000 gold roubles. It obtained a monopoly of transactions in precious metals and foreign currency. All this contributed to the need for a stabilised currency, and the State Bank was authorised by a decree to issue (in 1922) banknotes known as the *Chervonetz*, representing the value of the Tsarist 10-rouble gold coin. The decree provides that 25 per cent. of the face value of the banknotes shall be secured by precious metals and stable foreign currency, and the rest by commercial short-term bills of exchange and other securities. The exchange of *chervontzy* for their gold equivalent is to be inaugurated later on. According to the official figures of October, 1924, the State Bank issued 51,886,650 *chervontzy* secured to the extent of over 50 per cent. by precious metals, English pounds, American dollars, and Swedish crowns. The value of this monetary unit has hitherto fluctuated only insignificantly, and the *chervontzy* are current throughout the Union. In February, 1924, the Government decided to discontinue the further printing of depreciated Soviet paper currency, and to issue Treasury notes in denominations of 1, 3, and 5 roubles to an amount not exceeding one-half of the total amount of *chervontzy* in circulation. Since May 18, 1924, the money market disposes of three sorts of money: *chervontzy*, Treasury notes, and silver and copper coins in circulation since the summer of 1924. It was announced that this new currency was to be issued solely in order to furnish a sufficiency of money for credit and circulation and not for covering the items of State expenditure, which was to be covered by regular revenues.

Budget 1924-25		Gold Roubles
Revenue	3,091,000,000	
Expenditure	2,091,000,000	

The revenue from direct taxation is estimated at 431 million gold roubles, and from indirect taxation at 458 million. The estimated expenditure includes 407 million for Navy and Army.

In October, 1922, was issued a 6 per cent. State Lottery Loan for a total amount of 100,000,000 gold roubles in bonds of 5r. each, redeemable within 10 years. The loan was taken up among the population after some measures of compulsion. A second 8 per cent. State Lottery Loan for 100,000,000 gold roubles, and a special Peasantry Lottery Loan to the amount of 50,000,000 gold roubles were issued in 1924, and met with only a small measure of voluntary support.

Debt.—The outstanding Foreign Debt of Russia on Jan. 1, 1917 (before the Revolution), with the annual charge for Interest, may be stated as under:—

	Debt.	Interest.
To Great Britain..	£620,674,406	£24,000,000
To France.....	Francs 3,950,000,000	Francs 828,000,000
To U.S.A.	\$282,000,000	\$10,000,000
To Japan	Yen 256,000,000	Yen 20,700,000
To Italy.....	Lira 36,123,836	
To Netherlands..	Guilders 59,200,000	Guilders 59,200,000

All internal and external obligations have been (in 1918) proclaimed null and void, but the Soviet Government is inclined to acknowledge some part of the Tsarist debts in return for further credits abroad.

Defence.—The Red Army consisted in 1923 of about 720,000 all ranks, including 37 cavalry brigades of about 3,000 men, and about 30,000

sailors serving on land. The Red Air Fleet is reported to consist of about 250 aeroplanes, but it is stated that an organisation of 10,000 aeroplanes was aimed at for the year 1924. The Red Navy is believed to consist of 4 capital ships and about 30 destroyers and small fighting craft. The Budget item for Army and Navy expenditures made up (in 1923) 313,000,000 gold roubles. The number of the standing army was recently stated officially to be 562,000.

Agriculture.—The average land allotments given to the peasantry in 1861 were about 4·8 *dessiatins* (1 *dessiatina* = 2·7 acres) per capita of male population; they failed to provide for the natural increment of the population and dropped to 2·6 in 1900, reaching in 1916-17 somewhere between 1·5 and 1·8. The situation was aggravated by the poor quality of the land allotted, inconveniences of scattered fields, overlapping strips, remote pastures, high instalments of payment, and the system of communal ownership. These drawbacks hampered the development of tillage, which continued to remain on an almost primitive level. In 1898 in 50 provinces of European Russia alone, about 8 million passports had been issued to individual peasants who were quitting their native villages in search of employment. The Duma's scheme of agrarian reform was repudiated by Nicholas II., and the Duma itself twice dismissed (1906 and 1907). The census of 1917 revealed the fact that out of 27,000,000 able-bodied male population 15,000,000 had been called to the colours, and during the first three years of war over 2,000,000 horses were requisitioned. These facts contributed to a further decay of agriculture. After the November Revolution the Bolsheviks abolished land-ownership. Land was to be taken by the local peasants for "seasonal tillage," and under no circumstances was the land so taken to become their property. The civil war called forth new mobilisations of men and new requisitions of horses and cattle, while the Government took charge of feeding large numbers of the civil working population, so that at one time, besides providing for 5,000,000 soldiers, it was supporting more than 25,000,000 people in the towns. Under these circumstances the Bolsheviks decreed a State monopoly of food-stuffs (grain, meat, butter, eggs, potatoes), so that it became compulsory for the peasants to deliver the whole of their surplus produce to the State without any compensation. This resulted in risings of the peasantry and in a reduction of cultivated area by about 32 per cent. The unparalleled famine of 1921, together with a complete exhaustion of food supplies, brought the Communist system to the verge of complete collapse. In the spring of 1921 the "New Economic Policy" (*N.E.P.*) was proclaimed. This opened the markets and allowed the peasants to dispose freely of their produce, while a decree of March, 1921, ensured regular and continuous land-tillage, preserving the prohibition of selling, buying, mortgaging and alienation of their allotments, and cancelling the law in virtue of which no more land was leased than could be tilled by the tenant and his family without the aid of hired labour. There was an increase of cultivated area in 1923 to 60,000,000 *dessiatins* against 49,000,000 in 1922. The irksome and multifarious taxes were replaced in the summer of 1923 by the "Unified Agricultural Tax," and by the end of 1923 80 per cent. of this tax was paid in money and only 20 per cent. in kind.

Since January 1, 1924, the Unified Agricultural Tax is to be collected only in cash. The total amount of the revenue from this direct tax was in 1923 about 400,000,000 gold roubles. The enormous rise in prices for manufactured articles is substantially equivalent to overwhelming indirect taxes, but the difference between the low prices for agricultural produce and the high prices for manufactures ("the scissors" problem), coupled with weakened paying capacity, discourages the peasantry and may result in a new reduction in the cultivated area. In 1924 a new famine gripped the hitherto fertile provinces of the Volga and of Southern Russia. The total harvest of cereals in 1924 amounted to (official figures) 2,600,000,000 poods against 4,000,000,000 before the war, 1,900,000,000 in 1922, and 2,800,000,000 in 1923.

Agriculture outweighs in Russia all other industries in importance, the principal crop being rye, the food of the people; wheat, the second largest crop, was formerly exported in great quantities, and export has been revived during the last two years, though quantities have been comparatively small; barley, oats, millet, and maize are also important food crops, and potatoes are largely grown. Among the important industrial crops are flax and hemp and cotton.

Production of	Average 1911-15. Per annum.	1923.	1924.
	Poods	Poods.	Poods.
Flax	26,000,000	11,000,000	...
Hemp	22,000,000	9,000,000	...
Cotton.....	20,200,000	2,500,000	5,000,000

The livestock included (1923) 22,800,000 cattle, 30,400,000 sheep, 9,100,000 pigs, and 16,500,000 horses.

Industry.—The natural riches of Russia in coal, iron-ores, copper, manganese, gold, platinum, timber, naphtha, and so on, are enormous. Russia represents a wide field for investing capital in industry, and in the last two decades before the war already attracted considerable internal and foreign capital. The November Revolution nationalised all enterprises, and during the civil war only an insignificant number of factories continued to work (chiefly for the Army). The census in the autumn of 1921 gave the figure of 1,120,000 industrial workers against 2,700,000 in 1913. Under the New Economic Policy groups of homogeneous enterprises were united into trusts and syndicates, with a good deal of independence in regard to their management, and were removed from the State Budget and had to be "self-supporting." This resulted in an increase in the number of workers (1,600,000 in July, 1923) and in production. The average productivity of a worker in 1923 is estimated at 1,365 gold roubles per annum, against 628 gold roubles in 1920-21, and 2,163 gold roubles in 1913. The table below shows the development of large-scale State industry:—

Groups of Industry.	Output in millions of gold roubles. 1922-23.	Percentage of the Output of 1922-23 to that of 1921-22.	1921-22.
Mining.....	207'7	36'4	113'4
Metal.....	212'3	29'3	143'0
Textile.....	339'9	41'0	189'7
Food.....	96'2	13'5	145'3
Other.....	470'2	51'3	150'8
	1,097'3	33'2	148'9

The quoted figures show an indubitable increase in production in 1922-23 in comparison with 1921-22, though it amounts to but one-third of the pre-war production. But this industrial progress is not on a sound basis; contributions from the State Treasury in support of industry are still being made, in transgression of the "self-supporting" principle; in 1923 such contributions made up 20 per cent. of the total value of the produce.

The chief mineral is petroleum, the total in 1922-23 being nearly 5,000,000 tons, and in 1924 6,250,000 tons. The chief metals produced in 1922 were gold—318 poods (against an average output of 3,553 poods in pre-war days), and platinum—12 poods (against 352 poods in 1912). The output of coal was in 1924 540,000,000 poods.

External Trade.—The external trade of 1923 across the European frontier and the Caucasian border, but exclusive of the trade of the Trans-Caucasian Republics, is stated as under in gold roubles:—

Exports from Russia to	Countries.	Imports into Russia from
11,267,000.....	Estonia	5,217,000
7,989,000.....	Finland	5,962,000
61,139,000.....	Germany.....	49,707,000
16,541,000.....	Gibraltar
33,511,000.....	Great Britain	36,597,000
6,364,000.....	Italy	679,000
23,860,000.....	Latvia	2,514,000
11,829,000.....	Netherlands
1,434,000.....	Norway	3,274,000
491,000.....	Persia	2,304,000
2,431,000.....	Poland	7,749,000
.....	Sweden	5,772,000
10,222,000.....	Turkey	593,000
.....	U.S.A.	18,695,000

205,818,000 Total.....144,056,000

Trade in 1924-25.—Provisional figures for Oct. 1, 1924-Sept. 30, 1925, give 557,000,000 gold roubles as the value of the exports (507 m. over the European, and 50 m. over the Asiatic frontiers), and 693,300,000 gold roubles for imports, (633'3 m. over the European and 60 m. over the Asiatic frontiers).

British Trade with Russia (1923).—According to Russian official figures, the trade between Great Britain and Russia in 1923 was as under:—

Classification.	Imports from Great Britain. Gold Roubles.	Exports to Great Britain. Gold Roubles.
Foodstuffs.....	1,576,000	5,114,000
Raw Materials.....	25,826,000	28,282,000
Manufactures.....	9,914,000	115,000

The chief import from Great Britain was coal; the principal export was timber.

According to British official (Board of Trade) figures, the trade of Great Britain and Russia in 1924 was as under:—

Imports consigned from Russia £19,994,000
Exports to Russia 3,820,000

Communications.—There were (1923) 45,957 miles of railway in use, and 9,070 post offices and radio stations, with 24,003 post boxes and 349,309 miles of telegraph wire. Under Soviet administration the financial deficit on the working of the railways has increased in proportion as transport conditions have deteriorated. In 1921-22 the deficit exceeded 150,000,000 gold roubles, in 1922-23 it was 274,000,000 gold roubles, against an average credit balance of 270,000,000 gold roubles for the years 1914-16.

	1913.	1922-23.
No. of Locomotives :		
In full order	19,866	8,500
Disabled	840	11,000
No. of Wagons :		
In full order	480,000	20,000
Disabled	290,000	129,000
Total haul (miles) ...	254,364,000	90,618,000
Freight (poods)	16,135,300,000	2,800,000,000

In 1923 there were about 830,000 employés on the railways, but the number was reduced in 1924 to 650,000. The principal railway lines are the main European network from Leningrad, through Moscow to Astrakhan and across the Urals *via* Perm, Ufa, Samara and Saratov, with northern extensions to the Kola Peninsula and to Archangel and running southwards to the Baltic, the Crimea and the Caucasus; the *Trans-Siberian Line* from Chelyabinsk, on the Ural frontier, to Omsk, and round Lake Baikal to Chita and Stryetensk. From Chita the line crosses the Manchurian frontier (as the Eastern China Railway) to Harbin and Vladivostok, where a northward extension runs to Khabarovsk. The *Amur Railway* connects Stryetensk with Khabarovsk, and the *Trans-Siberian line* thus connects the western and eastern limits of Russia on Russian territory. The *Trans-Caspian Railway* runs from Krasnovodsk (opposite Baku) to Askabad, Merv, Bokhara, Samarkand, Khokand and Audijan, with a 200-mile branch from Merv to Kushk (near Herat) on the Afghanistan border. The *Orenburg-Tashkent Line*, from the European boundary, across the Kirghiz Steppe to Kazalinsk, Perovsk and Tashkent, whence a short line connects with the *Trans-Caspian system*. The *Trans-Caucasian Line* runs through Georgia, Azerbaijan and Armenia, from Batum and Poti, on the Black Sea, *via* Tiflis, to Baku, on the Caspian, where it is met by the European system of Rostov on the Don. From Tiflis branches run to Kars, and *via* Erivan to Mount Ararat on the Armenian frontier, and to the Persian frontier at Julfa. There are in the *Soviet Union* (1923) 164,793 miles of navigable rivers and canals and lakes, of which 103,935 miles are within European Russia, and 60,858 in Asiatic Russia; of the total about one-fourth of the distance is navigable by steam vessels, a further eighth by sailing vessels, and nearly one-half by rafts. In 1923 the ships and rafts carried over 10,000,000 tons of goods and 8,218,356 passengers. The principal seaports are Leningrad and Kronstadt on the Gulf of Finland, Sevastopol and Novorossiysk (Black Sea), Archangel on the White Sea, and Ekaterininsk in the Kola River (Murmanski), Vladivostok (Sea of Japan), and Petropaulovsk in Kamchatka.

Capital.—On March 14, 1918, the seat of Government was transferred from Petrograd to Moscow, which had a population in 1923 of about 1,600,000. LENINGRAD (before the war "St. Petersburg," and until the death of Lenin, "Petrograd"), the former Capital, founded by Peter the Great on the banks of the Neva in 1703, had a population in 1923 of about 800,000. Other centres are Saratov (188,000), Rostov (177,000), Tula (124,000), Nijni-Novgorod (135,000), Voronezh (100,000), Krasnova, formerly Ekaterinodar (143,000), Astrakhan (123,000), Orenburg (109,000), Ekaterinburg (96,000), Tomsk (90,000), Omsk (144,000), Nikoliesk (109,000), Tashkent

(200,000), Kokand (112,000), Samarkand (87,000), Vladivostok (100,000). Archangel had about 45,000 inhabitants in 1914.

II.—THE UKRAINE. (Ukraina.)

President, V. J. Tchubar.

Vice-President, M. J. Vladimírsky.

Chairman of Central Executive Committee, G. J. Petrovski.

Ukrainian Representative in Moscow, A. T. Prikhodjko.

On Nov. 21, 1917, the greater part of "Little Russia," consisting of the former governments of Chernigov, Kharkov, Kieff, and Poltava (with Ekaterinoslav and Kherson in "South Russia," and Podolia and Volynia in "West Russia"), was encouraged by Germany to declare itself independent as the *Republic of the Ukraine*. The new Republic was invaded by Germany in 1917-18, and subsequently overrun by Bolshevik forces, and a military and economic alliance was concluded between Soviet Russia and the *Ukraine Socialist Soviet Republic* (Dec. 28, 1920). The total area of the Republic is about 183,655 sq. miles, with a population of about 28,000,000. The chief town and seat of government is Kharkoff (pop. 1923, 312,000), other large centres being Odessa, the great port on the Black Sea (with a population in 1923 of 316,000), Kieff (pop. 1923, 406,000), Ekaterinoslav (pop. 1923, 127,000), Nikolayev (81,000), Poltava (88,000), and Taganrog (100,000). The Ukraine is the great cereal-growing district of Russia, and before the Great War the harvests exceeded 1,000,000,000 poods; during the Civil War the production was reduced to 385 million poods, but in 1923 it had increased to 700 millions. In 1922-3 there were 112 sugar-beet factories (200 in 1915) producing 10,000,000 poods (500 millions in 1914-15). The Ukraine also contains large deposits of iron ore and coal, and is the principal source of the European supply of quicksilver. Agriculture is the principal industry, and there are large iron and steel works. Before the Great War the exports from the Ukraine (grain, sugar, hides, bristles, quicksilver, and wool) were of the annual value of about £75,000,000, and the imports (manufactured goods and machinery) about £50,000,000. The Budget of 1922 showed a deficit of 124,800,000 gold roubles; in 1923 there was a surplus of 316 million gold roubles.

CAPITAL, Kharkoff. Population (1923), 312,000.

III.—WHITE RUSSIA. (Byelorussia.)

President (and Chairman of the Central Executive Committee), A. G. Tchervyakov.

The independence of White Russia was recognised by Soviet Russia in 1919, and a military and economic alliance was concluded Jan. 16, 1921. The independent republic covers the former government of Minsk and parts of Vitebsk and Moghiler, and its area may be estimated at 23,022 sq. miles, with a population of about 1,650,000. The political neighbours are Lithuania and Poland, on the west, and the Ukraine, on the south. The capital is Minsk (pop. 150,000), where there is a University founded by the Soviet Government.

CAPITAL, Minsk. Population, 150,000.

IV.—TRANSCAUCASIA.

(Zakavkarskaya F.S.S.R.)

President of the Council of People's Commissars,
M. D. Orakhelashvili.*Chairmen of Central Executive Committee, MM.*
Zkhakaya and Agamaly-Ogly.*Plenipotentiary in Moscow, S. M. Ter-Gabrielyan.*

The total area of the Transcaucasian Federative Socialist Soviet Republic is 74,105 sq. miles, with a population of 5,769,400.

Armenia, or Hyastan.

President of the Council, M. Lukashin.

Armenia (area 15,065 sq. miles, population 1,300,000) occupies the uplands between the Iranian plateau and Asia Minor, and is bounded by the Black Sea on the N., by Kurdistan on the S., by Azerbaijan on the E., and by Turkey on the W. Until the outbreak of the Great War it was shared between Turkey (35,600 sq. miles), Russia (20,587 sq. miles), and Persia (6,518 sq. miles). The rivers Euphrates, Tigris, Aras, Kur, and Tcheroekh take their rise within its boundaries, and at the meeting of the former Turkish, Persian, and Russian boundaries is *Mount Ararat* (17,160 feet), the traditional resting place of "Noah's Ark." In the uplands the climate is severe, but in the valleys and plains the soil is fertile, producing all kinds of cereals, cotton, rice, sesame, hemp, flax, and tobacco. Sericulture (silkworm breeding), sheep-breeding, and fruit growing are capable of great development. Armenia has great mineral resources hardly as yet developed. Naphtha, sulphur, bitumen, and nitre abound, while the mountains yield salt (mineral and in solution), gold, silver, copper, lead, iron and valuable marbles; there are also numerous hot and cold mineral springs (similar in nature to those of Vichy); more than half the supply of copper from Russia was derived in 1914 from Soviet Armenia, and the value of carpets manufactured in 1914 exceeded 10,000,000 gold roubles. The Armenian Church is the oldest established Christian church, Christianity having been recognised as the State religion in 300, and from the 5th century there is a national language and literature. On account of their religion the Armenians have suffered a general persecution by Islam, particularly in the *vilayet* of Sivas, Bitlis, Diarbekir, Mamuret-el-Aziz, Van, and Erzerum, where massacres have frequently occurred. In 1915-17 there were wholesale deportations and massacres of the Christian population of Turkish Armenia, while the Armenian Christians of Azerbaijan and of Russian Armenia were similarly treated by Turkish and Kurdish hordes. In 1918 the Supreme Council of the Allied Powers recognised the independence of the *Republic of Armenia*. Under the Treaty of Peace with the Allies (May 11, 1920), Turkey recognised the independence of Armenia, with its capital at Erivan. In 1920 a Bolshevik movement set up the *Armenian Socialist Soviet Republic*, on the lines of the Moscow government.

CAPITAL, Erivan. Population (estimated), 90,000.

Georgia, or Sakartvelo.
(Gruziya.)*President, M. Eliava.**Chairman of Central Executive Committee, M.*
Zkhakaya.

Georgia, a Kingdom in Transcaucasia, with a history of more than 2,000 years as a State, was annexed by Russia in 1801 in violation of the Treaty of Alliance of 1783. At the beginning of 1918 it regained its independence, but in 1921 the country was occupied by Bolshevik forces and became a member of the Transcaucasian Federation. *Soviet Georgia* is bounded on the N. by the Caucasian Mountains, on the S. by Armenia, on the E. by the Republic of Azerbaijan, and on the W. by the Black Sea. It includes the autonomous republics of Abkhasia and Ajaria and the autonomous area of Ossetia; the total area being about 25,470 square miles, with a population (1923) of 2,372,400. There are 670 miles of railway, the trunk line connecting the Black Sea ports of Poti and Batoum with Baku, on the Caspian. Batoum and Baku are also connected by a petroleum pipe-line. The manganese ore beds are the richest in the world, more than one-half of the world's supply being derived from the Tchiatury mines (in the district of Sharopausky) in 1914. There are also abundant supplies of coal (5 million poods in 1914) and over 500 mineral springs partly unexploited. Wine is produced in considerable quantities, and the tobacco plants (chiefly in Abkhasia) yielded 800,000 poods in 1914, a great deal of which was imported by Egypt and produced as local grown. Timber (especially box) is an important industry. Oil wells with unproved quantities of crude oil have been discovered in many places, particularly in the Shirak Steppe. The chief town and seat of government is Tiflis, population (1923) 400,000; the administrative centre of Abkhasia being Sukhum (60,000), and of Ajaria, Batum (pop. 70,000); other large centres being Kutais (93,000) and Poti (30,000).

CAPITAL, Tiflis. Population (1925), 400,000.

British High Commissioner at Tiflis, Commander Luke, D.S.O., R.N.

Azerbaijan.

(A.S.S.R.)

Chairman of Central Executive Committee, M.
Agamaly-Ogly.

Azerbaijan, on the south-western shore of the Caspian Sea, extends from the Caucasus in the north to Persia in the south and from the Caspian on the east to Armenia and Georgia, with a total area of 33,570 square miles and a population (1916) of 2,097,000, of whom over 75 per cent. are Muhammadans. It includes the provinces of Baku, Hanjin (Elisavetpol), and the districts of Zakatal and Nakhichevan. The *Azerbaijan Socialist Soviet Republic* entered the Union as a Member of the Transcaucasian Federation on Dec. 31, 1922. The Republic is very rich in minerals (naphtha, magnetic ironstone, and manganese), but oil is the principal industry, concentrated in the Baku region, the production being 466,800,000 poods in 1914, and 213,000,000 poods in 1922-3. Fishing is also important, and 15,000,000 poods of caviare were produced in 1922. The principal crop is cotton.

The CAPITAL is Baku (pop. 255,000) on the shore of the Caspian Sea, the centre of the petroleum industry. Baku is connected by railway with Batum (Georgia) on the Black Sea, via Tiflis, and with Moscow, via Rostov. Other towns are Hanjin (65,000), Derbent (35,000), Kuba and Shemakha.

V.—BOKHARA.

President, Khodjayef Feyzulla.

Chairman of Central Executive Committee, Parsa Khodjayef.

Plenipotentiary in Moscow, Yusuf Zade.

Bokhara is a Central Asian Republic with an estimated area of 85,000 square miles, and a population of about 2,000,000, the majority being Muhammadan Uzbeks. The former capital (Old Bokhara) is a station on the Russian Trans-Caspian Railway, and has a population of about 100,000, and a branch line (8 miles) connects with the new capital (Kahan). The principal products are rice, wheat, fruit, hemp, cotton, silk, and carpets. Exports (mainly to Russia) are agricultural products and silk and cotton manufactures; imports are principally manufactured goods and sugar. The Emirate was abolished in 1920 and the Emir fled to Afghanistan. A Soviet Republic of Bokhara was established and its independence was recognised by Soviet Russia by treaty of March 4, 1921; and on Sept. 20, 1924, the Bokhara *Kurultai* (Congress of Soviets) declared a *Socialist Soviet Republic*, which may be understood as a first step towards entering the Soviet Union. CAPITAL, Kahan.

VI.—KHIVA.

(Khorezm.)

President, Bektchan-Nazaroff.

Chairman of Central Executive Committee, Sultan Kary.

Plenipotentiary in Moscow, Atadshanoff.

The National Soviet Republic of Khorezm, formerly the Khanate of Khiva, lies between Bokhara and Kirghiz, and has a total area of about 26,000 square miles, with a population of 850,000, of whom about half are nomads, and nearly all Muhammadans. The country occupies the fertile delta of the Oxus and is highly productive (rice, wheat, cotton, silk, fruit, hemp). The independence of the Republic has been recognised by treaty with Soviet Russia (Sept. 30, 1920). CAPITAL, Khiva (population about 10,000).

SARRE TERRITORY.

Under the *Treaty of Versailles* Germany renounced the government of the Sarre Basin in favour of the League of Nations, the government being entrusted to a commission of 5 members nominated for one year by the League. At the expiration of 15 years from Jan. 10, 1920, the population will be called upon to decide by a plebiscite the government under which they wish to be placed. The total area is about 743 square miles, with a population of about 713,000. The chief towns are Sarrebruck (117,000), Neunkirchen (35,000) and Saint Ingbert (18,000).

SALVADOR.

República de El Salvador.

President (1923-1927), Señor Dr. Don Alfonso Quinonez Molina, assumed office March 1, 1923. Vice-President, Señor Dr. Don Pio Romero Bosque.

Foreign Affairs, Education and Justice, Señor Dr. Don Reyes Arrieta Rossi.

Interior and Public Works, Señor Dr. Don Rodolfo Schoneberg.

Finance, Señor Don Gustavo Vides.

War and Marine, Señor Dr. Don Pio Romero Bosque.

Envoy Extraordinary and Minister Plenipotentiary to Gt. Britain, Señor Dr. Don Arturo Arguello-Loucel (resident in Brussels). Consul-General in London, Señor Dr. Don Antonio Reyes-Guerra, 7 Union Court, Old Broad Street, E.C. 2.

The Republic of Salvador extends along the Pacific coast of Central America for 170 miles, with a general breadth of 43 miles, and contains an estimated area of 13,176 square miles, with a population estimated at 1,525,926. It is divided into 14 departments. In 1921 there were 55,539 births (37 per 1,000) and 30,613 deaths (20 per 1,000), 10 per cent. of the deaths being due to malaria.

Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish viceroyalty of Guatemala until 1821. In 1840 the Republic broke away from the federation of Central American States. The constitution rests upon the fundamental law of 1864 (revised in 1886), the President and Vice-President being elected for four years by direct vote of the people, the President being ineligible for a successive term in either office.

There are distinct areas in the low alluvial plains of the coast and the interior plateau, with a mean elevation of about 2,300 feet, broken in many places by volcanic cones, of which the highest are Santo Ana (8,300 feet) and San Miguel (7,120 feet). The lowlands are generally hot and unhealthy. There is a wet season (winter) from May to October, and a dry season (summer) from November to April. Earthquakes are frequent, and on June 8, 1917, a series of seven shocks nearly destroyed the capital, and ruined the towns of Santa Tecla, Armenia, and Apopa. The volcano on Mount Salvador was actually in eruption in Oct. 1917, and a severe earthquake was experienced on April 28, 1919, doing great damage to the capital.

The principal river is the Rio Lempa, which rises in Guatemala and flows into the Pacific, with tributaries in the Santa Ana, Asaguate, Sumpul and Torola, the Lempa being navigable for most of its course by small steamers. In the eastern districts the Rio San Miguel rises near the Honduras boundary and flows into the Bay of Fonseca. The western boundary crosses the Laguna de Guisja, the greater part of which lies within the borders of Salvador, and in the centre of the Republic is the large volcanic lake Ilopango, with a smaller lake, Coatepeque, further west.

The chief industry is the cultivation of coffee; sugar is also grown, as well as indigo, rice, balsam, &c. Cotton-growing on an extensive scale was commenced in 1924. The principal exports are coffee (80 per cent. of total value), indigo, tobacco, sugar and gold. The chief imports are textiles, hardware and machinery, chemicals and drugs. About 69 per cent. of the imports are from the U.S. and 15 per cent. from the U.K.

The total length of the railways is 262 miles; a British railway nearly 100 miles in length connects Acajutla with the capital and Santa Ana, the coffee centre, and a line from the port of La Union to the capital was opened in 1922. The principal ports are Acajutla, La Libertad and La Union. There is a good motor road between La Libertad and the capital, while motor transportation is usually possible between the capital and Guatemala City, over the International road opened in 1923.

There are 120 post-offices and 234 telegraph offices, with 2,400 miles of wire.

The language of the country is Spanish.

Revenue	1924-25.	£1,852,000
Expenditure		1,823,000

CAPITAL, San Salvador. Pop. circ. 80,000. Other towns are Santa Ana (70,000), San Miguel (40,000), San Vicente (30,000), Nueva San Salvador (26,000).

FLAG: Three horizontal bands, light blue, white, light blue.

BRITISH LEGATION.

British Minister (see Guatemala).

BRITISH CONSULAR OFFICES.

San Salvador—Consul and Chargé d'Affaires (ad interim), Gerald Harrington. Acapulco—Vice-Consul, Capt. L. R. J. C. Dale, M.C. (acting).

Salvador is 5,700 miles from London; transit (passenger), via New York and thence every 3 weeks by direct steamer to La Libertad; or via New Orleans and thence every week by direct steamer to Puerto Barrios (Guatemala), or by various direct lines from England to Panama Canal and thence by steamer (about once every 10 days) to La Libertad; time 3 to 5 weeks.

SAN DOMINGO. See Dominican Republic.

SAN MARINO.

Regents, Two "Capitani Reggenti."

Consul-General for San Marino in Great Britain, Commendatore Melvill A. Jamieson, F.R.G.S., 17 Cockspur Street, S.W. 1.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mason of Dalmatia in the 4th century, and governed by a Council of 60, of whom two are elected as Regents for six months (1 April and 1 October), being thereafter ineligible for office for three years. The area is 38 square miles, the population 12,036. There is an army of about 1,000. The city of San Marino (pop. 2,000) occupies the slope of Mount Titano, and has an impregnable castle, where King Berengar of Lombardy took refuge in 950 A.D., a fine church and Government palace, and a theatre. The principal industries are wine, cereals, cheese, oil and cattle raising, in addition to the utilization and export of gravel from Mount Titano and production of white and hydraulic lime at Serravalle. A Treaty of Extradition was concluded between the Governments of Great Britain and the Republic of San Marino on 16th Oct., 1899.

FLAG: Two horizontal bands, white, blue (with coat of arms of the Republic in centre).

British Consul-General, E. Mervyn de Garston (Leghorn, Italy).

SERBIA. See Yugo-Slavia.

* The interest and amortization are secured by a lien on 70 per cent. of the Customs receipts. \$ (Colon) at par = 50 cents U.S. currency.

SIAM.

(Muang Tai.)

King, Rama VI., G.C.B., G.C.S.I., G.C.V.O., born

January 1, 1880; succeeded October 23, 1910.

Foreign Minister, H.H. Prince Traidos.

Envoy Extraordinary & Minister Plenipotentiary, in London, Phya Prabha Karavong, 23 Ashburn Place, S.W. 7.

Consul-General (Vacant): Temporary Offices, 23 Ashburn Place, S.W. 7).

The Kingdom of Siam, or Muang Tai (area about 295,000 square miles; population, 1923, 9,513,000), is a buffer State between British Burma and French Indo-China, and its integrity is guaranteed by the British and French Governments by the Anglo-French Agreement of April, 1904. The King is an absolute monarch, and appoints his successor. There is an Executive Council of Ministers with an adviser in Foreign affairs (usually of American nationality), and a Financial adviser (hitherto always of British nationality) and, since 1895, a Legislative Council of State, consisting of the Ministers, eight royal princes, and over twenty members appointed by the King, who has an absolute power of veto. A number of English, French, Italians, Danes, and Americans are employed in the various State departments. There is an army of nearly 50,000 men, and a few small gunboats; compulsory military service has been introduced. The Kingdom contains many Chinese (largely engaged in trade and industry), besides Shans, Laos, Malays, Burmese, and Cambodians, and over 1,800 Europeans. The principal religion is Buddhism. There are 364 Government schools and 4,124 schools of all kinds, attended by 448,380 children. The Chulalongkorn University is organised with faculties of medicine, political science, engineering, and literature and science.

The upper part of Siam is mountainous, the lower flat. Bangkok is the only much-frequented port. Eighty-five per cent. of Siamese sea-borne trade, which centres at Bangkok, is with the British Empire, and is largely in the hands of British firms or of Chinese trading from Singapore and Hong Kong. German shipping, which had held the lead in tonnage for many years past, has ceased to visit Bangkok since August, 1914, and, as a consequence, there has been a large increase in Norwegian and British shipping. The chief products of Siam are rice, teak, and tin (from Lower Siam). The area under rice is being much enlarged by irrigation. There is a large number of rice mills, mostly in or near Bangkok. The teak industry in the great forests of N. Siam is mainly in English hands. In 1924-25 rice constituted 81 per cent. and teak 4 per cent. of the exports from the port of Bangkok; while hides and marine products are also exported in considerable quantities. Among imports are treasure, cotton goods and yarn, silk goods, provisions, gunny bags, kerosene, sugar, opium, metals and metal wares, machinery, &c. The general tariff rate is 3 per cent. *ad valorem*. Burma imports teak and cattle overland from Siam, and exports thither cotton and silk goods, &c. Except tin, wolfram, rubies and sapphires, there are no important mineral products as yet. About 1,500 miles of railroads (mostly State-owned) are now open for traffic. Railways from Bangkok run to Korat (165 miles N.E.), with an extension (13 miles) to Tha Chang, Chiangmai (462 miles N. of Bangkok), Petru (40 miles E.); the southern line to Trang, on the west coast of the Malay

Peninsula, was open to traffic in October, 1916, and in July, 1918, was completed to the Kedah border where junction with the Federated Malay States Railway system was effected. There is through railway connexion between Bangkok and Penang and Singapore, and the railway is being extended from Petriv to the Cambodian frontier. Good roads are few. There are 4,000 miles of telegraph lines.

SPAIN.

(España.)

King, Alfonso XIII., son of Alfonso XII. and of Queen Maria Christina, born (and acceded to the throne) May 17, 1886; married May 31, 1906, H.R.H. Princess Victoria Eugénie Julia Ena Maria Christina of Battenberg (born Oct. 24, 1887).

Heir Apparent, H.R.H. The Prince of the Asturias, Don Alfonso, born May 10, 1907.

MILITARY DIRECTORATE (Sept. 1923).

President, General Primo de Rivera, Marquess de Estella.

Members, Generals Adolfo Vallespinoza, Luis Hermosa, Luis Navarro, Dalmiro Rodriguez, Antonio Mayandia, Francisco Gomez Jordana, Francisco Ruiz del Portal, Mario Muslera, Marquess de Magáz.

Ambassador in London, Excmo. Señor Marqués de Merry del Val, 1 Grosvenor Gardens, S.W. 1.
Counsellor, (vacant)

1st Secretary, Señor Don Manuel Inclán.

2nd Secretary, Señor Don José Ruiz de Arana, Vizconde de Mambias.

3rd Secretary, Señor Don Roberto de Satorres. Attachés, Señores Don P. J. de Zulueta, Don E. M. Pena, Marques de Murrieta.

Military Attaché, Lt.-Col. Don F. Rich.

Naval Attaché, Lieut.-Com. Señor Don Fernando Navarro.

Agricultural do., Señor Don Jesus Navarro de Palencia.

Consul-General, Excmo. Señor Don Enrique Gaspar, 47 Bloomsbury Square, W.C. 1.

Vice-Cons., Señor Don Pedro Lecuona; Señor Don Fernando Illera.

A Kingdom situate in the south-west of Europe, between 36°-43° 45' N. lat. and 4° 25' E.—9° 20' W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay

and France, from which it is separated by the Pyrenees; and occupying the larger portion of the great Iberian Peninsula. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 196,700 English square miles, and an estimated population, in Jan. 1924, of 21,763,000—110 to the square mile. The interior of the peninsula consists of an elevated tableland surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morena, S. Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho. The Constitution upon which the present Government is formed is dated June 30, 1876. Spain is rich in iron, copper, and lead; its mineral resources are only partially exploited, and principally by foreign capital under foreign direction. The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, and dates. The agricultural products comprise wheat, barley, maize, rice, with hemp and flax of the best quality. The vine is cultivated in every province; in the south-west, Jerez, the well-known sherry and tent wines are made; in the south-east, the Malaga and Alicante. The principal articles imported are raw cotton, spirits, fish, wheat and flour, sugar, coal, timber, woollen manufactures, machinery and railway materials, hides, &c. The principal exports are wine, copper and copper ores, lead, iron ores, olive oil, raisins, oranges, cork, esparto grass, wool, salt, quick-silver, grapes, &c. Trade was for many years mostly confined to France and Great Britain, but Germany had, before the War, become a serious competitor, while the United States and Belgium share an increasing proportion of Spanish trade. Home manufacture is protected by high customs duties.

In 1923 there were about 10,000 miles of railway open, and 69,400 miles of telegraph line. The sea-going mercantile marine over 50 tons, on Jan. 1, 1923, consisted of 1,198 steamers (1,008,890 tons) and 591 sailing vessels (97,491). In 1923, 19,500 vessels of 24,584,581 tons (displacement) entered and 16,913 vessels of 20,773,523 tons (displacement) cleared at Spanish ports.

Defence.—The authorised peace establishment, including forces in North Africa, was, in 1923, 19,827 officers and 284,212 men; in 1924 these forces were increased by 100,000 men, and the army of occupation in North Africa reached the figure of 150,000 all ranks. War strength: Field Army, first line, 300,000; second line, 450,000.

The Navy consists of 3 (15,700-ton) battleships and 3 modern cruisers, with 1 old battleship and 4 old cruisers; there are also 7 torpedo-boat destroyers, 20 torpedo-boats, 7 submarines, and 21 gunboats.

Education, Primary, is nominally compulsory and mainly free, and is State-aided, the public schools being maintained by local taxation. Many private schools are under clerical control, and supervision is lacking. Secondary High Schools are in each province, but the curriculum is defective. Universities at Barcelona, Granada, Madrid, Murcia, Oviedo, Salamanca, Santiago, Saragossa, Seville, Valencia, and Valladolid.

BRITISH CHAMBER OF COMMERCE FOR SPAIN,

8 Rambla de los Estudios, Barcelona (Branch,
9 Calle Marqués de Cubas, Madrid).

Madrid, 1,750 miles; transit, 45 to 50 hours.

The BALEARIC ISLES are an archipelago of 15 islands in the Mediterranean, the largest being Majorca, Minorca, Iviza, and Formentara; the total area is 1,935 square miles, with a population (1923) of 342,462. The archipelago forms a province of Spain, the capital being Palma in Majorca.

CEUTA, which forms part of the Province of Cadiz, is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 miles, with a population of 35,219.

The CANARY ISLANDS are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population of 473,497. The Canary Islands form a Province of Spain, the capital being Santa Cruz in the island of Teneriffe.

Spanish Colonies.

The Spanish Colonies (exclusive of Ceuta and the Canary Islands, which form an integral part of the kingdom) consist of certain settlements

in, and islands round the coast of, Africa, with a total area of close on 82,400 square miles, and a population exceeding 275,000.

FERNANDO PO (*Fernando Póo*) lies in the Bight of Biafra in $3^{\circ} 12'$ N. lat. and $8^{\circ} 48'$ E. long., about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,800 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar-cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. Total population 20,650. The capital is Basile, and the largest town Port Clarence (1,500 inhabitants). Dependencies of the island of Fernando Po are:—

Annobon Island (*Anno Bom*), in the Gulf of Guinea, in $1^{\circ} 24'$ S. lat. and $50^{\circ} 35'$ E. long.; population 1,391.

Corisco Islands, consisting of Corisco, Bata, Elobey Grando, and Elobey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce. Total population 96,072.

RIO DE ORO is a possession on the north-west coast of Africa, between Cape Bogador and Cape Blanco, or approximately between $21^{\circ} 20'$ – 26° N. lat., and extending eastwards to about 13° W. long. The territory is part of the waterless Sahara, with a sparse population of wandering Muhammadan Arabs; population 253.

Rio Muni (or *Spanish Guinea*) is a coastal settlement of West Africa between Cameroon and French Congo (1° N.— $2^{\circ} 10'$ N. lat.), extending about 125 miles inland. The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni, Benito, and Campa rivers, and at Bata on the coast.

SPANISH MOROCCO.—Spain exercises a protectorate over a part of Northern Morocco, where her armies of about 150,000 are engaged in a continuous struggle with the Rifians (see pp. 766-7), and on the Moroccan seaboard are certain Spanish *presidios*, formerly used as convict settlements.

Melilla is a town on a rocky promontory of the Riff coast, connected with the mainland by a narrow isthmus. The population is 50,170.

Alhucemas is a settlement on the bay of that name, and includes six islands; population 322.

Peñon de la Gomera (or *Peñon de Velez*) is a fortified rocky islet about 40 miles west of Alhucemas Bay; population 398.

Spanish Southern Morocco—*Ifni*, on the Atlantic coast of Morocco, about 100 miles south of Agadir, affords access to the interior of south-west Morocco, but has no great trade at present.

The Chaffarinas (or *Zaffarines*) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua; population 318.

THE SUEZ CANAL.

The Suez Canal.—The *Compagnie Universelle du Canal Maritime de Suez* is an Egyptian company, authorised in 1856, and confirmed in 1866, with a capital of 200,000,000 francs in 400,000 shares of 500 francs each. The British Government acquired from the Khedive in 1875 a total of 176,602 shares (cost £4,000,000, value March 31, 1922, £19,740,125). Since 1924 each 500 franc share has been divided into two 250 franc shares.

The Suez Canal was opened in 1869. The total length of the canal is 101 miles, with a minimum width of 45 metres (147 ft. 8 in.), having cost

844,704,029 francs to construct and enlarge; the maximum draught of water allowed for vessels using the canal is 9'75 metres (32 feet). The average time for the transit through the canal is 15 hours 23 minutes. By a convention, signed on Oct. 29, 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war. The management of the canal is entrusted to a council of 32 administrators, of whom 10 are British (three representing H.M. Government and seven the shipowning interest).

British Directors, The Lord Inchcape, P.C., G.C.M.G., K.C.S.I., G.C.I.E. (*Vice-President of the Company*); Sir Aubrey Brocklebank, Bart.; Sir Fredk. Green, K.B.E.; Rt. Hon. Sir R. S. Horne, G.B.E., K.C.; T. Harrison Hughes; Oswald Sanderson; Sir E. Wyld-bore-Smith.

Representing H.B.M. Govt., H. T. Austruther, Sir Ian Malcolm, K.C.M.G.; Sir J. T. Davies, K.C.B., C.V.O.

The following table shows the number and tonnage of vessels which have passed through the Suez Canal since 1914, with the percentage of British vessels:—

Year.	No. of Vessels.	Net Tons.	British Tonnage.
			%
1914	4,802	19,409,495	66·5
1915	3,708	15,266,155	76·3
1916	3,110	12,325,347	79·6
1917	2,353	8,368,918	73·6
1918	2,522	9,251,601	79·5
1919	3,986	16,013,802	70·9
1920	4,009	17,574,657	61·7

Egyptian	6	15,902	0·06
Panama	2	17,624	0·07
Danzig	2	11,856	0·05
Finnish	3	8,527	0·03
Rumanian	4	7,058	0·03
Siamese	1	588	0·002
Hedjaz	1	259	0·001
Totals	5,122	25,109,882	100

The transit receipts in 1870 were 5,718,756 fr., and in 1924, 186,488,740 fr.

The rate of transit dues as from April 1, 1925, is 7 fr. 25c. per ton, and 4 fr. 75c. for vessels in ballast.

The net dividends for the year 1915 amounted to 265 fr. on the ordinary 250 fr. shares, and 255.638 fr. on the Actions de Jouissance.

The 2,973 British vessels included in the total for 1924 are grouped under the following categories:—

	No.	Net Tonnage.
Merchant vessels	2,028	10,010,812
Mail steamers	345	2,407,704
Warships and transports	167	736,780
Government chartered vessels	33	190,496
Vessels in ballast	400	1,648,889

2,973 14,994,618

SWEDEN.

(Sverige.)

King of Sweden of the Goths and the Wends, Gustaf V., born June 16, 1858; suc. December 8, 1907; mar., Sept. 20, 1881, Victoria, dau. of Grand Duke of Baden, born August 7, 1862 (and has issue 2 - as).

Heir Apparent, Gustaf Adolf, Duke of Skåne, Crown Prince, born Nov. 11, 1882; married (1) June 15, 1905, H.R.H. the late Princess Margaret of Connaught (died May 1, 1920). (2) Nov. 3, 1923, Lady Louise Mountbatten, Princess of Battenberg, born July 13, 1889.

CABINET (Jan. 24, 1925).

Prime Minister, R. J. Sandler.

Foreign Affairs, Östen Undén.

Justice, T. K. V. Nothin.

Finance, E. J. Wigforss.

Commerce, C. E. Svensson.

Communications, Victor Larsson.

Defence, P. A. Hansson.

Social, Gustaf Möller.

Legation, 27 Portland Place, W. 1.

Counsellor of Legation, Count Claes Bonde.

Secretary, T. H. W. Wistrand.

Attaché, B. H. B. de Ribbing; G. O. Broms.

Military Attaché, Col. E. Mossberg, C.B.E.

Naval Attaché, Commander A. de Bahr, O.V.O.

Press Representative, E. Sundström.

Chancery, J. Stille.

Agricultural Adviser, M. W. F. de Wachenfelt.

Chaplain, Rev. A. O. T. Hellerström.

Consul-General, E. G. Sahlin, 329 High Holborn, W.C. 1.

Vice-Consuls, E. J. S. Wisén; Harry Eriksson.

Swedish Church, Harcourt Street, Marylebone Road, W. 1.

Sweden comprises the eastern half of the Scandinavian peninsula, and comprises the capital and 24 governments, "Län," with an area of 173,105 square miles, and a population, Dec. 31, 1924, of 6,036,118, nearly all Protestant. This area includes the great lakes of Hjälmaren, Mälaren, Vanern, and Vättern. Nearly 40 per cent. of the population are devoted to agriculture, about 60,000 being owners and 70,000 tenants of the land they cultivate. The country may be divided into three separate districts—the north-

ern, forest; central, mining and agricultural; the southern, agricultural. The climate in the south is favourable for producing grain. The principal articles of cultivation are oats, rye, barley, wheat, potatoes, roots and grasses. The forests are very extensive, covering over one-half of the surface of the country, and consisting of pine, birch, fir; these are of great importance, supplying timber, pitch, and tar, and the chief fuel of the country, in addition to sulphite and mechanical wood pulp for the paper-making industry. The mineral products are extremely rich: iron of excellent quality; gold and silver in small proportions; copper, lead, nickel, zinc, cobalt, alum, sulphur, porphyry, and marble. There is a railroad opening up the rich iron-ore districts of Lapland, and mineral trains run from Gellivare and Kiruna to Luleå on the Gulf of Bothnia and to Narvik on the Atlantic. Considerable mines of coal are being worked in Scania (Skåne). The chief imports are coffee, tobacco, and other ordinary colonial produce, coal, cloth, yarn, wool, cotton, skins, manure, iron, fish, oils, wheat, rye, pork, and machinery. The chief articles of export are timber, butter, iron, steel, wood pulp, paper, matches, stone, iron and zinc ores, &c. In 1924 the exports of wood pulp and paper were 1,797,000 tons.

Railroads 9,820 miles in length (of which 3,556 are the property of the State) were open on Jan. 1, 1925; and 51,432 miles of telegraph wires (inclusive of 22,294 railroad telegraph wires), 145 control stations, and 1,216 railroad and 1,505 other telegraph stations. There were at the same date 410,567 miles of telephone wires.

Defence.—Service in the Army is universal and compulsory. The peace effective is about 95,000 trained men, which can be raised to war strength of about 380,000. The Navy consists of 57 fighting vessels (370 guns), 13 being iron-clads, with submarines, submersibles, and some training ships, &c.

Education.—(i.) *Primary*: Compulsory and free. Illiteracy rare. Maintained by local taxation, with State grants. Attendance good. (ii.) *Secondary*: Well-developed, schools numerous and efficient. (iii.) *Special schools* make a feature of technics and navigation. (iv.) *Universities*: Lund, Uppsala, and private faculties in Stockholm and Gothenburg.

	1923-4.	1925-6.

Chancellor, M. Paul Hilfiker.
The Helvetia of the Romans, a Federal

Republic of Central Europe, situated between 45° 50'—47° 48' N. lat. and 5° 58'—10° 30' E. long. It is composed of 22 Cantons, of very dissimilar size, united under a Constitution dated 29 May, 1874, and comprises a total area of 15,950 square miles, with a population of 3,888,320 in 1920, who are divided between Roman Catholics, 41 per cent., and Protestants, 57 per cent., Jews numbering 21,000, and others 43,000. The population is formed by three nationalities, distinct by their language, as German 71 per cent., French 21 per cent., Italian 6 per cent., and Romansh (Grisons), 1½ per cent. It is the most mountainous country in Europe, having the Alps, covered with perennial snow and glaciers, rising from 5,000 to 15,213 feet in height, not only along its southern and eastern frontiers, but throughout the chief part of its interior; and the Jura mountains in the north-west. Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables are grown. The forests cover about one-fifth of the whole surface. The chief industries comprise the manufacture of silks, artificial silks and silk ribbons, wool, cotton and cotton ribbons, linen, embroideries, strawplait, machines, paper, chemicals, chocolate, condensed milk, dyestuffs, and tobacco; while the metallurgical, electrical and pharmaceutical industries are also extensive; clocks and watches have long been the staple products of Geneva and Neuchâtel. In 1923 there were 3,593 miles of railway in working order, 25,338 miles of telegraph line, 426,460 miles of telephone line, and 3,929 post-offices.

The legislative power is vested in a Parliament, consisting of two Chambers, a National Council, of 158 members, and a Council of States of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for three years, an election taking place in October. The executive power is in the hands of a Federal Council of 7 members, elected by the Federal Assembly, presided over by the President of the Confederation. The President has a salary of 27,000 francs; the Vice-President and other members of the Federal Council 25,000 francs each. The members of the Federal Council are elected for three years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year, the five other members for three years. Not more than one of the same canton may be elected member of the Federal Council.

Defence: Militia. Active Army, 12 yrs.; initial trg., 65–90 days. Subsequently 11 days per ann.; then Landwehr, 8 yrs.; 1 trg., 11 dys. for dismt'd. branches only; then (Landsturm to age 48). *War Strength*, 140,600; Landwehr, 65,000; Landsturm, 57,000.

Education.—Control by cantonal and communal authorities. No central organ. Illiteracy rare in Protestant cantons. (i.) *Primary*: Free and nominally compulsory, but attendance is not strictly enforced in the essentially Roman Catholic cantons. School age varies. (ii.) *Secondary*: Age 12–15 for boys. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities*: Bale, Berne, Fribourg, Geneva, Lausanne, Zurich, and Neuchâtel.

• The President is elected in December, and remains in office from 1 Jan.—31 Dec.; he is generally succeeded by the Vice-President.

	1925.

Berne, transit, 22 hours.

SYRIA AND LEBANON.

Syria.—British forces, together with small French and Arab detachments, drove the Turks out of Syria and Lebanon in 1918, and occupied those districts and the district of Cilicia. By decision of the Supreme Council of the Allies the districts in question were entrusted to France, to be administered under a mandate (Cilicia was restored to Turkey by the French in 1922).

The Emir Feisal (son of the ex-King of the Hedjaz and, since 1921, King of Iraq) had from the outset assumed the administration of the districts of Aleppo, Hama and Homs, which had been assigned as Independent Arab districts under an earlier agreement of May, 1916, between France and Great Britain (the *Sykes-Picot Agreement*), and it was intended to allow the Emir to remain under French guidance, but on March 8, 1920, the "Syrian Congress" at Damascus declared Syria independent, and the Emir Feisal was crowned King of Syria. The action of the Syrian Congress did not receive the sanction of the Allied Powers,

and General Gouraud occupied Damascus, Aleppo, Hama and Homs. The Emir Feisal left the country, and afterwards became King of Iraq (q.v.). The French Mandatory Zone was first divided into the four autonomous states of Great Lebanon, Damascus, Aleppo and the Alaouites (the region round Latakia), each having a French adviser responsible to the High Commissioner at Beyrout. The latter three States were later grouped together to form the *Syrian Federation*, with a nominated Council. The Federation has now been abolished. *Damascus and Aleppo* have been amalgamated into a single State (the details of the amalgamation have not yet been worked out), and the *State of the Alaouites* again becomes independent. The actual form of government differs in each of the States, but the guiding principle in each is real and effective French control.

Syria is a geographical term for part of the former Turkish territories in Asia Minor, and its Northern limits are still undefined. The present temporary Northern boundary between Syria and Asiatic Turkey was defined in the agreement between France and the Kemalists, and is roughly as follows:—From a point immediately S. of Payas (on the Gulf of Alexandretta) to Meidan Ekbes (the railway station and environs remaining in Syria), thence S.E. to the railway station of Tchoban Bey, leaving the districts of Marsova to Syria and of Karnaba and Killis to the Kemalists; thence along the Baghdad Railway to Nussebin and along the old highway to Jizireh ibn-Omar on the Tigris (the districts of Nussebin and Jizireh ibn-Omar remaining in Kemalist territory, with the roadway between these two places). The E. boundary separates Syria from Mesopotamia along a line running roughly N.E. from the E. side of Jebel Druze to a point 15 miles S.E. of Jezireh Ibn Omar (80 miles E. of Mardin); the S. boundary follows a line from Ras el Nakoura on the coast, N. of Akka, and running S.E. by E. to the Hedjaz railway line S. of Nasib, with a projection northwards to include the head waters of the Jordan, the Hule Lake and the Lake of Tiberias being included in Palestine. Within these limits, the estimated area is 100,000 sq. miles, with a population of about 3,000,000, of whom the greater number are Orthodox Muhammadans, with a proportion of Shites and Druses. The products of Syria are wheat, tobacco, fruit, wine, silk, liquorice, copper and brass goods; there is little cultivation without irrigation, the inland districts being cut off from the moisture-laden winds by a mountain barrier, running parallel with the coast. The mineral wealth is believed to be unimportant, but there is a certain amount of bitumen. The principal Syrian towns are Damascus (est. pop. 300,000), Aleppo (250,000), Homs (70,000), and Hama (60,000). The administrative capital is at Beyrout (Grand Lebanon). Damascus contains the Mosque of the Omayyades (where is the tomb of Saladin), and in the south-western quarter is "The Gate of God," through which the pilgrimage to Mecca passes annually, while the "street called Straight" (Acts ix, 11) runs E. to W. through the city. Damascus is an important commercial centre, and among its industries are metal work and mother-of-pearl inlay, and also native-made silk and cotton stuffs. At Baalbek (Heliopolis), on the western slopes of the Anti-Lebanon range (35 miles N.N.W. of

* Estimated.

Damascus), are ruins of 1st to 3rd century Roman temples (the Circular Temple, the Great Temple and the Temple of Bacchus), and in the vicinity of the ruins is the largest cut stone in the world (60 × 17 × 14 feet), weighing 1,500 tons. The railway system consists of a line from Beyrout to Damascus (narrow gauge), with a connexion at Rayak for Homs, Hama and Aleppo (standard gauge). The line from Tripoli to Aleppo, *via* Homs, was re-opened in 1921. A narrow-gauge tramway runs from Mamelfein along the coast. From Damascus there is railway communication with Palestine, and with Transjordan (Kerak) and The Hedjas, *via* Deraa, and the Syrian railways link up with the Baghdad railway at Aleppo. Road communications between Beyrout and Baghdad, *via* Damascus, have been recently developed by the opening up of the desert motor routes. Baghdad is now within 24 hours of Beyrout.

In the Autumn of 1925, following a revolt of the Jebel Druze in the Hauran, rioting took place in Damascus on Oct. 18th, and the city was bombarded by French artillery. It was afterwards reported that the Azin Palace had been destroyed by shell fire, and the Street (called Straight reduced to ruins. Soon after the receipt of news of the disturbances in Syria, the Governor-General (Gen. Sarrail) was recalled by the French cabinet.

Beyrout is the residence of the French High Commissioner and the capital of the Great Lebanon. Damascus was the Federal capital, and has become that of the new Unified State.

The Great Lebanon (the former Turkish provinces of Lebanon and Beirut), declared a State by the High Commissioner, under the title of *État du Grand Liban*, in 1920, extends along the Mediterranean littoral from the Palestine frontier to Nahr el Kebir (15 miles N. of Tripoli) and is bounded on E. by the Great Central Depression, known as the Bekaa, in which flow the rivers Orontes and Litani. Its total length is about 120 miles, and its width varies from 30 to 35 miles. The estimated area of the Great Lebanon is about 4,300 square miles, with an estimated population of 579,778. The products of the soil are olives, wheat, grapes, oranges and mulberry-trees; the live stock are numerous and one of the principal sources of wealth. The Capital is Beyrout (pop. 91,498), which is the chief seaport and commercial centre, and also the administrative capital of Syria. Tripoli is the next important town and seaport. Minor ports are Junieh, Tyre and Sidon. The national flag is the French tricolour with a Cedar of Lebanon on the white band.

Governor of Syria, M. Henri de Jouvenel.
Governor of the Great Lebanon, M. Léon Cayla.

" Pro-Consul, Yusuf Teen.

TAURIDA.

In March 1918 the former government of Taurida declared its independence as the *Taurida Republic*. The area is 13,312 sq. miles, with a population (1914) of 2,000,000, and the Republic

is bounded on the N. by the Dnieper river and the Province of Ekaterinoslav, on the W. and S. by the Black Sea, and on the E. by the Sea of Azov. The soil is very productive, especially in its southern peninsula, known as the *Crimea* (the ancient Tauric Chersonese). The capital is SIMFEROPOL (pop. 1914, 85,000), other towns being Sevastopol (pop. 1914, 62,000), Kertch (pop. 1914, 60,000), Theodosia (pop. 1914, 44,000), Berdiansk (pop. 1914, 41,000), Yalta (pop. 1914, 31,000), Eupatoria, Melitopol, and Perekop.

TURKESTAN.

In Jan. 1918 the former Russian Provinces of Ferghana, Syr-Daria, Amu-Daria, Samarkand and Semirychensk, with a total area of about 420,000 sq. miles and a population of about 7,000,000, declared their independence as the *Republic of Turkestan*. The territories of this Republic extend from the Aral Sea in the W. to the boundaries of the Chinese Republic in the E., and between the River Chu and Lake Balkash on the N., and Khiva, Bokhara and Afghanistan on the S. The capital is TASHKEND (pop. 1914, 275,000), other large centres being Khokhland (pop. 1914, 125,000), Samarkand (pop. 1914, 100,000), Adijan (pop. 1914, 90,000), and Namangan (pop. 1914, 80,000).

The Ottoman Turks are derived from Central Asian tribes, who were converted to the Muhammadan faith in the seventh century. These Muhammadan tribes attacked and conquered the Asiatic Provinces of the Byzantine (Eastern Roman) Empire, and by the middle of the fourteenth century they had spread from Asia Minor into South East Europe. In 1453 they captured Constantinople, and spread over the whole of the Balkan Peninsula, their name of Osmanli, or Ottoman Turks, being derived from Othman, or Osman (1299-1326), a notable Turkish leader in the fourteenth century. Early in the sixteenth century the Ottoman Empire was spread over Egypt and northern Africa, and penetrated northward into Hungary, a great

part of which was incorporated with the Turkish dominions until 1699, when the *Peace of Carlowitz* freed the country from Turkish rule. In the nineteenth century the outlying African dominions, with the exception of Tripoli, broke away from their suzerain, or were occupied by other Powers, and in the latter part of the century the northern states of the Balkan Peninsula asserted their independence, under guarantees of the Christian Powers. The outcome of these political upheavals was a demand for better government in the remaining dominions of the Sultan. During the process of constitutional reforms, which drove the Sultan Abdul Hamid (1876-1908) from the throne, war broke out between Italy and Turkey, and Tripoli and Benghazi were ceded to Italy under the *Treaty of Lausanne* (Oct. 12, 1912). These events were followed in the autumn of 1912 and the early months of 1913 by a disastrous war with the states of the Balkan League (Bulgaria, Montenegro, Serbia and Greece). At the outbreak of hostilities the European dominions of Turkey extended westwards to the Adriatic and northwards to Bosnia-Herzegovina (Austria), thus including the districts known as Macedonia, Thrace, and Albania. By the *Treaty of London* (1913), the north-western boundary of European Turkey was a line drawn from Enos, on the Adriatic coast, to Midia, on the Black Sea, thus excluding Adrianople, which had capitulated (after a long siege) to the Bulgarian forces. At the outbreak of the second Balkan war (in which Serbia and Greece were aided against Bulgaria by Rumania), Turkey re-occupied Adrianople, thus recovering a part of the lost dominions. In the Great War of 1914-1918, Turkey threw in her lot with the Central Powers and made unsuccessful attacks on Egypt and South Russia. Great Britain sent an expedition to Gallipoli (which was withdrawn) and to Mesopotamia and Palestine, which freed those countries and Syria from Turkish rule, while various tribal revolts in Arabia ended the Turkish suzerainty in that peninsula. On Oct. 30, 1918, Turkey surrendered unconditionally before the conquests of the various Anglo-Indian and Imperial British columns and their Arabian allies. The final peace settlement with Turkey was the subject of protracted negotiations. The first definite proposals were embodied in the *Treaty of Sevres*, which was signed on Aug. 10, 1920, but was never ratified. The rise of the Turkish Nationalist movement in Asia Minor, which brought into existence a *de facto* Government at Angora, and the defeat of the Greek armies in August-September, 1922, finally destroyed any possibility of the *Treaty of Sevres* being brought into force.

Treaty of Lausanne.—As a result of the Peace Conference, which met at Lausanne from November, 1922, until February, 1923, and again from April to July, 1923, a treaty was signed there on July 24, 1923. This treaty has been ratified by Turkey and Greece, and came into force as between Great Britain and Turkey on Aug. 6, 1924. The main provisions of the treaty and various instruments annexed to it are that Turkey retains Eastern Thrace, including Adrianople, while ceding Syria, Palestine, Mesopotamia and the rest of Arabia. The northern boundary of Mesopotamia is to be settled by negotiation within nine months, or failing that by reference to the League of Nations. Italy is confirmed in possession of the Dodecanese,

and Greece in possession of the islands formerly held by Turkey in the Aegean, except Imbros and Tenedos. Turkish rights over Egypt, the Sudan and Cyprus come to an end. A special convention demilitarises zones on either side of the Bosphorus and Marmora, and lays down rules for preserving the freedom of the Straits in peace and war. These rules are to be applied under the auspices of the League of Nations by a commission composed of representatives of Turkey, France, Great Britain, Italy, Japan, Bulgaria, Greece, Rumania, Russia, Serbia and, in the event of her accession, the United States. The minorities clauses are the same as in recent European treaties. Turkey cedes ground for military cemeteries at Anzac and elsewhere. The old extraterritorial privileges of foreigners ("Capitulations") are abolished, but a special convention concluded for seven years provides that foreigners residing or trading in Turkey are to be subject to no taxes or disabilities not imposed on Turks. A commercial convention concluded for five years establishes an import and export tariff and lays down that there shall be no discrimination against foreign shipping and trade.

Turkey in Europe (10,000 sq. miles, estimated population 2,000,000) thus consists of Eastern Thrace, including the cities of Constantinople and Adrianople, and is separated from Asia by the Bosphorus at Constantinople and by the *Dardanelles* (Hellespont)—about 40 miles in length, with a width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west.

Turkey in Asia (200,000 sq. miles, estimated population 11,000,000) comprises the whole of Asia Minor, and extends from the Aegean Sea to the western boundaries of Georgia, Erivan and Persia, and from the Black Sea to the Mediterranean, and the northern boundaries of Syria, Arabia and Iraq. This area corresponds approximately with *Anatolia* ("Land of the Rising Sun," or Orient) and includes *Cilicia* round the Gulf of Alexandretta, assigned to France by the Allies, but restored to Turkey by the French. Cilicia is generally fertile and produces wheat, cotton, wool, sesame, &c., and is capable of considerable agricultural development. Alexandretta or Iskanderun, the chief port and an important strategical centre, secures the command of the Beilan Pass. Cilicia was handed over to the Kemalist forces by the French on Jan. 4, 1922. The district is now part of the Turkish Republic, and is under the control of the National Assembly at Angora.

Government.—Sultan Muhammad VI. Vehiduddin fled to Malta on Nov. 20 without, however, abdicating, and the Heir Presumptive, Abdul Mejid Effendi, succeeded, after election by the Grand National Assembly at Angora, without any temporal functions and with the title of Caliph. Abdul Mejid was a direct descendant from Othman, and bore the "sword of Allah" girded upon Sultan Selim in 1517. On October 29, 1923, the Grand National Assembly proclaimed Turkey a republic and elected Ghazi Mustafa Kemal Pasha President of the Republic; on March 3, 1924, the Grand Assembly passed a law abolishing the office of Caliph and ordering the Caliph and the other members of the dynasty to leave Turkish territory. The Caliph and his family, from which for over four centuries the "Commander of the Faithful" had been drawn, were expelled from Turkey on March 4, 1924, and the

remaining members of the dynasty within the next few weeks. The *Grand National Assembly* is a single chamber legislature, which delegates its executive power to ministers acting in its name and responsible to the Assembly for their actions.

Religion.—The religion of the State is by law Muhammadan, and the majority of the inhabitants are Muhammadans, but there are numbers of Christians (of the Latin and Eastern rites) and Jews. Education is nominally compulsory and free. There are primary schools, training schools for teachers, and at Constantinople a university, founded in 1900.

Production.—Although the soil of Asia Minor is generally fertile, agriculture is still very primitive in centres that are not served by railways. The peasant is, however, gradually adapting himself to the more modern methods, particularly in the vilayet of Aidin, Adana, and Messina. Cereals are abundantly produced, as well as tobacco, raisins, figs, cotton, opium, nuts, olives, valonea and liquorice root, and many varieties of fruit are grown. Samsoun is the chief centre of the tobacco growing industry, which is also of importance at Smyrna, Ismidt and Broussa. The export of merchandise was considerable before the War, and consisted principally of opium, tobacco, cotton, carpets, gums, mohair, wool, raisin and figs, and to a less extent, coffee. The forests should be a source of wealth, but scientific exploitation is disregarded; beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple are among the chief varieties of trees. The mulberry is planted for the silk-worm industry, which centres round Broussa and Ismidt. The mineral wealth of Asia Minor is stated to be considerable, but is almost undeveloped. Chrome ore, zinc, manganese, antimony, copper, borax, corundum (emery), coal and lignite, silver, and arsenic are among the minerals produced. The principal manufacture is carpet-weaving. Before the War the total exports were valued at about £125,000,000 annually, and the imports at about £145,000,000 (£111 = £10). In 1913-14 the share of Great Britain in the import trade of Turkey was approximately 20 per cent., in 1923 it had fallen to 17·3 per cent., and for the first half year of 1924 to 17·3 per cent.

Communications.—About 300 miles of railway remain to Turkey in Europe. In Asia Minor there are 1,860 miles, consisting of the Anatolian Railway (645 miles), Baghdad Railway (393 miles), Smyrna-Aidin (376 miles), Smyrna-Cassaba (420 miles), and Mudania-Brussa (26 miles). There are electric trams in Constantinople and Smyrna.

Turkish Finances.—The Budget estimates in their final form for the financial year 1925-26 showed expenditure amounting to £170,245,932 as against revenue estimated at £153,046,854, thus leaving a deficit of £17,199,078. The National Debt of Turkey at the commencement of the financial year 1923-24 amounted to £441,503,196, as against £127,561,342 at the same date in 1913, both amounts being exclusive of the kilometric guarantees for railways and pensions; but the amount stated for 1923-24 is subject to considerable modification, as the final repartition of the pre-war public debt of Turkey will eventually be distributed between Turkey and her detached territories. The *Ottoman Debt* is administered by a Council: Sir Adam Block, K.C.M.G. (Delegate of British and Netherlands Bondholders); M. F.

de Closières (French), M. B. Nogara (Italian), Djavid Bey (Turkish), A. H. Reid (Imperial Ottoman Bank), Imperial Commissary, Zekia Bey; General Manager, M. Grasset. Sir Adam Block and M. de Closières preside alternately.

	1923.
Total Imports.....	£145,000,000
Total Exports.....	85,040,000
Imports from U.K.	£4,213,000
Exports to U.K.	3,158,000

CAPITAL OF TURKEY, ANGORA, the headquarters of the Republican Government, an inland town of Asia Minor, about 200 miles E.S.E. of Constantinople, with a population in 1923 of about 65,000. Angora (or Ancyra) was the capital of the Roman Province of *Galatia Prima*, and a marble temple dedicated to Augustus (now in ruins) contains the *Monumentum (Marmor) Ancyranum*, inscribed with a record of the reign of Augustus Caesar. It is reported that a new city is to be laid out, on the lines of Washington, D.C. **CONSTANTINOPLE**, the former capital, was the Roman city of Byzantium, and was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328, and renamed by him; it became capital of the Eastern Roman Empire, A.D. 364; population estimated at 1,000,000. Other cities are Smyrna (70,000), Broussa (50,000), Scutari in Anatolia (50,000), Caesarea (50,000), Marash (50,000), Sivas or Sebastia (45,000), Adana (45,000), Trebizond (30,000), and Alexandretta (10,000). The population of Asia Minor has been greatly reduced by the exodus of Greeks and Armenians following upon the Turkish capture of Smyrna; the preceding figures are estimates of Oct., 1923.

The smallest Republic in South America, on the east coast of the Rio de la Plata, situate in lat. 30° – 35° S. and long. 53° $25'$ – 57° $42'$ W., containing an area of 72,180 square miles, and a population on Dec. 31, 1923, of 1,662,116.

Uruguay resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century, and 100 years later the Portuguese settlements were captured by the Spaniards. From 1726-1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. On Aug. 25, 1825, through the heroism of the 33 liberators (whose memory is perpetuated in the name of the province of *Treinta y Tres*), the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated, with a Constitution of Sept. 10, 1829. The President is elected by the legislature for a term of 4 years and is ineligible for a consecutive period of office. By an amendment to the Constitution (which came into force March 1, 1919) an administrative council was appointed to share the Executive power with the President.

The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which crosses the Brazilian boundary and extends southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet. The principal river is the *Rio Negro* (with its tributary the Yi), flowing from north-east to south-west into the Rio de la Plata. The boundary river *Uruguay* is navigable from its estuary to Salto, about 200 miles north, and the Negro is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguaron, Santa Lucia, Quequay, and the Cebollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Mirim. The climate is extraordinarily healthy, with great uniformity of temperature, the summer heat being tempered by the breezes of the Atlantic and the geographical position causing a high thermometer in winter.

Wheat, barley, and maize are cultivated. The

wealth of the country is obtained from its pasturage, which supports large herds of horned cattle (8,431,613 in 1924) and sheep (14,443,341 in 1924), the wool of which is of excellent quality. Gold mines exist at Cuñapirú. The exports are entirely animal products, and include frozen and preserved meat, wool, hides, horn, hair, tallow, and jerked beef; the imports are principally machinery, textiles and clothing, food substances and beverages, coal, oil, timber, fuel and blood-stock. The principal imports from the U.K. are woollen and cotton goods, hardware, and coals. There are 1,499 miles of railway open (1925), all in British hands, and three short lines owned by the State; and 4,850 miles of telegraph, with 19,030 miles of telephones. There were 995 post-offices, dealing with 101,638,265 letters and packets. The language spoken is Spanish.

Consulates at Birmingham, Manchester, Cardiff, Glasgow, Hull, Newport, and Southampton.

The most northerly Confederation of South America, situated approximately between $1^{\circ}40'$ S. lat. and $12^{\circ}26'$ N. lat. and $59^{\circ}52'$ — $73^{\circ}15'$ W. long. It consists of 20 States and 2 federal territories. The best authorities calculate the actual present area to be approximately 363,728 square miles. The census of 1920 gave the population as 2,411,952.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia (with which Republic the boundary is in dispute), east by British Guiana, and south by Brazil. Included in the area of the Republic are over 70 islands off the coast, with a total area of about 14,650 square miles, the largest being *Margarita*, which is politically associated with Tortuga, Cubagua and Coche to form the newly constituted State of *Nueva Esparta*. *Margarita* has an area of about 400 square miles.

Venezuela was visited by Columbus in 1498, and in 1499 by Alonso de Ojeda and Amerigo Vespucci, the former naming the Gulf of Maracaibo Venezuela, or "Little Venice" (on account of the Indian pile-built settlements on the coast and shores of the lake), and the name was afterwards extended to the whole of the Orinoco basin. In 1550 the territory was formed into the captaincy-general of Carácas, and the country remained under Spanish rule until the revolt under *Simón Bolívar*, a native of Carácas, who defeated the Spanish forces in the battles of Lagunillas (1813) and Carabobo (1821), and thus secured the independence of the country. Bolívar was an untiring hero in the cause of independence, and through his efforts (and those of his adjutant Sucre) Venezuela, Ecuador and Colombia (Upper Peru) achieved their freedom from Spain, while Peru was enabled to establish its independence in consequence of his victories. He died in 1830, at the age of 47, and his remains were re-interred at Carácas in 1842. Venezuela formed part of the Federal Republic of Colombia from 1822–1830, since which time it has been independent. There have been many revolutions since 1846, particularly in 1849, 1868, 1889, 1891, 1900, and 1908. In 1854 President Monagas liberated the African slaves, and in 1864 President Falcón divided the country into States and formed them into a Federal Republic. The present constitution rests upon the fundamental law of June 13, 1919, under which the government is that of a Federal Republic of twenty autonomous States, a Federal District, and two Territories, with a President elected by the Federal Congress for seven years.

The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Picacho de la Sierra (15,420 feet) and Salado (13,878 feet), the maritime ranges containing the Silla de Carácas (8,531 feet). Near the Brazilian border the Sierras Parima and Pacaraima and on the eastern border the Sierras de Rincoete and de Usupamo enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries: The Sierra Parima contains Yapurana (7,175 feet) and Duida

(8,120 feet), and Para Caima contains Maraguaca (8,228 feet) and Roraima (8,530 feet), the latter being on the Venezuela-Guiana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly llanos, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the *Orinoco*, with innumerable affluents, the main river exceeding 1,500 miles in length from its rise in the north-western mountains of the republic to its outflow in the deltaic region of the north-east. The Orinoco is navigable for large steamers from its mouth for some 700 miles, and by smaller vessels as far as the Maipures Cataract, some 200 miles further up stream. Among the many tributaries of the main stream are the Ventuari, Caura and Caroni from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the *Casiquiare*. The coastal regions of Venezuela are much indented and contain many lagoons and lakes, of which *Maracaibo*, with an area exceeding 7,000 square miles, is the largest lake in South America. Other lakes are Zulía (290 square miles), south-west of Maracaibo, and Valencia (216 square miles), about 1,400 feet above sea level in the Maritime Andes. The llanos also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons.

The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot wet season lasts from April to October, the dry cooler season from November to March.

The principal imports are cotton prints and shirtings and cotton drill, mainly from the U.K., and hardware, principally from the U.S. The principal articles of export are coffee (46,433 metric tons in 1923); cacao (22,420 metric tons in 1923); goatskins, asphalt, sugar, hides, and balata. The U.S. is the principal customer.

Spanish is the language of the country.

Military Attache, Col. G. Ostrovitch, C.C.V.O., C.B.

The area and population of the Kingdom of the Serbs, Croats, and Slovenes are approximately as under:—

Province	Sq. Miles.	Est. Pop.
Serbia	34,500	5,000,000
Montenegro	5,800	500,000
Croatia and Slavonia	16,418	2,700,000
Bosnia and Herzegovina	6,000	800,000
Slovenia	16,233	1,630,000
Herzegovina	3,547	270,000
Dalmatia	2,500	350,000
Syrmia	1,900	350,000
Total	86,878	11,600,000

Montenegro (*Tzerna-Gora*) was formerly a province of the old Serbian Empire. On Nov. 22, 1918, the National Assembly deposed King Nicholas and a decision was made to reunite Montenegro with Serbia. King Nicholas died on March 21, 1921, and the union of the country with Yugo-Slavia is now an accomplished fact. The chief town is Cetinje (pop. 5,000) and the ports are Antivari and Dulcigno.

Old Serbia has no seaboard, but the whole coast of Croatia, Dalmatia and Montenegro is included in the Yugo-Slav Kingdom, and access is thus possible to the Adriatic at any point of the littoral of these territories. By a convention with Greece of May, 1914, similar access is obtained to the port of Salonika, on the Aegean; this convention was renewed in another form in

1923, a free zone in Salonika harbour being thus secured to the S-C-S. Kingdom. In 1922 there were about 6,000 miles of railway in operation. The Danube forms a great commercial highway, the Save and Tisa being also extensively used by river steamers. In January, 1923, a French company secured a contract for an aerial passenger and mail service between Paris and Belgrade. The Army in a peace footing consists of 130,000 men, and the war strength being about 250,000.

The religion of the state is Greek-Orthodox and Roman Catholic. Primary education is free and compulsory, but the attendance is less than 125 per cent. of the young. The State also maintains Secondary and Girls' High Schools. The University is at Belgrade.

The principal industry is agriculture, and the crops of 1922 were of average quality, enabling a considerable surplus of wheat, barley, oats, rye and maize (over 660,000 tons of last named) to be exported. The product of the vines also permitted a surplus to be exported. Of the exports of all kinds in 1922, Italy took 28 per cent. and Austria 23 per cent.

Revenue, 1924-25 Dinar 810,405,000,000
 Expenditure do 10,405,000,000

National Debt (Jan. 1, 1924):—

Serbian Foreign Debt Francs 780,030,000
 S-C-S. Foreign Debt \$65,414,997
 S-C-S. Internal Debt Dinar 629,150,000
 War Debt to France Francs 486,581,250
 War Debt to Gt. Britain... £29,905,120
 Relief Credits £2,387,777
 Total Exports (1924) Dinar 538,774,003
 Total Imports (1924) " 8,221,744,000
 Exports to U.K. (1924) £494,000
 Imports from U.K. (1924) ... £1,122,000

CAPITAL, Belgrade (*Beograd* = White Fortress), at the confluence of the Save and Danube, a modern city, with electric tramways and light, and wide streets; it contains the university, the national museum and library, and the old Turkish citadel; population about 120,000 in 1922. Other towns are Zagreb (Agram) 80,000; Liubliana 60,000; Sarejevo 50,000; Novi Sad 40,000; Split 30,000; Nish 25,000; Cetinje 5,000.

FLAG: Blue, white, red.

BRITISH LEGATION.

(Consulate Union 22, Belgrade).

Envoy Extraordinary and Minister Plenipotentiary to H.M. the King of the Serbs, Croats, and Slovenes, H. W. Kennard, C.M.G., C.V.O. (1925) £3,000
2nd Secretary, G. A. D. Ogilvie-Forbes.
3rd Secretary, R. A. Gallop.
Commercial Secretary, (and Guide), Capt. E. M. Harvey, M.C., O.B.E.
Naval Attache, Commander R. T. Down, D.S.O., R.N.

THE International Institute of Agriculture was originally founded in 1905 as the result of a Convention made between the representatives of 40 different countries. The number of nations subscribing to the Convention has now risen to 71, and not only may the Institute fairly be regarded as, in a sense, the pioneer of official international institutions, but it is in fact to-day the most representative of all. It is estimated that the countries and colonies adhering to the Institute represent 80 per cent. of the territorial area, and over 90 per cent. of the population, of the world.

The following is a complete list of the countries now adhering to the Convention of 1905, and therefore represented at the Institute and contributing to its funds:—

Abyssinia.	Haiti.
Argentina.	Hungary.
Austria.	Italy.
Belgium.	Eritrea.
Belgian Congo.	Cyrenaica.
Brazil.	Italian Somaliland.
Bulgaria	Tripoli.
Chile.	Japan.
China.	Latvia.
Colombia.	Lithuania.
Costa-Rica	Luxembourg
Cuba.	Mexico.
Czechoslovakia.	Netherlands.
Denmark.	Dutch East Indies.
Ecuador.	Nicaragua
Egypt.	Norway.
Estonia.	Panama.
Finland.	Paraguay
France.	Persia.
Algeria.	Peru.
French West Africa.	Poland.
Indo-China.	Portugal.
Madagascar.	Rumania.
Morocco.	Russia.
Tunis.	San Marino.
Germany.	Spain.
Great Britain and	Sweden.
Northern Ireland.	Switzerland.
Australia.	Turkey.
British India.	United States.
Canada.	Hawaii.
Irish Free State.	Philippine Islands
New Zealand.	Porto Rico.
Union of South	Virgin Islands.
Africa.	Uruguay.
Greece.	Yugo-Slavia.
Guatemala.	

The essential objects of the Institute are defined in Article 9 of the original Convention as follows:—

The Institute, confining its activities to the international sphere, shall:—

(a) Collect, examine and publish, with the least possible delay, statistical, technical and economic information with regard to farming, crop and live-stock production, trade in agricultural products and the prices current on the different markets;

(b) Communicate all such information to persons interested as soon as possible;

(c) Indicate the wages paid for farm work;

(d) Record any new diseases of crops which may have appeared in any part of the world, showing the countries affected by such diseases, their progress and, where possible, any effective measures for their control;

(e) Study questions concerning agricultural

co-operation, insurance and credit in all their forms; collect and publish all information that may be useful in the various countries for the organisation of systems of agricultural co-operation, insurance and credit;

(f) Submit, should occasion arise, for the approval of the various Governments, measures for the protection of the common interests of farmers, and for the improvement of their conditions, after the preliminary study of all requisite sources of information, such as resolutions passed by international or other agricultural Congresses and Societies, or by scientific and learned bodies, &c.

All questions affecting the economic interests, the legislation or the administration of any particular State are outside the competence of the Institute.

In accordance with the terms of the Treaty, the Institute has its seat in Rome, and is established in a palace in the Villa Borghese, specially erected through the munificence of H. M. Victor Emmanuel. The Governing Body consists of a Permanent Committee of Delegates, resident in Rome, acting as the executive of a larger body of national representatives, known as the General Assembly, which normally holds biennial meetings at the Institute. The detailed work is distributed between the following offices: (1) the General Secretariat or administrative department, with which is also particularly connected the Section of Agricultural Legislation; (2) the General Statistical Bureau; (3) the Bureau of Agricultural Science; (4) the Bureau of Economic and Social Intelligence.

The life of the Institute as an advisory international institution covers a period during the greater part of which, owing to the almost universal state of war, it was a matter of practical impossibility for definite action to be undertaken for the promotion of international understandings in regard to agricultural questions, such action being among the chief duties of the Institute. It has, however, exercised considerable influence upon the organisation of agricultural statistics in the various countries, and has taken the initiative in promoting international conferences on plant diseases, olive-fly and locust control, and agricultural meteorology, which have resulted either in the drafting of conventions, or the establishment of permanent organisations.

As occasion demands, the Institute collaborates with the League of Nations and the International Labour Office, and sent experts in 1922 on equal terms with those bodies to the Economic Congress at Genoa. A joint Standing Committee, including three representatives of the Governing Body of the International Labour Office, and three representatives of the Permanent Committee of the Institute, with power to invite expert members from either institution and others to attend meetings, was established in 1922. The Institute is also taking steps to extend its relations with non-official international institutions dealing with agricultural questions, and is represented at the most important international agricultural congresses.

The general diffusion of information on agricultural questions is mainly carried out by means of periodical publications, issued in English and French and, in some cases, also in Spanish, Italian and German.

The Institute publishes two Year-Books, the *International Year-Book of Agricultural*

802 International Institute of Agriculture—Nobel Prizes, 1907–1925.

Statistics and the International Year-Book of Agricultural Legislation, a monthly bulletin entitled the *International Crop Report and Agricultural Statistics*, and two quarterly reviews, the *International Review of the Science and Practice of Agriculture* and the *International Review of Agricultural Economics*. These periodical publications are from time to time supplemented by monographs based on special research or specially acquired information.

The Library of the Institute, which contains nearly 100,000 volumes and pamphlets, and 70,000 unbound volumes of periodicals from all parts of the world, offers quite unusual facilities for the study of agricultural problems, and may be freely consulted by all properly ac-

credited persons. Some 3,500 periodicals are regularly received by the Institute Library.

Among special features in the work of the current year (1925) may be mentioned the initiation of a scheme for a World Agricultural Census, which it is hoped may take place in 1930–31, and the preparation for a World Forestry Congress to be held at the Institute in May, 1926, immediately before the eighth meeting of the General Assembly.

President: His Exc. Prof. G. De Michelis, Delegate of Italy.

Vice-President: M. Louis-Dop, Delegate of France.

British Delegate: Sir Thomas Elliott, Bt., K.C.B.

United States Delegate: Prof. Asher Hobson.

General Secretary: Prof. Carlo Dragoni.

THE NOBEL PRIZES, 1907–1925.

THE Nobel Prizes are awarded from the income of a fund bequeathed to trustees for distribution to those who have contributed most largely to the common good, and is divided into five shares, which are devoted to workers in the domains of (a) Physics, (b) Chemistry, (c) Medicine or Physiology, (d) Literature, and (e) the Preservation of Peace. The testator was the Swedish scientist Alfred Nobel, the inventor of dynamite, who died December 10, 1896, leaving a fortune of about £1,750,000. The first awards were distributed on the fifth anniversary of Nobel's death, Dec. 10, 1901 (for awards before those recorded below see former issues of

WHITAKER). The awarding authorities are the Swedish Academy of Science—(a) Physics, (b) Chemistry; the Stockholm Faculty of Medicine—(c) Medicine or Physiology; the Swedish Academy of Literature—(d) Literature; and a committee of five persons elected by the Norwegian Storting—(e) Peace. The fund is managed by a Board of Directors elected by fifteen deputies appointed by the authorities above named. The Swedish Government appoints a President of the Board of Directors. Particulars concerning conditions, &c., can be obtained from Styrelsen för Nobelstiftelsen, Styrelse, Norrlandsgatan 6, Stockholm, Sweden.

LIST OF AWARDS (Value about £6,500 each).

Year	(a) PHYSICS	(b) CHEMISTRY	(c) MEDICINE OR PHYSIOLOGY	(d) LITERATURE	(e) PEACE
1907	A. A. Michelson	E. Buchner	A. Laveran	R. Kipling	(E. T. Moneta. L. Renault.
1908	G. Lippman	E. Rutherford	{ P. Ehrlich E. Metchnikoff }	R. Eucken	(K. P. Arnoldson. F. Bajer.
1909	{ G. Marconi F. Braun }	W. Ostwald	T. Kocher	Selma Lagerlof	(Bn. de Constant. M. Beernaert.
1910	{ J. D. van der Waals }	O. Wallach	A. Kossel	P. Heyse	(Berne Intl. Peace Bureau.
1911	W. Wien	Marie Curie	A. Gullstrand	M. Maeterlinck	(T. M. C. Asser. A. H. Fried.
1912	G. Dalén	{ V. Grignard P. Sabatier }	A. Carrel	G. Hauptmann	Elihu Root.
1913	{ H. Kamerlingh Onnes }	A. Werner	C. Richet	{ Rabindranath Tagore }	H. La Fontaine.
1914	M. von Laue	Th. W. Richards	R. Barany	No award	No award.
1915	{ W. H. Bragg W. L. Bragg }	R. Willstätter	No award	Romain Rolland	No award.
1916	No award	No award	No award	{ V. von Heiden- stam }	No award.
1917	Ch. G. Barkla	No award	No award	{ K. Gjellerup H. Pontoppidan }	Comité Interna- tional de la Croix Rouge.
1918	M. Planck	E. Haber	No award	No award	No award.
1919	J. Stark	No award	J. Bordet	C. Spitteler	Woodrow Wilson.
1920	Ch. E. Guillaume	W. Nernst	A. Krogh	Knut Hamsun	Léon Bourgeois.
1921	Albert Einstein	F. Soddy	No award	Anatole France	(K. H. Branting. Chr. L. Lange.
1922	Niels Bohr	F. W. Aston	{ A. V. Hill O. Meyerhof }	J. Benavente	F. Nansen
1923	R. A. Millikan	F. Pregl	{ F. G. Banting J. J. R. Macleod }	W. B. Yeats.	No award.
1924	Reserved	Reserved	W. Einthoven	W. Reymont,	Reserved.
1925	The decisions regarding the Nobel Prizes 1925 will be taken later in 1926.				

AFFORESTATION.

THE Forestry Act of 1919, under which the Forestry Commission was established, was passed with the following objects:—(1) to increase the supplies of home grown timber in view of the anxiety and waste caused by reliance on imported timber during the war; (2) to provide a reserve against the time when the exhaustion of the virgin forests of the world begins to be acutely felt; (3) to secure the increased employment and increased production which follow the conversion of waste land or poor pasture into forest. The area actually planted by the Commission in the five years, 1919-1924, was 39,469 acres, of which 37,790 acres were planted with conifers and 1,679 acres with hardwoods. A part only of this area can be deemed to have been "afforested." The Commissioners had to decide whether they would confine their efforts to the afforestation of new areas, or include the planting of felled woodlands. They decided to include the latter where there was no hope of their being replanted otherwise; 27,817 acres have, in fact, been afforested, and 11,652 acres, acquired in a derelict condition, replanted. The proportion of hardwoods has fallen short of the area which the Commissioners desired to plant. Grants made to public bodies and private individuals have resulted in the planting (or preparation, with undertaking to plant) of 42,082 acres. The total area planted under the auspices of the Commission was thus 81,551 acres.

The area of plantable land acquired is 141,470 acres, of which approximately 100,000 acres represents an addition to the existing forest area, the remainder being felled or devastated woodlands. It has been the policy of the Commissioners to restrict acquisitions so far as possible to land of little value for any other purpose. Considerable areas of such land have been obtained—in some cases almost derelict but suitable for timber growing—in Norfolk, Suffolk, Surrey, Dorset, Hampshire, and in Scotland. The average cost of plantable land acquired by purchase in the years 1919-1924 was approximately £3 8s. per acre. This includes (a) the cost of any unplantable land inseparable from the plantable; (b) buildings which in many cases the Commissioners have been able to adapt to their purposes, thus saving considerable expenditure, and (c) in some cases the value of the standing timber. Excluding these items, the planting land itself has probably not cost more than £1 15s. 4d. per acre on the average. The cost of land acquired by lease and feu is approximately 2s. 3d. per acre.

In addition to the Crown lands, there are now 34 planting centres in process of planting in England and Wales, and 28 in Scotland. The largest continuous stretch of planting land which has been acquired is in the Thetford district of East Anglia. Here a forest of 20,000 acres is in the making, and is thus comparable in size with the New Forest. The actual work of planting, weeding and beating up, including the cost of plants, preparation and fencing, but not overhead charges, is stated by the Commissioners to cost now on an average about £7 10s. an acre.

AMUNDSEN'S FLIGHT.

THE heroic story of Arctic exploration has been further enriched by the remarkable attempt

of Captain Amundsen during the past year to reach the North Pole by sea-plane. On May 21, two planes carrying Amundsen and his five comrades started from Spitzbergen on their 700 mile flight to the Pole, which it was estimated might be reached in eight hours. After covering over 600 miles in this time, however, the machines were compelled to descend, partly for the purpose of getting their bearings, on a water lane cutting through the ice, no more suitable landing place being available. Observations during the flight northwards had shown an area of about 100,000 square kilometres, reaching to about 88° 30 degrees north, without any indication of land, and the explorers came to the conclusion that it is improbable that any land is likely to be found further north on this side of the Norwegian Arctic Ocean. In view of the impossibility of landing at the Pole with an opportunity to take observations and soundings, it was decided to lay a return course further east in order to cross hitherto undiscovered tracts. But very shortly the planes were frozen in, and for the following 24 days the explorers had to work, in the face of tremendous difficulties, to get one of the planes clear. Eventually one plane was freed, and on June 14 an unsuccessful attempt to start was made. All stores and equipment which could be discarded were then thrown overboard, and another start tried. This, too, was a failure owing to the state of the snow and the absence of wind. The following day—June 15—had been fixed earlier as the latest day on which the explorers must decide whether or not they were to give up the idea of trying to escape by air, and instead, to attempt to return on foot. Happily the last desperate effort to get the plane under way was successful, and a course was set for North Cape, North East Land. This point was reached after an exciting flight, partly through fog, in 8½ hours. Owing to the fog, the area observed on the return journey amounted to only 60,000 square kilometres. Altogether the expedition observed a total of 10,000 square kilometres of hitherto unexplored area. Although the main object of the great enterprise was not achieved, the practicability of carrying out polar exploration work from the air has been proved, and further aerial expeditions will doubtless, in the near future, add to our knowledge of the unexplored polar regions.

BRITISH LEGION.

THE Fourth Annual Conference of the British Legion opened on May 31, 1925, at Queen's Hall, London, at which Earl Haig, Earl Jellicoe and Prince Arthur of Connaught addressed nearly 500 delegates from branches all over the country. The British Legion now possesses a Royal Charter, and has organised two British Legions in Ireland. During the past year the net gain has been 103 new branches, whilst in the women's section 102 new branches have been opened. The Poppy Day Collection of the anniversary of the Armistice, 1924, resulted in £347,403 gross, an increase of £83,000 on the previous year. A tubercular settlement at Maidstone, Kent, was taken over in April, 1925, for the treatment of ex-service men. A training scheme exists for preparing ex-service men and their families for overseas settlement. Unfortunately, a large number of ex-service men are still numbered among the almost permanently unemployed.

The British Legion was represented at the Rome Conference of the F.I.D.A.C.—the International Ex-Service Men's Organisation—in September. (See also paragraph headed F.I.D.A.C.)

BROADCASTING.

CONSIDERABLE further developments have taken place in the broadcasting service during the past year, and it is claimed that since the opening of the new high-power station at Daventry, 85 per cent. of the population of the British Isles can receive broadcasting on a crystal set. The number of receiving licences issued has continued to increase, and it was stated by the Postmaster-General that the approximate number in force on April 30, 1925, was 1,356,000. As regards the programmes, the aim of the Broadcasting Company has been to maintain a high level, and it has been contended by some critics that the standard of musical entertainments which have been broadcast has been rather too high for the majority of listeners. Improvements have been made in transmission, an important contributing factor being the improvements in the design and arrangement of the transmitting studios. It is probable that the programmes will be strengthened as the result of an agreement reached between the Broadcasting Company and associations representing the entertainment industry. The agreement provides, *inter alia*, that excerpts from stage performances, not exceeding 20 per annum, may be broadcast, the duration of these excerpts not normally to exceed 30 minutes. No objection will in future be made to theatrical artists being employed for broadcasting. Unfortunately no agreement had been reached at the time of going to press between the Broadcasting Company and the concert industry, and until such an agreement is arrived at many eminent concert artists will be unable to give listeners the pleasure of hearing them by wireless. The use of broadcasting as an auxiliary to education has now passed the experimental stage, and the transmissions of lectures to schools throughout the country will doubtless be considerably increased in the near future. Further progress is likely in the direction of the provision of adequate alternative programmes for all listeners, and in the international development of broadcasting. A new international receiving station has been erected at Hayes, in Kent, and it is possible that early in 1926 arrangements will have been completed which will enable British listeners to hear some of the best Continental and American programmes. The series of tests carried out by the International Wireless Bureau at Geneva in the autumn of 1925 should result in a more satisfactory distribution of wave-lengths for broadcasting stations throughout Europe, and this will be an important step towards the regular interchange of European programmes. The agreement between the Post Office and the Broadcasting Company, which forms the basis of the existing broadcasting service, expires on December 31, 1926, and in August last the Postmaster-General announced that a committee had been formed "to advise as to the proper scope of the broadcasting service and as to the management, control and finance thereof after the expiry of the existing licence on December 31, 1926." He added that the committee would indicate what changes in the law, if any, were desirable in the interests of broadcasting service.

The members of the committee are:—The Earl of Crawford and Balcarres (chairman), Lord Rayleigh, Lord Blanesburgh, the Right Hon. Ian Macpherson, M.P., The Right Hon. W. Graham, M.P., Sir Thomas Royden, Dame Meriel Talbot, Sir Henry Hadow, Captain Ian Fraser, M.P., and Mr. Rudyard Kipling.

THE CHURCH CONGRESS.

SEVERAL problems of general importance were considered by the Church Congress, which met at Eastbourne during October, the proceedings providing a proof that the Church of England is fully alive to issues which are vital to the Nation, as well as to those affecting the ecclesiastical world. The President, the Bishop of Winchester, led the way in his opening address, when he examined the present-day unrest and its causes and condemned Communism, and the Archbishop of Canterbury sounded the same note in a striking sermon in which he urged the Ministry to equip itself more carefully in order to meet the demands of an educated public. The average Church of England sermons, the Primate declared, had not kept pace with educational advances. The average preaching of to-day was less thoughtful, less painstaking, than it was in their fathers' days, and they needed more midnight oil, or forenoon hours, with closed doors, steady, if miscellaneous study, and big notebooks.

The question of racial equality aroused one of the most interesting discussions of the Congress. Lord Willingdon, a former Governor of Bombay and Madras, said it resolved itself very largely into consideration of the future relations of white and coloured races, and he expressed his conviction that the white races must realise the necessity of treating all coloured men in a spirit of absolute equality and abandon the attitude of colour superiority. Similar advice was given by Mr. J. H. Oldham, the missionary, who declared that many Moslems were turning to Bolshevism for the sole reason that they felt that the Bolsheviks treated them as equals, while the Western Nations did not. Among the other problems dealt with by the Congress were education, discipline in modern life, the League of Nations, and the industrial situation.

CO-OPERATIVE MOVEMENT.

THE 57th Annual Congress of the Co-operative Societies of the U.K. was held at Southport on June 1-3, 1925. Whilst the Co-operative Union is a federation of approximately 1,300 societies, with a shareholding membership of 4,500,000, practically all of whom are purchasing members also, only 559 societies were represented at the Congress. The delegates taking part numbered 1,709 under the chairmanship of Mr. W. E. Dudley, a director of the C.W.S.

In development, the greatest step of the year has been the establishment of an agricultural department in the Co-operative Union. Politically, the Co-operative Movement desires to maintain its freedom, but with so many of the Labour Leaders being co-operators there is a distinct touch of Labour Party policy in Co-operative politics. The Congress passed a resolution to instruct the parliamentary party to make definite arrangements with the Labour Party, that constituencies at the next election shall be divided between Co-operative and Labour candidates, and so obviate internecine contests.

Though the vast bulk of the members are employees, the Co-operative Societies cannot be considered as good employers. Only sixty societies have superannuation schemes for employees, and an appeal was made for an extension in this direction at the Congress. Every employee must be a member of the trade union for his industry. Machinery is being established to settle labour disputes amongst employees of the societies; certainly a conciliation scheme was necessary, as 10,000 employees of the retail societies in the North were on strike for five days, at the end of March, on the wages question.

It is noteworthy that during the mining crisis of August, when the nation was face to face with a general strike, consequent upon trade unionists threatening to withdraw all labour where the use of coal or substitute for coal was involved, mention was made that the labour leaders looked to the Co-operative Societies to take over the provision and distribution of food and other essentials to the men on strike. Though the idea of national catering was accepted in the form of not publicly declining the offer, it is only too obvious that the task would have been beyond the societies, and that one section of the population could not be served whilst the other starved.

Belfast has been chosen for the 1926 Congress, May 24-27.

CO-PARTNERSHIP.

No definite progress can be reported in Co-partnership. Notwithstanding the endeavours of certain politicians as well as organisations of employers to popularise schemes of co-partnership, or profit-sharing in industry, there is very little response from the employees. The Trades Union Congress in September, 1925, at Scarborough, condemned co-partnership in a composite resolution against capitalism, the card vote figures being 2,456,000 to 1,218,000. With the labour leaders antagonistic in most part against co-partnership, it is not to be wondered at that schemes fail to materialise.

It is understood that altogether 493 profit-sharing schemes had been begun since statistics have been collected or co-partnership has existed. Of these only 236 were still in operation at the end of 1924. For the 174 schemes in respect to which details are available the average bonus paid to employees was £8 3s. 2d. for the year, or the equivalent of an addition of 4.9 per cent. on the earnings for the year.

The total employees of the 225 establishments with 236 schemes was returned as 340,000, of whom one-half were entitled to participate in the profit-sharing. The engineering and metal trades showed the largest number with 57,000 employees, but the profit division was in the reverse ratio; that only approximately 6d. weekly per head as profit was divided might be expected from the general slump in the industry. The electricity, gas and water supply companies had 40,000 work-people in the schemes, and they averaged 3s. weekly in profit-sharing. High division of profits was shown in the returns of four financial houses employing 24,633 men and women who averaged a yearly bonus of £12 os. 9d. whilst the merchants and retail traders could furnish particulars of an average addition to wages of 9.8 per cent. in the nineteen small schemes covering 5,042 work-people. In the five agricultural schemes two failed to pay a bonus.

F.I.D.A.C.

THE Sixth Annual Conference of the Inter-Allied Federation of Ex-Service Men (*Federation Inter-Alliée des Anciens Combattants*) was held at Rome, September 7-14, 1925, with Commander Rossi, of Italy, in the chair. The United Kingdom, Belgium, Czechoslovakia, France, Italy, Poland, Serbia, and the U.S.A. were represented; two women delegates from each country were admitted for the first time. Resolutions were passed pledging the Federation to employ all efforts to prevent the outbreak of a new war, that the Communist propaganda had become an international danger, asking for more pressure upon the former enemy countries for the settlement of their debts to the Allies, dealing with the employment of ex-Service men and so forth. The Boy Scout movement came in for especial praise on the part of the delegates, and they hoped with the aid of the extension of that movement to secure the peace of Europe and the world.

THE FOOD COUNCIL.

ONE of the first acts of Mr. Baldwin's Government was to set up a Royal Commission on Food Prices, with Sir Auckland Geddes as chairman, to inquire into the conditions prevailing in the wholesale and retail trades in articles of food of general consumption so far as they affected prices. After an investigation extending over several months, the Commission recommended the establishment of a permanent Food Council of twelve members, of whom two men and two women were to represent the consumer, to maintain a continuous supervision over the staple food trades, with powers to report to Parliament any firm or association acting against the public interest. The Commission also advised the compulsory registration of retail butchers by the local authorities and recommended the Food Council to watch closely future developments in connection with the import of meat from the Argentine. The view was expressed that the time had come to equip some body with power to deal with monopolies, trusts and combines.

The Council was set up in July under the chairmanship of Lord Bradbury, and appointed an executive committee to be more or less in permanent session. The price of bread was first dealt with, and after investigating the matter the Council invited representative bakers to discuss with them the question of an immediate reduction. Within a few weeks the quarter loaf was reduced one halfpenny to 9d., owing, as the bakers claimed, to the fall in the price of flour; but the Council declared that this was not enough. Subsequently they invited bakers who were selling under that price to communicate with them so that the consumers could be informed, and immediately the general price was reduced to 9d. The Council also considered the price of milk and short weight and measure.

HOUSING.

THE housing shortage still remains a very serious question, in spite of the number of houses which have been built since the war by local authorities and private builders, and it is clear that the requirements of the country for houses will not be overtaken for many years. Indeed, the financial year ended March 31, 1925, was the first year since the war when the houses built covered not only the number required for the

normal increase in the population but made some inroad on the war deficiency. The yearly totals of new houses completed since the war by local authorities and private enterprise are as follows:—1920, 15,811; 1921, 86,669; 1922, 102,298; 1923, 80,816; 1924, 121,679; 1925 (first six months), 60,982; total, 1920 to June 30, 1925, 468,255. An interesting chart was prepared by the Garden Cities and Town Planning Association in September last, based on official figures, showing the numbers of houses built under the Addison Acts of 1919, the Chamberlain Act of 1923, and the Wheatley Act of 1924. The total houses built under these Acts, by local authorities and private enterprise, and by unassisted private enterprise, are as follows:—

1919 Act by local authorities	172,794
1919 Act by private builders	39,186
Unassisted private enterprise—	
Rated at not more than £26	117,587
Rated at over £26	42,979
1923 Act by assisted private enterprise	65,484
1923 Act by local authorities	23,943
1924 Act by local authorities	6,282

468,255

During the past year there has been much discussion and research work in connection with the possibility of finding suitable new building materials and new methods of house construction, by means of which the rate of building could be improved to a greater extent than is possible with the standard brick construction which has hitherto been used. Up to the present, however, no very fruitful results have been forthcoming. In particular, attention has been directed to a new type of house faced externally with steel sheeting, and demonstration houses of various types employing this and other new materials, and built on new lines, have been erected by many local authorities to enable the public to make comparisons of their merits. The general position with regard to housing made an extension of rent control imperative, and the Rent and Mortgage Interest (Restrictions Continuation) Act, 1925, was passed to extend the period of absolute control until December 25, 1927, in England, and May 28, 1928, in Scotland, and to extend the provisions of Part II. of the Act of 1923, relating to the protection of sitting tenants, for a further five years.

LABOUR PARTY.

THE 25th Annual Conference of the Labour Party was held at Liverpool, September 28—October 2, with Mr. C. T. Cramp, N.U.R., in the chair. Practically all trade unions taking part in the Trade Union Congress were represented, plus delegates from local Labour and national Socialist societies. The resolution that "No member of the Communist Party shall be eligible to become a member of any affiliated local Labour Party or be entitled to remain a member" was carried by 2,870,000 votes to 321,000. A further recommendation that trade unions should refrain from nominating or electing delegates who were known members of non-affiliated political parties, including Communists, was also carried by 2,632,000 to 480,000. These votes were equivalent to the total exclusion of Communists within the Labour Party.

A resolution for the State ownership and control of banks and credit was carried unanimously, but an amendment to refrain from

compensating stock holders beyond £5,000 each was lost. The capital levy took a secondary place in the financial discussions. The "Chancellor" in the Labour "Shadow Cabinet" was so cautious in his explanation that it seemed as if a free and unfettered hand was demanded in financial affairs.

FOUR GROUP ALLIANCE.

At the Transport Workers Conference, Sept., 1921, Mr. A. Gosling outlined a programme of an alliance that would lead to one trade union for all. The Triple Alliance died with the "Black Friday" fiasco of 1921. At the meeting of the Miners' Federation Executive Meeting of Feb. 25, 1925, Mr. Cook, Gen. Sec., reported correspondence with the trade unions of railwaymen, engineers and transport workers on the subject of an alliance. Meetings between representatives of miners and other unions separately, were held in March, to discuss the project, and on June 4 a private delegate conference was held. Nine unions were represented from mining, transport, railway, engineering and shipbuilding organisations. The forward step was taken of calling for two representatives from each group to concentrate on the project. On July 21, a draft constitution of the new Industrial, or Four Group, Alliance was made public.

The objects were defined in clause 1 as, *inter alia*, "mutual support . . . in defending the hours of labour and wage standards, and securing advancement of the standard of living, or to take action to secure acceptance of, or to defend, any principle of industrial character which may be deemed vital . . ." Apparently the constitution went considerably further than many of the individual constitutions of the unions concerned. The members were presumed to be discussing the proposals through the next three months, whilst in September the Transport Workers' Union put into action a ballot of members on the scheme. In August, invitations were extended also to the Electrical Trades and the Iron and Steel Trades Confederation to link up with the proposed Alliance. The committee responsible for the Constitution met on Sept. 1 and admitted the receipt of a number of proposals for amendment. Apparently the National Union of Railwaymen are fundamentally antagonistic, for it seems that they cannot accept the Constitution until every effort has been exhausted to obtain unity amongst the three railway trade unions—an almost impossibility in view of the constant friction between the N.U.R. and the Associated Society of Locomotive Engineers and Firemen.

GENERAL FEDERATION OF TRADE UNIONS.

MR. F. W. BIRCHENOUGH (Cotton Spinners and Twisters) presided at the 26th Annual Congress of the General Federation of Trade Unions at Blackpool on July 10, 1925. He asked trade unionists to realise the ideal of the founders—"a federation of all trade unions within the British Isles to combat the huge combinations of employers' organisations, giving each union local authority and action with the knowledge at all times it had the backing of all other unions." An amendment proposing the class war to the address in favour of peaceful negotiations was defeated by an overwhelming majority.

The annual report issued by the Secretary (Mr. W. A. Appleton) showed a decline in membership as represented by the aggregates of the federated societies. The 1925 total was 830,316 compared with 920,050 of 1924 and 1,583,058 of 1922. The present (1925) total is less than any year since 1911. Excuses given for the decline were poverty of trade unions, amalgamations of trade unions, and the falling off of membership of individual organisations.

INDEPENDENT LABOUR PARTY.

PRIOR to the opening of the 33rd Annual Conference of the Independent Labour Party at Gloucester on April 12, 1925, the National Council issued a report in which it was claimed that the number of branches had grown in the past year from 772 to 1,028 with an accompanying increase of 10,000 in membership. Mr. C. Allen's presidential speech outlined the plan of a concentrated attack for "a universal living wage dictated by the needs of a civil existence and not dependent upon the varying fortunes of each industry." As each industry failed to produce the ever increasing needs, so it would be taken over by the State to be scientifically organised. The banks would be transferred with the control of credit to the nation and the import of all food and raw materials would devolve upon the Government.

The delegates passed unanimously a resolution proclaiming capitalism as a failure and socialism as a remedy, whilst by 386 votes to 210 liberty of action was given to M.P.s on credits for the fighting Services. Other resolutions passed included abolition of capital punishment, evacuation of Egypt by British, a new constitution for India leading to self-government in a co-operative commonwealth, and usual items of socialist nature.

A Glasgow Conference of the Independent Labour Party was held Jan. 11-12 by delegates of the Scottish Party, when proposals were passed in favour of a maximum 40-hour week, trade union amalgamations, factory and workshop committees, raising school leaving age to 15, and state purchase and control of food imports. A special Conference was called for March 1 to consider an industrial policy for the Clyde areas. A permanent committee was appointed to bring forward a scheme to educate the public towards nationalisation of the key industries. The Welsh Independent Labour Party at Newport, on May 31, decided in conference against the establishment of Labour Groups within the Independent Labour Party, on the ground that such would lead to the disappearance of the Independent Labour Party within the Labour Party.

During the early months of 1925, the Independent Labour Party had the use of the Strand Theatre, London, on Sunday evenings for propaganda, whilst in August a Summer School was held at Dunmow when long consideration was given to the various aspects of socialism.

MINORITY MOVEMENT.

THE Minority Movement is really the Communist or Soviet Party at work in the U.K. If not directly organised from Moscow, there is no question that the aims of the Minority Movement are to all intents and purposes the same as those of the Russian Soviets, whilst there is constant touch between them. A Conference of

the National Minority Movement was attended at Battersea on January 25, 1925, by 600 delegates, said to represent 38 trade unions, with Mr. T. Mann in the chair. On March 15, a Minority Movement of the Transport Workers had a national conference in London. The 14th Congress of the All-Russian Communist Party was held at Moscow on April 27 and the following days, when in connexion with the gatherings the *Pravda* published statistics showing the strength of the Communist Party in the U.K. was only 45,000. The Annual Congress of the Communist Party of Great Britain was held at Glasgow on May 29-30 when 400 delegates were present. A further National Minority Movement Congress took place at Battersea, August 29-30, with Mr. T. Mann in the chair; 600 delegates, including 137 from the provinces, were present. A two-day Scottish Congress of the Communists under the presidency of Mr. W. Gallacher was promoted in Glasgow Sept. 6-7. The one object of the meetings was the attack upon the ordinary leaders of the Trade Unions and the Labour Party, who were accused of not pushing forward the class war. The Labour Party decided to exclude all Communists after the Conference at Liverpool in October, 1925.

SOCIALIST INTERNATIONAL.

THE second Congress of the Labour and Socialist International, that was constituted at Hamburg in 1923, was held at Marseilles under the presidency of Mr. A. Henderson, M.P., on August 22-27. The secretariat report referred to a "fight against war," and the establishment of "basis towards peace." This organisation is antagonistic to the International that has its centre in Moscow—the report characterised the latter as "Bolshevist groups... moving continually towards fresh division and disruption, and for the most part irrevocably towards ultimate dissolution." Considerable difference of opinion was revealed in the discussions on current politics—a position not remarkable in view of the fact that the Conference contained as members at least fifty socialists who had been at some time members of a Cabinet. On actual socialist policy, it was accepted that the day of active revolution was postponed *sine die*, and that the hope of change rested in gradual transition from the present order to the new.

TRADES UNION CONGRESS.

THE Fifty-seventh annual Trades Union Congress was held at Scarborough, under the presidency of Mr. A. B. Swales, on September 7-12, 1925, when 726 delegates had been nominated to attend, to represent 172 trade unions with a total membership of 4,342,982. The advance on last year's figures was 2 delegates and 14,747 unionists. Permission was given to the General Council to obtain more suitable headquarters and to develop publicity and research departments. But a proposal to give more powers to the General Council on the question of a levy and ordering of a strike of an organisation affiliated to one engaged in a trade dispute was referred back for further discussion. Drastic amendments in Unemployment Insurance with real control in the hands of the trade unions met with unanimous approval. Unions were instructed to remove any sex bar and to obtain equal pay for similar work done by the sexes. A policy of amalgamation of trade unions leading up to the ideal of the one big union was carried

by 2,138,000 to 1,787,000, whilst the amendment against the merging of all into the one union was defeated by 2,073,000 to 1,667,000.

A declaration in favour of the organisation of the trade unions with the Labour Parties for the overthrow of capitalism, opposition to all co-partnership, with the urging of strong workshop committees, went through by 2,456,000 to 1,218,000. A long resolution that might be styled anti-Imperialism was carried by 3,082,000 to 79,000. A proposal that National Agreements entered into through the Joint Industrial Councils should be made legally binding as are the awards under the Trade Boards Act was accepted by 2,799,000 to 900,000. The usual string of resolutions proposing all kinds of reforms came under nominal discussion and were accepted.

During 1925 the General Council of the Trades Union Congress attempted to make political capital from unemployment. Unemployed Sunday was celebrated in London and thirty other towns on June 21, under the leadership of the Trades Union Congress. On July 24 a special meeting of the representatives of the unions federated to the Trades Union Congress was held at Westminster, and resolutions were carried unanimously upon unemployment questions. Opportunity was taken at the meeting for the miners' secretary to prepare other trade union leaders for the coal crisis that came a week later.

On April 6 the General Council of the Trades Union Congress received a visit in London from Soviet leaders for discussion "of the ways and means of removing the difficulties in the way of the affiliation of the Russian trade unions to the Amsterdam International Federation of Trade Unions." The result of the conversations was seen from the issue on September 23, on a manifesto from the Joint Advisory Council set up from the meetings in April, in which the closing words were: "Appeals to the workers of every country, to their organisations and leaders, to join their efforts with the British and Russian trade union movements, in order to secure the removal of all obstacles and difficulties in the way of national and international working-class unity, and to help them to bring into existence one all-inclusive world-wide federation of trade unions."

The General Council of the Trades Union Congress was engaged constantly throughout the year in trying to settle trade disputes.

LABOUR UNREST.

EMPLOYERS have followed a policy of asking for greater production at lower costs in order to compete with foreign trade. The answer from the trade unions has been no reduction in wages and no increase in hours, with an agitation in favour of higher rates and shorter working days. Competition with foreign countries is to be maintained—in the view of the Labour Leaders—by increase of costs of manufacture abroad, consequent upon the workpeople concerned obtaining a higher standard of remuneration and easier working conditions.

Coal has occupied the stage with its peculiar controversy, behind which is the one demand for State ownership of the mines. Details of the coal struggle and unrest in other important trades are found under separate headings. With few exceptions, the strikes have been small or of very short duration, and all of them could

have been obviated if a reasonable sense of compromise had entered into preliminary discussions. The actual numbers concerned in the strikes of the year are given below.

NEW DISPUTES.

	Disputes.	Workpeople involved (in '000's).	Days lost (in '000's).
1923.....	628	343	10,672
1924.....	692	556	8,312
Jan. 1925	35	12	67
Feb.	44	13	85
Mar.	55	44	161
April	44	25	122
May	47	27	202
June	48	34	281
July	45	51	732
Aug.	39	218	2,813
Sept.	36	41	410

COAL.

THE year 1923 was second only in prosperity to that of 1913 in the mining industry, but the boom was short-lived as it was based upon the dislocation of the Ruhr coalfield. The year 1924 began with an unemployed percentage of only 2 per cent.: as months passed depression set in, and in October the percentage had gone up to 10.3 to fall by December to 7.9. The highest number employed in the mines was reached in May, 1924, with 1,193,668; five months later the figure was 58,288 less. On August 24, 1925, the Labour Exchanges reported the percentage unemployed in the coal mining industry as 22.2. Depression consequent upon loss of foreign trade is undoubtedly responsible for the present trouble, though it must be understood the leaders of the discontent have the single aim of mines nationalisation. On June 30, 1925, the Mining Association gave notice of one month to the Miners' Federation to terminate wages agreement of June, 1924, that had taken the place of the agreement of 1921. A new wages scheme was submitted by the Association, and almost summarily rejected by a National Delegate Federation Meeting on July 3. Cabinet Ministers saw representatives of each side, and on July 13 the Prime Minister announced to the House of Commons he had set up a Court of Inquiry under the Industrial Courts Act. The Court issued its report on July 28. It summed up with the conclusion "The present crisis . . . has arisen in the main from without and is due to causes not within the control of either party. These causes are to be found in the operation of national and international disturbances We venture to think that in taking common counsel together the parties are most likely to find a means of averting its worst consequences." Efforts had been renewed in the meantime to bring the two sides together. The Premier saw them separately, but no agreement was made. Negotiations lasted for the next two days, when Mr. Baldwin announced that work would be continued on the terms of the old agreement with a subsidy, if necessary, from the Imperial Exchequer to make up losses, and he would appoint a Royal Commission to investigate the whole question of the mines. What probably effected the settlement on the part of the Ministry was the threat of the transport and railway workers to refrain from handling any coal or coal substitute from the moment the coal strike began. This was tantamount to a hold-up or general strike on the eve of the

holidays, and it was only too obvious that a general strike under any pretence would be a national calamity.

Apart from this main agitation, there has been the usual minor difficulty of odd day strikes from various local causes. A South Wales anthracite district had strikes lasting from June 22 to August 24, with at the conclusion 20,000 unemployed over the dismissal of a certain worker. The mine at which the dispute began remained closed—the discharged men were to be absorbed where possible at other local mines.

RAILWAYS.

WAGES have dominated the outlook amongst railwaymen during 1925. Definite programmes were produced on Feb. 3 by the delegates from the National Union of Railwaymen and the Railway Clerks' Association in their interview with the General Managers of the Companies. In response to the appeal for an all-round increase, the reply was forthcoming of a proposed decrease ranging up to 6s. weekly. Five days later, the N.U.R. decided to place the position before the Central Wages Board. On Feb. 16, the Locomotive Enginemmen and Firemen saw the General Managers, when similar reduction proposals were put forward. Trouble arose because the men in the craft unions became the shuttlecock again on the question of the union to which they should belong, i.e., of their trade or of the railway. On June 25, an unofficial conference was held at St. Pancras between trade union leaders and company representatives, when the financial position of the railways was confidentially discussed. A further meeting was held at St. Pancras on July 28, when the informal negotiations ended with rejection of terms by the men.

The Annual Conference of the N.U.R. was held at Southport on July 6-10, when the President (Alderman W. Dobbie, of York) gave the impression that there could be no acceptance of wage reductions. Resolutions were passed in favour of railway nationalisation, non-contributory pensions, and consolidation of the various forces of labour. A proposal to make the minimum unemployment relief by the Government 30s. weekly was negatived by 48 to 18.

The N.U.R. does not appear to be kindly disposed towards the proposed Industrial Alliance of the big unions. But it was party to the arrangement not to handle any coal had the mines ceased working during the crisis of August. What prevents a common policy on the part of the railwaymen is the difficulty of a combined movement. The various unions, railway and other, concerned with the railway employees fail to agree amongst themselves into what unions the various grades shall belong.

After months of discussion, the wages question was due to come before the Central Board in October, and falling agreement then would be referred to the National Wages Board that meets in public. The leaders realise that financial conditions of the railways demand many economies, but to suggest any reduction of employment or remuneration would naturally not find acceptance with the union members.

TEXTILE TRADES.

WAGES agreement terminated on May 31, 1925, but work continued under the old terms pending negotiations. The employers wished to reduce

the cost of living bonus by 5 per cent., and notices were posted accordingly at the factories. Leaders gave unionists instructions to cease work by July 23. Ministry of Labour intervened on July 20, but owing to the introduction of an application by a section of the workers for a 5 per cent. increase, who were not covered by the local Industrial Council, that body could not immediately function. The strike lasted until August 15, when after the personal mediation of the Minister for Labour both employers and employees agreed to resuming at the old conditions, ending the investigation by a Court to be set up by the Minister. The strike lasted three weeks with Bradford as the centre of the disturbance, and approximately 165,000 workpeople were unemployed during that period.

TRANSPORT WORKERS.

WITH the exception of minor vehicle workers disputes, 1925 has been a very peaceful year for the transport workers and dockers. The first biennial Conference of the Transport and General Workers' Union was held at Scarborough July 20-24, with Mr. Gosling in the chair, when nearly 300 delegates were in attendance. Full support was guaranteed the miners in the dispute then in progress, and delegates were ordered to be ready to carry out what discipline was imposed upon them by the T.U.C. to suspend work in certain sections. The Conference was much concerned with the high rate of accidents sustained by transport workers, and passed a resolution asking for more safeguards, greater compensation allowances, and a revision of the present Workmen's Compensation Acts.

Whilst the seamen are regarded usually for grouping purposes amongst transport workers, it must be understood their organisations are quite distinct. The Amalgamated Marine Workers' Union (a minority movement) refused to countenance the agreement for lower wages accepted by the National Sailors and Firemen's Union (the older and majority movement), and were successful by means of a partial strike in holding up certain steamers in home and overseas ports during August-October.

THE LABOUR VISIT TO RUSSIA.

ALTHOUGH members of the British trade union delegation to Russia delivered eulogistic speeches upon the conditions of that country while they were within its frontiers, the special report of their visit was couched in much less enthusiastic terms. They found that government in Russia was "a dictatorship of the proletariat under the direction of the Communist Party." Democracy, as understood elsewhere, they decided, had no place in it, and they expressed the view that this amounted to a denial in principle of individual liberty as hitherto understood. "In practice," said the report, "there is a complete control, not only of the Press, the platform and the political machinery, but of the schools, universities and Army."

The conclusions of the delegation were that the Union of Socialist Soviet Republics was a strong and stable State; that its government was based on a system of State Socialism that had the active support of a large majority of the workers and the acceptance of an equally large majority of the peasants; that the machinery of government seemed to work well and was doing work in which other older state systems had

failed; and that the whole constituted a new departure of the greatest interest that was well worth foreign study and a new development that might be greatly benefited by foreign assistance.

The report contained many illuminating admissions. No attack on the Communist Party in the Press is permitted; there is immorality among children; divorce can be obtained at once by mutual consent; family life is being destroyed; there is heavy unemployment; there is a strong propaganda against religion. But the balancing of the Budget within a few years was foreshadowed and it was claimed that wages were increasing more rapidly than production.

LAND REGISTRATION.

THE jubilee year of the Land Registry—1924-5—was the most successful in the history of the department from every point of view. The report of the Chief Land Registrar shows that the volume of work during the year greatly exceeded all previous records; the financial surplus, after paying all expenses, is the largest the department has had; the increased volume of work was handled with fewer errors, even of a clerical nature, at increased speed, while the service was improved in many important respects. The effect of the Land Registration (Consolidation) Bill introduced during 1925 will, if passed, be to give new life and vigour to the department, not only by making such amendments in the present Acts as the experience of a generation and an enquiry by Royal Commission have found to be necessary, but also by extending the statutory powers of a registered proprietor to the full gamut of dealings permitted to landowners by the general law. The report points out that the jubilee year has also been marked by the first petition of a County Borough to the Privy Council for an Order in Council making registration of title compulsory in its area. It may well be that this will prove the turning point in popular favour towards registration of title after a half-century test between that system and the system of conveyancing by deeds. However that may be, it is evident from the unprecedented number of enquiries regarding registration of titles received by the department during the year 1924-5 from public authorities, companies and societies, as well as from private individuals, throughout England, that public attention is turning in an increasing degree towards the system. There are now more than 289,000 separate titles on the register of the estimated aggregate value of about £300,000,000. With these there have been over 745,000 dealings of the estimated aggregate value of about £586,000,000. The following table shows the gradual increase in the total volume of registrations during the last four years, and the great increase in the business of the Registry since the last complete year before the war:—

Year.	First Registrations.	Dealings with Registered land.	Total.
1913-4	7,147	23,884	31,031
1920-1	13,760	54,903	68,663
1921-2	11,225	46,612	57,837
1922-3	10,503	55,449	65,952
1923-4	10,100	60,923	71,023
1924-5	10,335	67,496	77,831

In the County of London, where registration is compulsory, about two-thirds of the total area has now been registered. One of the most remarkable features of the past year's work of the department was the great increase in the number of absolute and good leasehold titles, the total being 8,360 compared with 6,267 in 1923-4. The figures for previous years were:—1923-4, 5,906; 1921-2, 5,964; 1920-1, 6,149; 1913-4, 2,827.

THE L.C.C.'s MOTTO.

THE London County Council is still without a motto for its coat of arms, although during the year it adopted one, only to upset the decision a week later. For some time search has been made for an appropriate inscription, and after many suggestions had been considered the General Purposes Committee of the Council recommended *Loco Dulcedo Nos Attinet*. Many Councillors, however, disliked the idea of a Latin motto, despite the example of the City of London (*Domine Dirige Nos*), and the Committee were invited to discover something in English. They failed, and finally proposed that there should be no motto. This suggestion also met with opposition, and an amendment that the simple word "London" should be placed beneath the coat of arms was brought forward and adopted, though only by a small majority.

The College of Arms then intervened and declared that "London" was not a motto that could be entertained. At the next meeting of the Council, a motion was brought forward to rescind the former resolution. The members were fairly evenly divided on the subject, but, again by a small majority, the rescission was carried. For the time being, therefore, the Council possesses a coat of arms but no motto, and the subject has been allowed to drop until someone comes forward with an acceptable suggestion.

MONOMARKS.

A SYSTEM which should prove valuable to the British trading community and provide a link between the manufacturer and the consumer and at the same time be of service to the private individual was launched during the year under the name of Monomarks. The basis of the system is the registration at headquarters of a series of symbols, consisting either of alphabetical characters or numerals or a combination of both. No monomark will be duplicated so that the combination of symbols is the exclusive property of the person or company who registers it, and it thus forms a permanent address. It can therefore be written on an envelope with the addition of "London, W.C. 1," arrangements being made for the prompt re-distribution of all communications so directed to a Monomark. Every group of symbols will be preceded by one of two prefixes, either B.M., standing for British Monomark and applicable to private individuals, or B.C.M., standing for British Commercial Monomark. Monomarks of other countries will have varying prefixes to denote the country of issue. In the case of Commercial Monomarks it is claimed that potential buyers in far countries and at home, who hitherto had no knowledge of the name of the makers of various goods, can address enquiries and orders to the Monomark, and it is hoped that the demand for many classes of manufactures will thus be increased. The holder of a Monomark is entitled to place the particular

set of symbols assigned to him upon his wares or to use it as a consignor's mark on packing cases and parcels. The private person who secures a Monomark, can use it for all his personal property, thus going some way towards ensuring its return in case of loss. The symbols upon linen will afford immediate identification of the wearer in case of accident or loss of memory; they could be used as a laundry mark, could be placed upon articles to be sent away to be cleaned, or upon motor cars and valuable property, as a means of identification in case of theft. They could also be used as a *nom de plume*, or as a box number, and thus communication could be established by the owner of the Monomark, without his name or address being known.

O.M.S.

A NON-POLITICAL and non-party organisation has been established under the title of "Organisation for the Maintenance of Supplies" in time of big trade disputes, or at other times when the ordinary means of distribution appear to be breaking down. The lesson of the coal crisis was too evident. Though Governments have appointed a Minister as a Civil Commissioner to keep organised the machinery for such distribution, it was apparent in July and August that the nucleus would be far from sufficient should the general strike be declared. As a means of protection in the event of a repetition of the threat of stoppage the O.M.S. was established, and it has quite an unofficial nature at the moment. Lord Hardinge of Penshurst is President, whilst the Council consists mainly of retired naval and military commanders who have been accustomed to organisation and discipline on a huge scale. Registers are open for names of volunteers, and separate though allied organisations are being established in all centres. The Labour Organisations place their faith in the Co-operative Movement for supplies for trade unionists during a big strike.

PLAYING FIELDS.

THE shortage of open spaces and recreation grounds throughout the country generally, which has tended to become more serious year by year, has at last led to the establishment of an influential national body pledged to direct its efforts to remedy the deficiency. Under the presidency of the Duke of Sutherland, a meeting was held in June last at the Royal United Services Institution of representatives of local authorities and various sporting societies, at which resolutions were passed establishing a National Playing Fields Association and adopting a provisional constitution. This was followed in July by an enthusiastic meeting at the Albert Hall which was attended by the Duke and Duchess of York and many members of Parliament and representatives of local authorities in all parts of the country, as well as representatives of athletic associations and welfare societies, members of the teaching profession and organisations such as Boy Scouts, Girl Guides, Boys' Brigades, Church Lads' Brigades, and other kindred organisations. Sir Arthur Crosfield, Chairman of the Provisional Committee of the Association, stated that their aim was to link up the efforts that had been made and were being made by organisations concerned with education, public health, social and industrial welfare, or with the provision and preservation

of open spaces and areas for recreation. It was hoped in the near future to cover the whole country with a network of county branches, each of which while working in close collaboration with the central organisation would be the responsible body in its own community. The following resolution, proposed by the Duke of Sutherland and seconded by the Duke of York, who promised to accept the presidency of the Association, was carried with enthusiasm:—"That this meeting, recognising the vital importance of playing fields to the physical, moral and mental welfare of the youth of the country, deplors the widespread and increasing shortage of recreation grounds, and urges all local authorities, sports governing bodies, societies and members of the public interested in the matter to co-operate with the National Playing Fields Association, in order that, by their united efforts, the deficiency may be met. That this meeting pledges itself to support the efforts of the National Playing Fields Association to promote and encourage the provision of adequate facilities for open-air recreation in and around every city, town, and village in the country."

PUBLIC SERVICE VEHICLES.

IMPORTANT recommendations which are likely to form the basis of legislation are contained in an Interim Report of the Departmental Committee on the Licensing and Regulation of Public Service Vehicles issued during the past year. The Committee, who were appointed in 1922, have not yet finished their work, as they have yet to deal with the special constructional details of the smaller public service vehicles, such as motor cabs. The interim report deals with vehicles seating upwards of eight persons, including the driver. The special problems presented by the area of the Metropolitan and City districts also remain to be considered by the Committee. In carrying out their task the Committee have had for their three main objects the safety of the public, their convenience and the adequacy of the services provided for them. They point out that the essential requisites for any scheme of control are that no vehicle should be employed in the public service without first obtaining the proper licence from the proper authority, and that conditions should attach to such a licence to secure the observance of any regulations that may be deemed desirable. Unfortunately a number of private Acts of Parliament have conferred scattered and disconnected powers for dealing with public service vehicles on certain local authorities. In the opinion of the Committee all such local powers as may be in conflict with the scheme of control propounded in the report should be abrogated. At present while licensing powers are vested in the councils of all municipal boroughs and urban districts, many councils do not exercise these powers. Rural district councils, with a few exceptions, have no powers of licensing at all, nor have county councils any powers. By far the greater part of the rural areas, and in practice some part of the urban areas are not covered at all. In order to cover every part of the country the committee recommend that all county and county borough councils, together with the councils of non-county boroughs and urban districts which had a population at the last census of 20,000 and upwards, and of rural districts with a similar population which already

possess licensing powers, should be established as licensing authorities. As regards licensing procedure, the committee recommend that the licence should be issued by the licensing authority for the district in which the vehicle is usually garaged or stationed and from which it usually operates. It is suggested that the validity of all licences should be determined at a definite date in each year. In connection with the construction of public service vehicles the committee recommend that the Minister of Transport should issue an order dealing with the subject comprehensively and applicable to all public service vehicles throughout the country. Suggested constructional requirements are set out in detail in the report, the chief of which are as follows:—The maximum length of the vehicle measured from the dumb irons should not exceed 26 feet; the total weight laden and complete for service should not exceed 9 tons, or the weight on one axle $5\frac{1}{2}$ tons; the overall width should not exceed 7 feet 6 inches; there should be at least two independent brakes, the application of either of which should be capable of causing the two rear wheels to be held so effectually as to prevent the wheels from revolving, or have the same effect in stopping the vehicle as if the wheels were so held. Suitable and approved appliances for extinguishing fire should be carried in such a position as to be readily available for use.

RATING REFORMS.

FAR-REACHING changes in the existing system of rating and valuation of property for rating purposes in England and Wales are proposed in a Government Bill introduced during the past year. A draft Bill had been circulated by the Government in the autumn of 1923 to local authorities and institutions and associations specially interested in rating matters, and following criticisms and suggestions from these bodies the draft Bill underwent considerable alteration before its introduction in the House of Commons. The main objects underlying the proposals, as stated by the Minister of Health, were the simplification and improvement of the administrative machinery of rating and valuation and the removal of various anomalies inherent in the present system; the substitution of a single valuation in the place of the separate valuations at present required for purposes of rating and taxation; and the promotion of uniformity of valuation as a condition precedent to any comprehensive review of the system of local taxation and Exchequer Grants. Economies would be effected by avoiding (a) the duplication of work and the unnecessary expense occasioned by the separate valuations for purposes of rates and taxes; (b) the maintenance of a separate rating authority for each of the 14,427 parishes in England and Wales; (c) the levy of separate rates in urban areas (usually by separate staffs); (d) the obsolete multiplication of funds and accounts; and (e) the valuation of each parochial section of railway and other undertakings as a separate entity.

Much opposition was shown to the proposals when the Bill was considered by the Standing Committee of the House of Commons, and many amendments were made. The provisions in the Bill which are concerned with the abolition of parochial rating and the consolidation of rates met with general approval, but the clauses which deal with valuation practice and procedure were

considerably altered. The principle of uniformity throughout the country was not strictly adhered to, and as the Bill emerged from the Standing Committee London is excluded from the main provisions relating to valuation procedure and will continue, at least for a time, to make its valuation lists under the Valuation (Metropolis) Act of 1869, subject to certain modifications. The principle of one valuation for both rating and taxation purposes was dropped, and the clauses of the Bill which proposed that wide powers should be given to the officers of the Inland Revenue in connexion with the making of the valuation lists were withdrawn, as the result of the large volume of criticism directed against them. The proposals relating to the valuation of railways and other special properties extending into more than one rating area were also withdrawn by the Government, who intend to reintroduce them in the form of another Bill during 1926. On an amendment dealing with the valuation of Crown property the Government was defeated, and all Crown property is now proposed to be rated in the same way as other property. The important provisions of the Bill relating to valuation areas, the constitution of assessment committees, the quinquennial revision of the valuation lists throughout the country, the method of ascertaining the rateable values of properties, &c., were retained. At the time of going to press the Third Reading of the Bill had not been reached.

SAFEGUARDING BRITISH INDUSTRIES.

ABANDONING the original intention to introduce a bill for the safeguarding of British industries from unfair foreign competition, the Government during the year put into operation a scheme which made legislation unnecessary until investigation had shown that the imposition of an import duty would counterveil the unfair competition. Under this machinery, the Board of Trade was given power to appoint a committee to investigate any complaint by an industry of substantial importance which made out a *prima facie* case for an inquiry, and the committee was directed to report whether foreign goods of the class to which the application related were being imported into and retained for consumption in the United Kingdom in abnormal quantities; whether the foreign goods so imported were being sold or offered for sale at prices below those at which similar goods could be profitably manufactured or produced in the United Kingdom; whether employment was likely to be seriously affected by this competition; and whether such exceptional competition came largely from countries where the conditions were so different from those in this country as to render the competition unfair.

If the committee considered that a claim to a duty had been made out, and if the Board of Trade and the Treasury both concurred in their recommendation, the proposed duty was to be inserted in the Finance Bill, to be imposed for a limited period. One such recommendation was made and approved in time for incorporation in last year's Finance Bill, which imposed a duty of 33 per cent. upon imported lace and embroidery. In all nine inquiries were held during the year, the others concerning superphosphates, gas mantles, leather and fabric gloves,

wrapping and packing paper, aluminium hollow ware, brooms and brushes, cutlery, and worsted tissues.

ST. PAUL'S AND WATERLOO BRIDGE.

SERIOUS concern was displayed during last year over the condition of two of London's most famous structures—St. Paul's Cathedral and Waterloo Bridge. In each case operations of an extensive nature had to be carried out. In regard to Wren's masterpiece the work of preservation had already been in progress for some years, when a City Corporation district surveyor served a notice upon the Dean and Chapter under the Dangerous Structures Clause of the Building Act, calling for the immediate carrying out of certain work connected with the piers supporting the dome.

An appeal for £140,000 was made by the authorities, and *The Times* promptly opened a fund which in eight months reached a total of a quarter of a million. The City Corporation referred the question to a special committee, who recommended the suspension of the Dangerous Structure notice, provided the work of consolidating the piers by grouting and encircling the drums of the dome with metal hooping was proceeded with expeditiously. A portion of the Cathedral was closed to the public, and after the work had been in progress for some months it was announced that the actual task of cementation had gone forward satisfactorily, and that no settlement or other disruptive movement in the dome area was taking place.

The future of Waterloo Bridge remained undecided at the close of the year. When the discovery was first made that the piers had settled, the bridge was closed to vehicular traffic and only re-opened on condition that a slow rate of progress was taken. A temporary bridge was erected to the east and this was used for south-bound traffic, leaving the original structure for north-bound vehicles. The London County Council, in the endeavour to retain the old bridge, sought the advice of Sir Edwin Lutyens, but he could offer no solution and considered that rebuilding would eventually be necessary.

SAVINGS CERTIFICATES.

THE first War Savings Certificates were issued in Feb., 1916, and the ten years period of maturity therefore expires early this year. A committee was appointed last year to consider methods of dealing with these certificates in order that holders might, if they desired, leave the accrued value in the possession of the State. The Government adopted a recommendation of this committee that all War Savings Certificates of this issue—those purchased between Feb., 1916, and March 31, 1922, when the price of the National Savings Certificates, which took their place, was raised from 15s. 6d. to 16s.—may be retained irrespective of the date of purchase, until March 31, 1932, thus completing a period of ten years after the purchase of the final certificates of that issue.

Certificates so held, it was arranged, will, after the expiration of the tenth year from the date of purchase, increase in value until March 31, 1932, at the rate of interest of one penny a month for each certificate originally costing 15s. 6d. Holders of these certificates who desire to take advantage of this decision need take no

action before March 31, 1932, all existing privileges, including repayment at any time at the holder's option, continuing after prolongation at the end of Oct., 1925. The number of National Savings Certificates sold, totalled 747,329,871.

UNDESIRABLE ALIENS.

Admission, supervision and deportation of aliens.—Under the Aliens Order, 1920, any alien coming from outside the United Kingdom must obtain the leave of an Immigration Officer to land in the United Kingdom, and such leave is refused in many cases, e.g., where the alien is without means, or (if he is seeking employment) is unable to produce a Permit issued by the Minister of Labour. Provision is also made (Article 6 of the Order) for the registration of resident aliens and (Article 12) for the deportation of aliens by order of the Secretary of State, which can be made on various grounds. The Aliens Order, 1920, was made under the Aliens Restriction Act, 1914, as amended and extended by the Aliens Restriction (Amendment) Act, 1919.

UNEMPLOYMENT INSURANCE.

The Acts governing the administration of the Unemployment Insurance Scheme expire in June of 1926, and in readiness for new legislation, various enquiries were set up by the Government in order that the new Bill, which would be necessary, might not only consolidate the expiring measures, but embody amendments found to be desirable in view of the experience of the past few years. One of the most important of these investigations was carried out by a committee appointed late in the year by the Minister of Labour "to consider in the light of experience gained in the working of the Unemployment Insurance Scheme what changes in the scheme, if any, ought to be made." Lord Blanesburgh agreed to act as chairman of this committee, among the members of which were representatives of capital and labour, finance and local government, including Miss Margaret Bondfield, Mr. Frank Hodges, and Viscountess Milner.

From the wide terms of reference it was anticipated that the intention of this committee was to review the whole system of unemployment insurance contributions, benefits, administration, and moral and industrial effects. Its appointment had been promised by the Government, owing to the statements that there had been widespread abuse of the system and that many individuals preferred "living on the dole" to "looking for work." Another committee was charged with the task of examining whether the dole was proving a deterrent to emigration.

WAGES.

EXPECTATIONS mentioned in the 1924 WHITAKER of a stable Cost of Living Index Figure of 70 have not been quite realised, and the continuous fall experienced during 1922 from 92 to 78, with the lowest figures in 1923 and 1924 being 69, has been followed by a slight rebound. In 1924 June was the lowest month, after which a gradual rise was experienced. The official figures for the wages changes of the year are as follows. In all industries the employers are asking for a reduction in costs as the only hope of reviving trade.

Month (1st day).	Cost of Living Index Figure above July 1924.	Workpeople concerned. (in 000's).	Net weekly Incidence in Wages (in 000's £).
Year 1923	Varied between 78 and 69	4,225	- 309
" 1924	Varied between 81 and 69		
Jan., 1925	80	3,479	+ 549
Feb.	79	1,086	+ 55
Mar.	79	1,350	+ 40
April	75	450	approx.

June	73	536	+ 13
July	72	790	+ 13
Aug.	73	800	+ 41
Sept.	74	379	- 54
Oct.	76	74	—

The hours of labour have remained practically the same throughout the year. Only two reductions of any note were reported. Bristol builders obtained a slight reduction of working hours during the winter of 1924-25, and in July provincial wholesale newsagents' employees obtained decrease of 1 hour weekly to 47 hours for day-workers and 43 for nightworkers.

WEST HAM'S RELIEF SCALE.

For several months the West Ham Board of Guardians were at war with the Minister of Health as a result of the high scale of out relief granted in the borough and the refusal of Mr. Neville Chamberlain to lend money to the Board unless the scale were reduced. The Guardians had been allowing 9s. 6d. per head for man and wife, 5s. for each child, rent up to 75s., and coal in winter months up to 2s. 3d., with a maximum allowance of 59s. per family. They declined both to increase the rate of 9s. in the £1 and to decrease the maximum relief from 59s. as requested by the Goschen Committee, and rejected the terms upon which the Ministry agreed to sanction a loan.

On September 2, there was a deficit of £149,000 against which only £126,000 was due in rates. The Guardians owed the Ministry £1,540,000, and had almost exhausted an overdraft of £300,000 at the bank. Relief was being given to some 70,000 at the rate of £200,000 a month. The Ministry had lent £50,000 following an application for £350,000 but refused to loan the remainder unless the maximum relief were reduced to 55s. and again the Labour majority on the Board declined to do this. Later in the month the Clerk reported that there were no funds for the payment of salaries and wages, and a further interview with Mr. Chamberlain was obtained but his new offer was rejected.

The deadlock continued until Mr. Chamberlain in October announced his decision to assume direct control of the administration of relief in the borough, following a temporary arrangement under which the payment of accounts for the supply of relief in kind had been guaranteed by the Ministry. The Guardians met to consider this new situation and "regretfully" accepted the Minister's conditions for the granting of a further loan of £350,000, to follow one of £300,000. The terms included a review of cases in which relief had continued over a long period, a reduction of the relief given to adults by a further 6d. per head per week, and a reduction of the maximum of relief to any family to 55s. per week.

WORLD PEACE.

THE famous Protocol which was adopted by the Fifth Assembly of the League of Nations in the autumn of 1924 provided that if sufficient ratifications were received from the States who are members of the League a Disarmament Conference should be held in June, 1925, and the Council of the League should make various preparations for such a conference. In March last, Mr. Austen Chamberlain, on behalf of the Government, made it clear that there was no prospect of Great Britain or any of the Dominions ratifying the Protocol; and as only one ratification had been received—from Czechoslovakia—the Council of the League decided to postpone preparations for the Disarmament Conference and to place before the Sixth Assembly the whole of the communications received relating to the Protocol. Following the shelving of the Protocol, the suggestion of a Guarantee Pact between some of the Western European powers was revived. In connexion with the traffic in arms, a League of Nations Conference, which sat during the summer with the object of finding means by which control and publicity of the international traffic in arms could be secured, was successful in drafting a far-reaching Convention which cannot fail to have most beneficial effects if it is ratified by sufficient States to bring it into force. The Convention, which was signed by the representatives of 18 States, divides arms, ammunition, &c., into 5 categories and will come into force as soon as it has been ratified by 14 States.

THE SECURITY PACT.

UNIVERSALLY regarded as a noteworthy step towards European Peace, the Treaty of Mutual Guarantee, known generally as the Security Pact, was initiated at Locarno on October 16 by delegates of Germany, Belgium, France, Great Britain and Italy. The central feature of the Pact was the guaranteeing of the inviolability of the frontiers between Germany and Belgium and Germany and France. In effect the three countries, under British guarantee, bound themselves not to make war upon each other, and thus removed the principal menace to peace. In this great achievement, Great Britain, through its Foreign Minister, Mr. Austen Chamberlain, played a leading part, as it had done in rejecting the proposed Geneva Protocol of 1924.

The Treaty provides that Great Britain and Italy will come to the support of Germany, France or Belgium if any one of those three countries is attacked by either of the others. An allegation that such an attack has been made is to be reported at once to the Council of the League of Nations, and if the Council holds that such an attack has been made the guarantee is to come into immediate operation. It is laid down that the Treaty will not come into force until Germany enters the League of Nations, and that it shall remain in force until the League Council decides that the League itself ensures sufficient protection to the countries. Other differences between the contracting parties are to go either before law tribunals or conciliation commissions, or, if the decisions of the latter prove unacceptable, before the League Council. The Protocol of the Conference contained an undertaking on behalf of the five countries to give their sincere co-operation to the work relating to disarmament and to seek a realisation of that work in a general agreement.

WELSH SOVEREIGNS AND PRINCES,

WALES was ruled by Sovereign Princes from the "earliest times" until the death of Llewellyn in 1282. The first English Prince of Wales was the son of Edward I., and was born in Carnarvon town on April 25, 1284. According to a discredited legend, he was presented to the Welsh chieftains as their Prince, in fulfilment of a promise that they should have a Prince who "could not speak a word of English" and should be native born. This son, who afterwards became Edward II., was created "Prince of Wales and Earl of Chester" at the famous Lincoln Parliament on February 7, 1301. The present Prince was installed in Carnarvon Castle on July 13, 1911.

Totals		84,589 ...	497,741,215

The totals for 1921-22, when the whole of Ireland was included, were 89,662 individuals and £559,565,417. In 1922-23 the returns apply to Great Britain and Northern Ireland only.

TITHE RENT CHARGE.

THE Tithe Rent Charge is normally based on the septennial average price of wheat, barley, and oats, the basic price per imperial quarter being taken at 56s. 2d. for wheat, 31s. 8d. for barley, and 22s. for oats, but has been fixed until Jan. 1, 1926, by the Tithe Act (1918) at £109 3s. 11d.

ROYAL SOCIETY MEDALS.

THE King has approved of the following awards for 1925 by the President and Council of the Royal Society:—

A Royal medal to Professor W. H. Perkin for his work on the constitution of the alkaloids.

A Royal medal to Professor A. C. Seward for his researches on the palaeobotany of Gondwanaland.

The following awards have also been made by the President and Council:—

The Copley medal to Professor A. Einstein, a foreign member, for his theory of relativity and his contributions to the quantum theory.

The Davy medal to Sir James Irvine for his work on the constitution of the sugars.

The Sylvester medal to Professor A. N. Whitehead for his research on the foundations of mathematics.

The Hughes medal to F. E. Smith for his determination of fundamental electrical units and for researches in technical electricity.

The following is a list of those recommended for election to the Council at the anniversary meeting on November 30, 1925.

President, Sir Ernest Rutherford. *Treasurer*, Sir David Prain. *Secretaries*, J. H. Jeans and Dr. H. H. Dale. *Foreign Secretary*, Sir Richard Glazebrook. *Other Members of the Council*, Professor J. H. Ashworth, Professor L. Bairstow, Professor F. O. Bower, Professor S. Chapman, Sir Dugald Clerk, Professor E. G. Donnon, Professor E. J. Garwood, Professor J. P. Hill, Professor J. B. Leathes, Professor J. C. G. Ledingham, Sir Thomas Lewis, Professor F. A. Lindemann, Sir Robert Robertson, Sir Charles Sherrington, Dr. G. C. Simpson, and W. C. D. Whetham.

In Rye Russia not included until 1924 (not known).

In Maize, Barley and Oats, Russia not included until 1924.

**WORLD'S IMPORTS AND EXPORTS
OF WHEAT, 1924.**

PRINCIPAL IMPORTERS.

Wheat.

Country.	Imports in Millions of Qrs. of 480lb. (year 1924).
U.K.	29,000,000
Italy	10,000,000
France	6,000,000
Belgium	6,000,000
Japan	3,000,000
Germany	3,000,000
Holland	3,000,000
Greece	2,000,000

Wheat Flour.

Country.	Imports in Millions of Sacks of 280lb. (year 1924).
U.K.	5,000,000
Germany	4,000,000
Czechoslovakia	3,000,000
Austria	2,000,000
Egypt	2,000,000

PRINCIPAL EXPORTERS.

Wheat.

Country.	Exports in Millions of Qrs. of 480lb. (year 1924).
Canada	26,000,000
Argentina	20,000,000
U.S.A.	19,000,000
Australia	7,400,000
India	4,000,000

Wheat Flour.

Country.	Exports in Millions of Sacks of 280lb. (year 1924).
U.S.A.	11,000,000
Canada	8,000,000
Australia	3,000,000
Hungary	2,000,000
Argentina	1,000,000

UNITED KINGDOM IMPORTS, 1924.

The Board of Trade returns show the following Import (quantities in hundredweights, and values in £ sterling) of Wheat, Wheatmeal and Flour in 1924, the countries from which the supplies were sent being shown in *italics*.

Wheat	cwt. 117,420,522	£69,003,960
U.S.A.	30,320,517	18,165,714
Canada	38,769,136	23,316,420
Australia	10,871,056	6,251,291
Argentina	24,021,841	13,196,831
Wheatmeal & Flour	cwt. 11,045,853	£8,325,334
U.S.A.	3,607,992	2,630,891
Canada	5,245,845	4,003,613
Australia	1,628,906	1,165,248

HALL MARKS ON PLATE.*

Assay Office Marks.—The official marks stamped on gold and silver plate at Assay Offices are distinguished as under:—

<i>Assay Office ...</i>	<i>Distinguishing Mark.</i>
London (Goldsmiths' Hall)	Leopard's Head (crowned, until 1823).
Birmingham...	Anchor (square frame for gold; pointed shield for silver).
Chester	City Arms (3 Garbs and a Sword).
Sheffield	Crown.
Edinburgh.....	Castle.
Glasgow	Tree, Fish & Bell.
Dublin	Harp crowned.

In addition to the above, there have been Assay Offices at Bristol, Exeter, Newcastle-upon-Tyne, Norwich and York, all of which have long been closed.

Makers' Mark (instituted in 1363).—This is impressed by the maker, and consists of initial letter (or letters) indicating the Surname (or Christian and Surname) of the maker.

Date Mark.—The year in which the article is marked at the Assay Office is indicated by a letter on a shield, the *type of letter* and the *shape of the shield* being changed in cycles of 20, 25 or 26 years. In 20-year cycles (London, invariably, Chester, alternately with 25, and Sheffield, alternately with 25), the letters J, V, W, X, Y, Z are omitted; in 25-year cycles (Birmingham, Edinburgh and Dublin, and alternately at Chester and Sheffield) the letter "j" is omitted from the alphabet; at Glasgow all the letters are employed in a 26-year cycle.

The Sovereign's Mark.—The "lion passant" introduced in the reign of Edward I. (1300) for silver articles only.

The Sovereign's Head.—The portrait of the reigning Sovereign was impressed on all plate chargeable to duty assayed from 1784—1889-90. The duty on plate was removed in 1890, and the Sovereign's head does not appear on plate assayed before 1784 or after 1890.

The Crown.—On gold articles only, in lieu of the "lion passant" on silver.

Britannia.—A full-length figure of Britannia was impressed on silver plate of a special standard of fineness (11 oz. 10 dwt. of fine metal to each 10 dwt. of alloy) during a short period only, 1697-1720; since that date the Britannia quality has been manufactured in small quantities, bearing the figure of Britannia, with the lion's head erased and the date mark.

Sterling Silver.—Articles of silver plate marked at an assay office are guaranteed to be of the requisite standard of purity and to contain 11 oz. 2 dwt. of fine metal to each 18 dwt. of alloy.

Sterling Gold.—Articles of gold plate marked at an assay office are guaranteed to contain such amount of pure gold as is marked thereon by the assaying office in carats and decimals thereof. The relative values of the various standards is shown below:—

	£	s.	d.
Pure gold, 24 carats.....	4	4	11½
Standard, 22 carats.....	3	17	10½
2nd ditto, 18 carats.....	3	3	8½
3rd ditto, 15 carats.....	2	13	1
4th ditto, 12 carats.....	2	2	5½
5th ditto, 9 carats.....	1	11	10½

* For the greater part of the material for this article readers of the ALMANACK are indebted to the late Mr. Wilfrid Cripps (author of "Old English Plate") by whose courtesy also many of the illustrations were provided.

London (Goldsmiths' Hall) Date Marks
From 1438 to 1936.

	Lombardic, simple.....	1438-9 to 1457-8
	Lombardic, external cusps	1458-9 ,, 1477-8
	Lombardic, double cusps	1478-9 ,, 1497-8
	Black letter, small.....	1498-9 ,, 1517-8
	Lombardic	1518-9 ,, 1537-8
	Roman and other capitals.....	1538-9 ,, 1557-8
	Black letter, small ...	1558-9 ,, 1577-8
	Roman letter, capitals	1578-9 ,, 1597-8
	Lombardic, external cusps	1598-9 ,, 1617-8
	Italic letter, small ...	1618-9 ,, 1637-8
	Court hand	1638-9 ,, 1657-8
	Black letter, capitals	1658-9 ,, 1677-8
	Black letter, small ...	1678-9 ,, 1696-7
	Court hand	1697 ,, 1715 6 (From March 1697 only.)
	Roman letter, capitals	1716-7 to 1735-6
	Roman letter, small	1736-7 ,, 1755-6

	Old English, capitals	1756-7 to 1775-6
	Roman letter, small	1776-7 .. 1795-6
	Roman letter, capitals	1796-7 .. 1815-6
	Roman letter, small	1816-7 .. 1835-6
	Old English, capitals	1836-7 .. 1855-6
	Old English, small	1856-7 .. 1875-6
	Roman letter, capitals	1876-7 .. 1895-6
	Roman letter, small	1896-7 .. 1915-6
	Old English, small	1916-7 .. 1935-6

The Collector will find but little difficulty in distinguishing a letter of one cycle from that of another, presuming his knowledge to be insufficient to judge by the style and period of the article itself, *e.g.* :

An article marked with the letter F 1721-2 can be distinguished from letter F 1801-2 by the difference in the shape of the respective shields; as also those containing the crowned leopard's head and the lion passant; the absence of the sovereign's head in the former as against its presence in the latter case; the different form of the leopard's head (which was "crowned" until 1823); and lastly, the irregularity of the stamp in the first case as compared with the uniformity of the latter stamp. These again can be distinguished from F 1881-2 as before, by the different shield of the date letter only (the shields of the remaining marks being the same as those of 1801-2); the absence of crown on leopard's head, and the presence of the Queen's *vice* the King's head.

Imported Plate.

Any gold or silver plate or article manufactured out of the United Kingdom and brought to be assayed, stamped or marked at a British or an Irish Assay Office must be marked in the manner prescribed by the Order in Council of May 11, 1906, under which the mark for each Assay Office is ordained to be:—*London*, the sign of the Constellation Leo; *Birmingham*, Equilateral Triangle; *Chester*, Acorn and two leaves; *Sheffield*, the sign of the Constellation Libra; *Edinburgh*, St. Andrew's Cross; *Glasgow*, double block letter F inverted; *Dublin*, Bouquet. The annual date letter is to be added by the Assay Office, as for plate, etc., of home manufacture.

The Periods of English Architecture.

Date.	Style.
I. Before B.C. 55	Ancient British.
II. B.C. 55 to A.D. 420	Roman Period.
III. A.D. 449 to Norman Conquest (1066)	Anglo-Saxon.
IV. 1066-1189 (<i>i.e.</i> to end 12th cent.)	Norman.
V. 1189-1307 (<i>i.e.</i> 13th cent.)	Early English (Lancet, or Geometrical).
VI. 1307-1377 (<i>i.e.</i> 14th cent.)	Decorated (or Curvilinear).
VII. 1377-1485 (<i>i.e.</i> 15th cent.)	Perpendicular (or Rectilinear).
VIII. 1485-1558 (<i>i.e.</i> first half 16th cent.)	Tudor.
IX. A.D. 1558-1625. Early Renaissance	Elizabethan (A.D. 1558-1603).
	Jacobean (A.D. 1603-1625).
X. A.D. 1625-1830. Late Renaissance	Anglo-Classic (A.D. 1625-1702).
	Queen Anne and Georgian (A.D. 1702-1830).
	William IV. (A.D. 1830-1837).
	Victoria (A.D. 1837-1901).
	Edward VII. (A.D. 1901-1910).
	George V. (A.D. 1910- ..).
Modern Architecture } (The Age of Revivals) }	19th cent. to present time

This Comparative Table shows the approximate period of each style. It must, however, be remembered that the transition from one style to the next was slow and gradual, and can often hardly be traced, so minute are the differences. It is only for convenience in alluding to the different stages of evolution that the division is made, for it must not be forgotten that the Architecture of England is one continuous development.

Note.—The first portion (I-VIII) of this table is based upon that given on p. 319, Parts IX, and X on p. 701; and "Modern" on p. 764, of "A History of Architecture on the Comparative Method" (6th ed.), by Sir Banister Fletcher, F.R.S.B.A. (Batsford.)

CLOSE SEASON FOR GAME, WILD BIRDS, &c.

It is illegal to pursue the different kinds of game between the following dates (inclusive):—

GAME.	ENG. & W.	SCOTLAND.
Black Game or Heath Fowl.	11 Dec. to 19 Aug. (31 Aug. in Somerset, Devon, and New Forest).	11 Dec. to 19 Aug.
Bustard	1 Mar. to 31 Aug.	None.
Deer, Male	None.	None.
„ Fallow Male	None.	None.
*Grouse or Red Game	11 Dec. to 11 Aug.	10 Dec. to 11 Aug.
*Hare	None.	None.
*Heath or Moor Game	None.	As "Muir-fowl."
Landrail, Quail	As "Wild Birds."	As "Wild Birds."
*Muirfowl, or Ptarmigan	None.	11 Dec. to 11 Aug.
*Partridge	1 Feb. to 31 Aug.	1 Feb. to 31 Aug.
*Pheasant	1 Feb. to 30 Sept.	1 Feb. to 30 Sept.

It is also unlawful (in *England and Wales*) to kill the game marked * on a Sunday or Christmas Day.

In *England and Wales*, hares, rabbits, woodcock, snipe, quail, landrail, and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close-time is fixed for them by those laws. In *Scotland* the same remarks apply to deer and hares, to the first four birds, and to wild duck. The close-time for all these birds is, under the Wild Birds Protection Acts, 1880 to 1908, from 1 March to 31 July, both inclusive. Otherwise this close-time applies to all wild birds throughout Great Britain. The penalty for killing any wild bird in such close-time, or for selling or having in possession between 16 March and 31 July, both inclusive (unless the killing can be proved to have occurred at a time and place to which the Act does not apply), is a reprimand and costs for the first offence, and 5s. and costs for each bird for every subsequent offence, or, in the case of the undermentioned birds, £1 for each bird for each offence. In any case the Court may also order the forfeiture of any bird (or egg, where protected—see next column) in respect of which the offence was committed. In the Island of St. Kilda the fork-tailed petrel and St. Kilda wren are deemed to be included in the following list, and the birds marked † to be omitted.

American quail.	Dotterel.	†Guillemot.
Ank.	Dunbird.	Gull (except black-backed)
Avocet.	Dunlin.	Hoopoe.
Bee-eater.	Elder-duck.	Kingfisher.
Bittern.	Fern-owl.	Kittiwake.
Bonxie.	†Fulmar.	Lapwing.
Colin.	†Gannet.	Lark.
Cornish chough.	Goatsucker.	Loon.
Courteneb.	Godwit.	Mallard.
Cuckoo.	Goldfinch.	Marrot.
Curlew.	Grebe.	Merganser.
Diver.	Greenshank.	

Murre.	Redshank.	Spoonbill.
Night-hawk.	Reeve or Ruff.	Stint.
Night-jar.	Roller.	Stone curlew.
Nightingale.	Sanderling.	Stonehatch.
Oriole.	Sandpiper.	Summer snipe.
Owl.	Scout.	Tarrock.
Ox-bird.	Sealark.	Teal.
Oyster-catcher.	Scamew.	Tern.
Peewit.	Sea parrot.	Thicknee.
Petrel.	Sea swallow.	Tystey.
Phalarope.	Shearwater.	Whaup.
Plover.	Sheldrake.	Widgeon.
Ploverspage.	Shoveller.	Wild duck.
Pochard.	Skua.	Willock.
†Puffin.	Smew.	Wimbrel.
Purra.	Snipe.	Woodcock.
†Razorbill.	Solan goose.	Woodpecker.

Offenders refusing their names and addresses are liable to a further penalty of 10s., but the Acts do not apply to any person shooting on his own land, or authorising anyone so to shoot, any wild bird not included in the above list.

On the application of the local authorities, the Secretary of State in England and Wales, or the Secretary for Scotland in Scotland, has power to vary or abolish the close-time for any bird or birds in any county by order to be published in the *Gazette*. They may also direct that the above enactments shall apply to any wild bird not specified in the list, and may further prohibit the taking of the eggs of any wild bird in any county or part thereof. The Secretary of State in England and Wales, or the Secretary for Scotland, may also on the application of the local authorities make an order providing that in any specified area the taking or killing of any particular kinds of wild birds shall be illegal during any period specified in the order. These various powers have been exercised in many cases—too numerous to recapitulate here.

Penalties are imposed on persons setting springs, gins, &c., on poles, trees, mounds, &c., so as to injure wild birds. Persons permitting such acts are equally liable. The use of a hook or like instrument for taking wild birds is forbidden.

HUNTING AND GROUND GAME.

There is no statutory close-time for fox-hunting or rabbit-shooting, nor for deer or hares; but there is an "unwritten law" which the sportsman respects as much as he does the enactments of Parliament. The first Monday in November is the recognised date for the opening of the fox-hunting season, which continues till the following April. Otter-hunting lasts from mid-April to mid-September. The period for deer-hunting or stalking varies from about 12 Aug. to 12 Oct. for stags, and from 10 Nov. to the end of March for hinds. By an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March to July inclusive under a penalty of a pound.

ANNUAL CLOSE-TIME FOR SALMON.

Salmon and Freshwater Fisheries Act, 1923.—This Act came into force on 1 Jan., 1924. It is "an Act to consolidate and amend the enactments relating to Salmon and Freshwater Fisheries in England and Wales" (18 July, 1923). By this Act the numerous Acts relating to our inland fisheries have been consolidated and brought up to date with a view to meeting modern requirements.

This Act comprises 94 sections and it should be of considerable benefit to fishery boards, riparian owners, anglers, and to the inland fisheries generally. The so-called "coarse fish" (freshwater fish in the Act) have received additional protection. The important question of pollution is dealt with in three sections:—

Section 8 enables police-court proceedings to be taken where an effluent causes water to be poisonous or injurious to fish or the spawning grounds, spawn or food of fish. The same section provides for notice being given to the fishery boards or to the Minister of Agriculture and Fisheries where the construction of new works or the alteration of existing works are contemplated.

Section 55 authorizes a fishing board to institute or aid any person or local authority in instituting proceedings under the Rivers Pollution Prevention Acts 1876 to 1893, and, subject to certain safeguards, to extend the scope of those Acts to tidal waters.

Section 59 (1) (p) enables fishery boards to regulate by bye-law the discharge of specified effluents. These sections do not interfere with the common law right of procedure by action for injunction and damages. Although the Act provides powers for dealing with pollution, procedure in the nature of peaceful persuasion on the lines adopted by the Standing Committee on Rivers Pollution is likely to have much more comprehensive results than litigation.

Power has been given fishery boards to acquire fisheries, by purchase or lease and to let the fishing rights and also to acquire obstructions to the passage of salmon and migratory trout.

Anglers who fish for trout and coarse fish are now entitled to representation on the Fishery Boards, the number of such representative members not to exceed one-third of the total number of members of the fishery board in the preceding year. These representatives will be appointed under schemes approved by the Minister and pending the constitution of schemes, by the Minister.

The Minister may by Order, on any application he may deem sufficient, require anglers to take out licences to catch freshwater fish, i.e., coarse fish, in a fishery district.

Coarse-fish, as well as salmon and trout, illegally bought, sold or exposed for sale or in the possession of any person for sale may be seized by an authorized officer.

WEEKLY CLOSE-TIME.

In England and Wales net-fishing for salmon is prohibited from noon Saturday to 6 a.m. Monday, with an extension to 48 hours in certain districts.

In Scotland, from 6 p.m. Saturday to 6 a.m. Monday, and rod-fishing on Sundays.

I. ENGLAND AND WALES (including the Esk in Dumfries). The close time for salmon (including all migratory fish of the *genus* salmon) begins, for nets, on 1 Sept., and for rods on 2 Nov.; for both nets and rods it ends on 1 Feb. For putts and putchers the annual close season is from 1 Sept. to 1 May. By an Act of 1907 the Ministry of Agriculture and Fisheries may make provisional orders varying the law on these and other points. The close-time may also be varied by bye-law by local boards of conservators, provided it begins for nets not later than 1 Nov., with a minimum of 154 days, and for rods not

later than 1 Dec., with a minimum of 92 days. The statutory dates have been varied as follows:—

Close-time for	Nets.	Rods.
Frome	1 Aug. to 28 Feb.	1 Aug. to 28 Feb.

Fowey	11 Nov. to "	" "

No fresh salmon may be sold between 31 Aug. and 1 Feb., except such as come from parts beyond the seas, or as have been taken, if in the United Kingdom, by legal netting. During that period all packages containing salmon consigned by any common or other carrier must be clearly marked with the word "Salmon." Salmon, dried, pickled, or cured abroad, or, if within the United Kingdom, between 1 Feb. and 31 Aug., may be sold after that date. The onus of proof that the fish were caught out of the United Kingdom, or, if within the kingdom, that they were caught during the legal netting season by legal means, or that, if pickled, they were pickled between 1 Feb. and 31 Aug., lies with the person selling or exposing for sale. The exportation of salmon from any part of the United Kingdom is prohibited between 31 Aug. and 30 April, unless caught at a time at which its sale in the place where it was caught would be legal, if in the United Kingdom: the *onus probandi* lies on the person exporting. The

* Except above Woodbury Road Station, 1 Sept. to 15 April. † Above S. Biddick. ‡ Below Old Sandsfield for nets. For rods these dates do not apply in R. Eden above Irthing Foot, or in R. Eamont. § Below Lostwithiel only. || Except R. Erme, 30 Sept. CLOSE-TIME FOR TROUT AND CHAR.

In Scotland there is a close-time for trout from 15 Oct. to 28 Feb. For pollen the close-time is from 14 Nov. to 31 Jan.

Between Sept. 3 and Feb. 1 all packages in England and Wales consigned by any common or other carrier and containing trout or char must be distinctly marked with the word "Trout" or "Char," as the case may be.

The capture of trout and char in England and Wales is prohibited between 2 Oct. and 1 Feb., except (1) in the Thames and Lee, where the close season is from 11 Sept. to 31 March; and (2) in the cases noted below, where, under an Act of 1876, the close-time (for rods and nets, except where specified) has been varied by bye-law by local boards of conservators. In the districts marked * the close-time applies only to trout. The sale of trout and char is prohibited throughout England and Wales between 31 Aug. and

1 March, unless for fish propagation, stocking or re-stocking of waters, or for some scientific purpose:—

*Eden	2 Sept. (rods 2 Oct.) to 28 Feb.

*Suffolk & Essex	2 Oct. to 10 Apr.
*Dee ¶¶	14 Oct. to 14 Feb. (rods only).
*Coquet	1 Nov. to 3 Mar. (ditto).

CLOSE-TIME FOR FRESHWATER FISH.

By the Freshwater Fisheries Act, 1878, a close-time for catching, selling or buying "freshwater fish" (which are defined for this purpose to include all kinds of fish, other than pollen, trout, and char, which live in fresh water, except those kinds which migrate to or from the open sea) is fixed from 15 March to 15 June, both inclusive, for England and Wales except small parts of Norfolk and Suffolk, under a penalty of £2 for a first and £5 for a subsequent conviction. The close-season, however, does not apply to eels taken other wise than by angling; or to freshwater fish other than grayling taken in certain private waters by leave of the owner; or to angling in public waters by leave of a board of conservators, or in private waters by leave of the owner; or to taking fish in certain cases for bait or for scientific purposes. Fishery districts may be wholly or partially exempted from this close-time with the sanction of the Ministry of Agriculture and Fisheries. The

† River Avon between Amesbury and Bickton only; above Amesbury 15 Oct. to 31 Mar.

¶ (Char close-time throughout district 1 Nov. to 1 Mar. 2 Oct. to 1 April for R. Duddon; and 16 Sept. to 15 Feb. for R. Bela.

¶¶ April 30 between Lostwithiel and St. Winnow.

¶ 2 Oct. to 30 June from R. Gwill to G.W.R. Bridge.

¶ 2 Oct. to 14 Mar. in certain reservoirs.

** Or Thursdays preceding Good Friday, whichever date is the earlier.

†† In area of Norfolk Fisheries Provisional Order only; elsewhere in Norfolk close-time for nets 10 Sept. to 25 Jan.

¶¶ Bala Lake 14 Sept. to 24 Jan.

* Except Earn, rods, 1 Nov. to 31 Jan.

Axe, Avon (Devon), Wye, Eden, and Towy districts have been so exempted; also the Kent and Bela and Severn as regards pike; the Usk as regards eels; and parts of the Severn as regards fish other than grayling. For eels a separate close-time exists (so far as regards fixed engines in salmon rivers) in England from 1 Jan. to 24 June; in Ireland, with one or two exceptions, from 11 Jan. to 30 June. In the Severn, eelers, or eel fry, are protected between 1 Jan. and the last day of Feb., and between 25 April and 25 June both inclusive. Certain other local close-times exist for freshwater fish, under local Acts or bye-laws.

PROTECTION OF CRABS AND LOBSTERS.

Under the Fisheries (Oyster, Crab, and Lobster) Act, 1877, it is prohibited to buy or sell crabs under 4½ inches, measured across the largest diameter of the back, or lobsters under 8 inches, measured from tip of beak to end of tail when spread out flat. The capture of "soft" crabs and crabs with spawn is also prohibited. By local bye-laws of Sea Fisheries Committees (*vide infra*), the minimum size of lobsters and crabs that may be lawfully taken in different parts of the territorial seas has been increased, and in

some cases the taking of lobsters with spawn is prohibited, or a close season fixed.

CLOSE-TIME FOR OYSTERS.

There are also local regulations for the protection of oysters; and by the Fisheries (Oyster, Crab, and Lobster) Act, 1877, a close-time for the capture and sale of "Deep-Sea Oysters" is fixed for England and Scotland, from 15 June to 4 Aug.; and for all other kinds of oysters—except oysters taken in the waters of a foreign state—from 14 May to 4 Aug. By the Sea Fisheries Act, 1868, fishing for oysters is prohibited from 16 June to 31 Aug. in the English Channel between lines drawn (1) from North Foreland to Dunkirk, and (2) from Land's End to Ushant—the territorial seas of England and France being excepted. This close-time, however, cannot be enforced till the Convention between England and France, included in the Act, is ratified; until that is done, the Convention concluded in 1839, which prohibits oyster-fishing in those limits from 1 May to 31 Aug., remains in force so far as French fishermen are concerned. But both Powers usually agree to suspend the close season till 16 June in each year.

Licences for Fishing and Shooting.

FISHING LICENCES.—In all fishery districts in England and Wales, and in Ireland, a licence to fish for salmon is necessary, and in most English and Welsh rivers a similar licence is necessary for trout or char, except that a salmon licence includes the latter. In the Lune, Derwent, Severn, and Wye and in Norfolk licences for "freshwater fish" are in force. No licence is required for Thames trout or general fish. In Scotland no licence is needed. A licence is available only in the district, and for the season, in which it is issued. The rates on salmon nets and other like instruments range from £20 downwards in England and Wales. The rate on draft nets in England and Wales varies from £5 to £2. In England and Wales different rates are charged in different districts for a salmon rod and line as follows (an asterisk signifies that lower rates of duty are chargeable for short periods, or for certain parts of the district):—

*Dee, 40/-; *Eden, *Derwent, *Exe, Hampshire, *Wye, *Usk, 30/-; Taw and Torridge, 24/-; *Lune, *Ribble, Clwyd & Elwy, *Conway, *Dovey, *Teify, Avon (Devon), *Dart, *Teign, Frome, Stour (Kent), *Yorkshire, *Tees, *Tyne, 20/-; *Dwyfach, Towy, 21/-; *Seiont, Avon, Brue & Parret Axe, *Camel, *Fowey, 15/-; Cleddy, Taff & Ely, Ogmere, W. Cumberland, 10/6; *Kent & Leven, Rhymney, *Ayr, Severn, Axe, Trent, Tamar & Plym, 10/-; *Esk (Yorkshire), 7/6; Ouse (Sussex), Wear, Coquet, Cuckmere, Rother, Adur, 5/-.

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springes; proprietors, or tenants, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds; owners or occupiers, or their servants, killing deer on their own enclosed land; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorise others to do so,

without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence. Sailors, soldiers, territorial soldiers, or constables, on duty, or at practice, need not take out a gun licence, nor need occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence. Unless, however, the occupier is himself licensed, he cannot authorise any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits. The rates of duty are as follows:—

GAME LICENCES, if taken out after	
31st July and before 1st Nov., to expire on 31st July following.....	£3 0 0
After 31st July, to expire following	
31st October	2 0 0
After 31st Oct., to expire 31st July ...	2 0 0
Licence for a continuous period of fourteen days	1 0 0
Gamekeeper's (Great Britain), to expire 31st July.....	2 0 0
Game-Dealer's Licence, to expire 1st July, annually	2 0 0
DEPUTATION or Appointment of a Gamekeeper	0 10 0
GUN LICENCES (gun or pistol).....	0 10 0

Payment is now rigidly enforced, even to the carrying of a revolver or air gun. Persons holding game licences, soldiers and volunteers carrying a gun in the performance of duty or when engaged on target practice are exempt; but the licence cannot be transferred to a son or to a servant. Expire 31st July.

Fishery Districts, Boards of Conservators, &c.

ENGLAND AND WALES.—The administration of the laws of close season, &c., for salmon and freshwater fish is placed by the Salmon and Freshwater Fisheries Act, 1923, and the Ministry of Agriculture and Fisheries Acts, 1889 to 1919, in the hands of local boards, with the Ministry of Agriculture and Fisheries as the central authority.

qualified by ownership of lands or fisheries of a certain value; and representative members, elected annually by persons who have paid licence duty on instruments other than rod and line for salmon fishing in public waters. In certain cases there are also members representative of freshwater anglers. Districts

Coquet.....	—	—

ity. Districts may be formed and Boards of Conservators appointed, and the following districts have been formed, including generally all rivers running into the sea between the points named. Except in the cases marked + they also include the sea for three miles from the shore, or to the mid-channel in estuaries.

These Boards of Conservators consist mainly of three classes of members—those appointed annually by the Councils of the various counties through which the rivers flow; *ex-officio* members

where Provisional Orders are in force are marked thus *.

There are also certain bodies created by local statutes, having authority over the fisheries, *e.g.*, the Thames Conservancy Board, Port of London Authority, Lee Conservancy Board, and Conservators of the Medway.

The above-mentioned Boards have power to make bye-laws, not only for the regulation of the fisheries for salmon and freshwater fish, but also, in certain cases, for the regulation of other

kinds of fishing which are prejudicial to such fisheries. They are also empowered to issue licences for fishing for salmon, trout, and in some cases freshwater fish generally.

SCOTLAND.—In Scotland there are 105 Fishery Districts, nearly each separate river forming a district of itself, but only 37 Boards of Conservators. The powers of these Boards are limited to the Salmon Fisheries.

IRELAND.—In Ireland there are 24 districts, embracing between them the whole country, each with a separate Board of Conservators.

SEA FISHERIES DISTRICTS.—Under the Sea Fisheries Regulation Acts, 1888 to 1894, the Ministry of Agriculture and Fisheries has power to form sea fisheries districts within the territorial waters of England and Wales, and to constitute local Fisheries Committees, either for a single county or borough, or for several jointly. These Committees have power to make bye-laws, to be confirmed by the Ministry of Agriculture and Fisheries, regulating or prohibiting the use of

instruments for the capture of sea fish (including shell fish and crustaceans, but excluding salmon), the deposit of rubbish on fishing grounds, &c. The following districts have been created, including in each case the adjoining coast and territorial seas between the points respectively mentioned:—
1. Northumberland (coterminous with that county). 2. North Eastern, from Northumberland to Donna Nook in Lincolnshire. 3. Eastern, Donna Nook to Yarmouth. 4. Kent and Essex, Dovercourt to Dungeness, including the Thames estuary to London Stone near Yantlet Creek. 5. Sussex (coterminous with that county). 6. Southern, Western boundary of Dorset to Hayling Island. 7. Devon, and 8. Cornwall (each coterminous with the respective counties). 9. South Wales, Eastern boundary of Cardiff to Cemmaes Head. 10. Lancashire and Western, Cemmaes Head to Haverigg Point. 11. Cumberland, Haverigg Point to Sark Foot.

Similar districts may be formed in Scotland under the Sea Fisheries Regulation (Scotland) Act, 1895.

Seasonable and Unseasonable Fish.

THE following table shows the periods when the different kinds of edible fish mostly in use are "in season" and "out of season."

The letter *p* signifies that the fish are then

in their prime or most plentiful; the letter *x* signifies that the fish may be obtained, but are not at their best; the letter *c* signifies that it is "close-time" as fixed by statute.

(a) This is for sea crayfish (or crawfish). River crayfish can be obtained in the summer and autumn. It is illegal to take fresh-water crayfish from March to June.

(b) Foreign oysters can be sold in the close season, and are to be had almost all through the year, even though they have been laid down in English beds for temporary storage.

(d) In the close season, salmon from Holland, and also from certain British rivers where net fishing is permitted later in the year than usual, are largely sold.

(e) For the first six months the bulk of our London supply of shrimps comes from Holland, but Dutch shrimps are far inferior to the English, which are plentiful from July to December.

WILLS proved disposing of estates of a gross value of over £1,000,000. "Gross" value, for estate purposes, is everything of which the deceased died possessed, and of which he had the disposition. It does not therefore include settled property, of which the deceased had not the disposition, or of which he had disposition within certain limits. The "net personalty" is the gross amount, less the value of the estate and all debts or charges, and also funeral expenses. Freeholds and advowsons ("real estate," but leaseholds are "personal estate.")

The "net" or actual value of the property on which duty is levied is not given on the official documents, and the value of estate abroad is usually given, although it is taken into account in determining the percentage rate at which the duty is levied on the English portion of the estate. Estates proved in Scottish form are usually entered at a valuation of the gross personalty only.

	Gross Value.
£	£
Am, Peter (69), of Kidderminster, forces, carpet manufacturer (died Mar. 8, 1925) (net personalty, £224,088)	257,808

Thompson, Edward Philips (68), of Whitechurch, Salop, formerly of Liverpool (died Sept. 16, 1924) (net personality, £196,830)	213,355	Wallace, Alexander Falconer, O.B.E. (88), of Strathdon, N.B., East India merchant (died Jan. 24, 1925) (net personality, £299,909)	315,289
Thompson, Richard, of Wiltshire near Blackburn, Lancashire, cotton manufacturer (died Aug. 11, 1924) (net personality, £93,127)	103,130	Ward, Rev. George (80), of Wynsteth Park Drive, Harrogate, Yorks (died Feb. 18, 1925) (net personality, £101,017)	103,552
Thomson, Benjamin Thomas Lindsay (75), of Long Walk House, Windsor, Berks (died July 3, 1925) (net personality, £66,680)	119,573	Warden, Walter Evers (83), of Edgbaston, Birmingham, retired bolt and nut manufacturer (died July 23, 1925) (net personality, £155,338)	155,718
		Warren, Rev. Canon John Shrapnel, M.A. (95), of Willoughby, The Green, St. Leonards, Sussex (died May 2, 1925) (net personality, £123,217)	124,499

	Gross Value. £
Waugh, Walter, of Chigwell, Essex, and Lloyds Avenue, E.C., chemical merchant (died April 7, 1925) (net personality, £257,670)	322,010
Wells, Joseph Habershon (65), of Mosborough, near Sheffield (died May 23, 1925) (net personality, £139,055)	157,952
Wheatley, Joshua Hirst (72), of Berkswell, Coventry, J.P., and a former High Sheriff of Warwickshire, Lord of the Manor of Berkswell (died May 26, 1925) (net personality, £1,283,645)	1,379,490
Whitaker, Jeremiah (70), of Burley-in-Wharfedale and Halifax, Yorks, brewer (died Nov. 11, 1924) (net personality, £109,346)	119,459
Whitley-Thomson, Sir Frederick (72) of Halifax, Yorks, and Addison Road, W., clothing manufacturer (died June 21, 1925) (net personality, £138,719)	144,803
Wigley, Sir George, J.P. (84), of Nottingham, silk merchant (died Jan. 5, 1925) (net personality, £106,401)	142,434
Wilby, Frederick (76), of Bishops Stortford, Herts (died July 25, 1925) (net personality, £177,187)	193,772

	Gross Value. £
Wilkinson, Noah, of Llanfairfechan, Carnarvon, cotton manufacturer (died Oct. 26, 1924) (net personality, £69,057)	124,888
Williams, James David (69), of Styal, Cheshire, merchant and shipper (died Feb. 19, 1925) (net personality, £529,080)	634,959
Williams, Thomas (60), of Chester, manufacturing confectioner (died Feb. 18, 1925) (net personality, £156,348)	168,522
Winterbotham, Herbert Brend, J.P. (58), of Ashmead, Dursley, Gloucs., woollen cloth manufacturer (died Aug. 11, 1925) (net personality, £114,288)	125,617
Winterton, William Henry, J.P., of Oadby, Leics., brick manufacturer (died Dec. 15, 1924) (net personality, £56,414)	135,574
Winwood, Thomas Henry Ricketts (72), of Dorchester (died Jan. 25, 1925) (net personality, £91,565)	101,122
Wrigley, Miss Sarah Scholes, of Windermere, Westmorland (died Dec. 20, 1924) (net personality, £133,199)	134,021

PRINCIPAL SCHOOLS IN THE BRITISH DOMINIONS.

On pages 282-290 appears a list of Boys' Schools in the British Isles with signs to mark the respective Headmasters' membership of Scholastic Associations. The Headmasters of the Schools in the following list are Members of the Headmasters' Conference.

AUSTRALIA.

ADELAIDE (Collegiate School of St. Peter)—*Rev. K. F. J. Bickersteth.	
" (Prince Alfred College)—*W. R. Bayly.	
MELBOURNE (C. of E. Grammar School)—*R. P. Franklin.

LONDON FIRE BRIGADE CALLS.

	1923.	1922.
Number of calls.....	7,227	7,037
Fires (including serious outbreaks)...	3,863	3,790
Serious outbreaks.....	33	42
Chimney fires.....	961	1,030
False alarms.....	1,871	1,788
Malicious false alarms.....	532	429
Lives lost (Males 19, females 52; in 1922, males 27, females 62)	71	89
Lives endangered (males 36, females 61)	97	68
Persons injured (males 329, females 115)	444	370
First aid rendered (males 138, females 63)	201	171

The estimated monetary fire loss within the County of London was £727,901.

COMPANIES (CONSOLIDATION) ACT, 1908.

FEEs TO BE PAID BY STAMPS.

On registration, with a capital of £2,000, £2; exceeding £2,000:—	
For every £1,000 or part of £1,000, up to £5,000.....	£ s. d. 1 0 0
Do., after first £5,000 up to £100,000.....	0 5 0
Do., after first £100,000.....	0 1 0
Maximum Fee.....	50 0 0
For registering any document required or authorised by the Act.....	0 5 0
For making a record of any fact required or authorised to be recorded by the Registrar.....	0 5 0
Deed stamp 10s. to be put both upon Memorandum and Articles of Association.	
Fees on Registration of Mortgage, 10s. up to £200, £1 above £200.	

The Year's Weather.

(1924) October was a warm month, with a moderate excess of sunshine in many parts of Scotland and northern England, and an excess of rain in the eastern, midland counties and the south-west of England. Unsettled rainy conditions prevailed generally throughout the month, with a few periods of fine dry weather. During the opening days of the month most of the rain fell in the west, while early morning mists and fine sunny weather was experienced in the east. On the 4th rain became general over the whole country. A depression moving up the English Channel on the 7th, caused high winds and gales, and brought heavy rain to the south-west of England. On this day a gust of 62 miles per hour was felt at Fleetwood, and one of 61 miles per hour at Southport. On the 8th, a gale was blowing in the Channel and was said to be the most severe that had been experienced for many years. It caused serious damage to both property and crops. Beginning with the 12th and lasting about a week, conditions were generally fair and dry, with a daily amount of sunshine, in places of over 9 hours, notably on the 13th and 14th, during which the temperature in several localities rose to 70° F. At the close of this finer period there was a renewal of unsettled weather all over the country with heavy rain in the west. This spread to the eastern counties by the 21st and next day high winds and gales were blowing along the south-east coast. There was an improvement for a few days, during which time the lowest temperatures of the month were registered, the month closing with a renewal of mild unsettled weather, with at times some heavy rain. The mean temperature of the month was everywhere in excess of the average, varying from 0.3° F. in the east of Scotland to 2.4° F. in the eastern counties of England. The highest and lowest temperatures of the month were: (England and Wales) 73° F. at Colwyn Bay and Weston-super-Mare on the 13th, and 22° F. at Garforth on the 24th. (Scotland) 72° F. at Kilmarnock on the 14th, and 21° F. at Braemar on the 22nd. (Ireland) 73° F. at Clongowes Wood (Kildare) on the 14th, and 31° F. at Markree Castle (Sligo) on the 3rd and 4th. The warmest weeks of the months were those between the 12th and 18th, and between the 26th and November 1st. Most places recorded ground frosts during the month. Among the sharpest of these were 20° F. at Balmoral on the 22nd, 19° F. at Inverness on the 22nd, and at Wisley (Surrey) on the 24th, and 17° F. at Achnashellach (Ross and Cromarty) on the 22nd.

In isolated areas in Scotland and Ireland the rainfall was less than 75 per cent. of the normal and did not exceed 48 per cent. at Colmonell (Ayrshire), while areas with over 100 per cent. of the average comprised the greater part of England and Wales, most of the Scottish eastern coast and much of western and central Ireland. Several areas of considerable size in the midlands, eastern and southern England had a rainfall equal to more than 150 per cent. of the average. The last week of the month was everywhere very wet, and three times the normal fall was registered in the south-west of England. The driest week of the month was that from the 12th to the 18th, which was also one of the two warmest weeks. On the 7th, the heaviest daily fall of

rain ever recorded at Falmouth was measured, the amount being 3.27 ins. On the same day 3.23 ins. fell at Penzance, and 2.56 ins. at Newquay. This fall of 2.56 ins. at Newquay was the heaviest daily fall since observations commenced in 1893. At St. Austell (Cornwall), with a fall of 3.46 ins., the day was the wettest on record since 1865. A thunderstorm accompanied by hail occurred in the south-east of England on the 30th. From the 13th to the 16th fog was very dense in the Firths of Forth and Tay. Aurora was seen at Gordon Castle (Elgin), Wick, Malin Head and in Orkney and Shetland on the 23rd, at Roshven (Inverness) and Wick on the 25th, and at Baltasound (Shetland) on the 31st. On the 5th at Elstree (Herts) a lunar rainbow was seen.

November was warm, dry in the northern part of the Kingdom, and with a general deficiency of sunshine. Unsettled weather marked the opening days of the month. Strong winds and gales blew along the south-west coasts, a gust of 62 miles per hour being recorded at St. Ann's Head (Pembroke) in the early afternoon of the 2nd. There was heavy rain in the south with floods at Bude, Exeter and in the Thames Valley. The floods at Bude on the 1st were the worst for 20 years. During the next few days the wind was northerly, a fall of temperature occurred, and several inland frosts were experienced on the mornings of the 4th and 5th. At Rhayader (Radnor) on the morning of the 5th there were 21° of frost on the ground, and at West Linton (Peebles) 22° of frost was registered on the ground next morning. For a few days round about the 9th to the 11th, the wind became southerly, temperature increased with rain in the west. Unsettled weather continued until the end of the month in the extreme west, but in the south, under the influence of an anticyclone which spread in south-westwards from Scandinavia, fair, quiet weather prevailed for nearly a week. There was a decided fall of temperature and in some places on the 17th and 18th there were shade temperatures showing from 10° to 12° of frost. At several places on these two days the maximum failed to reach 40° F. During the last ten days the weather was generally of an unsettled character, with strong winds and frequent rain which in some places was heavy. At Sedburgh (Yorks) on the 22nd there was a fall of 1.97 ins., and 3.35 ins. at Dungeor Ghyll (Westmorland). The mean temperature of the month was above the average in all districts, the excess in the north of Ireland being 2.8° F. and as much as 3.5° F. in the north of Scotland. The least deviation from the normal was 0.5° F. in the south-west of England and the Channel Islands. For the month the highest and lowest temperatures were: (England and Wales) 61° F. at many places on the 1st, and 19° F. at Mursley (Bucks) on the 18th. (Scotland) 59° F. at Onich (Inverness) on the 25th, and 18° F. at Wolfelee on the 16th. (Ireland) 59° F. at several places on the 1st and 23rd, and 21° F. at Clongowes Wood on the 13th. There were 17 occasions when a ground frost was registered at Chopwellwood (Durham). The first week of the month was the coldest and the last week was the warmest.

Except in the south of Ireland, rainfall was less than the average in all districts, the deficiency ranging from 0.30 in. in the south-east of England to 2.0 ins. in the north of

Scotland. The first week was the driest and the last week was the wettest. The only districts in which the sunshine was above the normal was the north and west of Scotland. At Aberdeen it was the dulllest November on record. The most important gale of the month occurred during the night 26-27th. Gusts of 57 miles per hour were recorded at Kew Observatory, 68 miles per hour at Calshot and Shoeburyness, and 72 miles per hour at Petersfield (Hants), and at South Farnborough. In London it was the most severe gale of recent years, and was said to be the worst since 1881 at Bournemouth. Aurora was somewhat widely observed in the north and north-east of Scotland on the 24th.

December was warm and wet. At the beginning of the month the weather over the British Isles was of an unsettled character. Heavy rain fell locally and both fog and mist was prevalent. On the 10th the country was under a pall of inland mist, with thick fog in the east and south-east of England. The next few days were dull and mild with drizzling rain. After a few days drier weather conditions again became unsettled; on the 27th rain fell over a wide area with hail and sleet in the north and north-west. Gales were particularly severe in the English Channel, the force of the wind at times reaching 60 miles per hour. Although the month was characterized by unsettled weather and an excess of rain, there were some very fine days, so that by the end of the month the duration of bright sunshine had in most places exceeded the average. As an indication of the general character of the month in different places it may be noticed that at Copdock (Ipswich) it was the sunniest December for 7 years, with the land completely waterlogged all round. At Meltham (Yorks) it was, with only one exception, the warmest December in a record of 47 years. At Southport the month though wet and sunny was the warmest, with one exception, during 54 years' observations. At Newport (Isle of Wight) it was a wet and wild month. The mean temperature of the month was well above the normal, the deviation exceeded 5° F. in the north and east of Scotland, and the north-west of England, more than 3° F. in every other district, except the Channel Islands where the excess was only 1·3° F. Excluding the north of Scotland and the Channel Islands, the mean temperature of the British Isles was more than 4° F. above the average. The highest and lowest temperatures of the month were: (England and Wales) 59° F. at Colwyn Bay on the 12th, and 23° F. at Addington Hills on the 11th. (Scotland) 66° F. at Colmonell on the 23rd, and 23° F. at Balmoral on the 15th. (Ireland) 58° F. at Newcastle (Wicklow) on the 2nd, and at Dublin City on the 23rd, and 30° F. at Markree Castle (Sligo) on the 25th and 31st, and at Newtownforbes on the 31st. The lowest readings of the month where higher than those of November; in England and Wales by 4°, Scotland by 5°, and Ireland by 9°. During the first, third and fourth weeks the mean temperature of the week was above the average in all districts, and below it in only three districts during the second week. During the fog which prevailed on the 10th and 11th, maximum temperature in some places did not reach 35° F. and on the first of these days only reached 32° F. at Wisley and Wallington. In Scotland the month was the mildest for at least 60 years, while at Edinburgh the only milder December since 1800 appears to have been those

of 1843 and 1857. Rainfall was above the normal in all districts except the Channel Islands and the north-east of England, the largest excess being 2·28 ins. in the north of Scotland and 2·31 ins. in the south of Ireland. The least deviation was a deficit of 0·16 ins. in the north-east of England. During the first three weeks the rainfall was mostly below the average, but exceeded it during the fourth week. In the low-lying districts of Moray and Banff less than half the average was measured. In the Upper Thames Valley, the Lake District and Central Ireland more than 150 per cent. of the average was recorded. Among some of the heavier daily falls were 2·20 ins. at Greenock on the 26th, 3·11 ins. at Ardgour and 4·69 ins. at Kinlochquhich on the night of the 12th-13th. During the last few days there was extensive flooding in various parts of the country. Very little snow fell until the end of the month, when snow and sleet showers occurred in many parts of Scotland and at a few places in England and Ireland. For the month, as a whole, sunshine was slightly in excess of the average in most places. Some stations reported between 6 and 7 hrs. on the 5th, 6th, 14th and 29th. A notable feature of the month was the prevalence of mist and fog. On the 10th and 11th the fog was very dense. In some areas in and around London, traffic was almost entirely suspended. At Hampstead the fog persisted for 62 hrs. Aurora was seen at Gordon Castle on the 20th, at Lerwick on the 21st and at Sumburgh Head on the 23rd. Strong winds and gales were frequent throughout the month, especially in the north and north-west. Violent gales were widely experienced in Scotland on the 15th, 22nd, 23rd, 26th, 27th, 29th and 31st. A gust of 90 miles per hour occurred at Lerwick on the 25th. South-westerly winds of about 60 miles per hour were felt in the English Channel on the 27th. Gusts of 79 miles per hour were recorded at Edinburgh on both the 27th and 29th. During a heavy squall at Shoeburyness on the 31st, which lasted about 10 minutes, the wind attained a maximum speed of 73 miles per hour.

Year 1924 was dull and very wet, with a cool and cloudy summer. Among the outstanding features of the year were the cold of the last three weeks in February and the first week in March, the brief warm spell at Easter, some fine warm days between the middle of June to about the middle of July, the cool, wet summer, with an unusual number of thunderstorms accompanied in many instances by heavy falls of rain and hail which helped to constitute record values in many places, and the widespread thunder towards the close of the year. January was on the whole warm and unsettled with heavy rain in most places. Extensive flooding occurred in the upper reaches of the Thames. At Lerwick on the 12th, a gust of 80 miles per hour was felt. February opened fair, but from the 10th to the 14th cold easterly winds prevailed, and from the 11th onwards the mean temperature and sunshine was mostly below the average. The month was unusually dry. March. During the first week, the temperature was lower than in February, and in Scotland the weather was bitterly cold. From the 6th to the 20th the weather was fine and sunny with cold nights. During the last week it was cloudy and cold, with sleet and hail showers in some places. April. Except for the warm sunny spell at Easter, the month was dull, cool and wet.

May was very wet and thundery. Towards the end of the month there were extensive floods. June was mainly dull and unsettled during the first half, warm and drier in the second half. July was noted for its severe local thunderstorms and generally heavy rain. In most places, the 12th was the hottest day of the year. Except on the western coasts, generally fine weather prevailed until about the 17th, after which the conditions became cold and unsettled. August was mainly cool. There was a spell of fine warm weather between the 6th and the 10th, during which time several places had from 13 to 14 hrs. daily sunshine. Rainfall was above the average. September for the most part was wet and unsettled, with deficiency of sunshine. October. There were severe floods in northern Scotland. On the 8th a gale experienced in the Channel Islands was the worst for many years. Fair weather prevailed from the 12th to the 18th, and for a few days towards the end of the month. November was warm and dry in the north. A severe gale swept over southern England on the night of the 26th, and was the worst that had been felt at Bournemouth for over 40 years. December was warm and unsettled, with frequent fog and mist. Strong winds and gales with heavy floods occurred during the last few days of the month. A gust of 90 miles per hour was recorded at Lerwick on Christmas Day. The highest and lowest temperatures of the year were: (England and Wales) 90° F. at Camden Square (London) on July 12th, and 3° F. at Garforth (Yorks.) on March 3rd. (Scotland) 81° F. at Wolfelee on June 17th and at Port Augustus on July 12th, and 2° F. at Balmoral on March 3rd. (Ireland) 75° F. at Newcastle (Wicklow) and Kilkenny Castle on June 13rd, and at Dublin City on July 15th, and 11° F. at Lisburn (Antrim) on March 3rd. The rainfall of the year was greater than that of any year since 1903. Although the year stands out as a wet one, there were considerable areas in the British Isles in which the annual fall was below the average. In Ireland the annual total exceeded the average. At Camden Square (London) there were 128 rain days, and the total duration of rain was 540 hrs. Among the greatest totals for the year were 72 ins. at Leadhills (Lanark) and Ashburton (Devon), 80 ins. at Achnashellach (Ross and Cromarty), and 95 ins. at Ardtornish (Argyll). Among the smallest totals were 22 ins. at Lincoln, and 21 ins. at both Skegness and Hunstanton. The rainfall at Brymore House, near Bridgewater, on August 19th, was 9.41 ins. The largest British rainfall on record in 24 hrs. is 9.57 ins. at Sexey's School, Bruton, Somerset, on June 28th, 1917.

(1925) January was windy and very mild, wet in the south. The rough weather which prevailed towards the end of December continued into the first few days of January, with gales in many parts of the country. In some places the average wind velocity was about 60 miles per hour, and attained 80 miles per hour in gusts at Weaver Point (Cork) on the 1st, and at Southport on the 2nd. Heavy rain was measured over wide areas during the first two days, Westmorland and Wales receiving the largest amounts. A fall of 2 ins. was recorded at Orton (Westmorland) on the 1st, and one of 3.90 ins. at Braemar (Brecon) on the 2nd. There was snow in many parts of Scotland with a renewal of floods, especially on the Border. At Balmoral on the 3rd, snow was lying to a depth, of 5½ ins.

Except for the passage of a V-shaped depression which caused rain generally, fairer and colder weather set in which lasted for nearly a week. Six and seven hours bright sunshine was recorded on several days, notably in the south-east of England, and there were some rather low night temperatures. From the 10th to 12th, dense fog prevailed over a large area in and around London, and at many places on the 11th day temperatures did not rise above the freezing point. Mild weather with local rain and strong south-westerly winds spread over the whole country by the 13th. At Killarney on the 12th, there was a fall of 1.81 ins. of rain, followed next day by a fall of 1.89 ins. At Killin (Perth) on the 13th, 2.44 ins. was measured. Gusts of 71 miles per hour were recorded at Holyhead and 74 miles per hour at Paisley and Weaver Point (Cork). Many large trees were blown down in North Wales in the Menai Straits neighbourhood. At Lerwick, the wind exceeded gale force from 10 p.m. on the 13th to 8 p.m. on the 15th. There was a change to sunny and drier conditions, but after the 22nd, which was wet and stormy in Scotland, the weather again became unsettled. There was a good deal of rain on the 25th and 26th, especially in the south-west of England; at Ippiden (Devon) 1.89 ins. was measured on the 25th. Heavy rain fell in the north of England and parts of Scotland between the 28th and 30th, on the latter of which days 3.27 ins. was measured at Kintlochquich (Inverness). Gales were blowing over a wide area on the 29th and 30th. While at Ipswich it was the driest January since 1909, at Newport (I. of W.) it was an exceptionally wet month, with local floods and serious landslips. The mean temperature of the month was everywhere above the average. In the north of Scotland the excess amounted to 3.5° F. and to 3.7° F. in the eastern counties of England. The least deviation was shared by the Channel Islands, the east of Scotland and the north-east of England with an excess of 2.5° F. The week 11th-17th was the warmest week of the month, in which week the north of Scotland was 8° F. above the average. The highest and lowest readings of the month were: (England and Wales) 60° F. at Wistanstow (Salop) on the 2nd, and 22° F. at several places between the 11th and 13th. (Scotland) 57° F. at Onich (Inverness) on the 13th, and 16° F. at Braemar on the 5th. (Ireland) 58° F. at Trinity College, Dublin, on the 13th, and 26° F. at Newtownbarry (Wexford) on the 16th. Rainfall was above the normal in the south-east and south-west of England, the south of Ireland and the Channel Islands, in which latter district the excess amounted to 1.62 ins. In the Midland counties the amount was only just below the average. The week 11th-17th was the driest (and warmest) and the last week of the month was the wettest. Snow fell on several days in Scotland, but there was very little in the south. The amount of bright sunshine varied considerably. While the west of Scotland had only 13 per cent. of the possible, and the Midland counties 15 per cent., the Channel Islands had 23 per cent. The week 4th-10th was the brightest and the last week the dullist (and wettest). Aurora was seen at Gordon Castle (Elgin) on the 16th, 17th and 19th, and at Baltasound on the 19th.

February was very wet, and, except in Ireland, temperature was above the average. The unsettled weather which had prevailed during the

last ten days of January continued throughout the greater part of February. During the first week there were showers of rain, hail and snow, with a good many bright intervals. Snow fell in many parts of Scotland on the 6th. The unsettled weather which set in over Ireland on the evening of the 7th, subsequently spread over the whole country and continued until the 16th. Heavy rain fell between the 10th and the 12th, among the larger falls being 1'77 ins. at Penrhyn Quarries (Carnarvon) on the 10th, 2'05 ins. at Bettws Garmon (Carnarvon) on the 11th, and 3'23 ins. at Snowdon on the 10th. At Newport (Isle of Wight) 1'54 ins. was measured on the 12th. Gales were recorded at several places, when velocities of 78 miles per hour were attained in gusts at Valencia and Birmingham on the 9th, and at Shobery on the 11th, and 82 miles per hour at Rosyth on the 10th. During the third week the weather became quieter and cooler. Bright sunshine amounts of between 8 and 9 hrs. per day were registered in many places between the 18th and 22nd. A considerable amount of snow fell in Scotland between the 21st and the 23rd, and on the first of these days was lying to a depth of 6 ins. at Crieff (Perth). By the 24th, unsettled weather had again become general with some heavy rain. At Valencia a fall of 1'46 ins. was measured on the 22nd, and 2'42 ins. at Llyn Fawr (Glamorgan) on the 25th. There were extensive floods in the Thames Valley at the latter end of the month. At Blundellsands (Lancs.) it was the wettest February for at least 50 years, at Southampton it was the wettest since 1881, at Cheltenham only four wetter Februaries had been recorded since 1867. At Newport (Isle of Wight) the month was excessively wet, and at Totland Bay only twice in 38 years had as much rain fallen as in this month. In Dublin City there were only four days which did not yield a measurable amount of rain. The mean temperature of the month was equal to the normal in the south of Ireland, and only very slightly below it in the north of that country. Everywhere else it was above the average. The midlands, eastern and south-eastern parts of England showed the largest excess, Scotland the least. The highest and lowest temperatures of the month were: (England and Wales) 59° F. at several places on various dates, and 22° F. at Sprowston (Norfolk) on the 22nd. (Scotland) 54° F. at Perth on the 2nd, and 15° F. at Eskdalemuir on the 22nd. (Ireland) 56° F. at Glasnevin on the 3rd, and at Killybeg on the 8th, and 24° F. in the Phoenix Park on the 14th. Rainfall was above the normal in all districts, the least deviation being an excess of 0'71 ins. in eastern England, ranging up to 1'97 ins. in the south-east of England, and 2'44 ins. in the north-west and south-west of England. The only areas with a rainfall less than the average were two small regions on the western Scottish coasts. Over the whole of Wales, parts of the north and south of England, and a small area in central Ireland the rainfall exceeded twice the normal. At Grantown-on-Spey the amount was equal to 267 per cent. of the normal, and at Logie Coldstone (Aberdeen) to 317 per cent. The second and fourth weeks of the month were the wettest. There was a considerable amount of snow during the month, especially in Scotland. The Grampians and the Cairngorms were snowed throughout the month. Most places had hail, some as many as 13 to 16 days. At Weymouth on the 14th some

of the hailstones were half an inch in diameter. Sunshine amounts varied from 18 per cent. of the possible in the west of Scotland to 30 per cent. in the south of Ireland, and 38 per cent. in the Channel Islands. Mirage was observed over Spithead from Calshot on the morning of the 7th. Aurora was seen at Aberdeen and Baltasound on the 8th, at Wick and Lerwick on the 9th, at Dublin on the 18th, and at Armagh, Lerwick and Baltasound on the 19th.

March was mainly dry with northerly winds. The month opened with generally fair weather in the west, but cloudy in the east. Snow fell in the north of Scotland on the 17th, and spread over the greater part of that country during the next two days. Showers of snow, sleet and hail became general, with low day temperature. At Inverness on the 8th, the temperature did not rise above 32° F., and at Andover 23° of frost on the ground was registered on the night 12th-13th. Between the 13th and the 19th, the wind was mainly westerly with fair weather. Temperature rose to 60° F. at Kilkenny, Killybeg and Cork on the 15th. On the 19th there was a return of the northerly winds, with cold and generally cloudy weather until the 30th. There were snow, hail and rain showers, and on the 22nd snow was lying to a depth of between 2 ins. and 3 ins. at such widely distant places as Balmoral, Skegness and Folkestone. Heavy rain or snow fell in many parts of Scotland and the north of Ireland on the 31st. More than half the month's total rain was accounted for on the 31st in Pembrokeshire, Flintshire and the Lothians. At Renfrew, 1'34 ins. out of a total of 2'19 ins. was measured on that day. As showing the generally dry character of the month, it may be stated that at Cheltenham and Teignmouth it was the second driest March recorded at those places; at Totland Bay it was the driest for 38 years, and at Cork the driest for 42 years. Rainfall was below the average in all districts; the south-west of England had a deficit of 2'13 ins. and the south of Ireland a deficit of 2'56 ins. The only regions in which the month's fall was normal or above, were a fairly large area in the north of Scotland, two small areas in the eastern English and Scottish coasts and a small part of the extreme north of Ireland. Over a large part of southern and western England and Wales, a small part of the south-west of Scotland, and most of Ireland, the total fall was less than half the average. Snow fell in all districts, but mainly in the north. At Deerness (Orkney) 22 days of snow were recorded, and for 12 days snow was lying at Braemar. The mean temperature of the month did not differ greatly from the normal, the Channel Islands being the only district in which the deviation reached or exceeded 10° F. The highest and lowest temperatures of the month were: (England and Wales) 60° F. at Fowey and Newton Abbot on the 15th and at Scilly on the 18th, and 18° F. at Porton (Wilts) on the 13th. (Scotland) 63° F. at Inverness on the 5th, and 8° F. at West Linton on the 21st. (Ireland) 60° F. at Kilkenny, Killybeg and Cork on the 15th, and 24° F. at Binn Castle on the 12th and 22nd, and at Markree Castle on the 27th. Over the British Isles as a whole sunshine was below the normal. In the west of Scotland there was an excess of nearly half an hour per day, a deficiency of almost the same amount in the north of Scotland, and of 50 minutes per day in the east of England. Fog was reported on 11 days at Greenwich and 12

days at Kensington. Aurora was seen at Deerness (Orkney) on the 12th, Gordon Castle (Elgin) on the 13th, Lerwick on the 19th and Baltasound on the 20th.

April. The weather of April was of a generally unsettled character, it was changeable and showery with a good many bright intervals. Rainfall was above, and temperature was below the normal, so that the month as a whole was mainly wet and cool. Snow fell in Scotland during the first few days. On the 1st it lay to a depth of more than 6 ins. at Edinburgh. After a sharp frost in the Midlands on the morning of the 4th, when a grass minimum of 11° F. was registered at Oundle (Northampton), the wind became westerly, with moderate rain and warmer weather. Day temperatures of 66° F. were recorded at Reading and South Farnborough on the 8th and at Workop (Notts) on the 12th. A deep depression passing across the north of Scotland was associated with strong winds and gales in many places between the 15th and the 18th. On the morning of the 16th there were gusts of 80 miles per hour on the north-west coast of England, while the airship R 33 was torn from her moorings at Pulham. Over a considerable portion of England on the 16th the highest gusts of the month were recorded. Between the 19th and the 21st fair or fine weather prevailed over the British Isles, over 13 hrs. of bright sunshine were registered in some parts of Ireland on the 19th and 20th. During the last week there were many bright intervals, although the general character of the weather was unsettled. With the exception of eastern England, which just exceeded, and the north of Scotland, which was exactly normal, the mean temperature of the month was below the average. The least deviation was an excess of 0.1° F. in eastern England and a deficit of 0.3° F. in the north-east of England, and the greatest a deficit of 1.3° F. in the north of Ireland and 1.5° F. in the east of Scotland. The second and third weeks were the warmest. The highest and lowest temperatures of the month were: (England and Wales) 66° F. at Reading and South Farnborough on the 8th, and at Workop on the 12th, and 21° F. at Marlborough on the 4th. (Scotland) 65° F. at Smeaton on the 21st, and 17° F. at Braemar on the 1st. (Ireland) 62° F. at Glasnevin and Phoenix Park on the 21st, and 23° F. at Phoenix Park on the 3rd. Ground frosts were numerous. Rainfall was above the average in all districts and ranged from an excess of 0.28 in. in the Midland counties to 1.46 in. in the Channel Islands and 1.39 in. in the west of Scotland. Areas where the rainfall was less than the normal were parts of western England and Wales, a small area near the mouth of the Thames and parts of the extreme north and north-east of Scotland. Over a considerable portion of southern central Scotland, areas in southern England, central Ireland and western Scotland the rainfall was below the normal. At Paisley it was the wettest April for at least 40 years, and at Greenock the only wetter April on record was that of 1904. The third week was the wettest. The heavy rain in Scotland caused destructive floods. Sunshine was in excess of the average in Scotland and Ireland and in the western districts of England and Wales. The largest mean daily excess was 0.9 hrs. in the north of Ireland, and the largest deficit 1.1 hrs. in eastern England. Aurora was seen at Gordon Castle (Elgin) on the 15th and at Tenbury on the 27th.

May was changeable and showery with bright intervals. The month opened with a day of cold northerly winds, with bright weather in the western districts, over 13 hrs. of bright sunshine was registered at both Aberystwyth and Falmouth. From the 2nd to the 9th it was cool and cloudy, with local thunderstorms, and at times heavy rain. Hail showers were widespread and numerous between the 5th and the 7th. Between the 10th and the 16th an improvement was experienced, with temperature rising in many parts of England to between 70° F. and 80° F. In the north of Scotland and in some parts of Ireland, cloudy and cool weather prevailed, the thermometer failing to reach 60° F. Between the 14th and the 16th, sea fog was prevalent along the English south-west coasts. Thunderstorms were numerous on the 18th and the 19th, and were accompanied by some heavy rains, 1.46 ins. fell at Calshot (Hants) and 1.76 ins. at Derby on the 19th. During the last ten days the weather over the British Isles was changeable with local heavy rain, strong south-west winds were experienced, and at Sealand (Flint) a gale was recorded, during which there was a gust of 56 miles per hour and one of 59 miles per hour on the same day at Southport. A thunderstorm at Cleethorpes (Lincoln) on the 16th was the worst there for several years, the hailstones which accompanied it being very large. The mean temperature of the month was below the average in Ireland, the south-west of England and the Channel Islands. The north of Ireland had a deficit of 1.0° F., the south a deficit of 1.3° F., the north-eastern counties of England had an excess of 2.2° F., the eastern counties an excess of 2.7° F. For the month, the highest and lowest readings were: (England and Wales) 82° F. at Camden Square (London) on the 16th, and 29° F. at Ilkley (Yorks); Tenbury and Burnley on the 1st, and at Houghall (Durham) on the 2nd. (Scotland) 76° F. at Onich (Inverness) on the 19th, and 25° F. at Braemar and Braemar on the 3rd. (Ireland) 65° F. at Killarney on the 14th, and at Dublin (Phoenix Park) on the 15th, and 31° F. at Phoenix Park on the 5th. Ground frosts occurred in most parts of the country: there were 9 at Greenwich, and 11 at Rounton (Yorks). A ground temperature of 23° F. was recorded at Houghall on the morning of the 2nd. Rainfall was everywhere above the normal, especially in the west of Scotland where the excess amounted to 3.15 ins. There was an excess of over 2 ins. in the south of Ireland, the south-west of England and the Channel Islands. The district of least excess was the eastern counties of England with 0.2 in. At Hodsock Priory (Nottingham) it was the wettest May since 1889, at Newquay it was the least sunny and by far the wettest May for 33 years, at Tavistock it was the wettest since 1878, and only once in 38 years had there been a wetter May at Totland Bay (I. of W.). A fall of 1.98 ins. was measured at Llyn Fawr (Glamorgan) on the 29th, 2.41 ins. at Killin (Perth) on the 30th, and 2.93 ins. at Llak Llydow (Snowdon) on the 26th. The last two weeks of the month were the wettest. Although there were bright intervals during the month, the total of bright sunshine was mostly below the normal; only two districts, eastern and south-eastern England, had an excess and in neither of these districts did the excess amount to half-an-hour per day, while the north of Ireland and the west of Scotland had a deficit of 2 hrs. per day.

and of nearly 2½ hrs. per day in the south of Ireland.

June was a fine, warm and abnormally dry month, a striking contrast to those immediately preceding it. During the first few days westerly or south-westerly winds prevailed over the British Isles, the weather being mainly fair to cloudy with some showers and drizzling rain on the north-west coasts. Between the 4th and the 12th, the weather was dominated by an anticyclone. Temperature rose considerably, exceeding 80° F. in many places, and on some days between 14 hrs. and 15 hrs. bright sunshine was experienced. Cool northerly breezes set in on the 13th, causing a temporary drop in temperature, but by the 15th the wind again became westerly, the temperature rose, the thermometer in a few places again reaching 80° F. Warm sunny weather continued in the western districts, but in the eastern it was cloudy and cool, especially on midsummer day, when a maximum of only 49° F. was recorded at Rounton (Yorks). Between the 27th and the 30th, the weather was generally fine and warm. At Lerwick the cold northerly wind brought the temperature at the latter part of an otherwise fine month down below that on the same days in the previous December. Although a very fine sunny month, with temperature above the normal in all districts, in only two, the south-west of England and the Channel Islands, was the excess above 2° F. The least deviation was 0.5° F. in the north of Ireland and 0.3° F. in the north-east of England. The highest and lowest temperatures of the month were: (England and Wales) 88° F. at Camden Square (London) on the 11th, and 32° F. at Uundle (Northampton) and Usk (Monmouth) on the 3rd. (Scotland) 86° F. at Kelso and Perth on the 10th, and 32° F. at Dungal (Lanark) on the 22nd. (Ireland) 86° F. at Killarney on the 8th, and 38° F. at Phoenix Park on the 5th. The abnormal dryness was the outstanding feature of the month. In only one district, that of Scotland north, did the total fall exceed 1.0 in. In seven other districts it failed to reach 0.50 in., and in the Channel Islands there was no rain. The deficit ranged from 1.14 ins. in the north of Scotland, 1.54 ins. in the east of Scotland and the east of England, to 2.20 ins. in the south of Ireland, 2.24 ins. in the south-west of England, and 2.28 ins. in the north-west of England. No English district had more than 5 rain days. Over the greater part of England and Wales the total fall was less than 6 per cent. of the average. In some parts of south Wales and the south and south-west of England the month was rainless. At some stations all previous records were broken. At Stonyhurst College it was the driest June since 1859. At Southport the driest for 54 years. At Blundellsands the driest of any month for 50 years. At Hodsock Priory (Notts) there has been only one drier month for 50 years. At Wolstanton Rectory (Shropshire) the driest June for 60 years; Rothamsted the driest June on record; London (Camden Square) it was the driest June since 1858, and the driest of any month since April 1912; Cheltenham it was the driest of any month since 1867; Totland Bay it was the driest month during the past 39 years. At Penzance it was the driest month on record.

Sunshine was above the average in all districts, the excess being equal to 4½ hrs. per day in the Channel Isles and the south-west of England. At many places in these two districts the per-

centage of the possible was over 70, and reached 78 at Falmouth, Plymouth, Jersey and Guernsey.

July was mainly fair, warm and thundery. On the opening days of the month the weather over the British Isles was fair to fine. There was a high temperature on the 2nd, which reached 80° F. at many inland places. Thunderstorms occurred in Ireland, Wales and the south of England. On the afternoon of the 2nd. over an inch of rain fell in a thunderstorm at Birr Castle (King's Co.). During the next few days the weather was cloudy to overcast with slight rain, and temperature was below the average for the time of year. After the 10th, conditions improved and fair to fine weather prevailed, with temperature rising in some places to 80° F. In the south-eastern counties there was a considerable amount of sunshine, over 14 hours in the day being recorded at some stations. By the 17th, as the result of a depression which gradually spread southward, rain, sometimes heavy, was reported from many places. The wind became strong, and at Holyhead on the morning of the 18th there was a gust of 47 m.p.h. During the next few days rain fell in Ireland and the western parts of England and Wales. In the early morning and again in the evening of the 22nd a severe thunderstorm passed the midland and southern counties of England. At Hampstead, 1.85 ins. of rain was measured, and 1.97 ins. at Skennington Rectory, Oxfordshire. On this day (22nd) the highest temperatures of the year occurred, the most notable being 91° F. at Lincoln, Raunds and Peterborough, and 92° F. at Hunstanton. On the 27th a depression centred over the southern part of the North Sea caused gales in the English Channel. The mean temperature of the month was above the average in all districts, the deviation ranging from 0.3° F. in the Channel Islands and the north of Ireland to 3.0° F. in the north of Scotland. The two warmest periods of the month were between the 11th and 14th and between the 21st and 25th. Over the greater part of England and Wales the 22nd was the warmest day. The highest and lowest temperatures of the month were: (England and Wales) 92° F. at Hunstanton on the 22nd and 37° F. at Chopwellwood (Durham) on the 1st and 25th. (Scotland) 85° F. at Ardtornish (Argyll) on the 22nd, and at Ruthwell (Dumfries) on the 23rd, and 35° F. at Wolfelee (Roxburgh) on the 27th. (Ireland) 79° F. at Lisburn (Antrim) on the 12th and 23rd, and at Waterford on the 24th, and 41° F. at Markree Castle (Sligo) on the 1st and 31st. Rainfall was above the average in Ireland, the south-west and south-east of England and the Channel Islands. In some parts of Kent and Sussex the amount was equal to twice the normal. It was less than half the normal in some parts of the eastern counties, parts of the West Riding of Yorkshire, and the Lake District. Over the greater part of Scotland the amounts were below the average, and in some places it was the driest July since 1919. The rainfall associated with the thunderstorms of the 2nd ended the drought, which at some places in the south-west of England lasted for 30 days. The greatest deviations from the average were an excess of 0.87 in. in the north of Ireland and 1.18 ins. in the south-east of England, and a deficit of 0.87 in. in the north-west of England and the west of Scotland, and 0.94 in. in the north-east of England. A severe thunderstorm on the 22nd did extensive damage in Woolwich and Plumstead. Some of

the hailstones which fell during this storm were said to be 8 ozs. in weight. A cloudburst at Fulbeck (Lincoln) caused the corn in one field to be laid absolutely flat. In some parts of Scotland a thunderstorm on the 25th was of great intensity. In Ireland and the Channel Islands there was a deficiency of sunshine exceeding one hour per day. The largest excess, amounting to nearly 40 minutes per day, was in the north of Scotland.

August was dull and unsettled. With the exception of a fair to fine spell of weather between the 14th and 17th, the month was generally of a dull and unsettled character. During the first two days rain or rain showers were general, and at a number of places in the southern part of England there were thunderstorms on the 1st. A secondary depression which moved across the southern part of the British Isles on the 5th gave rise to thunderstorms and heavy rain in the south-west of England. More than an inch of rain fell at several places along the coast from Falmouth to Torquay. Among these heavy falls were 1.06 ins. at Torquay, and 1.22 ins. at Falmouth and Plymouth. There was heavy rain between the 10th and 12th, when 1.34 ins. fell at Manchester on the 10th, 1.54 ins. at Blacksed (Co. Mayo) on the 11th, and 1.61 ins. at Eskdalemuir on the 12th. On the 14th conditions began to improve. There was a considerable amount of bright sunshine on these days, and at some places the day temperature rose to 80° F. On the 18th there was an appreciable fall of temperature over the British Isles. In consequence of a deep depression centred over the Channel Isles on the 22nd, thunderstorms occurred locally, accompanied by heavy rain. At Guernsey on the 23rd 1.50 ins. of rain was measured, and 1.73 ins. at Calshot. Unsettled weather continued until the 28th, when fair conditions again became general, with some good records of bright sunshine in the southern part of England. The month as a whole was the dulllest August at Skegness since 1920, and at Ipswich the sunshine equalled the previous worst August record of 1912. The mean temperature of the month was about the average in most districts, due in part to the warm and cloudy nights. At many places the lowest night temperature never fell below 50° F. In no district did the excess exceed one degree, and the greatest deficit was less than half a degree. High temperatures were recorded on the 8th, 9th and at the end of the month, but the warmest period coincided generally with the sunniest, which extended from about the 14th to the 17th. In Scotland it was the warmest August since 1918, and the fourth in succession with a mean temperature above the average. There were very few ground frosts, and at Southport the thermometer on the grass never registered a temperature below 46° F. The extreme temperatures for the month were: (England and Wales) 84° F. at Sutton Bonington (Notts) on the 17th, and 35° F. at Comondale (Yorks) on the 26th. (Scotland) 77° F. at Perth on the 16th, and 33° F. at West Linton (Peebles) on the 26th. (Ireland) 76° F. at Mountmellick (Queen's Co.) on the 15th at Killarney on the 16th, and Waterford on the 31st, and 38° F. at Newtownforbes (Co. Longford) on the 25th. In only four districts, England east, south-east, and south-west, and the Channel Islands did the rainfall exceed the average, the greatest amount being 0.55 in. in the Channel Islands. The largest deficits were over the south of Ireland with 1.14 ins., and the north of Scotland with

1.38 ins. below the average. Among the heavy falls of the month were 2.00 ins. at Sandown (I. of Wight), and 2.13 ins. at both Ventnor and Portsmouth on the 23rd. The rain at Portsmouth was persistent from 7 p.m. on the 23rd to 6 a.m. on the 24th. This was the largest amount measured in 24 hrs. since June 5, 1905, when 2.36 ins. was recorded. Sunshine was below the average except in the north of Ireland which had an excess of 0.5 hr. per day. In the midlands, and the east, south-east and south-west of England the shortage exceeded 1 hr. per day, while the deficiency in the Channel Islands amounted to nearly 2 hrs. per day. A beautiful lunar rainbow was seen on the late evening of the 31st at Bray and Greystones (Co. Wicklow). Auroras were seen in the Orkneys on the 22nd, 25th and 26th.

September was on the whole cold, unsettled and showery with a good many bright intervals. During the first few days, the wind, which fell at the close of the previous month, had been westerly, veered to between north-west and north, and there was a decided fall of temperature. Showery weather with some sunny intervals prevailed until the 9th. On this and the following day rain became general over the British Isles, accompanied in some places with thunder. After this there were a few days of bright weather with a good deal of mist and fog. There was a renewal of unsettled weather on the evening of the 15th. Another disturbance on the 19th caused heavy rain in the south-west and midland counties of England. Among the heavy falls were 1.23 ins. at Newport and Usk (Monmouth), 1.83 ins. at Lincoln Lock (Worcester), and 2.18 ins. at Filey (Yorks). On the night of the 21st-22nd there was very stormy weather in the Atlantic, the *Caronia* reporting a wind force of 59 m.p.h. at 1 a.m. Unsettled wet weather continued until the 26th, after which fair and warmer weather prevailed with a good deal of morning mist or fog. In the Shetlands harvest operations were hindered by the unfavourable weather. At Ipswich the month was dull, wet and cold, the mean temperature being lower than in any September since 1912. At Teignmouth there was an unusually large rainfall for the month, made up chiefly by 5 days rain. Owing to the prevalence of cold north-westerly winds, the mean temperature of the month was everywhere below the average. A striking difference between the western and eastern counties of Scotland was shown in the fact, that while in the western districts there was a deficit of only 0.9° F., in the eastern the deficit amounted to 3.0° F. In England and Wales the deviation ranged from 2.4° F. in the south-west of England to 3.5° F. in the south-east. Between the last day of August and the 4th of September the temperature at some places had dropped 20° F. The highest and lowest readings of the month were: (England and Wales) 73° F. at Sprowston (Norfolk) on the 1st, at Tunbridge Wells on the 30th, and 29° F. at Rhayader on the 13th. (Scotland) 69° F. at St. Andrews on the 15th, and 26° F. at Braemar on the 12th and Eskdalemuir on the 17th. (Ireland) 70° F. at Dublin on the 1st and 2nd, and 31° F. at Glasnevin, Phoenix Park and Kilkenny on the 13th. On the ground a reading of 23° F. was registered at Rhayader on the 12th, and a reading of 20° F. next day. Except in the north of Scotland, rainfall was above the normal in all districts. At some

places in the Midland counties and the west of England the month's fall exceeded twice the normal. In the east of Scotland and as far north as the Moray Firth, a rainstorm of great intensity was experienced on the 9th, when more than an inch of rain fell over a large area. More than 2 ins. fell at Arbroath, Gorebridge and Marchmont, and as much as 2.87 ins. at Galashiels. At Edinburgh fully one-third of the total fall was measured on the 9th. On this day snow fell on the Scottish Highlands above

the 2,000 feet level, this being an unusually early date. Thunderstorms were general in the British Isles between the 6th and the 9th, in the north and west on the 19th, and in the south on the 21st. Only in the west of Scotland did sunshine exceed the average, and that by more than half an hour per day. In the north of Scotland and the east of England there was a deficit of more than an hour per day. A brilliant double rainbow was seen in London at about 6.30 p.m. on the 12th.

Storms and Floods in 1924-25.

(1924) October 20. A tropical storm at Mantua, Cuba. Eight persons were killed and about 50 injured. Nearly every building in the town was damaged, and the tobacco crop suffered severely. 22. A violent storm two miles west of Orokār lighthouse. The ss. *Fylgia* was wrecked, and owing to the heavy seas the lifeboat was unable to reach the wreck. 23-24. A typhoon on the coast of Annam. Several natives were drowned, and communications were badly interrupted.

November 1. Heavy rainstorms in France. The river Seine rose 7 ft. above normal. The Rhine rose 11 ft. in 24 hours. 9. Cloudburst over Cuba. Hundreds of houses were destroyed. 19. A violent storm in the Straits of Gibraltar. Telegraphic communication was broken down. 26. Heavy storm in the Atlantic. The ss. *Leviathan* encountered a north wind blowing at 100 miles an hour. Huge waves broke over decks, and 15 people injured.

December 1. A storm at Nice. Palm trees were uprooted and carriages and motors overturned. 23. Violent storm at Sydney. The wind attained a velocity of 70 miles an hour, causing much damage. 25. Heavy gale off Norwegian coast. The coast carrier *Sortland* was wrecked and crew of 13 drowned.

(1925) January 1. A storm off the west coast of Norway. Four steamships ran ashore. 15. A tempest of unusual violence over the north of Norway. Many houses were blown down. 25. A cyclone over Roubourne, Western Australia. The jetty (2,000 ft. long) practically destroyed. 27. Snowstorm over New York. The temperature fell 44° in 28 hours. Mount Popocatepetl was covered with snow. The heat of the volcano usually prevents this. 29. A blizzard at Albany and Rochester, N.Y. The worst for 20 years.

February 6. Five inches of rain at Adelaide fell in two hours. This is the heaviest fall ever recorded in this district. 12. Heavy gale between Oslo and Bergen. All railway traffic was suspended. 14. A violent gale at St. Gilgen, Austria. A passenger train blown over an embankment and 17 passengers injured. Eight inches of rain fell in the Ticino, Italy, in 48 hours. 24. Violent storm off the Japanese coast. Three vessels were wrecked. 25. A violent gale in the Bay of Biscay. Seven of the crew of a lifeboat were drowned.

March 12. A heavy storm over Kuishiu. A 450-ton steamer sunk and 100 passengers drowned. The velocity of the wind reached 80 miles an hour. A snowstorm caused Mount Vesuvius to be covered. 18. A tornado at Annapolis, Missouri, travelled over a length of 150 miles; 26 towns were ruined, and nearly 900 persons killed and 2,800 injured. 21. Cloudburst at Hartshill, Natal. The railway bridge collapsed and a Cape-Natal express fell into the river; several lives lost. 23. Snow fell at Mont Estoril for the first time in living memory.

April 5. A tornado near Miami, Florida. 75 houses destroyed; roofs lifted 200 ft. in the air. Hailstones as large as walnuts reported. 23. Snowstorm at Butte, Montana; 17 ins. of snow were recorded. At the same time a temperature of 93° occurred at Washington.

May 18. A thunderstorm in Switzerland. Many vineyards were destroyed. 21. Thunderstorms occurred at Ohio and Colorado. Six persons were killed. 24. A tidal wave at Lake Ontario. Boats and houses carried inland. In New York City the wind uprooted trees and blew over houses. A drop of 20° occurred in the temperature. 25. Heaviest thunderstorm for many years at Sydney, N.S.W. The torrential rain disorganized traffic. 26. In the early hours another storm broke over Sydney; the heavy rain and strong wind caused serious flooding and damage in the city.

June 8. Torrential rain at Tarbes. Streets flooded and vines washed away. 13-14. Thunderstorms at Berne. Many farmhouses set on fire by lightning. 16. Violent thunderstorm in New York. The Equitable building struck by lightning, causing damage to 37th storey.

July 17. Heavy rain at Hong Kong; 10 ins. fell in 12 hours. 22. Heavy thunderstorms in many parts of France. At Bordeaux hail lay 3 ins. deep in places. 24. Thunderstorm in Paris; 1,000 telephones put out of action.

August 2. Heavy storms in Austria. Much damage caused. Snow fell at a height of 6,000 ft. Terrific snowstorm in the Alps, causing a guide to lose his life. 9. Severe thunderstorm over Denmark. Several persons killed by lightning; 300 panes of glass in one hotel broken by hailstones. 10. Violent storm in Holland, causing enormous damage. Several people killed and over 2,000 people homeless. Over £300,000 worth of damage caused at Borculo. 19. Lightning at Grenoble, causing damage at the Exhibition estimated at £100,000. 24. Heavy rains and thunderstorms in France. Many districts flooded and heavy damage done. 26. Floods and landslides in Japan; 26 persons lost their lives. Snowstorm on the Petersgrat; three lives lost.

September 7. A typhoon burst on Fusan, Korea. Over 2,000 houses severely damaged and many people killed and injured. 13. Heavy rain in Southern States of United States broke the drought which had lasted many weeks. 17. Very heavy rain in the Darjeeling district, measuring in some places 8 ins., caused the roads to become unsafe for traffic. 20. A typhoon swept Southern Japan. Communications were interrupted and a few casualties occurred. 26. Heavy squall near Lingon, Nova Scotia, caused the wreck of a schooner, and six of the crew were drowned. 26. Great flood in China through break of the south dyke of Yellow River. Much damage caused and 1,500 sq. miles flooded.

BRITISH ASSOCIATION.—The ninety-third annual meeting of the British Association for the Advancement of Science was held at Southampton from Aug. 26 to Sept. 2. Professor Horace Lamb, who succeeded Sir David Bruce as President, dwelt in his address on the nature and purpose of science, and considered certain problems connected with the present state of the interior of the earth and with the age of the earth's crust. Extravagant claims, he said, had sometimes been made as to what science could do for humanity. Science must not be blamed for not having fulfilled promises it never made, or even for the uses to which its gifts may be put. Even if all the forces of nature were subdued to the service of man, the results from the point of view of the general good would depend on the nature of man. In his opinion science could have no pretensions to improve human nature.

The following were the Presidents of the various sections, and the subjects of their presidential addresses:—*A*, Mathematics and Physics, Dr. G. C. Simpson, "The New Ideas in Meteorology"; *B*, Chemistry, Prof. C. H. Desch, "The Chemistry of Solids"; *C*, Geology, Prof. W. A. Parks, "The Cultural Aspects of Geology"; *D*, Zoology, Mr. C. Tate Regan, "Organic Evolution"; *E*, Geography, Mr. A. R. Hinks, "The Science and Art of Map Making"; *F*, Economic Science and Statistics, Miss Lynda Grier, "The Meaning of Wages"; *G*, Engineering, Sir Archibald Denny, "Fifty Years Evolution in Naval Architecture and Marine Engineering"; *H*, Anthropology, Dr. T. Ashby, "Practical Engineering in Ancient Rome"; *I*, Physiology, Prof. A. V. Hill, "The Physiological Basis of Athletic Records"; *J*, Psychology, Prof. C. Spearman, "Some Issues in the Theory of 'G', including the Law of Diminishing Returns"; *K*, Botany, Prof. J. Lloyd Williams, "The Phaeophyceae and their Problems"; *L*, Education, Dr. W. W. Vaughan, "The Warp and Woof in Education"; *M*, Agriculture, Dr. J. B. Orr, "The Inorganic Elements in Animal Nutrition." No Germans or Russians were present at the Meeting.

The Meeting in 1926 will be held at Oxford, under the Presidency of the Prince of Wales; and in 1927 the Meeting will be at Leeds.

BARRAGE SCHEME ON THE SARDA CANALS.—Steady progress is being made with the Sarda Canals irrigation barrage scheme on the Nepal-United Provinces frontier in India. This barrage is 1,965 ft. long, placed across the Sarda River, with a complete equipment of steel sluice-gates, piers, and abutments. The steel sluice-gate equipment includes thirty mild steel sluice-gates, 50 ft. span by 11 ft. deep, complete with free rollers, rocking paths, staunching tubes, lifting attachments, and adjustable plates on the bottom of each of the gates; also four mild steel sluice-gates, 54 ft. span by 13 ft. deep, and finally sixteen gates, 24 ft. span by 6 ft. 4 in. deep, with the necessary operating gear. The total cost, including all feeder canals, is estimated at about £5,000,000, the gross catchment or draining area from which the water accumulates being 6,400,000 acres, whilst 1,382,400 acres of land are to be irrigated. The main object is to provide sufficient reserve of water for cultivation, so as to avoid the serious danger of famines in the Province of Oudh, and also to a less extent in the Agra Province, now partly

supplied by the Ganges, Tumna, and Agra canals. It is expected that the work will be completed by 1930.

BAY OF BISCAY FLOOR RAISED.—An upheaval of the sea-bed in what has always been believed to be the deepest part of the Bay of Biscay was discovered by Lieutenant Cornet, the commander of the *Loiret*, returning from Oran. Soundings were being taken, and it was found that the lead brought up sand and registered a depth of 30 fathoms in the "Cup of Antioch," as the Navy calls it. The Minister of Marine embarked on a series of investigations and found that the point at which the sudden elevation was fixed by the commander of the *Loiret* was in latitude 48 degrees 7 seconds north, and longitude 3 degrees 57 minutes east. A serious seismic disturbance had taken place in Japan a few days previously, and it is considered that an upheaval of volcanic origin was responsible for the sudden appearance of land at a depth of 30 fathoms on what has been known for ages as the "deepest dip" of the Bay of Biscay, over which a ship could sail with a mile of water between her keel and the sea-bed. It is probable that the "dip" is the mouth of a silent volcano which has suffered a sudden spasm of activity.

"BIG BEN" HEARD IN NORTH BORNEO.—Among the letters received by the British Broadcasting Company from persons in distant parts of the world who claim to have picked up speech and music broadcast from B.B.C. stations is one from Mr. C. F. N. Wade, superintendent of telegraphs at Jesselton, British North Borneo. He reports a successful reception of wireless telephony from Great Britain. On Dec. 12, 1924, he states, music and speech were heard, and on Dec. 14 the music of the Savoy bands was distinctly received. "On Dec. 16 the striking of Big Ben at 11 p.m. came through very clearly." The reception was definitely confirmed by the fact that Mr. Wade heard eleven strokes of Big Ben at a time corresponding to 11 p.m. Greenwich mean time, so that he could not have been listening to an American, Australian, or Canadian station. The distance from England to North Borneo is about 10,000 miles.

BLUE NILE DAM.—A gigantic engineering work, known as the Sennar Dam, has been constructed on the Blue Nile, about 170 miles south of Khartoum, with the object of forming a reservoir and raising the level of the waters of the Nile to irrigate land for the cultivation of cotton. The work, which is said to dwarf the building of the Pyramids, has cost £12,500,000, and 17,000,000 cubic yards of earth had to be excavated. It was first conceived before the War, but although work was started at the expense of the Soudan Government, under a British guarantee, operations were delayed and were not really resumed until 1919. During the flood season the river above the dam will be turned into a great lake, stretching back for 50 miles, and holding enough water to supply Greater London for two years. Irrigation and field canals of a total length of 9,300 miles have been cut. The Gezira Plain, the area to be irrigated, lies in the fork formed by the White and Blue Niles, which meet at Khartoum. The canalised area for the first instalment of the plan is equal in size to Bedfordshire, while the actual portion of that under cotton will extend to a region half the size of the county of London.

BORING MECHANISM OF THE SHIP-WORM.—Mr. R. C. Miller has issued in the zoological publications of the California University an account of his observations of the manner in which the *Teredo*, or ship-worm, bores into timber. Some naturalists have held that the work was done by the soft fleshy foot, which was supposed to be capable of rubbing away the fibres of the wood, perhaps with the help of a softening secretion. Others have regarded the valves of the shell, with their file-like rows of teeth, as the instruments of boring. Mr. Miller says that the foot is unfitted for abrasive action, and he was unable to discover traces of any solvent in shavings from the inside of the ship-worm's burrow. By laying bare the end of the burrow and sealing a cover-glass over the opening, he was able to watch the *Teredo* at work. He found that the movements of the animal were effected chiefly by means of the suctorial and surprisingly mobile foot. The boring was accomplished by rhythmical movements of the valves of the shell, which were held in position by the combined action of the foot attached to one wall of the burrow and the dorsal fold of the mantle pushing against the opposite wall.

BRIDGE ACROSS THE HUDSON RIVER.—Plans for the construction of a new bridge across the Hudson River have been prepared by Mr. O. M. Ammann, an engineer of New Jersey. He proposes to put up a span of nearly two-thirds of a mile, between supports, at a height of 650 feet above water-level. The main roadway, 80 feet wide, will accommodate eight lines of vehicles, and the walks at each side will be 15 feet across. Two lines of tramways, intended for express traffic, will be placed below the side-walks. The bridge will have a total width of 126 feet, and will stand 210 feet above water-level. The span is double that of the suspension bridge above the Delaware River at Philadelphia, which at present holds the record. The cost of the Hudson River Bridge is estimated at \$7,250,000.

BUFFALO PRESERVATION IN CANADA.—A remarkable experiment in the preservation of the American buffalo from extinction is being carried out by the Canadian Government. Some time ago a number of buffalo were enclosed in a reserve of some 60 square miles near Wainwright, in Alberta. When the protected herd was found to number 10,000, and that the reserve could not support any further increase—the animals had to be hand-fed in winter—the Canadian Government resolved on the bold experiment of drafting 2,000 young animals yearly to a vaster reserve in the north. In July last the first consignment of buffalo was safely delivered at the Wood Buffalo Reserve near Fort Smith, on the Slave River, in the North-West Territories, after a rail and river journey of 600 to 700 miles. Two thousand buffalo will follow each year until 10,000 have been moved. Rounded up from the huge park area at Wainwright, the buffalo, all yearlings and two-year-olds, were driven into corrals and then put into specially reinforced cattle trucks, making the journey to Edmonton without mishap. At Edmonton the cars were attached to the Alberta and Great Waterways train going north to rail-head, 200 miles, where the buffalo were removed from the cars to log corrals, through which they were in turn loaded on to huge scows for the trip down the Athabasca and Slave rivers. On

arrival at the Wood Buffalo Reserve, the animals were liberated, when they at once made a mad dash for the shelter of the woods, where they will remain for the rest of their lives.

CALIFORNIAN EARTH MOVEMENTS.—A comprehensive scheme of research is being carried out in California, with the object of investigating the alarming movements to which the earth's crust in that region is subject. The United States Coast Survey and the Hydrographic Office have triangulated the land and contoured the ocean floor, and the Geological Survey, aided by the universities of California, are studying the geology in detail. Great faults are found along the Californian coast, for the Sierra Nevada rises to more than 14,000 feet on the east, while the ocean floor drops sharply to a depth of 12,000 feet on the west. The danger zones of structural instability are being carefully mapped, so that in future definite predictions of the places where earthquakes may occur may be made from a knowledge of the direction and magnitude of the creeping and tilting movements of the land.

CELTIC VILLAGES ON SUSSEX DOWNS.—As the result of investigations carried out at Park Brow, near Cissbury, by Mr. Garnet Wolseley and by Mr. Reginald Smith, of the British Museum, important discoveries have been made of the remains of villages of the late Bronze Age and of the Iron Age, and of a Celtic tribe which persisted right through the period of the Roman occupation until it was destroyed by the Saxon invaders. Evidence of three distinct colonies of human habitation were found. The first and oldest is half-way up the hill. Here, it is thought, was a domestic hearth built as far back as 1000 B.C., or even earlier, by a race of men who dwelt in cone-shaped huts of mud compressed on to saplings which served as laths. These people knew how to weave, and they made a rough sort of pottery from coarse clay and ground flints, clumsy vessels which were not strong enough to resist the heat of a fire. On the brow of the hill was found a Celtic village, and the probability is that a new race invaded this part of England from the West, and with their keener brains, and iron weapons about which the Bronze Age men knew nothing, slew the natives, ploughed up their village, and built another one higher up the hill. Here the find was that of the earliest Iron Age village. Many kinds of pottery of a finer texture distinguished the new type of settlers, and all of it was distinctly superior to anything found half-way down the hill. These people migrated to the valley below, where in turn they were overcome by the Roman invaders, and then apparently the life of this Sussex hillside was wiped out by the Saxons.

CENSUS OF THE ATOM.—Sir Ernest Rutherford, in a series of lectures on "The Counting of Atoms," at the Royal Institution, said that in the last twenty years, and particularly since the discovery of radium, scientific men had been busy counting and weighing atoms, and these investigations had resulted in a complete experimental verification of the atomic theory. This census of the atom has disclosed both the enormous number and the incredible smallness of the atoms in the smallest particle of matter. Something like 100,000,000 could be placed side by side in the space of an inch, and the radius

of a single molecule was somewhere between one 50,000,000th and one 10,000,000th of an inch. Many years ago Faraday obtained gold films about 1,000,000th of an inch thick, which Sir Ernest Rutherford estimated contained from ten to fifty layers of molecules.

CRESWELL CRAGS.—A joint committee of the British Association and the Royal Anthropological Institute have explored an undisturbed "occupation site" at Creswell Crags, Derbyshire, opposite a cave known as Mother Grundy's Parlour. The work resulted in the discovery of rude implements of quartzite, more than 1,500 flint flakes and implements, a number of bone tools, and various bones of pleistocene animals. Examples of paleolithic art in the form of engraved bones were also unearthed. One of them bore a spirited drawing of a reindeer, and another a part of a bison with a head. The flakes and hand-axes, made from quartzite pebbles of late Acheulean form, were associated with remains of the cave lion, the cave bear, and the hyena, all of which are said to represent the extreme northward extension of paleolithic man in Britain. In a later stratum, belonging to the reindeer period, were flint tools of Upper Aurignacian type, tools made from the antlers of the reindeer, and engraved fragments of bone. A fire-hole was scooped out of the basement bed and ringed with flat stones.

DAVENTRY WIRELESS STATION.—The largest and most efficient broadcasting station in the world, having a radius of 100 miles, has been built at Daventry, and was opened on July 27 by Sir William Mitchell-Thomson, the Postmaster-General. There was a difficulty in choosing the actual spot near Daventry, because such matters as a space reasonably flat over some thirty acres, geologically suitable for mast foundations and wireless "earths," and as high and free from any masking influence, had all to be considered at the same time. The site chosen, Borough Hill, which is about one mile south of Daventry, fulfils all these conditions. The aerial is supported by two triangular steel masts, each 500 feet high, and placed 800 feet apart. The power-house is in the centre beneath the aerial. The special earth system consists of thirty-six huge zinc plates, each measuring three feet by six, and sunk in the form of a circle of 100-foot radius round the lead-in insulator.

DEAD CITY OF MONGOLIA.—Colonel Kosloff, a Russian explorer, and Sir Aurel Stein, have been conducting a series of investigations in the "dead city" of Khara-Khoto, Mongolia, a city which was flourishing in the twelfth century, and whose foundation is believed to date at the beginning of the Christian era. Although the city now is a mass of tottering ruins, the books, silks and draperies found in protected positions had been well preserved by the dry air. The library of some 2,000 volumes and many paintings and tapestries that were found in a prayer tower were so excellently preserved that the books, for instance, in the words of Kosloff, "might have been issued yesterday." Some of the books had been written by hand, but others had been printed from block type. This discovery puts back by many years the estimated date at which the Chinese began to print with type. Another find was an original copy of the stories of "Sinbad the Sailor,"

written in Persian. Some original fragments of the teachings of the Great Khan, as well as a copy of the debt act of the period and numerous pages of business correspondence, also were found. There are said to be 80 cartloads of gold and silver, jewellery and other treasure buried about the city somewhere by a ruling prince who feared his city would be captured by besieging Chinese. The city was captured, but the Chinese say the treasure was never found. The disappearance of the rivers which once watered the valleys of the region caused the city to dwindle until the caravan routes deserted it and it was left in a waterless wind-eroded desert.

ELECTRIC TRAINS TO GUILDFORD.—The longest electric run on any railway in the United Kingdom was inaugurated in July, 1925, when the Southern Railway opened the two electric routes from Waterloo to Guildford and Dorking North, representing 67 track miles. The total cost of electrification was about £833,000. The new trains are scheduled to cover the 30 miles between London and Guildford in 49 minutes.

ELECTRIC TYPEWRITER.—Steady advance is being made in the development of the electric typewriter. The essential feature of the latest machine before the public is a toothed shaft which crosses the instrument under the type-levers. The shaft runs by means of a small electric motor which can be attached to a plug at 300 revolutions per minute. As the keys are struck, whether lightly or heavily, the type-levers engage the teeth of the rotating shaft, operating them as the fingers would do. A method is provided for increasing the strength of the impression so that several carbon copies can be taken, and a simple apparatus prevents two keys being pressed down at one time.

EVOLUTION AT WORK IN ENGLAND TO-DAY.—Sir Arthur Keith, in a lecture at the Royal Institution, stated his belief that evolution was at work in England to-day. There had been no great change in the stature of the inhabitants of these islands since the close of the ice age, 12,000 years ago. The heads of our ancestors in the third millennium B.C. were long and narrow. About the beginning of the second millennium Eastern and Southern England were settled by persons with short, wide skulls. Measurements made on living Englishmen lead to the belief that our head form is changing, but there is no evidence of increase in brain capacity. He had made a minute comparison between fifty skulls of men and women from English graves, some of which were as old as the Pyramids, and skulls of the eighteenth and nineteenth centuries, and had come to the conclusion that evolution was still at work on our bodies. Our palates had changed, the bony entrance to the nose had changed, our jaws had receded, our eye-sockets had changed in outline, our cheek bones were less prominent, and our faces were narrower.

EYE AS RADIO RECEIVER.—Sir Oliver Lodge, in his presidential address to the Radio Society of Great Britain, outlined what may be regarded as a new theory of vision. He asked what stimulated the nerves of the eye. He believed, he said, it is the electrons that are thrown off by the atoms with considerable violence. What

the nerves feel is the shock of the ejected electron which strikes them with the speed of some thousand miles a second. This is the theory of vision which is in process of being born. Light, as it were, pulls the trigger, stimulates the atoms which emit electrons. It is a problem which must be worked out by physicists and physiologists together. The eye is thus like a receiving instrument for detecting radio waves of extremely short wave-length. It was the first wireless receiving instrument used by man, and by most of the animals. The property was possessed by vegetation also, but the result was not vision; it was chemical action. The growth of vegetation was a photo-electric phenomenon, a view which was strengthened by the discovery that plants are stimulated by a discharge of electricity in their neighbourhood.

FOOTBRIDGE OF THE ICE AGE.—An important prehistoric find has been reported from Kaerde, near Dortmund. It is a perfectly preserved wooden footbridge, which had been used to enable Ice Age man to cross a marshy river-bed. Professor C. Gagel estimates the bridge's age at about 50,000 years—ten times as old as the Pyramids—and says that the high technical skill and intelligence displayed in its making must lead archaeologists to revise their judgment of prehistoric man's capacity. The bridge, which is about forty yards long, consists of split and carefully planed oak planks, fastened together by oak clamps at intervals of a stride. Professor Gagel says that science is confronted with a complete riddle as to how the Ice Age inhabitants could have turned out so skilled a piece of carpentry by means only of implements made from the teeth of mammoths. From the care and trouble which the prehistoric carpenters took over the use of the wood in the bridge's construction—using it to the utmost advantage—he concludes that as long ago as 50,000 years oaks were getting scarce in Western Germany.

GALILEE SKULL.—Mr. Turville-Petre, while excavating on behalf of the British School of Archaeology in Jerusalem, in one of the caves at Tabgha, near the Lake of Galilee, discovered a human skull of an extremely primitive type, closely resembling the Neanderthal type of primitive man whose remains have been found in Europe, but never before in Asia. It has been named the Galilee skull. It was brought to England and examined by Sir Arthur Keith, who stated that the skull threw important light on the problem of the appearance of modern, or Neanthropic man, and his replacement of Neanderthal man. The Galilean man was a member of the Neanderthal species, but one which made an approach in several respects to man of the modern type. In point of size the brain of the Galilean fell only a little short of that of the average Englishman of to-day. The first inference from the discovery, he says, seems to be that the ancestor of modern man has to be sought for still further to the east or, perhaps, to the south, for the Rhodesian man found in the Broken Hill mine, although he has more massive eyebrow ridges than have been seen in any Neanderthal skull, yet is of our type. The Galilee skull shows that in all parts of the world, even as late as the middle of the Pleistocene period, mankind of all species was, so far as bodily features were concerned,

still in a primitive state, and the Near East possibly contains valuable evolutionary data.

ICE AGE MEN IN THE THAMES VALLEY.—Sir Arthur Keith, in his Hunterian lectures at the Royal College of Surgeons, surveyed some of the more important discoveries of fossil man in England during the last ten years, and spoke of finds, chiefly portions of skulls, in the Thames Valley, where, he said, men very much like ourselves were living in the Ice Age, 10,000 to 12,000 years ago. The remains found in Somerset included some of the people with round heads, who also lived in the Ice Age. Before this discovery it was thought that this type did not exist before the end of the Neolithic period. He had come to the conclusion that evolution and growth were the same thing, and that the lack of knowledge of certain diseases was largely due to lack of knowledge of growth. He had found in these ancient skulls evidence of tuberculosis in early man, and also of some of the deformities which were known to-day.

JELLY-FISH VITALITY.—Messrs. de Beer and Huxley have conducted a series of experiments on the vitality of the jelly-fish. They found that the common jelly-fish, *Aurelia aurita*, could be kept alive without food in a laboratory aquarium for as much as 38 days, living at the expense of its own tissues. During that period it underwent a progressive decrease in size. The bell began to shrink first, the oral arms later, the tentacles and thread-cells disappeared, and the gastro-vascular cavity closed up. The bell continued its pulsations until an advanced stage of the process had been reached.

LONDON ATMOSPHERE.—In a lecture at the Royal Society of Arts on the conditions of the atmosphere over London, Dr. J. S. Owens stated that while over the North Sea, off Spurn Head, there are 140 particles of dust per c.c. of air, there are over London on an ordinary winter day 4,000 or 5,000, and during a fog 100,000 per c.c. During a working day the amount of suspended matter in the air over London increases from six o'clock in the morning till a little after noon, and then decreases to a minimum at six o'clock the following morning. It is least on Saturdays and greatest on weekdays. The tarry nature of the suspended matter shows that it is mainly due to smoke from domestic fires, as factory smoke is almost free from tar. There has been a reduction of suspended matter by about 40 per cent. in the last eight years.

MEDAL FOR SIR FLINDERS PETRIE.—The first presentation of a medal attached to the Board of Archaeology in the University of London was made by Prince Arthur of Connaught to Sir Flinders Petrie, in recognition of his half-century of work for archaeology. The medal bears Sir Flinders Petrie's bust on the one side, and on the other the searching ibis, the hieroglyph of "finding," placed before the head of Khufu, which was found by Sir Flinders.

MERCURY INTO GOLD.—Mr. H. Nagaoka, of the Tokio Institute of Physical and Chemical Research, claims, in a letter to "Nature," that mercury has been transmuted into gold at that institution. He describes how under the influence of an electric discharge of tremendous voltage purified mercury gradually turned into

fine globules. These were tested chemically and found to contain gold. An expert in gold assaying extracted small specks of gold from the results of the experiment. "Grave doubts were, however, expressed by critics as to the purity of the mercury, and also as to the possible presence of gold in the chemical laboratory, due to frequent treatment of the metal." Accordingly further experiments with mixtures of mercury and carbon were carried out with the most extreme care, and they confirmed the results of the earlier attempts.

METEOR CRATER OF ARIZONA.—Exploration has been conducted into the character of the gigantic meteorite which has been held responsible for the origin of the remarkable crater of Canyon Diablo in Northern Arizona. In 1909 Mr. D. M. Barringer predicted that the main body of the meteorite would be found under the southern wall of the crater, and an exploratory boring of 1,346 feet gave evidence of highly oxidized meteoric iron. After passing through 30 feet of this substance no further progress could be made with the boring tools. Mr. Barringer suggests that the main meteorite approached the earth from the north at an angle of 45 degrees, leaving a trail of the Canyon Diablo meteorites, many of which have been found to contain platinum. A company has been formed to mine the deeply buried mass, which has been estimated to weigh 1,000,000,000 tons, and to contain platinum to the amount of one ounce to five tons.

MOSQUITO CONTROL.—The new buildings of the British Mosquito Control Institute, on Hayling Island, were opened by Sir Ronald Ross on August 31. A few years ago Hayling Island was in places infested by mosquitoes, and Mr. J. F. Marshall, a prominent resident, started a campaign against the pest. The variety of mosquito was identified, and its breeding-grounds located and destroyed. Mr. Marshall, almost entirely out of his own resources, then built the Institute, which has a demonstration museum, laboratory, a drawing and record office, photographic room, workshop, and living accommodation for research workers and students. With the aid of correspondents, Mr. Marshall has compiled much information about British mosquitoes and the best methods of exterminating them. Requests for advice are frequently received from various parts of the country where mosquitoes are troublesome. On its new basis, the Institute will be able to do still more effective work in stamping out the mosquito plague.

MOST POWERFUL LIGHTHOUSE.—The most powerful lighthouse in the world has been erected on Mont Afrique, on the plateau of Dijon in France, for the purpose of guiding aircraft proceeding from and to Paris, Switzerland, Italy, and Africa. The lamps consist of eight powerful electric arc lamps, with dioptric lenses, divided into two groups of four. The light from each four is converged into one beam, one beam facing one way and the other beam the other way, each beam having 1,000,000,000 candle power. The lantern measures eighteen feet across, and each lens is five feet in diameter. Lamps and lenses are mounted on two circular platforms, one above the other. The platforms are mounted on ball bearings on a circular pivot,

about which they are rotated by an electric motor. On a clear night the light of the beams is visible for 300 miles.

MOTH DAMAGE PREVENTION.—A method of preventing the damage caused by moths and moth larvae has been discovered by Dr. Meckbach, a German chemist. The most searching tests have proved that Eulan, as it is called, is odourless, harmless to the human skin or fabrics, and that it affords permanent protection against moth. Being of a metallic nature, it is not volatile or ephemeral in action. An aqueous solution is made, in which the material to be protected is immersed in the final stages of manufacture, or, by dissolving the powder in benzine, it can be used in the dry-cleaning process. Before much headway could be made with the experiments, which extended over eight years, it was necessary to throw more light on the habits and life-cycle of the moth, and an entomologist was engaged, who, after nearly three years' study, produced an elaborate monograph. Over 1,000 eggs a day were afterwards required for research and tests. An English estimate of the value of articles destroyed by the clothes moth in a year is £1,000,000; an American estimate is £40,000,000.

MOTOR-SHIP OF 20,000 HORSE-POWER.—The *Asturias*, which has been built by Messrs. Harland and Wolff for the South American service, is claimed to be the most powerful vessel afloat. She has a gross tonnage of 22,000, and her four-cycle double-acting motors are the largest marine Diesel engines constructed. Their outstanding feature is the fact that the 20,000 h.p. developed will be delivered on two shafts. The adoption of internal combustion engines for so large a power has not necessitated any departure from the normal twin-screw arrangement. Accommodation provided for 1,740 passengers and crew.

MOUNTAIN INDICATOR ON BEN MACDHUI.—Members of the Cairngorm Club have succeeded in erecting a mountain indicator on the summit of Ben Macdhui, 4,296 feet above sea-level, the highest of the Cairngorm mountains, and the highest ground in Britain except Ben Nevis. The summit of the mountain is a wilderness of stone slabs and rough gravel, without a blade of any vegetation. Owing to the fact that the temperature on the top of Ben Macdhui is at freezing point or below it every night during eleven months of the year, the only time when an indicator, with a base of stone and lime, could be built was the latter half of July, when frost was least likely. Careful investigation revealed the fact that the nearest point where water could be obtained was half a mile east-north-east from the Cairn, and as every day of the building was misty, a long white thread was laid from the summit to this point so that the water-carrying party would not get lost.

ORIGIN OF AMERICAN MAN.—In the *Quarterly Review* Mr. Lewis Spence, in the course of an article on the origin and antiquity of man in America, concludes that the New World received its main human stock from Asia at a time when the eastern portion of the continent had developed only a slender degree of culture at the close of the glacial period or maybe at one of the recurring periods of mildness. There

were later accessions. European influence may be seen in the banner-stones and the stoue gouge of New England and further north. The architectural remains of Central America and south-eastern Asia, he says, have closely similar features, and the cult of Quetzalcoatl in his earlier forms shows many analogies to Buddhism. Polynesian influences have been found in many artistic forms and customs in South America. He holds that the extreme view of, the entirely indigenous origin of American culture cannot be maintained.

PHOTOGRAPHS BY WIRELESS.—Interesting experiments carried out at Radio House showed that it was possible to transmit photographs by wireless telegraphy from London to New York. The transmission of a half-plate film by the process occupied about twenty minutes. A photographic film is placed in a revolving drum and an electric transmitting circuit is affected by a beam of light shining through the film on to a photo-electric cell. By this means the ordinary wireless telegraph circuit is operated and the illustration is reproduced by a fine pen at the distant station. After each rotation of the drum the photographic film is automatically moved by a fraction of an inch. Transmission was on a basis of a movement of $\frac{1}{128}$ th of an inch for each revolution, but for ordinary reproduction the photograph might be moved $\frac{1}{64}$ th of an inch. Reproduction is obtained by a succession of lines, in which detail is conveyed by varied shades of markings influenced by the degree of light passing through the film to the photo-electric cell.

PHOTOGRAPHS OF AIR EDDIES.—Under the direction of the Aeronautical Research Committee ingenious experiments have been made on the operation of air currents in relation to aeroplanes. The deflection caused to a stream of air when it strikes a blunt object, like a rectangular block of wood, was photographed. Then the edges of the block were rounded off in different ways, and the consequent alterations in the air stream were again photographed. The experiments were carried out in a wind tunnel by means of powerful arc lamps, and the photographing of the air was assisted by the introduction of a smoke jet of ammonium chloride into the stream of air. The photographs show the direction followed by the jet as it struck and passed the blocks. The results will assist the high-speed aeroplane designer in determining the shape of those parts of the machine which cannot be perfectly streamlined.

PRINTING BOOKS WITH A CAMERA.—Mr. J. R. C. August and his brother-in-law, Mr. E. K. Hunter, working secretly for four years in a room in Walworth, London, have perfected a machine which, it is claimed, will revolutionize the art of printing by rendering metal type obsolete, and substituting for that a photographic film on which letters, figures, and other characters have been photographed. By means of a keyboard operated like a typewriter letters and characters from a "master-film" are projected one by one in rapid sequence on to a sensitised photographic film base and photographed. This exposed film, when developed, corresponds to the "set-up metal" or type-line of a modern composing machine. Having

reached this stage, printing may be done in a dozen different ways—by lineblock for letterpress printing, by direct litho, by photographic processes from plate or stone, or by the off-set photo-litho throughout. Different sizes of type are obtained by an adjustment of focus of the lens of the camera which projects the "master-film" image. A single spool, two inches in diameter, of "master-film," three inches wide, contains the equivalent of 2,700 founts of type. It is claimed that the invention will save millions of pounds to the printing industry, and that the application of wireless telegraphy to it will enable a machine installed in, say, London, to "set up" the same matter simultaneously in many provincial towns.

RAILWAY ENGINES WEIGHING 178 TONS.—Among the new engines in the centenary procession of locomotives and trains which filed over the route of the old Stockton and Darlington Railway was one with 20 wheels. The locomotive was a "Garratt," built by Messrs. Beyer, Peacock & Co., for the London & North-Eastern Railway. It was the first of its type built for a British railway, the first to have two three-cylinder engines, and also the heaviest, weighing 178 tons. The boiler for this huge engine is 7 feet in diameter, and the tractive effort is equal to two L.N.E.R. 2-8-0 coal engines. It was built for use as a banking engine on the Worsborough branch, between Wath and Penistone, which is 7 miles long, all on a rising gradient with 2 miles at 1 in 40. The trains weigh about 1,000 tons, and have hitherto been worked with two train engines in front and two or three banking engines behind. The "Garratt" will replace the banking engines. The American Locomotive Company has built for the Chesapeake and Ohio Railway what is said to be the largest locomotive engine in the world. It weighs 252 tons, and the tender an additional 94 tons. The boiler is 57 feet long, and the maximum diameter of the barrel 8 feet 8 inches. The fire-grate is 14 feet long by 8 feet wide, and is capable of burning $5\frac{1}{2}$ tons of coal per hour, which is supplied by mechanical stokers. The engine has 20 wheels, two sets of eight coupled together in fours at each side, and a pair at each end. The coupled wheels have a diameter of 4 feet 9 inches each. Two sets of engines drive the two sets of coupled wheels, each have two cylinders of 23 inches bore, and a stroke of 32 inches. The engines develop 3,902 horse-power with a steam pressure of 205 lbs. per square inch, which ensures a pulling force of 45 tons. The engineers are provided with gas masks, which are supplied with fresh air from a reservoir.

RAILWAY TUNNEL OPENED UP.—The famous Chevet Tunnel, constructed by Stephenson nearly ninety years ago, is being laid open to the sky, and the permanent way exposed. The tunnel, which is 702 yards long, is between Walton and Syndale, near Wakefield, on the London, Midland, and Scottish Railway, and the work is being carried out from motives of safety, as a new coal mine is being driven under the tunnel. A large slice is being cut out of the hill, and when the work is completed the line will pass through what is believed will be the deepest cutting in England, 93 feet deep, and 90 yards wide across the top. At the same time the permanent way is being widened for a distance of 4 miles, and two additional lines of

rails are being laid. Although the tunnel is covered by over 1,000,000 tons of earth and rock, the work is being carried out without interruption of the ordinary traffic. Elaborate precautions are being taken to ensure the safety of trains. All rock blasting operations are suspended whenever a train approaches. By means of electrical devices immediate warning is given of any obstruction falling on the line where the roof of the tunnel is being uncovered.

ROMAN SIGNAL STATION AT SCARBOROUGH.—The excavations disclosing a Roman signal station at Castle Hill, Scarborough, have now been thrown open to the public. The Castle Hill divides the north and south bays of Scarborough. By the excavations which were carried on for four years under the superintendence of Mr. F. G. Simpson, Hon. F.S.A. (Scotland), an authority on Roman antiquities, three quite distinct types of ancient remains have been disclosed in a plot of ground, half an acre in extent, on the seaward extremity of the hill. They are a village of the Bronze Age, the Roman signal station, and three chapels, one earlier and two later than the Norman Conquest. All three are surrounded by graveyards. The excavations have been conducted with the approval of the Government and the Corporation of Scarborough. The masonry now visible belongs mostly to the Roman signal station, which was one of a series erected on the headlands of the Yorkshire coast to aid in the defence of Britain against the Saxon raiders.

ROTOR-SHIP.—Herr Anton Flettner, a German engineer, exhibited outside Kiel Harbour his sail-less sailing ship "Buchan," otherwise known as the rotor-ship. For its propulsion the ship needs nothing else but two vertical metal cylinders, which revolve with the help of two small electric motors of 15 horsepower each. The revolving cylinders convert the wind into a strong air-current, whirling it horizontally round their surface until it meets the wind on the other, the rear, side of the cylinders. Here the impact between the two turns wind and air-current alike in the direction of the cylinders, thus exerting a strong pressure on it, pushing the ship ahead. There is also a small vacuum which helps by sucking the ship forward. Each cylinder rotates on a pivot mounted on a circular turret or cylinder inside of it, which reaches far down into the hull, where its gearing connects with an electric motor.

SEAL PRESERVATION.—The French Government has decided to create a preserve for seals and penguins, which are destroyed wholesale for their oil and feathers, on French territories in the Southern Ocean. These include Kerguelen, the Crozet Archipelago, St. Paul and Amsterdam Islands, and the Adélie Land sector of the Antarctic continent. In these areas the destruction of either the seal or the penguin will henceforth be illegal.

STONE AGE IN THE SAHARA.—Captain Marius Prevost has described the stone implements found on many sites in the oasis of Kavar, Eastern Sahara, recently explored by him. They occurred in such numbers as to suggest that the oasis supported a considerable population from an early date. Imported flint, quartz, siliceous limestone, hematite, and volcanic rocks were

used in their manufacture. Certain implements were worked sometimes on one side, sometimes on both, and while some suggested a Paleolithic origin, others suggested that they had been made in the Neolithic age. The neolithic industry, it is pointed out, shows strong affinities with that of Egypt, which, if contemporary, would indicate an antiquity of 9,000 to 12,000 years; and the Paleolithic would have to be assumed to be older still.

SUN CLOCK.—Professor W. E. Cooke, the Government Astronomer of the Sydney Observatory, New South Wales, has invented a new kind of sundial, known as the sun clock. It is provided with a movable pointer geared to the hands of an ordinary clock-face. At any time when the sun is shining the pointer is turned as directed in one simple motion, and the time is instantly read on it as on an ordinary clock-dial to within half a minute. The seasonal variations of solar time and the difference due to the longitude of the place in which it is set up are compensated for in the design of the instrument.

TALKING MOTION-PICTURES.—In a lecture on "Hearing by Light," Professor A. O. Rankine indicated the possibility of talking motion-pictures in the not distant future. He showed by experiments how, by means of a photophone transmitter in one room and a receiving end in another, comprising a selenium cell, battery and telephone, it was possible to convey language along a line of light reaching from the transmitter to the receiver, and falling on to the selenium cell. The sounds heard on the telephone were not the same sounds as those imparted to the receiver, but were re-manufactured sounds practically the same in character. Talking motion-pictures were an amplification of this kind of thing. If a beam of light could be made to fluctuate in accordance with speech or other sounds, the thing could be done in two stages. They could make the beam of light fluctuate and take a talk record of it and a photograph also. By allowing the light to fall on a moving film they would get a photograph which was really a photographic record of the sound made—a sort of optical gramophone. If they got on one and the same film a sound record of the corresponding picture record they could reproduce the two together. The synchronism was bound to be perfect, because they were both together on the same film.

TAUNGS SKULL.—The discovery in November, 1924, of the Taungs skull, about eighty miles north of Kimberley, in Bechuanaland, was said to afford *prima facie* evidence of the occurrence at a remote period in South Africa of a pre-human stock, neither chimpanzee nor gorilla, and differing in many respects from any anthropoid previously known. The fossilized fragments when fitted together revealed a cast with almost the entire face of what appeared to be anthropoid, but Professor Dart on closer examination claimed that it had humanoid characters. The divergence from the anthropoid and its approximation to the human stock was exhibited in the character of the cranium as a whole and in the formation of the brain. The position of the foramen magnum indicated that this sub-human type was well on the way to acquiring an upright posture, with a consequent increase of intelligence. Sir Arthur Keith, after careful study of casts of the

skull, said that in every essential respect the Taungs skull is that of a young anthropoid ape, possessing a brain which in point of size was actually smaller than that of a gorilla of corresponding age. Only in the lesser development of teeth, jaws and bony structures connected with mastication can it claim a greater degree of humanity than the gorilla. Professor Dart, he says, has made an important discovery. He has shown that anthropoid apes had extended, during the Pleistocene period, right into South Africa, into a land where anthropoid apes could not gain a living to-day. He has found an extinct relative of the chimpanzee and gorilla, but one with more man-like features than are possessed by either of these. But Java-man (*Pithecanthropus*) still remains the only known link between man and ape.

THYROID GLAND FOR PLANTS.—Sir Jagadise Bose, of Calcutta, has been conducting a number of experiments at his Research Institute with the object of showing how various chemicals affect the life of plants. With the aid of a common water-weed, called the *Hydrilla*, found in the ponds in the lowlands of Bengal, he found that it gave out oxygen under the sun's rays. He then used his new super-retina, which detects all other octaves of light beyond that with which the human eye is familiar, and with the aid of different electric wave lengths showed how rays of light were able to affect the breathing out of the *hydrilla*. This proved that the weed responded to light octaves which were invisible to us. Sir Jagadise then gave the weed doses of poison, of alcohol, of other stimulants, and last of all of extract from the thyroid gland. The weed collapsed when poison was administered, the breathing out process being completely arrested. It was stimulated by alcohol, but showed a severe reaction, falling down to a state of coma soon after the arc of the stimulus was over. The same thing happened when ether was administered. After the thyroid gland dose, however, there was no reaction, and the breathing out process increased by over 100 per cent.

TWO NEW ELEMENTS.—By means of X-ray spectroscopy a German chemist in Berlin has discovered two new elements, which he has named "masurium" and "rhenium," after the eastern and western borderland of his native country. The discovery has been confirmed by chemical analysis, and the two substances have been obtained in minute quantities from platinum ore and a number of other mineral substances. The atomic number of "masurium" is 43, and that of "rhenium" is 75. These two elements help towards the discovery of the 92 elements which scientists believe to constitute the full complement of chemical elements forming the crust of the earth. Numbers 61, 85, and 87 are yet to be discovered.

UR EXCAVATIONS.—During the final month of the season at Ur excavations brought to light a remarkable stela which is regarded as the most important monument on the site, ranking with the stela of the vultures in the Louvre. The reliefs show Ur-Engur, founder of the Third Dynasty and the builder of the Ziggurat. Two series of clay tablets were also found, one dating back to 3500 B.C. and the other to 2000 B.C., which give a comprehensive record of the

economic organisation of the temple, showing the receipts for the tithes, the balance-sheets of amounts received in kind from the townsmen and the farmers. The townsmen paid in hides, gold, silver and copper. The food paid as wages to the women-devotees, who worked at weaving for the temple, was proportionate to the labour done, and children and old women received less than the young women.

WATCHMAKERS' OIL.—Watchmakers' oil, the finest of its kind in the world, is obtained from the jaws of the porpoise by the Passamaquaddy Indians who live on the coasts of New Brunswick, Nova Scotia, and Maine. Hunting in canoes or small boats, they shoot the porpoises and then extract the oil from them by rude appliances. On the Indian Beach at Grand Menan, an inlet of the Bay of Fundy, are to be seen curious structures consisting of two upright pieces of wood surmounted by a cross-piece from which large kettles are hung by chains. Stones are piled in a semi-circle under each kettle, and inside them a fire is made and allowed to burn fiercely until the stones are very hot. The kettles into which the blubber had been poured are then lowered over the stones, and just enough fire is kept going to melt the blubber slowly. When melted the oil is skimmed off and poured into cans of about five gallons capacity. But it is only from the jaws of the porpoise that the real "watchmakers' oil" is produced. The jaws are hung up in the sun, and the oil as it drips from them is caught in cans placed below. Only about half a pint comes from each jaw. The oil commands high prices, and in late years it has become so expensive that its use in the delicate machinery of lighthouses has been abandoned.

WATER SUPPLY FOR PORT SUDAN.—For several years the authorities of Port Sudan have been troubled by the absence of an adequate supply of drinking water in the town, especially owing to the needs of the railways and the ships. That difficulty has now been overcome by the provision of a supply from the Khor Arbaat, a rocky and sandy valley about 18 miles distant from Port Sudan, where an underground river was discovered. Two wells have been sunk just above the mouth of the Khor, and the water is delivered by gravity through about 18 miles of pipeline; the diameter of the pipe at the head is 8 in., and this diameter continues for about a mile. Work at this point was made a little difficult by the fact that the pipeline had to be laid in a deep trench cut through the valley bottom, and it was considered advisable to provide at the outset sufficient capacity to allow of a considerable increase in the demand for water. For the remainder of the distance to Port Sudan the pipe is 6 in. in diameter, as the work of laying that part of the line was comparatively easy, and an increased supply can be obtained by doubling the line. Such additions are not likely to be needed in the near future, for the estimated capacity of the pipeline is about 200,000 gallons a day, and only half that quantity is at present required by the town. It is expected that the water will be suitable for locomotives and for the ships calling at the Port. It will also be much cheaper than the condensed water which has hitherto been provided for drinking purposes.

WRITING BY WIRELESS.—An ingenious method of wireless tele-writing has been invented by Dr. Fournier d'Albe, who has succeeded in transmitting a written message with complete accuracy. At the transmitting end the original writing is passed through an apparatus resembling an optophone, which analyses the letters into strips, each controlled by a note of a given frequency. The note sounds only when a blank portion of the letter is passing through. Seven notes are transmitted simultaneously, and at the receiving station they operate seven different resonators, each resonator picking up only its own note. A small mirror on the reed of each resonator throws a beam of light on a moving photographic film. Each beam makes a narrow line of light on the film, and as the film moves the seven lines of light make seven broad bands. Each of these lines of light traverses a narrow slit, and so long as the note is not sounding the whole of the light passes through that slit and affects the film; but when any of the notes is sounding, the vibration of the corresponding reed draws out the line of light into a wide band, which throws the light above and below the slit

so that it no longer affects the film. The consequence is that the negative shows a corresponding blank which in the positive would be a black patch. These black patches make up the original letters.

X-RAY PENETRATING RECORD.—Mr. A. E. Pullin, Director of the Radiological Institute at Woolwich, stated in a lecture at the Royal Society of Arts how thoroughly X-rays were used in Government Departments for the examination of flaws in heavy castings. He had been able in his laboratory, to extend the penetration of X-rays from three inches to four inches of steel. This was a record. Mr. Pullin threw on the screen a series of slides which varied from heavy castings down to a radiographed baby mouse, which showed a fractured skull, and from his exhibits he drew the conclusion that the very high factor of safety at present insisted on in structures of all sorts could be reduced very considerably if only radiographic methods were more widely employed. X-rays made it possible to investigate not only ordinary structures but also the structure of the crystal.

The Year's Music.

OPERA.—The principal event of the year has again been the Covent Garden season of German and Italian opera. Few of those who made an outstanding success of the 1924 season reappeared, a circumstance which is to be regretted, for the singers who were invited to replace them did not, in every case, rise to the occasion. It was, however, interesting to see and hear the much talked-of Madame Jeritz's Tosca. Experts, who are competent to judge, found that the newcomer forced her upper notes, thus rendering the quality ugly and hard, though in *mezza voce* passages she pleased exceedingly. Madame Jeritz's reading of the part also satisfied those who are most difficult to please: she puts herself in the skin of the character, as the French say. Meanwhile, the latest Tosca left these hospitable shores with a voluminous collection of press cuttings, all of which declare her to be vocally perfect, and the best draw that Covent Garden has known since Madame Ternina (as Tosca) drew all London. Decidedly, she is to be congratulated.

The other Italian works included the one hundred and nine year old—and ever fresh—"Barbière" and "Lucia di Lammermoor" (with Madame Toti dal Monte as the sprightly Rosina and the demented Lucia), "Aida," which suffered from lack of rehearsal, and "Rigoletto." In the last-named Joseph Schwarz, an extremely intelligent Russian artist, sang the title rôle. His voice, though over-praised by critics who do not know what constitutes a good voice, was used with considerable skill, and in the duet of the second act and in that of the third act he thoroughly justified the applause which rewarded his well-directed efforts. Still, one wished that in certain phrases the quality of the upper notes had been more brilliant. The Gilda was Madame Norena, an extremely competent singer, with a welcome sense of dramatic emphasis. "Fedora" and "Andrea Chénier" also were given, and without improving upon the impression which they made when last per-

formed at the Royal Opera. Indeed, "Fedora" is poor stuff, so much so that few of those who heard it were anxious to repeat the experiment. Fortunately, an agreeable contrast was furnished by "Madame Butterfly," which, despite some dull moments, never fails to please. Miss Margaret Sheridan, of Milan fame, was the Butterfly; she proved to be a fairly capable performer.

The German venture was much like its predecessors. None of the tenors, who replaced each other in rapid succession, were up to the mark, though each is highly thought of in his native land. Happily, the "Rosenkavalier," which attracted large houses, is practically independent of a tenor, only two or three pages being allotted to this particular voice. So the entertainment fulfilled expectations.

THE CARL ROSA COMPANY.—The Lyceum, at which the "Carl Rosa" has often appeared in the past, housed the company for a season which lasted several weeks, and greatly to the joy of musical Londoners who cannot afford Covent Garden prices. All tastes having to be consulted, the changes were rung on an unusually extensive *répertoire*, in which operas of almost every conceivable description figured. Particularly gratifying were performances of "The Tales of Hoffmann," a work which (very properly) enchants all who consider that the basis of music is melody. "Maritana" also found a place in the programme; but that, unfortunately, could not be helped. If there is a public for rubbish, those who like such stuff must be pandered to. The "Carl Rosa," as of old, numbers several excellent principals, amongst them being Miss Doris Woodall, who puts her voice, a *mezzo-contralto*, to such admirable use, that her singing is a most valuable object-lesson to the student. So, too, is Miss Woodall's Carmen, a part in which she has always been distinguished.

Coleridge-Taylor's "Hiawatha" was performed, at the Albert Hall, as an opera, with a certain

amount of success, and Holst's "At the Boar's Head" tried conclusions with a representative audience at Golder's Green. The work consists of rapidly sung dialogue, as much as anything else, a form of composition which makes for monotony. Break away from operatic form, and opera no longer is opera.

INNUMERABLE CONCERTS.—To recitals there was no limit, some of which had better not have been given—since the aspirants had little to recommend them. Lady Phillida Shirley, however, justified her appearance, for her technique and style are good, and, if the pianist's touch is a trifle metallic, her readings usually are intelligently thought out. Welcome, too, was Miss Beatrice Harrison, a 'cellist of exceptional ability, while Mr. Harold Samuel, faithful to Bach, played with his customary distinction. Mr. Heifetz repeated the successes of former years, his fiddling being well-nigh flawless. But he should take steps to improve a *répertoire* which relies too much on cheap music to the exclusion of the classics. Mlle. Eric Morini, described by some ignorant scribe as "the most remarkable woman-violinist the world has ever known," proved to be nothing out of the common; decidedly capable, and nothing more. Mr. Arthur Catterall, on the other hand, showed himself to be almost a great player; rarely has anyone made so much of the Mozart "Concerto in A."

The number of vocal recitals was, if anything, more formidable than usual: seldom have concert-agents reaped so rich a harvest. One of the most interesting and instructive of these recitals was that given by Mr. Ingo Simon on May 21, the programme ranging from "I Puritani" to "Falstaff" (as represented by "Quand'ero Paggio") and including the fine—and little-known—air from "Torquato Tasso" and the recitative, "Eccomi solo affranto," and its accompanying "O Vecchio Cor." The *coloratura* passages in the last-named were sung with uncommon skill; indeed, the neatness with which Mr. Simon manages to sing florid music places him in a class by himself amongst baritones. His art also is remarkable for that smoothness which appeals to those who, having been brought up on *il bel canto*, detest the rough-and-ready methods of the average modern singer. Battistini excepted, there probably is no baritone who possesses Mr. Simon's qualifications in this direction; not, at all events, in England.

Of Mr. John Coates one, alas, heard far too little, his engagements having taken him from London, two visits to the United States making a lengthy absence necessary. Mr. Coates, however, found time for a recital at Æolian Hall, where the universal range of his attainments was afforded full scope. Elizabethan airs, the ditties of the English seventeenth and eighteenth centuries, and German, French and Russian songs, had his attention, and greatly to the delight of

many cultivated listeners. It is impossible to single out for praise any particular item, everything having been sung and interpreted (interpretation is an art in itself) to perfection. Still, an especially lasting impression was made by this truly gifted singer's treatment of the "Erl König." Not only did Mr. Coates control his voice with the utmost skill, but he told the story with wonderfully vivid emphasis. It is to be hoped that the exemplary performance will be repeated at subsequent recitals.

Special mention may be made of Miss Gladys Newberry's *Lieder* recital, for her excellent voice control, coupled with particularly tasteful singing, made the occasion a very memorable one. A genuine artist is she.

NEW COMPOSITIONS.—The various musical societies gave their usual concerts, at which orchestral novelties by British composers were introduced. The movement certainly was a patriotic one, designed, perhaps, to calm the popular clamour for such things; yet nothing of real merit was heard, the efforts, as in the immediate past, being infinitely more musicianly than musical. This applies equally to the year's songs, whose output has been enormous, every week having contributed to the shoals which have been advertised as something out of the ordinary. It is to be feared that each represents wasted labour, and a corresponding amount of disappointment, though some of the composers, having indulged in these vain attempts for many a long year, probably are used to failure. The younger generation, unfortunately, is less hardened.

Violin, viola, piano, flute, organ and 'cello pieces also have faced the public. The introduction was not followed by enthusiasm.

THE PROVINCES.—Cambridge, with praise-worthy enterprise, revived Handel's "Semele," amateurs taking the stage. Mr. G. D. Cunningham, a Birmingham organist, gave no fewer than forty-three organ recitals, the Town Hall instrument having afforded him scope for his enterprise. Aberystwyth ran to a festival; as also did Peterborough, Gloucester and many another town; the Eisteddfod took place, during which Dr. D. de Lloyd's opera "Gwenllïan" was produced, without making the desired effect; the Manchester Hallé concerts were continued; the Fels Ceoil drew all Dublin; Bournemouth had its customary Winter Gardens concerts. M. Dupré gave an organ recital in Glasgow; Dunfermline, not to be outdone by Glasgow, exploited Hamish MacCunn's "Bonnie Kilmeny." The Edinburgh Amateur Opera Company performed "Masaniello."

Music in the public schools has been taken most seriously, and especially at Marlborough. Purcell, Handel, Mendelssohn, Brahms and Grieg are preferred to the "moderns," and the school band is in a flourishing condition. Crowded are the concerts.

The Academicians in January lent their galleries at Burlington House to the Royal Society of Portrait Painters, whose exhibition included, besides current work, some notable examples of the portraiture of Frank Holl, R.A. (1845-1888) including his well-known full-length of the nonagenarian Captain Sim.

The Selection Committee for the Summer Exhibition of the Royal Academy was composed of Sir Frank Dicksee, P.R.A., Sir Bertram Mackennal, R.A., Mr. Glyn Philpot, R.A., Mr. Bertram Priestman, R.A., Mr. Melton Fisher, R.A., Sir Reginald Blomfield, R.A., Mr. S. J. Solomon, R.A., Mr. Arnesby Brown, R.A., Mr. Philip Connard, R.A., Mr. Alfred Turner, A.R.A., Mr. Curtis Green, A.R.A., and Mr. Macbeth-Raeburn, A.R.A. The oils and watercolours were arranged by Mr. Solomon, Mr. Brown, Mr. Priestman, Mr. Philpot, and Mr. Fisher; the miniatures and works in black and white by Mr. Macbeth-Raeburn; the architecture by Sir R. Blomfield; and the sculpture by Sir B. Mackennal. The works submitted to the Selection Committee exceeded by several hundreds those sent in in 1924, but those to which places were given were fewer by 161.

Five works were purchased for the Chantrey Collection, two paintings and three pieces of sculpture. Both the paintings were bought from the exhibition of the New English Art Club; "The Blue Dress" (£350), by Mr. W. W. Russell, A.R.A.; and a portrait, "My Mother" (£262 10s.), by Mr. Ronald Gray. The works of sculpture acquired were a statuette in ivory and marble, "Christ at the Whipping-post" (£300) by Mr. A. G. Walker, A.R.A.; and a figure of a bird, "Drake-statuettes Limestone" (£50), by Mr. Richard Garbe. These were bought from the exhibition of the Royal Academy, but the third work, a study in bronze for Mr. Alfred Gilbert's famous "Eros," was acquired privately for £500.

The pictures sold from the exhibition included "Towards Italy" (£250) by Mr. Adrian Stokes, R.A.; "Silver Moonlight" (£110) by Mr. Julius Olsson, R.A.; "Hester" (£350) by Mr. Wilfrid G. de Glehn, A.R.A.; "Blythburgh from Henham" (£157 10s.) by Mr. Bertram Priestman, R.A.; "On the Bridge" (£131 5s.) by Mr. Stanhope Forbes, R.A.; "A Street Accident" (£600) by Mr. Glyn Philpot, R.A.; "Sunset on Dutton Hill" (£263 10s.) by Mr. George Clausen, R.A.; "Daughters of Eve" (£500) and "The Last Parting" (£200) by Sir Frank Dicksee, P.R.A.; "A Provencal Flower" (£300) and "The Thorn" (£300) by Mr. H. H. La Thangue, R.A.; "Marygold" (£130) by Mr. Robert J. Swan; "The Nelson Touch" (£450) by Mr. W. L. Wyllie, R.A.; "The By-road" (£120) by Mr. Algernon Talmage, A.R.A.; "The Passing of H.M.S. Lion" (£150) by Mr. Norman Wilkinson; "The Weighing Room, Hurst Park" (£400) by Sir John Lavery, R.A.; "La Tournette, Lac d'Annecy" (£225) by Mr. Terrick Williams, A.R.A.; "The Rocks of La Mortola" (£210) by Mr. Harry Van der Weyden; "The Cloud" (£350) by Mr. Arnesby Brown, R.A.; "Horses at Grass" (£300) by Mr. Alfred J. Munnings, A.R.A.; "A Winter Morning" (£105) by Stanley Royle; "Blue Girl" (£315) by Mr. Stanley Thompson; "Winter Market, Marrakech" (£150) by Mr. C. M. Hadday; and "A Ring of Roses by the Sea" (£350) by Mr. Gemmell Hutchinson. The unpurchased works sold included pictures by Mr. Joseph Farquharson, R.A.; Sir William Orpen, R.A.; Mr. Harold Speed; Mr. Fred Roe; Mr.

Norman Wilkinson; and Mr. Charles Spence-Layh.

At the National Gallery there were no great additions such as that of the Mond Collection in 1924, but several pictures were acquired during the year, including a group of canvases bequeathed by Sir Claude Phillips, which were placed temporarily in the vestibule. Other additions included a fine portrait of Cousins the engraver, by Frank Holl (the work that first brought him reputation as a portrait painter); a pastel portrait of a lady by Perronneau; and a panel by Lorenza Monaco. At the Tate Gallery the feature of the year was an exhibition of landscapes and portraits by Richard Wilson, R.A., which was extremely interesting although it was admitted that the authenticity of some of the examples was doubtful. The exhibition, which was open for some months, attracted much attention and was the cause of considerable discussion. Among the pictures acquired by this gallery was an interesting Sargent, reserved from his sale by his sisters and presented by them, a portrait of the French landscape painter, Claude Monet, at work in the open air. Sir Joseph Duveen at the same time presented to the Tate Gallery the original study for Sargent's famous full-length portrait of Madame Gauthereau, exhibited in Paris in 1884, just before the artist settled in London.

The collection of pictures in the Palace of Arts at Wembley was almost as notable as that of 1924. A gallery of portraits of "Empire Builders" was one of the attractions, and contained examples of Reynolds, Gainsborough, Copley, Romney, Hoppner, Millais, Lawrence, Holl, Sargent and others. In the section of retrospective oil paintings, "English Life," Hogarth's "March of the Guards to Finchley" were shown, lent by the Governors of the Foundling Hospital. Zoffany was strongly represented by the able but oddly composed "Music Party on the Thames," and several other paintings. A very fine Stubbs was lent by the Duke of Portland, and there were pictures by Morland, Crome, Hayman, Scott, both the Wilsons and Wilkie. More recently painted works in the retrospective section were Ford Madox Brown's "Work" and "Last of England," Holman Hunt's "Hiring Shepherd," and the curiously elaborate "Stone Breaker" by John Brett.

Retrospective work was also shown at the first exhibition held by the New English Art Club in its newly acquired gallery at Spring Gardens, Charing Cross, where examples of the skill of about a hundred past and present members were on view in the spring. The Chenil Gallery at Chelsea was opened with a collection of pictures by artists, English, French and American, mostly of views more or less advanced; and Mr. Epstein's memorial to W. H. Hudson was unveiled in Hyde Park. The unveiling was followed by violent newspaper controversies about the merits of the memorial. Messrs. Agnew's annual exhibition of watercolours, held in aid of the Artists' General Benevolent Institution, was worthy of its predecessors, which is saying a good deal; and their exhibition in the summer, of Old Masters, on behalf of the Royal Northern Hospital, was for artistic interest the most important of the year. At the Leicester Gallery there were exhibitions, among others, of pictures by Paul Cezanne, of portrait drawings by Professor Rothenstein, and interiors by Sir John Lavery; at Messrs. Knoedler's in

New Bond Street, of animal sculpture by Mr. Herbert Haseltine, and of Chinese and Japanese landscapes by Mr. Carstairs; and at the Fine Art Society's gallery of etchings by Mr. McBey and landscapes by Mr. Tom Mostyn.

The season in the sale room was sensational enough, but only at its close, when, owing to the lamented death of Mr. J. S. Sargent, the contents of his studio came under the hammer at Christie's. It was expected that the bidding would be keen for some of the remaining works of the distinguished Anglo-American artist, and it was. Some of the prices were astonishing, as, for example, £6,000 guineas for a copy by Sargent of a head by Velasquez on a canvas less than two feet square. The seventy-eight water colours, none of them particularly elaborate, fetched more than £53,000, and the whole collection of work from Sargent's hand more than £175,000. The total was the more remarkable because no single work realized a very large sum. The highest price, 7,000 guineas, was paid for an oil painting of 22 ins. by 28 ins., No. 134, "San Vigilio." This price would no doubt have been exceeded had the portrait of Madame Gauthereau come under the hammer, but that, as stated, was purchased

privately from the executors by Sir Joseph Duveen. Some high prices were realized at the sale at Christie's of property belonging to Lady Carnarvon, much of which had been inherited from the late Alfred de Rothschild. Gainsborough's portrait of Anne, Countess of Chesterfield, fetched £17,850, and that of Lord Chesterfield by the same artist, £6,825. Sir Joshua's portrait of the Countess of Carnarvon and her son realised £9,975, and very high prices were paid for some of the furniture and objects of art in the same collection. In Lord Darnley's sale £10,710 was paid for a Hoppner, a portrait of a child; £7,035 for Sir Joshua's "Calling of Samuel"; and £5,040 for a portrait of Mrs. Monck by Gainsborough. Other important sales were those of the collection of majolica formed by the late Sir Francis Cook; and of the pictures, sold at Brighton, belonging to the late Sir George Donaldson. A chalk drawing of Gainsborough's in the Donaldson Collection was sold for 1,250 guineas. The sale of the late Lord Leverhulme's works of art at his Hampstead house, The Hill, fixed for October 12th, was countermanded at the last moment, and the entire collection removed to New York, to be disposed of there by auction.

The League of the Empire (FOUNDED 1901).

THE League is entirely non-political and non-sectarian. Its practical work has been to promote co-operation between the different Countries and Colonies of the Empire, mainly in affairs connected with education, and to afford full and correct information regarding them, so that the duties of citizenship may be better understood and appreciated, and personal and active interest inspired in the great problems connected with our Empire's conditions and progress. The relation of the League to the Education Departments and Governments throughout the Empire has been regularised (a) through the recommendation of its work to the Governments concerned by the Colonial Office of the Imperial Government and by the Agents-General in 1902-3; (b) by the active and widespread acceptance of its schemes by the different Educational Authorities and Governments. In 1907 the League carried through the first Conference between the Education Departments of the Home and Overseas Governments. One of the effects of this Conference was that the Imperial Government undertook to call the Imperial Conference on Education in 1911. In 1912 the first Imperial Conference of Teachers' Associations was held by the League, and in 1913 was inaugurated the Imperial Union of Teachers. In 1921 an Imperial Conference of Teachers' Associations was held in Toronto; in 1924 another was held in London. An annual meeting of the Imperial Union of Teachers takes place each July. The League, through the liberality of the late Mr. Louis Spitzel, has published a series of text-books

on the Empire, under the editorship of Professor A. F. Pollard: (1) "The British Empire—Its Past, Its Present, and Its Future" (a book of reference); (2) "The British Empire and Its History" (for Secondary Schools); (3) "The Story of the British Empire." In 1907 the League helped to establish a lace industry in St. Helena. With the co-operation of the Oversea and Home Education Authorities a Scheme for the interchange of Teachers throughout the Empire is now in active operation, over 500 interchange appointments have already been arranged. Visits to historical places in England and on the Continent are planned for overseas teachers. The School Affiliation and Comrades' Correspondence Sections were established in 1901-2. Other work undertaken is the giving of lectures, the establishment of a bureau of information, essay competitions, exhibitions, and the furthering of the keeping of Empire Day.

During the War the League distributed from its depot over a million articles to the hospitals and troops, besides helping prisoners and others in distress. The League has also given colours and shields to all the overseas contingents who fought for the Empire.

Hon. Pres., H. R. H. The Duke of Connaught, K.G.
Acting Chairman, 1925, The Vice-Chancellor,
London University, Dr. E. A. Gardner.

Chairman, *Executive Committee*, M. J. Rendall,
LL.D., Headmaster of Winchester.

Hon. Treasurer, Sir Philip Hutchins, K.C.S.I.

Hon. Secretary, Mrs. Orla Marshall, C.B.E.

Address, 124 Belgrave Road, London, S.W. 1.

The following is a list of productions between Nov. 1, 1924, and Oct. 31, 1925.

Oscar Asche, Hugh E. Wright and Norman Williams and Mesdames Margaret Cochran, Eve Gray and Laura Smithson).

GARICK.—(1924) *Dec. 24.* *Six-Cylinder Love*, a comedy by W. Antony McGuire (Messrs. Bobby Howes, Sebastian Smith and Ernest Leeman and Mesdames Edna Best, Joyce Carey and Sybil Arundale). (1925) *Feb. 5.* *Old Heidelberg*, romantic comedy by Wilhelm Meyer-Förster, adapted by Rudolf Bleichmann, revived (Messrs. Ivor Novello, Ernest Benham and Wm. Kendall and Miss Dorothy Batley). *March 23.* *Possessions*, by Neil F. Grant (Messrs. Norman McKinnel, C. Aubrey Smith and Ernest Mainwaring and Mesdames Irene Rooke, Grace Lane and Fabia Drake). *April 20.* *Courting*, a Scottish comedy by A. Kenward Matthews (Messrs. Jevan Brandon-Thomas and Angus Adams and Mesdames Denzil Mather, Jean Clyde and Marjorie Graeme). *May 12.* *Rain*, by John Colton and Clemence Randolph (Messrs. Malcolm Keen, J. H. Roberts and Shep Camp and Mesdames Olga Lindo, Marda Vanue

and Barbara Gott). *Aug. 18.* *Cobra*, by Martin Brown (Messrs. Richard Bird and Henry Daniell and Mesdames Isabel Jeans and Valerie Taylor). *Oct. 21.* *Cristilinda*, by Monckton Hoffs (Messrs. Allan Aynesworth, Allan Jeayes and Lawrence Hamray and Mesdames Isobel Elsom and Polly Emery).

GLOBE.—(1925) *Jan. 7.* *Camilla States Her Case*, a comedy by "George Egerton" (Messrs. George Tully, Henry Vibart and C. M. Lowne and Mesdames Margaret Bannerman, Mary Rorke and Dora Gregory). *Feb. 20.* *The Grand Duchess*, adapted by Harry Graham from the French of Alfred Savoir (Messrs. Lawrence Anderson, Alfred Drayton, Arthur Wellesley, Herbert Ross and E. Vivian Reynolds and Mesdames Margaret Bannerman and Lillian Cavanagh). *April 21.* *Fallen Angels*, a comedy by Noel Coward (Messrs. Austin Trevor, Arthur Wellesley and Gerald Ames and Mesdames Talulah Bankhead, Edna Best and Mona Harrison). *Sept. 1.* *Beginner's Luck*, by Fred Jackson (Messrs. Francis Lister, Arthur Wellesley and J. P. Roberts and Mesdames Margaret Bannerman and Stella Arheina).

HAYMARKET.—(1924) *Dec. 20.* *A Kiss for Cinderella*, Sir James Barrie's play revived (Messrs. Norman McKinnel, J. H. Roberts, Austin Trevor and J. H. Bach and Mesdames Hilda Trevelyan and Louise Hampton and Lady Tree). (1925) *Feb. 19.* *Hamlet*, revived (Messrs. John Barrymore, Malcolm Keen, Herbert Waring, George Ralph and Ian Fleming and Mesdames Fay Compton and Constance Collier). *April 22.* *Ariadne, or Business First*, a comedy by A. A. Milne (Messrs. Allan Aynesworth, Ion Swinley and John Deverell and Mesdames Fay Compton, Barbara Everest and Louise Hampton). *June 11.* *The Man With a Load of Mischief*, a comedy by Ashley Dukes (Messrs. Leon Quartermaine, Frank Collier and Alfred Clark and Mesdames Fay Compton, Clare Greet and Joyce Kennedy).

HIPPODROME.—(1924) *Dec. 26.* *Mother Goose*, pantomime by J. Hickory Wood, G. M. Slater and Philip Rodway (Messrs. Shaun Glenville, Fred Conquest and "Wea Georgie Wood" and Mesdames Isobel Elsom and Dorothy Ward). (1925) *March 19.* *Better Days*, a revue (Messrs. Stanley Lupino and George Baker and Mesdames Maisie Gay and Connie Emerald). *Oct. 7.* *Mercenary Mary*, a musical comedy, with music by William B. Friedlander and Con Conrad (Messrs. A. W. Baskcomb, Sonnie Hale and Lew Hearn and Mesdames June and Peggy O'Neill).

HIS MAJESTY'S.—(1925) *March 26.* *Bamboula*, a musical comedy by H. M. Vernon and Guy Bolton, with music by Albert Sirmay and Harry Rosenthal (Messrs. W. H. Berry, Harry Welchman and Billy Leonard and Mesdames Mimi Crawford and Beppie de Vries). *Aug. 26.* *The Co-Optimists* in a new edition.

KINGSWAY.—(1925) *April 21.* *Caesar and Cleopatra*, by Bernard Shaw (Messrs. Cedric Hardwicke, George Hayes, Lewin Mantering and Frank Moore and Mesdames Gwen Ffrangcon-Davies and Florence Marriott-Watson). *June 29.* *The New Morality*, Harold Chapin's play revived (Messrs. Cedric Hardwicke and Wallace Evennett and Mesdames Gwen Ffrangcon-Davies and Francis Clare). *Aug. 25.* *Hamlet*, revived, in modern dress (Messrs. Colin Keith-Johnston, Frank Vosper, A. Bromley-Davenport and Cedric Hardwicke and Mesdames Muriel Hewitt and Dorothy Massingham).

LITTLE.—(1924) *Nov. 25.* *Falling Leaves*, by

Sutton Vane (Messrs. Stanley Lathbury, Allan Jeayes, Sutton Vane and Frank Vosper and Miss Diana Hamilton). Dec. 30. *You and I*, a comedy by Philip Barry (Messrs. Gerald Ames, Michael Sherbrooke and Tristan Rawson and Mesdames Margaret Moffat and Nora Swinburne). (1925) March 13. *Persevering Pat*, an Irish comedy by "Lynn Doyle" (Messrs. Arthur Sinclair, Fred O'Donovan and Christopher Steel and Mesdames Maire O'Neill and Ethel O'Shea). April 13. *Adam and Eva*, a farcical comedy by Guy Bolton and George Middleton (Messrs. Sebastian Smith and H. St. Barbe West and Mesdames Nancy Pawley, Aida Jenoure and Joan Clement Scott). Sept. 9. *The Monkey Talks*, adapted by Rowland Leigh from the French (Messrs. Jacques Lerner, Charles Carson and Thomas Weguelin and Mesdames Betty Ross Clarke and Enid Lindsay). Oct. 19. *The Sea Gull*, by Anton Tchekov, translated by Constance Garnett (Messrs. Hubert Harben, Alexander Sarner and Randolph McLeod and Mesdames Miriam Lewes, Margaret Swallow and Valerie Taylor).

LONDON PAVILION.—(1925) April 30. *On With the Dance*, a revue by Noel Coward (Messrs. Ernest Thesiger, Lance Lister and Leonide Massine and Mesdames Alice Delysia, Hermione Baddeley and Greta Fayne).

LYCEUM.—(1924) Dec. 26. *The Forty Thieves*, a pantomime by Walter and Frederick Melville (Messrs. Fred Austin, Albert Letine and Stanley Paskin and Mesdames Irene Shamrock and Connie Browning). (1925) May 12. Opening of Carl Rosa Company's opera season with *Madame Butterfly* (Messrs. Hughes Macklin and William Peacock and Miss Beatrice Miranda). July 15. *The Fake*, Frederick Lonsdale's play revived (Messrs. Godfrey Tearle, Allan Jeayes and Franklyn Bellamy and Mesdames Miriam Lewes and Dorothy Seacombe). Sept. 2. *The London Revue*, by Norman Lee (Messrs. Max Wall, George Carney and Billy Danvers and Mesdames Pearl White, Mary Lawson and Anna Glyn).

LYRIC.—(1925) Feb. 2. *The Lady from the Sea*, William Archer's translation of Ibsen's play revived by the Independent Players (Messrs. Arthur Wontner and Ernest Milton and Mesdames Liliehl Ibsen and Fanny Dowson). May 5. *Just a King*, by Cyril Harcourt (Messrs. Langhorne Burton, Charles Cullum, Arthur Layland and J. J. Bartlett and Mesdames Mary O'Farrell and Buena Bent). July 20. *The Czarina*, by Melchior Kengyel and Ludwig Biro (Messrs. George Relp and Leslie Faber and Miss Dorothy Dix).

LYRIC, HAMMERSMITH.—(1925) March 5. *The Rivals*, Sheridan's comedy revived (Messrs. Claude Rains, Nigel Playfair, Norman V. Norman and Miles Malleon and Mesdames Dorothy Green, Isabel Jeans, Beatrix Thomson and Angela Baddeley). May 25. *The Cherry Orchard*, by Anton Tchekov, translated by George Calderon (Messrs. John Gielgud, Fred O'Donovan, O. B. Clarence and Byam Shaw and Mesdames Virginia Isham and Mary Grey). June 23. *The Beggar's Opera*, revived (Messrs. Scott Russell, Frederick Randalow and Miles Malleon and Mesdames Kathryn Hilliard and Sara Allgood). Sept. 17. *And That's the Truth*, by Luigi Pirandello (Messrs. Claude Rains, Nigel Playfair and Frank Allanby and Mesdames Nancy Price and Dorothy Green). Oct. 28. *Lionel and Clarissa*, revival of opera by Isaac Bickstaffe, with music by Diddin (Messrs. Herbert Waring, Nigel Playfair, C. Hayden Coffin and Rupert Bruce and Mesdames Lottie Venne, Olive Grove and Nadine March).

NEW.—(1924) Nov. 26. *The Wandering Jew*, by E. Temple Thurston, revived (Mr. Matheson Lang and Mesdames Isobel Elsom, Hutin Britton, Jessie Winter and Dorothy Holmes-Gore). (1925) Feb. 7. *Carnival*, revived by H. C. M. Hardinge and Matheson Lang (Messrs. Henry Hewitt and Dennis Neilson-Terry and Mesdames Mary Glynn and Elsie Judge). March 18. *The Tyrant*, a drama by Rafael Sabatini (Messrs. Matheson Lang, Edmund Willard, Frank Vosper and Leonard Shepherd and Miss Isobel Elsom). July 7. *We Moderns*, a comedy by Israel Zangwill (Messrs. Hubert Harben and Walter Hudd and Mesdames Mary Jerrold, Olga Jocelyn and Jane Welsh). Aug. 12. No. 17, a melodrama by J. Jefferson Farjeon (Messrs. Nicholas Hannen, Fred Groves, Ronald Simpson and Leon M. Lion and Mesdames Elizabeth Arkell and Nora Swinburne). Sept. 24. *The Moon and Sixpence*, by Edith Ellis, adapted from W. Somerset Maugham's novel (Messrs. Henry Ainley, George Elton and Tom Reynolds and Mesdames Margaret Yarde, Grace Lane, Viola Tree and Eileen Sharp).

NEW OXFORD.—(1924) Nov. 10. *The First Kiss*, a musical play from the Spanish of Paso Y. Abati, with music by Pablo Luna (Messrs. Courtice Pounds, Gregory Stroud, Roy Emerton and Percy Parsons and Mesdames Desirée Ellinger and Aimée Bebb). Dec. 24. *Dick Whittington*, a pantomime (Messrs. Wilkie Bard and Fred Whittaker and Mesdames Mabel Greene and Vera Bryer). (1925) Jan. 26. *The Monkey House*, a farce, by Walter W. Ellis (Messrs. David Miller and Denis Hogan and Mesdames Gladys Ffolliott and Mimi Crawford). April 8. *Kismet*, Edward Knoblock's play revived (Messrs. Sam Livesey, Robert Harris and Herbert Grimwood and Mesdames Mary Clare and Elissa Landi). June 15. Season of Italian plays by Luigi Pirandello opened with *Six Characters in Search of an Author*. June 30. *The Gorilla*, a mystery play by Ralph Spence (Messrs. Edward Sillward and Lew Kelly and Miss Mimi Crawford). Oct. 28. *Carry On, Sergeant*, a musical show by Bruce Bairnsfather (Messrs. Johnny Danvers, John Kirby and Alan Macbeth).

PALACE.—(1925) March 11. *No No, Nanette*, a musical comedy by Frank Mandel, Otto Harbach and Irving Caesar, with music by Vincent Youmans (Messrs. George Grossmith and Joseph Coyne and Mesdames Binnie Hale, Irene Browne, Joan Barry, Gracie Leigh and Marie Hemingway).

PALLADIUM.—(1925) March 30. *Sky High*, a revue (Messrs. George Robey and Robert Chisholm and Mesdames Nellie Wallace, Lorna and Toots Pounds and Marie Blanche). Sept. 30. English version of the Folies Bergère revue (Messrs. Ernie Lotinga, Fred Duprez and Robert Chisholm and Miss Jennie Golder).

PLAYHOUSE.—(1925) May 18. *The Right Age to Marry*, by H. F. Maltby (Messrs. Terence Byron, Henry Eglinton and Watson Hume and Mesdames Enid Sass and Jessie Belmore). Aug. 31. *The Prisoners of War*, by J. R. Ackersley (Messrs. George Hayes, Ivor Barnard and Robert Harris and Mesdames Leah Bateman and Marie Ault). Oct. 26. *The Desire for Change*, by Francis Neilson (Messrs. Arthur Wontner and Harcourt Williams and Mesdames Mary Clare and Margaret Halsan).

PRINCE'S.—(1924) Dec. 24. *Alf's Button*, a farce by W. A. Darrington (Messrs. Tubby Edlin and Ambrose Thorn and Mesdames Hazel Jones and Jane Welsh). (1925) April 23. *Frasquita*, a musical comedy by Fred de Gresac, with music

by Franz Lehar, and lyrics by Reginald Arkell (Messrs. Thorpe Bates and Edmund Gwenn and Miss José Collins).

PRINCE OF WALES'S.—(1925) *March 20.* *Charlot's Revue*, American version (Messrs. Herbert Mundin and Peter Haddon and Mesdames Gertrude Lawrence and Beatrice Lillie).

QUEEN'S.—(1924) *Dec. 4.* *Orange Blossom*, adapted by Harry Graham from the French of André Birabeau and Georges Dolley (Messrs. Allan Ayresworth and Francis Lister and Mesdames Fay Compton, Marie Tempest and Helen Hays). (1925) *Jan. 28.* *Silence*, a melodrama by Max Marcin (Messrs. Godfrey Tearle, Alexander Sarnet, H. St. Barbe West and A. S. Homewood and Mesdames Mary Clare and Helen Spencer). *March 17.* *Dancing Mothers*, by Edgar Selwyn and Edmund Goulding (Messrs. Godfrey Tearle and Leslie Faber and Mesdames Gertrude Elliott, Jean Forbes-Robertson and Elsie Lawson). *May 7.* *Beggar on Horseback*, by George S. Kaufman and Marc Connelly (Messrs. A. E. Matthews, Eric Maturin, Kim Peacock and Martin Adeson and Mesdames Dorothy Tetley, Olive Sloane and Kyra Alanova). *June 24.* *Salomy Jane*, by Paul Armstrong (Messrs. Godfrey Tearle, Claude Rains, Toni Reynolds, Eugene Leahy and Allan Jeayes and Mesdames Miriam Lewes and Dorothy Seacombe). *Aug. 3.* *The Man from Hong Kong*, by Clifford Mills (Messrs. Claude Rains, Percy Hutchinson and H. R. Hignett and Mesdames Mary Merrall and Madeline Seymour).

REGENT.—(1925) *Jan. 14.* *Saint Joan*, Bernard Shaw's drama revived (Messrs. Ernest Thesiger, E. Lyall Swete, Herbert Horton, O. B. Clarence, Eugene Leahy and Lewis Casson and Miss Sybil Thorndike). *Feb. 24.* *Hippolytus*, Professor Gilbert Murray's version of Euripides revived (Messrs. Lewis T. Casson, Eugene Leahy and Nicholas Hanne and Mesdames Sybil Thorndike, Beatrice Smith and Agnes Lauchlan). *Sept. 7.* *Pygmalion*, G. B. Shaw's play revived (Messrs. Oliver Johnston and Tom Mowbray and Miss Florence Jackson). *Sept. 28.* *Mrs. Warren's Profession*, Bernard Shaw's banned play given its first public performance in London (Messrs. Charles Sewell, Oliver Johnston and Arthur Claremont and Mesdames Florence Jackson and Valerie Richards).

ROYAL OPERA HOUSE.—(1925) *May 18.* Opening of International season of Grand Opera with *Der Rosenkavalier*, by Strauss (Messrs. Richard Mayr and Browning Mummery and Mesdames Lotte Lehmann, Delia Reinhardt and Elizabeth Schumann). *Sept. 28.* Madame Pavlova opened a season of ballet with Adam's *Giselle*.

ROYALTY.—(1924) *Dec. 16.* *The Vortex*, a comedy by Noel Coward (Messrs. Noel Coward, F. Kinsey Peile and Bromley Davenport and Mesdames Lilian Braithwaite, Millie Sim and Mollie Kerr). (1925) *May 13.* *Jacob's Ladder*, by Norman MacOwan (Messrs. Dennis Eadie and Rothbury Evans and Madame Edvina). *Sept. 21.* *Taffy*, a Welsh comedy by Caradoc Evans (Messrs. Fewlass Llewellyn, H. R. Hignett, Bruce Winston and Mesdames Joan Maude and Winifred Evans). *Oct. 12.* *The Playboy of the Western World*, J. M. Synge's play revived (Messrs. Arthur Sinclair, Sydney Morgan and Fred O'Donovan and Mesdames Maire O'Neill and Sara Allgood).

ST. JAMES'S.—(1924) *Dec. 18.* *Pollyanna*, a Christmas play by Catherine Chisholm Cushing (Messrs. Lyn Harding, Athole Stewart and Tom

Reynolds and Mesdames Grace Lane, Alice Beet, Mary Brough and Maire O'Neill). (1925) *Jan. 6.* *Meddlers*, a farce by Norman S. Pugh and Agnes Platt (Messrs. Farren Soutar and John Wyse and Mesdames Mimi Crawford and Gladys Ffolliott). *Jan. 21.* *Grounds for Divorce*, a farce adapted by Guy Bolton from the Hungarian of Ernest Vajda (Messrs. Lawrence Grossmith, Lawrence Hanray and Owen Nares and Mesdames Madge Titherage, Jane Wood and Pamela Carme). *June 2.* *The River*, by Sir Patrick Hastings, K.C., M.P. (Messrs. Owen Nares, Leslie Faber, Lewin Manner and Clifford Mollison and Mesdames Jessie Winter and Helen Ferrers). *20.* *The Guardsman*, translated from the Hungarian of Franz Molnar by Grace Colbron and Hans Bartsch (Messrs. Seymour Hicks, Morton Selten and Willie Warde and Mesdames Madge Titherage, Margaret Yarde and Betty Seymour Hicks). *July 16.* *The Wild Duck*, Ibsen's play revived (Messrs. Milton Rosmer, Brember Wills and Ion Swinley and Mesdames Sybil Arundale and Angela Baddeley). *Sept. 22.* *The Last of Mrs. Cheyne*, by Frederick Lonsdale (Sir Gerald du Maurier, Messrs. Dawson Milward, Ronald Squire and Basil Loder and Mesdames Gladys Cooper, May Whitty and Ellis Jeffreys).

ST. MARTIN'S.—(1924) *Dec. 2.* *No Man's Land*, adapted by Ashley Dukes from the French of François de Curel (Messrs. Malcolm Keen and Drelincourt Odum and Mesdames Haidee Wright and Betty Ross Clarke). (1925) *Jan. 20.* *Spring Cleaning*, a comedy by Frederick Lonsdale (Messrs. Ronald Squire and Ian Hunter and Mesdames Edna Best, Cathleen Nesbitt and Cecily Byrne). *July 1.* *The Show*, by John Galsworthy (Messrs. Leslie Banks, Ben Field, Clifford Mollison and Felix Aylmer and Mesdames Molly Kerr, Haidee Wright and Hermione Baddeley). *Sept. 23.* *Easy Money*, a farce by Brandon Fleming and Sydney Carroll (Messrs. Hay Petrie and Lawrence Hanray and Mesdames Olive Sloane and Fabia Drake).

SAVOY.—(1925) *June 16.* *Mary, Mary, Quite Contrary*, a comedy by St. John Ervine (Messrs. Frank Bertram and George Child and Mesdames Eva Moore and Jill Esmond Moore). *July 28.* *On 'Change*, a farcical comedy adapted by E. Lawrence and H. F. Maltby (Messrs. Holman Clark, Peter Haddon, Henry Kendall and Robert Courtneidge and Mesdames Lottie Venne and Rosaline Courtneidge). *Aug. 17.* *Lightnin'*, by Winchell Smith and Frank Bacon, revived (Mr. Horace Hodges and Miss Diana Wilson). *Sept. 9.* *The Unfair Sex* (Messrs. Basil Foster, Clifford Mollison and C. M. Lowne and Mesdames Athene Seyler and Rosaline Courtneidge).

SCALA.—(1925) *July 20.* *The Wild-Goose Chase*, Fletcher's comedy revived by the Renaissance Theatre (Messrs. Wilfred Walter, Lawrence Hanray, Eugene Leahy and Henry Hewitt and Mesdames Angela Baddeley and Grizelda Hervey).

SHAFTESBURY.—(1924) *Dec. 16.* *Charley's Aunt*, by Brandon Thomas, revived (Messrs. James Page, Jevan Brandon Thomas and Malcolm Neville and Mesdames Jane Graham and Gwen Whitby). (1925) *Jan. 27.* *Lightnin'*, a play by Winchell Smith and Frank Bacon (Messrs. Horace Hodges, Donald Foster, Owen Roughwood and Louis Goodrich and Mesdames Ruth Chester and Norah Robinson). *June 9.* *Clo Clo*, a musical comedy by Douglas Furber and Harry Graham, with music by Franz Lehar (Messrs. Billy Leonard, Paul England and A. W. Baskcomb and

Mesdames Cicely Debenham and Sydney Fairbrother). Aug. 25. *Dear Little Billie*, musical comedy by Frith Shepherd, with music by H. B. Hodley and Jack Strachey (Messrs. Laddie Cliff and Teddy Fox and Mesdames Phyllis Monkman and Adrienne Brune).

STRAND.—(1924) Nov. 24. Return visit of *La Chauve-Souris* company of Russian entertainers. Dec. 24. *Treasure Island*, J. B. Fagan's stage version of R. L. Stevenson's book, revived (Messrs. Arthur Bouchier, Charles Groves, Fred Lewis, Terence de Marney and S. A. Cookson). (1925) Jan. 24. *The Thief*, Henry Bernstein's drama revived (Messrs. Arthur Bouchier, James Carew and Jack Hobbs and Mesdames Kyrie Bellew and Stella Patrick Campbell). March 31. *The Sea Urchin*, a comedy by John Hastings Turner (Messrs. Athole Stewart, Clifford Heatherley and Arthur Pusey and Mesdames Helen Haye, Margaret Watson, Peggy O'Neil and Lena Halliday). May 5. *The Signal*, a mystery play by Roland Daniel (Messrs. Martin Lewis, H. Humberston Wright and Fewlass Llewellyn and Mesdames Hilda Bayley, Olwen Roose and Kitty de Legh). May 19. *Ordeal*, by Dale Collins from his own novel (Messrs. Lyn Harding and Felix Aymer and Mesdames Haidee Wright and Madeline Seymour).

VAUDEVILLE.—(1925) Jan. 23. *Possessions*, a comedy by N. F. Grant (Messrs. Sam Livesey, Ian Fleming and C. Aubrey Smith and Mesdames Irene Rooke, Fabia Drake and Helen Haye). Feb. 5. *Sometime*, a musical play by Rudolf Friml (Messrs. Frank Tinney and Farren Soutar and Mesdames Desirée Ellinger, Joan Hay and Josephine Earle). March 30. *Tarnish*, a comedy by Gilbert Emery (Messrs. Francis Lister and Aubrey Mather and Mesdames Olga Lindo, Nora Swinburne and Grace Edwin). May 4. *Sun-Up*, by Lula Vollmer (Messrs. Kenett Allen, Owen Meech and Edward H. Loeffler and Mesdames Lucille La Verne and Sara Haden). Aug. 27. *Blessed are the Rich*, by James Agate and C. E. Openshaw (Messrs. Michael Sherbrooke and Sebastian Smith and Mesdames Elizabeth Arkell and Mary Clare).

WYNDHAM'S.—(1925) March 14. *A Man with a Heart*, by Alfred Sutro (Messrs. Dawson Milward and George Elton and Sir Gerald du Maurier and Mesdames Marie Lohr, Athene Seyler and Louise Prussing). April 15. *Little Miss Bluebeard*, a comedy by Avery Hopwood (Messrs. Arthur Margetson, C. M. Lowe and Eric Blore and Mesdames Irene Borloni and Dorothy Debenham). May 11. *The Round Table*, by Lennox Robinson (Messrs. Henry Caine, Arthur Hambling and Raymond Massey and Mesdames Sybil Thorneike and Clare Greet). May 30. *The Lie*, by Henry Arthur Jones, revived (Messrs. Lawrence Anderson, Robert Horton, Lawrence Hanray and Stockwell Hawkins and Mesdames Sybil Thorneike and Vere Shepstone). Aug. 26. *The Offence*, by Mordaunt Shairp (Messrs. Frederick Leister and Harcourt Williams and Miss Clara Harris).

THE STAGE SOCIETY produced at the New on Dec. 7, 1924, *The Man with a Load of Mischief*, a comedy by Ashley Dukes (Messrs. Allan Jeayes and Leon Quartermaine and Mesdames Laura Cowie and Eileen Beldon); at the Aldwych on Feb. 15, *The Bright Island*, a satire by Arnold Bennett (Messrs. Arthur Pusey, Alan Trotter and Michael Sherbrooke and Mesdames Jeanne de Casalís, Isabel Jeans and Dorothy Holmes-Gore); at the Aldwych on April 5, *The*

Colonnade, by Stark Young (Messrs. H. R. Hignett, Henry Oscar and Reginald Dance and Mesdames Jean Cadell and Dora Gregory); at Wyndham's on June 7, *Raleigh*, by D. A. Barker (Messrs. Nicholas Hannen, Harold Scott and Brember Wills and Mesdames Evelyn Hope, Leah Bateman and Moyna MacGill).

THE PHOENIX SOCIETY produced at the Regent on Nov. 16, 1924, Ben Jonson's *Epiciane* (Messrs. Cedric Hardwicke, George Zucco, Alfred Clark and Godfrey Winn); at the Aldwych on Jan. 26, 1925, *The Assignment*, John Dryden's play (Messrs. Charles Carson and Melville Cooper and Mesdames Dorothy Massingham, Eileen Beldon, Vera Lennox and Hermione Baddeley); at the Aldwych on May 10, *The Orphan*, Thomas Otway's play (Messrs. John Gielgud, Henry C. Hewitt, Douglas Burbidge and Melville Cooper and Miss Ray Litvin); at the Regent on July 6, *The Rehearsal*, by the Duke of Buckingham (Messrs. Melville Cooper, Alfred Clark and Fred O'Donovan and Mesdames Beatrice Wilson, Angela Baddeley and Vera Lennox); at the New Oxford on Oct. 25, Marlowe's *Faustus* (Messrs. Ion Swinley, Ernest Thesiger, Tom Heslewood, H. R. Hignett and Hay Petrie and Mesdames Leah Bateman and Florence Saunders).

THE REPERTORY PLAYERS produced at the Scala on Nov. 23, 1924, *Judas Iscariot*, by E. Temple Thurston (Messrs. Campbell Gullan and Frank Vosper and Mesdames Louise Hampton and Norah Robinson); at the New on Jan. 4, 1925, *The Fairway*, adapted by Noel Scott and Auriol Lee from the French (Messrs. Kenneth Kent and Raymond Massey and Mesdames Muriel Alexander and Nadine March); at the Aldwych on Feb. 8, *The Broken Thread*, by Noel Scott (Messrs. Frank Vosper and Reginald Gardiner and Mesdames Esther Whitehouse and Esmé Hubbard); at the Prince's on March 8, *Tunnel Trench*, a war play by Hubert Griffith (Messrs. Henry Kendall, Felix Aymer, H. G. Stoker and Aubrey Mather); at the Aldwych on May 3, *Southernwood*, a comedy by Harry Wall (Mr. Douglas Jefferies and Mesdames Mary O'Farrell, Fabia Drake, Katie Johnson and Dorothy Hall); at Prince's on June 14, *Mango Island*, by Reginald Berkeley (Messrs. Edmund Willard, Brember Wills and Aubrey Mather and Mesdames Mary Newnham-Davies and Eileen Hare); at the Garrick on Sept. 13, *The Harem*, adapted by Owen Cassidy from the Hungarian of Ernest Vajda (Messrs. Eric Cowley and Richard Bird and Mesdames Netta Westcott and Muriel Alexander); at the Duke of York's on Oct. 4, *That which Counts*, by Shirland Quinn (Messrs. John Longden and William Pringle and Mesdames Valerie Taylor and Dorothy Hall).

THE PLAY ACTORS produced at the Scala on Nov. 30, 1924, *Dear Father*, a play by Michael Arlen (Messrs. Herbert Marshall, H. R. Hignett, H. St. Barbe West and G. H. Mulcaster, and Mesdames Isobel Jeans and Jane Graham); at the Scala on Feb. 1, 1925, *Peter and Paul*, by H. F. Rubinstein (Messrs. J. H. Roberts and Franklin Dyal and Mesdames Hilda Moore and Molly Lumley); at the Scala on May 10, *By Right of Conquest*, by Michael Morton and Peter Traill (Messrs. Nicholas Hannen and Brian Gilmour and Mesdames Mary Merrill and Dora Barton); at the Royalty on Oct. 18, *This Woman Business*, by Benn W. Levy (Messrs. Tom Reynolds, A. Bromley-Davenport, Tristan Rawson and Leslie Frith and Miss Alison Leggatt).

In the first half of the 17th century (1633 has been cited as the best approach to a definite date) we meet with the earliest mention of the introduction of *rails* for the lessening of friction upon roads. Beams of wood, some six or seven inches in breadth, were about this time laid down to facilitate the draught of the wagons in the vicinity of some of the coal-mines at Newcastle; and as a matter of necessity the addition of "sleepers" had speedily to follow. In 1738, at Whitehaven, it is stated that iron was first substituted as the material of the rails; and in 1767 it appears established that this revolution was adopted at Coalbrookdale, being followed nine years later at the Sheffield Colliery. As yet, however, only thick plates of iron were fastened to the surface of the wooden rails, and it was not till 1789 that "edge rails" were introduced, the credit of their adoption being assigned to William Jessop, on the Loughborough and Nantpantan line. James Watt had conceived the idea of utilising steam for locomotion, and there is a record of a model locomotive having been used in Cornwall in 1784. George Stephenson, however, in the year 1825, was the first to bring the project fairly into practical shape.

The first Act obtained for the construction of a railway was that of the Surrey Iron Railway Company in 1801, for a line $9\frac{1}{2}$ miles long from Wandsworth to Croydon. In 1804 an Act was passed "for making and maintaining a railway or tramroad from the town of Swansea into the parish of Oystermouth, in the County of Glamorgan, and for the hauling or drawing of wagons or other carriages passing upon the said railway or tramroad with men, horses, or otherwise."

Up to 1840, inclusive, 299 Acts, authorising the construction of 3,000 miles of line, had been passed. The inevitable reaction set in, and in 1841-2-3 only a few small Bills were passed by the Legislature; but as the Liverpool and Manchester, the London and Birmingham, and other leading concerns were paying 10 per cent. dividends, and some of the smaller lines were yielding even larger returns, attention was naturally drawn to the remunerative character of this class of property, and the supply of railway shares became far below the demand. A flood of new projects appeared before the public, and the Legislature even, labouring apparently under the general excitement, encouraged promoters by relaxing or withdrawing the general opposition which had previously been offered. In 1844, 797 miles were authorised; in 1845, 2,883 miles; and in 1846, the prodigious total of 4,790 miles, under no less than 272 Acts, obtained Parliamentary sanction. The succeeding years saw some abatement, but still there were 1,663 miles passed in 1847, and 300 in 1848. These figures illustrate the rise and fall of the great fever known as the "railway mania."

The Railways Regulation Act of 1840, the first of the General Acts, provided for a month's notice being given to the Board of Trade before opening; for returns of traffic to be made by the companies, as also of accidents involving personal injury; for Government inspection of works, for the approval of bye-laws, &c. Afterwards were passed Acts for their better regulations, and for the conveyance of troops, 1842, the Railways Further Regulation Act of 1844, the Railways Clauses Consolidation Act, 1845, and the Canal and Railway Carriers Act of the same session.

The Cheap Trains Act, 1883, amended by the

Finance Act, 1921, provides that fares not exceeding the minimum fare shall be exempt from duty, but fares for return or periodical tickets shall be exempt from duty only where the ordinary fare for the single journey does not exceed that rate. On all other fares a duty of 2 per cent. is charged between stations within one urban district. Such district shall contain not less than one hundred thousand inhabitants, and must be of a continuous urban as distinguished from a rural or suburban character. Outside this area the duty payable is 5 per cent. The expression "minimum fare" means the lowest fare normally charged to an adult or a child, as the case may be, for a single, a return, or a periodical ticket, as the case may be, for any journey, and the expression "normally charged" means charged otherwise than to a special class of passengers or on a special occasion.

Officers or men in the military or police forces, when travelling on public service, are charged three-fourths or one-half of ordinary passenger rates, according to number travelling. The Act does not extend to Ireland.

Hiring of Special Trains.—The charges per mile for hire of special trains are 10s. Single and 15s. Return, plus the ordinary fare for each passenger according to class of vehicle hired. Minimum £6.

The Workmen's Compensation Act, 1897.—This Act, which received the Royal assent on Aug. 6, 1897, came into operation on July 1, 1898.

THE RAILWAYS ACT, 1921.

The Railways Act, which received the Royal Assent on Aug. 19, 1921, contains 86 clauses, and is divided into six parts, to which are added nine schedules. Under the Act railways in Great Britain are formed into groups. Before Jan. 1, 1923, the constituent companies in any group may submit to the Minister of Transport an agreed amalgamation scheme, and the amalgamated companies may submit agreed schemes for the absorption of the subsidiary companies in their groups. Failing agreement, schemes for amalgamation and absorption are to be settled by the amalgamation tribunal set up under the Act. The date tentatively fixed for the completion of grouping is July 1, 1923, the amalgamations of constituent companies preceding the absorption of subsidiary companies. Agreed amalgamation or absorption schemes must be submitted to the stock and debenture holders concerned before being referred to the tribunal. In the event of postponement later than July 1, 1923, in the case of any group, during the period of postponement the undertakings concerned "may, and shall if the amalgamation tribunal so direct, be used, worked, managed, maintained and repaired as one joint undertaking" and the net receipts shall be distributed as agreed or as may be decided by the tribunal. Sections 11 and 12 deal with the payment of £60,000,000 in settlement of the "Railways Compensation Account" in two instalments of £30,000,000. Part Two deals with the protection of the public inasmuch that the railway companies may be required by the Railway and Canal Commission, on a proper complaint being made, to afford reasonable services, facilities and conveniences. The Minister of Transport may require railway companies to conform gradually to measures of general standardisation of ways, plant and equipment, and to adopt schemes for the co-operative working or common user of

rollingstock, workshops, manufactories, plant and other facilities. Under Section 18 the Minister has power to confirm agreements between companies for the purchase, lease or working of railways.

Part 3, Section 20 to 26 deals with the constitution and procedure of Rates Tribunal. They establish a court of record styled the Railway Rates Tribunal, consisting of three permanent members, and the staff attached to it must not exceed 10 persons. Permanent members of the tribunal will be appointed by the Crown on the joint recommendation of the Lord Chancellor, the President of the Board of Trade, and the Minister. In November, 1921, the following appointments to Rates Tribunal were made:—(the late) Sir F. Gore-Browne, K.C., President, succeeded by Mr. W. B. Clode, K.C.; Mr. W. A. Jepson, late assistant to General Manager of L. & N.W. Ry., as the railway representative; and Mr. G. C. Locket, of Messrs. Gardner, Locket & Hinton, Ltd., London, as the commercial member. The appointments are for a period of seven years, and the members will be paid whole-time officers. The Registrar is Mr. T. J. D. Atkinson, Secretary, Mr. S. J. Page, and the Offices, 2, Clement's Inn, W.C. 2. The Minister is entitled to be heard in any proceedings before the tribunal which must make an annual report to him for laying before Parliament. With reference to charges for competitive traffic, Section 52 provides that within a prescribed time the companies shall submit schedules of rates where the distance is 30 per cent. or more in excess of the shorter route, and that these schedules shall be referred to the rates tribunal, which will settle the schedule of equal rates by the alternative routes. In the case of new "circuitous routes" (i.e. routes longer by 30 per cent. or more than the shortest route between the two places) the company must submit the route, and the Minister may refer the matter to the tribunal if the difference is above 30 per cent. If it exceeds 50 per cent. the route must have the consent of the tribunal before the equal rates are applied.

The following are the four railway groups.

1. North Western, Midland and West Scottish Group, and contains the following Railways—
L. & N.W. Furness Maryport & C.
Mid. Highland Cockermouth K. & P.
L. & Y. Caledonian S. on A. & Mid. J.
North Staffs G. & S.W. Other Companies

2. North Eastern, Eastern and East Scottish Group, and contains the following railways—

N.E.	G.N.	G.N. of S.
G.C.	Hull & B.	Other Companies
G.E.	N.B.	

3. Western Group, and contains the following railways—

G.W.	Mid. & S.W. Jct.	Other Companies
Cambrian	Local S. Wales	

4. Southern Group, and contains the following railways—

L. & S.W.	L.B. & S.C.	S.E. & C.	I. of W.
-----------	-------------	-----------	----------

Section 54 orders that each company shall at each station keep available for public inspection a copy of the general classification of merchandise. These books are to be available during all reasonable hours without fee. Each company must also keep available for 10 years at its head office all documents specifying the rates and conditions in use on Jan. 14, 1920, and a sub-section requires the proportion of any rate appropriated to conveyance by sea to be stated.

Part 4 deals with wages and conditions of service, Part 5 with Light Railways, and Part 6 includes sections dealing with facilities and the allocation of receipts of worked railways.

IRISH FREE STATE RAILWAYS ACT, 1924.

(*Acht Na Bothar Iarainn, 1924.*)

(*Dated July 23, 1924.*)

The Act in general corresponds very closely to the British Railways Act of 1921. It provides for the amalgamation of all railways wholly within the Irish Free State as follows:—

Amalgamating Companies.

Great Southern and Western Railway Company, including the Greashill Extension separate undertaking.

Midland Great Western Railway Company of Ireland.

Dublin and South Eastern Railway Company, including City of Dublin Junction Railways and New Ross and Waterford Extension Railways.

Cork, Bandou and South Coast Railway Company, including the Bantry Bay Extension.

The final amalgamation of these companies was completed on January 1, 1925.

Railway Tribunal.

The following appointments to the Railway Tribunal constituted under Section 13 were made in October, 1924, by his Excellency the Governor-General on the advice of the Executive Council:—

His Honour Daniel J. O'Brien, formerly County Court Judge (*Chairman*).

Mr. Henry Mangan, formerly City Accountant to the City of Dublin.

Mr. John R. Kerr, of the Cork, Bandou and South Coast Railway.

Mr. George O'Brien, of the Department of Industry and Commerce (*Registrar*).

Railway Panels.

Section 17 provides for the constitution of a General Panel and a Railway and Canal Panel, appointed by the Governor-General for a period of three years, to be appointed additional members of the tribunal as required. Appointments to the Railway and Canal Panel are as follows:—

Mr. E. A. Neale, formerly General Manager, Great Southern and Western Railway.

Mr. George McDonald, Dublin and South Eastern Railway.

Mr. W. C. R. Coe, Cork, Bandou and South Coast Railway.

Mr. John McCann, Chairman, Grand Canal Company.

BRITISH RAILWAYS IN 1924.

Total capital expenditure was £1,190,500,000 in 1924, as compared with £1,181,320,000 in 1923, and £1,141,543,000 in 1913. On revenue account, net receipts from the working of railways and ancillary businesses were £39,000,000 in 1924, as compared with £42,915,000 in 1923, £47,149,000 in 1922, and £46,114,000 in 1913. Miscellaneous receipts, exclusive of appropriations from reserve and from compensation account under the Railways Act, 1921, were £8,200,000 in 1924, as compared with £8,314,000 in 1923, £6,216,000 in 1922, and £2,827,000 in 1913, making totals for these years, respectively, of £47,200,000, £52,427,000, £53,365,000, and £48,941,000. In 1913, however, £22,000 was taken from the reserve; in 1922, sums amounting to £1,153,000 were appropriated from Compensation Account under the Railways Act; in 1923,

£1,198,000 was taken from that account and from reserve; and in 1924, as much as £5,100,000 was appropriated from these two sources, making, with these additions, the total net income available, £52,300,000 in 1924, as against £52,427,000 in 1923, £54,518,000 in 1922, and £48,963,000 in 1921. Rentals and fixed charges required £2,200,000 in 1924 as against £1,946,000 in 1923, £2,041,000 in 1922, and £1,696,000 in 1921; interest and dividends on capital took £50,100,000 in 1924, compared with £50,000,000 in 1923, £51,974,000 in 1922, and £46,172,000 in 1921; whilst appropriations to reserve were £200,000 in 1924, as against £339,000 in 1923, £614,000 in 1922, and £1,049,000 in 1921.

Passenger and Freight Traffic Figures.

Total passenger train receipts were £95,100,000 in 1924, against £94,080,000 in 1923, £101,786,000 in 1922, and £54,526,000 in 1921. Compared with 1923, ordinary passengers and workmen brought in £67,400,000, against £65,330,393, the number of "originating" passengers being 1,235,802,000 against 1,235,566,000. Season-ticket receipts, however, fell from £11,667,000 to £11,100,000, mails from £1,982,000 to £1,700,000, and parcels, &c., from £15,100,000 to £14,900,000. Total goods-train receipts were £106,400,000 in 1924, against £109,756,000 in 1923, £115,564,000 in 1922, and £64,255,000 in 1921. Compared with 1923, general merchandise receipts fell from £51,776,000 to £50,100,000, though the tonnage originating rose from 58,980,000 to 60,908,000. Receipts from coal, coke, &c., fell from £40,090,000 in 1923 to £37,800,000 in 1924, the

originating tonnage falling from 222,234,000 to 209,160,000. Receipts from "other minerals," however, improved from £15,828,000 to £16,400,000, and the originating tonnage from 62,052,000 to 65,382,000. The total freight tonnage originating on the Railways of Great Britain was 335,450,000 in 1924, as compared with 343,267,000 in 1923, 301,625,000 in 1922, and 364,424,000 in 1921.

Railway traffic expenditure in 1924 was £166,500,000, as against £165,553,000 in 1923 and £75,456,000 in 1921, the respective operating ratios being 83 per cent., 81·22 per cent., and 63·53 per cent. Compared with 1923, locomotive running expenses increased from £40,815,000 to £41,900,000, and traffic expenses from £54,316,000 to £55,200,000.

Route-miles, Engine-miles and Average Receipts.

Route-miles open for traffic were 20,328 miles in 1924, as compared with 20,314 in 1923 and 20,246 in 1921, and the total single-track, including sidings, was 51,966 miles in 1924, against 51,818 in 1923 and 50,604 in 1921. Total engine-miles in the three years were, respectively, 587,684,000, 579,676,000, and 601,224,000. The average receipt per passenger journey was 1s. 4·4d. in 1924, as compared with 1s. 3·89d. in 1923 and 9·87d. in 1921. Excluding the District Railway and London Tubes, the corresponding figures were, respectively, 1s. 7·6d., 1s. 6·96d., and 11·34d. For all descriptions of goods-train traffic (excluding live-stock), the average rate per ton was 6s. 3d. in 1924 and in 1923, 7s. 6d. in 1922, and 3s. 5d. in 1921. The average receipt per ton for general merchandise was 16s. 5d. in

Reserves and depreciation funds of the companies, which in 1923 amounted to £121,054,545, were reduced to £114,287,534 in 1924.

The average rate of interest or dividend paid per cent. of total nominal capital was 4·31 in 1924, as compared with 4·33 in 1923, 4·07 in 1922, 3·74 in 1921, 3·73 in 1920 and 3·62 in 1913. Corresponding returns paid on the total issued capital were 4·53, 4·55, 4·74, 4·43, 4·41, and 4·28, whilst the interest and dividends paid per cent. of receipts from capital issued were, on the average, 4·41 in 1924, as compared with 4·43 in 1923, 4·62 in 1922, 4·32 in 1921, 4·30 in 1920, and 4·17 in 1913.

864 *Operating Statistics, Finances, and Four-Track Main Lines.*

1924, 17s. 7d. in 1923, 22s. 2d. in 1922, and 9s. 3d. in 1913; for coal, coke, &c., the corresponding figures were 3s. 7d., 3s. 7d., 4s. 9d., and 2s.; and for other minerals, 5s., 5s. 1d., 5s. 10d., and 2s. 6d.

Operating Statistics.

The following statistics do not apply to certain railways of less than standard gauge, and include no figures for 1913. Engine-hours in traffic were 69,754,000 in 1924 and 67,810,000 in 1923; train-miles per train-hour were 13'80 coaching and 8'20 freight in 1924, compared with 13'87 coaching and 8'49 freight in 1923; and train-miles per engine-hour were 10'74 coaching and 3'34 freight in 1924, compared with 10'79 and 3'42 respectively in 1923.

Wagon-miles in 1924 were 5,057,653,000, of which 3,400,020,000 (or 67'23 per cent.) were loaded. Corresponding figures for 1923 were 5,020,802,000, 3,355,100,000, and 66'82 per cent. Total net ton-miles, including free-hauled traffic, were in 1924, 19,062,603,000, and in 1923, 18,960,609,000. Net ton-miles per engine-hour were 443'17 in 1924 and 453'15 in 1923. For general merchandise the average haul was 84'19 miles, for coal, &c., 43'97 miles, and for other minerals, 52'61 miles in 1924, the corresponding figures for 1923 being 82'75, 42'91, and 53'55. The average receipt per ton-mile was 2'31d. for general merchandise, 1d. for coal, &c., 1'13d. for other minerals, and 1'42d. for all descriptions of traffic in 1924. Corresponding figures for 1923 were 2'50zd., 1'02zd., 1'131d., and 1'467d.

BRITISH FOUR-TRACK MAIN LINES.

The 75 miles between St. Pancras and Glendon North Junction, Kettering, L.M.S. (Mid.) Ry., is the longest stretch of continuous four-track main line in Great Britain, although purists might object that the deviation of the goods lines from the fast lines between Souldrop Box and Irchester South Junction (about 3 miles) breaks into its continuity. This system also has another long four-track section of 53 miles between Kilby Bridge, Wigston, and Taptot Junction, Chesterfield. Second in the list comes the Western Division (L. M. S. Ry.) with the 60 miles from Euston to Roade, followed by the Great Western Railway from Paddington to Stevenon, 56½ miles, and the Southern (L. & S. W. Section) Railway from Waterloo (London) to Battledown Junction, Basingstoke, 51 miles. The L. & N. E. (G. N.) Ry. has a greater proportion of its first 100 miles out of London quadrupled than any of the lines mentioned, but the continuity of the four tracks is broken in five places, e.g., Potters Bar, Welwyn, Arlesey, Huntingdon, and Holme, aggregating in length about 18 miles out of the total. In several instances an alternative route, as the Roade-Northampton-Rugby loop, L. M. S. Ry., or the new Cuffley-Hertford line, L. & N. E. Ry., constitutes in effect a quadrupling of the main line, and is so for through traffic purposes.

IRISH RAILWAY STATISTICS (OFFICIAL), 1923.

NORTHERN IRELAND RAILWAYS.		IRISH FREE STATE RAILWAYS.			
Railways wholly in Northern Ireland and partly in Northern Ireland and partly in the Irish Free State are differentiated as far as practicable. The latter section is, however, largely duplicative with the Irish Free State section. Where double figures are given thus 232½-418, the first relates to standard gauge railways only, while the second is the total for all railways concerned.		Partly in Northern Ireland and partly in the Irish Free State			
		Covers railways entirely within the Irish Free State and the whole of the standard-railings companies having lines situated within and without the Irish Free State. Information is, therefore, largely duplicative of that given in Northern Ireland Section.

SALARIES AND WAGES OF RAILWAY SERVANTS.

MALE CLERICAL STAFF, INCLUDING HEAD-QUARTERS, STATION-MASTERS, AND BOOKING CLERKS, FROM AUGUST 1ST, 1919.

Junior Scale.

Age 15, £35; age 16, £45; age 17, £55.

(After this age Juniors pass into Senior Scale as below if successful in passing prescribed educational examination.)

Senior Scale.

Class 5. Commence at £80 per annum and increase by £10 per annum up to £200 per annum.

Class 4. £210 to £230 per annum.

Class 3. £240 to £260 " "

Class 2. £270 to £300 " "

Class 1. £320 to £350 " "

Special Class. £360 and upwards.

(£10 per annum additional paid to those in Junior Scale and Classes 5, 4, 3, 2, and 1 who work at offices, stations and depôts within 10 miles of Charing Cross.)

FEMALE CLERICAL STAFF, FROM AUGUST 1ST, 1919.

Juniors.

Age.	Per week s. d.	Age.	Per week s. d.

Detective	68 0	69 0	70 0	71 0	72 0	73 0	74 0	—	—	—	—
Detective Sergeant	77 0	78 6	80 0	81 6	83 0	84 6	86 0	—	—	—	—

* Includes cost of Living Bonus, which of course fluctuates. The above rates were 1s. less in all cases at end of November, 1925.

Men in any rank who are not supplied by the employing Company with uniform, 4s. per week extra and 3s. per week extra if working at stations or depôts within 10 miles from Charing Cross.

RAILWAY COUNCILS.

Councils set up under Clause 63 of the Railways Act, 1921, provide for the following stages in disputes of labour conditions and wages:—

- Local Departmental Committees (at stations and depôts).
- Sectional Railway Councils (representing various groups of grades).
- Railway Council (representing all grades covered by the scheme). Number on Council, 20, i.e. Railway Officers 10, and Railway Employees 10.
- Central Wages Board (consisting of 8 representatives of the Railway Companies and 8 of the Railway Employees).
- National Wages Board (17 members), consisting of the following representatives:—
 - Independent Chairman appointed by the Minister of Labour. (Mr. Harold Morris, K.C., was appointed to this post in October, 1925.)
 - 6 Representatives of Railway Companies.
 - 6 " " " " Employees.
 - 4 " " " " Users.

THE LARGEST PASSENGER

A new 4-8-2 type Locomotive, completed in 30 working days (September and October, 1925) at the Mt. Clare Works of the Baltimore & Ohio Railroad Company.

The principal proportions are as follows:—

Cylinders, diameter.....	30 in.
" piston stroke.....	30 in.
Piston valves, diameter.....	14 in.
Cut-off in full gear.....	88 per cent.
Wheels, coupled, diameter..	6 ft. 2 in.
Wheelbase, rigid.....	15 ft. 4 in.
" engine total.....	41 ft. 4 in.
" engine and tender total.....	89 ft.
Boiler heating surfaces:—	
Firebox (arch tubes and combustion chamber)....	383 sq. ft.
Tubes and flues.....	5,208 sq. ft.

Total 5,591 sq. ft.

ENGINE IN THE WORLD.

Superheater.....	1,305 sq. ft.
Grand Total.....	6,896 sq. ft.
Steam pressure.....	210 lb. per sq. in.
Grate area.....	89.17 sq. ft.
Weight in working order, engine.....	178 tons 10 cwt.
Weight in working order, tender.....	115 tons 12 cwt.
Weight in working order, engine and tender.....	294 tons 2 cwt.
Adhesion weight.....	122 tons 15 cwt.
Rated tractive power.....	65,000 lb.
Factor of adhesion.....	4.23

The engine has been introduced in order to do away as far as possible with the double-heading of passenger trains between Washington and Grafton and Washington and Pittsburgh, where heavy trains have to be hauled over severe and continuous grades.

RAILWAY ACCIDENTS DURING THE YEAR 1924.

TRAIN ACCIDENTS.

The following Table gives the number of casualties in the various classes of train accidents :—

Class of Accident.	A. Passengers.		B. Servants.		C. Other Persons.		Total all Persons.	
	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
1. Collisions in which passenger trains were concerned.....	10	428	2	33	...	15	12	476
2. Other collisions	7	1	76	1	83
3. Derailments of passenger trains.....	...	50	...	2	52
4. Other derailments	3	...	14	...	1	...	18
5. Accidents due to failure of engines or rolling-stock ...	14	11	3	7	17	18
6. Fires in train	1	1
7. Other accidents	3	2	6	10	26	12	35
Total.....	24	502	8	139	10	42	42	683

MOVEMENT ACCIDENTS.

The following table shows the number of passengers, servants of the Railway Companies and Contractors and other persons killed and injured during 1924 by accidents caused by the movement of railway vehicles exclusive of train accidents, as compared with the average for the preceding five years :—

	1924.		Average of 5 years, 1919 1923.	
	Killed.	Injured.	Killed.	Injured.
<i>Passengers :—</i>				
Attempting to enter or alight from trains.....	21	1,057	26	769
Falling off platforms and being struck or run over by trains ...	12	8	11	8
While crossing lines at stations.....	9	10	8	8
Falling out of carriages during the running of trains.....	30	45	25	45
By the closing of carriage doors.....	...	1,180	...	798
Other accidents.....	13	377	11	249
Total.....	85	2,677	81	1,878
<i>Servants of the Companies and of Contractors :—</i>				
Coupling or uncoupling vehicles	5	452	9	414
Other shunting accidents	42	1,674	49	1,464
Falling off or getting on or off vehicles in motion	7	130	8	145
Coming in contact with overbridges or erections at the side of the lines	1	34	4	37
Attending to engines in motion	3	649	2	555
Working on the permanent way	50	92	52	72
Walking or standing on the line on duty, or when proceeding to or from work	65	156	97	187
Other causes	47	577	36	526
Total.....	220	3,764	257	3,400
<i>Other Persons (exclusive of Trespassers and Suicides) :—</i>				
Passing over railways at level crossings	29	6	36	14
On business at stations or sidings or in other circumstances ...	32	91	25	102
Total.....	61	97	61	116
Grand Totals.....	366	6,538	309	5,394
<i>Trespassers</i>	141	62	153	57
<i>Suicides and attempted suicides</i>	212	13	176	15
Total.....	354	75	329	72

NON-MOVEMENT ACCIDENTS.

The following information concerning accidents on railway premises not connected with the movement of railway vehicles is given as regards the cases shown in Table I. These accidents, for the most part, are not attributable to railway working, and should not properly be classed as railway accidents.

(a) *Passengers*.—By falling on steps or from platforms, &c., in station premises 2 were killed and 393 injured, and from other causes 1 was killed and 394 injured.

(b) *Servants of Companies or Contractors.*—The fatalities and cases of injury to railway servants and servants of contractors have been classified in respect of primary cause, as shown in the following table :—

Cause.	Fatal.	Percentage.	Non-fatal.	Percentage.
1. Misadventure or accidental	29	82'86	16,274	94'64
2. Want of caution or misconduct on the part of the injured person	3	8'57	524	3'05
3. Want of caution or breach of rules, &c., on the part of servants other than the persons concerned	1	2'86	146	'85
4. Defective systems of working, dangerous places, dangerous conditions of work, or want of rules or systems of working	—	—	11	'06
5. Defective apparatus, appliances, &c., or want of sufficient appliances, safeguards, &c.	2	5'71	234	1'36
6. Neglect or non-observance of rules under the Railway Employment (Prevention of Accidents) Act, 1900	—	—	6	'04
Total	35	100'00	17,195	100'00

(c) *Other Persons.*—Thirty persons other than passengers or servants were killed and 491 injured on railway premises, 14 of whom were killed and 358 injured while on business at stations or sidings. Of the fatal cases, 11 were due to persons falling off walls, bridges, &c., 2 to persons falling off wagons or trucks, 9 to persons falling off or being run over by road vehicles, 2 to persons coming in contact with electrically charged rails while trespassing, and 6 to other causes.

Nine were killed and 52 injured while trespassing, and there were 5 cases of suicide and one of attempted suicide.

FASTEST RAILWAY RUNS ON RECORD.

The fastest railway run on record in the British Isles was that made in November, 1924, by the "Flying Scotsman" from King's Cross, with a heavy load consisting of 12 vehicles weighing 356 tons and drawn by one of the new L. & N. E. Rly. "Pacific" locomotives, covering part of the journey between Biggleswade and Sandy at 80 miles per hour, and the second fastest was that made by the Great Western Railway 4-2-2 engine No. 3065 *Duke of Cornwall*, on May 9, 1904, with the Transatlantic mails from Plymouth to London, when the 118½ miles from Bristol to Paddington, *via* Bath, were covered in 99 min. 45 sec., start-to-stop, at an average of 71·3 miles per hour. But this time included a slow to 10 miles per hour through Bath station, and another to walking pace for the renewal of Cricklade bridge at Swindon. The 81½ miles from Wootton Bassett to Westbourne Park were covered in 62 min. 55 sec., also including the latter check, and the average speed for most of the journey beyond Swindon was about 85 miles per hour, with a maximum of 91·8 miles per hour near Slough. Earlier in the same journey the 4-4-0 engine No. 3440 *City of Truro*, had achieved another record in attaining a speed of 102·3 miles per hour in the descent of Wellington bank. In the United States, on July 20 of the same year, the "Atlantic City Flier" of the Philadelphia and Reading Railroad, booked to cover the 55½ miles from Camden, N.J., to Atlantic City in 50 min., is reputed to have completed the trip in 43 min., at an average of 77·4 miles per hour; this is probably the "speed record" for the U.S.A., and the longest non-stop run in the States is claimed by the Michigan Central Railway from Detroit to Fallsview, a distance of 224·7 miles in 243 minutes at an average speed of 55'30, and compares with the longest British non-stop of 226·9 miles, average speed 55'8, see page 879.

CENSUS OF RAILWAY EMPLOYEES.

Figures showing the Staff Employed by the Various Railway Companies in March, 1925, as compared with 1924, and Numbers in Various Grades in 1925 and 1924.

A return has been issued showing (1) the number of persons employed by the several railway companies of Great Britain during the week ended March 28, 1925, and (2) a comparison of the rates of pay, and also of the average weekly salary or wage and the average weekly earnings of certain selected grades during the weeks ended March 29, 1924, and March 28, 1925.

Details are given of the number employed in each of the principal grades of the four great companies and certain other selected companies, with totals for each company and for Great Britain. Male and female employees are shown separately, and, with the exception of staff not employed directly, *i.e.*, staff employed by contractors, all persons in the service of the railway companies during the week of the census are taken into account. The figures comprise the number of staff receiving salaries or wages for the full week, combined with the equivalent number of full-time workers in cases where employees were paid for less than the complete week.

The average earnings of certain sections of the male adult staff were shown by the returns received to be as follows:—

	Week ended		March 28, 1924.	
			1925.	1924.
Staff entered at salaried rates:—	s.	d.	s.	d.
Clerical, supervisory, &c., staff (excluding officers in receipt of £500 per annum and upwards and staff entered under ancillary businesses)	91	3	92	0
Staff entered at wages rates (excluding staff entered under ancillary businesses):—				
Conciliation staff.....	67	4	67	6
Shop and artisan staff	69	11	68	7

Summary of Total Staff Employed in 1925 and 1924.

Name of Company.	At March 28, 1925.	At March 29, 1924.
Great Western	117,850	117,113
London & North Eastern	206,893	207,528
London Midland & Scottish	273,129	274,523
Southern	73,469	70,484
Cheshire Lines Committee	4,831	4,947
London Electric	6,626	6,507
Metropolitan	4,079	3,971
Metropolitan District	3,952	3,942
Midland & Great Northern Joint Committee	2,480	2,535
Somerset Joint Committee	1,456	1,484
Railway Clearing House	3,061	3,236
Other Companies	4,236	4,303

Total, Great Britain ... 702,062 700,573

The following table gives the numbers employed in each of the principal grades and in ancillary businesses during the selected week in 1925, with the corresponding numbers for the selected week in 1924:—

MALE STAFF.

Railway Staff:—	1925.	1924.
Capstainers	1,516	1,481
Carters and vanguarders	21,338	21,271
Carriage cleaners	7,336	7,083
Carriage and wagon examiners	4,802	4,834
Carriage and wagon oilers and greasers	2,259	2,297
Checkers	11,219	11,159
Cleaners	574	544
Crozier keepers	1,545	1,532
Engine cleaners	11,114	11,385
Drivers & motormen	38,292	38,062
Firemen & assistant motormen	36,359	36,326
Foremen and chargemen	7,612	7,547
Guards Goods	16,792	16,880
Passenger	8,153	7,927
Hydraulic and pumping engine staff	1,540	1,540
Labourers	32,140	33,415
Lampmen	2,417	2,389
Loaders, callers off, ropers and sheeters	7,170	6,931
Locomotive shed staff (excluding labourers)	10,866	10,731
Messengers	1,935	2,477
Number takers	2,664	2,874
Officers and clerical staff	77,118	77,887
Permanent-way men	66,480	65,751
Pointsmen	393	401
Police staff—Supervisory grades	214	215
Other grades	2,751	2,701
Porters—Goods	23,577	21,417
Passenger	27,858	27,857
Porter guards	511	498
Signalmen	1,723	1,807
Shop and artisan staff:—		
Supervisory grades	3,029	3,041
Other grades (excluding labourers & watchmen)	119,137	115,330
Shunters	18,055	18,054
Shunt horse drivers	712	736
Signal and telegraph men	5,722	5,623
Signalmen	29,184	29,205
Signal-box lads	1,097	1,138
Stationmasters, yardmasters, &c.	7,257	7,434
Supervisory staff (other than shop and artisan, and police)	11,935	12,216
Technical staff	2,669	2,647
Ticket collectors	5,087	5,026
Traffic control staff	1,330	1,104
Watchmen	579	682
Miscellaneous grades	11,292	11,325
Railway Total	642,920	640,980
Ancillary Business Staff:—		
Canal staff	1,597	1,594
Dock and quay staff	16,119	17,165
Marine staff afloat	5,508	5,444
Marine and dock shop and artisan staff	4,207	3,900
Motor omnibus and passenger road vehicles:—conciliation staff—traffic department	399	360

874 Railways—Summary of Total Staffs—Principal Railway Tunnels.

Summary of Total Staff Employed in 1925 and 1924—continued.

	1925.	1924.
Hotel, refreshment room, dining-car, and laundry staff	7,425	7,260
Total—Ancillary Businesses	35,255	35,723
Total—Male Staff	678,175	676,703
FEMALE STAFF.		
Railway :—		
Carriage cleaners	786	763
Clerical and technical staff	9,787	9,705
Crossing keepers	1,501	1,435
Office cleaners and charwomen	3,383	3,469
Shop and artisan staff	1,263	1,274
Waiting-room and lavatory attendants	773	810
Miscellaneous grades	443	461
Total	17,996	17,917
Ancillary Businesses :—		
Hotel, refreshment room, dining car, and laundry staff	5,781	5,828
Marine staff	110	125
Total—Female staff	23,887	23,870
Grand Total, all Staff	702,062	700,573

(c) Staffs of Railway Clearing Houses not recorded in 1913.

THE RAILWAY CLEARING HOUSE.

This Institution was opened in Jan. 2, 1842, and in addition to the work of clearing through bookings of passenger and luggage traffic, is the medium through which agreements relating to rates and fares, &c., are arrived at. *Chairman*, E. R. Turtton, M.P.; *Secretary*, P. H. Price, O.B.E. *Offices*, Seymour Street, N.W.

Name of Company.	IRELAND.		All Staff.

Indian Railways in 1923-1924.

The construction of Railways in India commenced in 1853. The mileage opened from 1853 to 1880 inclusive was 9,166, an average of 327 miles a year. From 1881 to 1925, 29,052 miles were opened, an average of 645 miles a year. Mr. Wardlaw-Milne, on April 6, 1925, asked the Under-Secretary for India what was the capital debt of the railways of India at the present time.

Earl Winterton: The amount of the capital at charge on the Indian State Railways (including those worked by companies) on March 31, 1925, is estimated at 654½ crores of rupees, or approximately (at present rates of exchange) £490,000,000. During the year under review the separation of the railway from the general finances of the country, which was one of the chief recommendations of the Acworth report, had not come into effect, but it had been agreed by the Legislative Assembly that a definite sum for capital expenditure on rehabilitation in the five years 1922-1927 should be guaranteed. It will be remembered that the Acworth Committee's recommendation for the appointment of a Chief Commissioner was carried out in November, 1922. The Chief Commissioner's proposals for the complete re-organisation of the Railway Department were submitted to Government in January, 1923, and finally approved with certain modifications in November, 1923, but did not come completely into effect until April 1, 1924, i.e., not until after the close of the year under review. The new organisation has been designed with the object of fitting the department for the work of administration of the railways as a commercial concern, and is based on the principle of giving it such a measure of independence in its management of railway problems as is compatible with its position as a department of government. But, pending the full operation of this new organisation, the recommendations of the Acworth Committee as to decentralisation began to be adopted by removing as much detail work as was possible under the existing system, and by considerable delegation to Agents. The report refers to the unqualified success of the divisional organisation which was introduced in a partial form on the Great Indian Peninsula Railway on November 1, 1922. The greater part of the immediate measures of economy recommended by the Inchcape Committee were also given effect to, though it was not possible to accept in all cases the figures suggested by the Committee.

The active co-operation of the railway administrations and the Railway Board in bringing the railways to a state of greater efficiency resulted in a profit in 1923-24 of Rs. 6.47 crores on railways owned by the State, as compared with Rs. 1.22 crores in 1922-23. The results are summarised below:—

(In lakhs of Rupees.)
1923-1924. 1922-1923.

(i) Total capital at charge (Central Government)	6.40.72	6.22.20
(ii) (a) Gross traffic receipts (including receipts in England) ...	94.65	93.22
(b) Subsidised companies—		
Government shares	24	26
of surplus profits		
Total receipts	94.89	93.48

(In lakhs of Rupees.)
1923-24 1922-23.

(iii) Deduct—		
(a) Working expenses	61.05	65.96
(b) Surplus profits paid to companies.....	1.15	69
(c) Interest and other payments	26.22	25.61
Total charges	88.42	92.26
Surplus	6.47	1.22

The reduction of Rs. 4.9 crores in working expenses is made up of Rs. 1.59 crores under programme revenue, Rs. 0.98 crores under fuel, Rs. 0.57 crores under "maintenance and repairs of the track, buildings, rolling-stock and plant," and Rs. 1.80 crores under establishment charges and general operating expenses and expenditure of a miscellaneous nature. Reduction of expenditure was the main preoccupation of the Agents of railways throughout the year.

Total capital outlay on all railways during 1923-24 was Rs. 21.32 crores, out of which Rs. 19.77 crores were spent on State owned railways, Rs. 9.51 crores being for rolling-stock. A total mileage of 430.12 miles was opened during the year, of which 253.34 miles were on the 5 ft. 6 in. gauge, 155.11 miles on the metre gauge, and 21.67 miles on the 2 ft. 6 in. and 2 ft. gauges. At the close of the year 759.02 miles of line were under construction.

Passenger earnings increased by 1.32 per cent. The increase in fares has been accompanied by a continuous decline in the number of first, second and intermediate class passengers, while the increase in third-class fares has only slightly reduced the progressive rate of increase in numbers as compared with previous years. In goods traffic there was little variation in the main staple commodities carried except for a substantial increase under grain and pulses. A rebate of 25 per cent. on the export rate from Calcutta for coal and coke from collieries on the East Indian and Bengal-Nagpur Railways was introduced from January 1, 1924.

Government of India Railway Department (Railway Board).

Chief Commissioner of Railways, Sir C. D. M. Hindley, V.O.

Financial Commissioner, G. G. Sim, C.I.E., I.C.S. Members, P. C. Sheridan, C.M.G.; F. Austin Hadow, C.V.O.

Deputy Director, Way and Works, Muzaffar

Hussain.

Dpy. Director, Projects, P. H. Maslin, O.B.E., M.C.

Deputy Director, Traffic, R. N. Nicolls, O.B.E.

Deputy Director, Finance, A. M. Hayman.

Assistant Director, Technical, K. C. De.

Assistant Director, Finance, Rai Sahib B. D. Puri.

*Address—India Office, Whitehall, S.W. 1. All others at Simla, India.

878 Indian Railways—Engineers & Solicitors of Principal Railways, &c.

Assistant Secretary, R. Thomas.
 Officers on Special Duty, A. A. L. Parsons, I.C.S.;
 Khan Sahib Barkat Ali.
 Superintendents, H. A. Colin Campbell;
 Muhamed Hussain Khan; V. G. Gadgil;
 W. S. Wood; C. H. L. Harvey; Rai Sahib
 A. L. Misra; P. B. Chandwani (Offg.);
 Ghanasham Dass (Offg.); W. W. Morgan.
 Accountant-General, G. W. V. de'Rhe Philipe,
 O.B.E., F.E.S.
 Deputy Accountant-General, J. L. Kaul.
 Government Inspectors, E. B. Beatson; Major
 W. Macrae, R.E.; D. M. Cookson; H. D. Green;
 C. H. H. Edwards; A. E. B. Sullen; Lt.-Col.
 E. Barnardiston, D.S.O., R.E.; E. L. Manley.

* Address—India Office, Whitehall, S.W. 1. All others
 at Simla, India.

India Office (Railway Department).
 Whitehall, London, S.W. 1.
 Secretary, W. Stantiall, C.I.E.
 Assistant Secretary, F. W. H. Smith.
 Clerks, R. Mowbray; C. W. Shephard.
 Government Director of Indian Railway
 Companies, Sir E. A. S. Bell, C.I.E.*
 Assistant, W. Gauld.
 Consulting Engineers, Messrs. Rendel, Palmer
 and Tritton.

NOTE.—At the standard rate of exchange of
 Rs. 10 to the pound sterling, which has been
 adopted, with effect from the beginning of the
 official year 1920-21, in accordance with the
 proposals of the Currency Commission, a lakh of
 rupees (Rs. 1,00,000) is equivalent to £10,000,
 and a crore of rupees (100 lakhs) to £1,000,000.

ALPHABETICAL LIST OF ENGINEERS AND SOLICITORS OF BRITISH & IRISH RAILWAYS* (continued from page 867).

Railways.	Engineer.	Solicitors.
Belfast & County Down	P. A. Arnott, C.E.	E. & R. D. Bates.

e Conditional stop. f Wednesdays and Saturdays only. g Working stop to cross up train on single line.
h Saturdays only. k And at 6.5 P.M. * Majority of distance single line. † Partly single line.

In the early part of the 18th century numerous inventors propounded schemes for applying steam power to vessels to be run upon rivers and canals. A chronological list from 1707 to 1853 is given below.

For the establishment of lines from 1861 to 1883 and for further information see WHITAKER'S ALMANACK, 1913 edition, including the Evolution of the Steamship in the North Atlantic.

In 1824 ocean trade was then carried on with sailing ships, mostly under 500 tons each, and all the steamboats in the United Kingdom only numbered 109.

As the size of steamships increased the heavy cost of construction necessitated the establishment of Corporations, with great strength of capital, which control the principal ocean routes (see page 887).

FIRST STEAMBOATS, PIONEER SAILINGS AND EARLIEST LINES.

1707. Denis Papin experimented on River Fulda with paddle-wheel steamboat.

1736. Jonathan Hulls patented designs similar to modern paddle boat.

1769. James Watt invented a double-acting slide-lever engine.

1783. Marquess of Jouffrey made experiments in France.

1785. James Ramsey, in America, propelled a boat with steam through a stern-pipe.

1785. Robert Fitch, in America, propelled a boat with canoe-paddles fixed to a moving beam.

1787. Robert Miller, of Edinburgh, tried primitive manual machinery.

1788. Miller, with Symington, produced a double-hull stern-wheel steamboat.

1802. *Charlotte Dundas*, the first practical steam tugboat, designed by Symington.

1803. *Phoenix*, screw-boat designed by Stephens in New York; first steamer to make a sea voyage.

1807. *Clermont*, first passenger steamer continuously employed; built by Fulton in U.S.A.

1812. *Comet*, first passenger steamer continuously employed in Europe; built by Miller in Scotland.

1818. *Rob Roy*, first sea-trading steamer in the world; built at Glasgow.

1819. *Savannah*, first auxiliary steamer, paddle wheels, to cross the Atlantic; built in New York.

1821. *Aaron Manby*, first steamer (English canal boat) built of iron.

1823. City of Dublin Steam Packet Co. was established.

1824. General Steam Navigation Co. was established at London.

1824. George Thompson & Co. (Aberdeen Line) were established.

1825. *Enterprise* made the first steam passage to India.

1825. *William Fawcett*, pioneer steamer of the P. & O. S.N. Co.

1830. T. & J. Harrison (Harrison Line) were established at Liverpool.

1832. *Elburkah*, iron steamer, took a private exploring party up the Niger.

1834. Lloyd's Register for British and Foreign Shipping established.

1836. F. Green & Co. established at London.

1836. Austrian Lloyd Steam Navigation Co. established at Trieste.

In 1844 the steamboats of all kinds registered in the United Kingdom amounted to less than 1,000 tons, increased to nearly 8,000 tons by 1820. There were 766 British steamers afloat in 1838, in all just short of 150,000 tons. The invaluable Register Book which is published by the Committee of Lloyd's Register of British and Foreign Shipping shows that on June 30, 1925, the steamship empire builders of Great Britain owned 10,063 vessels, 21,907,024 gross tons, exclusive of 921 ships (314,274 tons) belonging to the dwindling disciples of time-honoured canvas. The total for the world was—Steam, 63,380,376 tons; and sail, 2,261,042 tons.

Owing to recent inventions passengers enjoy greater immunity from accidents, the majority of passenger steamers being now fitted with installation of wireless telegraphy and with submarine signalling apparatus.

1837. *Francis B. Ogden*, first successful screw tugboat; fitted with Ericsson's propeller.

1838. *Archimedes*, made the Dover-Calais passage under two hours, fitted with Smith's propeller.

1838. R. F. Stockton, built for a tugboat, fitted with Ericsson's propeller, sailed to America; first iron vessel to cross the Atlantic; first screw steamer used in America.

1839. *Thames*, pioneer steamer of the Royal Mail Steam Packet Co.

1839. George Smith & Sons (City Line) were established at Glasgow.

1840. *Britannia*, pioneer steamer of the Cunard Line.

1840. *Chile*, pioneer steamer of the Pacific Steam Navigation Co.

1845. *Great Britain*, first iron screw steamer, precursor of modern Atlantic steamer.

1845. Thos. Wilson, Sons & Co., Ltd. (Wilson Line) established at Hull.

1847. Pacific Mail Steamship Co. established in America.

1849. Houlder Brothers & Co. established at London.

1850. Bullard, King & Co. (Natal Line) established at London.

1850. Messageries Maritimes de France established.

1850. Inman (now American) Line established at Liverpool.

1851. *Tiber*, first steamer of the Bibby Line, established 1821 at Liverpool.

1852. *Forerunner*, pioneer steamer of the African Steamship Co.

1853. Union Steamship Co. was established (now Union-Castle Line).

1853. *Borussia*, first steamer of the Hamburg-American Packet Co., established 1847.

1854. *Canadian*, first steamer of the Allan Line, established 1820.

1854. Donaldson Bros. established at Glasgow.

1855. British India Steam Navigation Co. was established.

1856. *Tempest*, first steamer Anchor Line.

1857. *Waldensian*, first steamer of J. T. Reunie, Son & Co. (Aberdeen Line).

1858. *Bremen*, first Atlantic steamer of the Norddeutscher Lloyd, established 1856.

1858. *Great Eastern* launched into the Thames, Jan. 31; commenced, May 1, 1854.

1858. British and African Steam Navigation Co., Ltd., established at Liverpool.

FUNNELS AND HOUSE FLAGS.

Line.	Funnel.	Flag.
Aberdeen	Yellow	Red and blue horizontal stripes; white star in centre.
American	Black; with white band.....	White, with blue eagle.
Anchor	Black	White burgee, with red anchor.
Atlantic Transport.....	Red; with black top	Red, white and blue horizontal stripes, with stars.
Bibby	Pink; black top.....	Red.
Blue Funnel Line	Light Blue	Blue; A in black on a white diamond.
Blue Star Line	Buff; black top and blue star	Red burgee; five-pointed blue star.
Booth	Black.....	White; red diagonal cross, B in centre.
British & African	Black.....	Blue burgee; white cross.
British India	Black; with two white stripes	White burgee; with red diagonal.
Bucknall.....	Black; three white diamonds	Blue; B S L in three white diamonds.
Bullard, King & Co. ...	Buff; black top, mauve band	Red, white St. George's Cross, initials in centre.
Canadian Govt. Merchant Marine, Ltd.	Buff; black top.....	Blue: thin red cross over broad white cross.
Canadian Pacific Steamships, Ltd.	Buff	Three red and three white squares, initials in centre.
Chargeurs Réunis	Buff; white band with red stars	White flag with five red stars.
Cie. Gén. Transque ..	Red; with black top	White; red ball; name of Co. in red.
Compania Trasatlantica	Black	Blue; white ball.
Cunard	Red; black top	Red; in centre lion holding globe.
City	Buff; black top, white band	Red, initials S S and blue pennant, initials J R E.
Elder Dempster	Buff	White burgee; red St. George's Cross, crown in centre.
Ellerman	Buff; black top, white band	Blue pennant; J R E in white.
Furness	Three black and two red bands	Blue; F in white.
Gen. Steam Nav. Co. ...	Black.....	White; 1824 under globe in centre, initials in corner.
Houlder	Black; white Maltese Cross on red band	Red; white Maltese Cross.
Lamport & Holt	Blue; black top, white band	One white longitudinal stripe (L & H in black) between two red stripes.
Leyland	Pink; black tops	Red.
Messageries Maritimes	Black.....	White; red at corners; letters M M.
Nederland	Buff; black top.....	White; blue cross in centre, red diamond (white N).
Netherlands-American	Buff; white between two green bands	White longitudinal stripe (N A S M) between two green ones.
New Zealand S. Co. ...	Buff	White; red St. George's Cross, initials in squares; red, white and blue pennant above.
Nippon Yusen K.	Black.....	White; two red horizontal stripes.
Orient S. N. Co.	Yellow	White; blue cross, crown in centre.
Pacific Steam Nav. Co.	Buff	White; blue St. George's Cross, crown in centre; red initials in squares.
P. & O.	Black.....	Square divided diagonally into red, white, blue and yellow quarters.
Prince	Black; one deep and one narrow red band, Prince of Wales Feathers	Red burgee; Prince of Wales Feathers in centre.
Red Star.....	Black; white band	White burgee; one red star.
Rotterdam-Lloyd.....	Black.....	Wide white cross on red ground; blue square (R L white) in centre.
R. Mail S. P. Co.	Buff	White; red diagonal cross and gold crown.
Shaw, Savill & Albion..	Buff; black top	Red cross on white square; one corner blue with white stars and red cross.
Union-Castle.....	Red; black top	Blue; red diagonal cross super-imposed white cross.
White Star.....	Buff; black top	Red burgee; five-pointed star.
Wilson.....	Red; black top	White pennant; red ball.

THE LARGEST MERCHANT VESSELS AFLOAT.

THE following list has been compiled from *Lloyd's Register* (June 30, 1925), and includes all steamers of 12,000 tons upwards.

Abbreviations. — Br. = British; Fr. = French; Ger. = German; Hol. = Netherlands; Itl. = Italian; Jap. = Japan; Nor. = Norway; Swe. = Sweden; U.S. = United States; m. = Motor-ship; δ = Turbines; ** = Twin screws; *** = Triple screws; **** = Quadruple screws; N.R. = No record yet.

LARGEST STEAMERS FITTED WITH REFRIGERATING APPLIANCES.

Hardiecke Grange, 481,998 cubic feet (Houlder); *Princesa*, 474,702 cubic feet; *Baronesa*, 474,541 cubic feet; *Duquesa*, 472,051 cubic feet; *Marquesa*, 465,852 cubic feet; *Canonesa*, 456,576 cubic feet (Furness Houlder Argentine Lines); *Neponset*, 461,664 cubic feet (U.S. Shipping Board); *Norfolk*, 447,433 cubic feet (Fed. Steam Nav.); *Nariva*, 445,400 cubic feet; *Nafia*, 445,200 cubic feet (R.M.S.P. Meat Transports. Ltd.); *Argyllshire*, 442,856 cubic feet (Scottish Shire Line). There were on June 30, 1925, 906 vessels fitted with refrigerating apparatus; of these, 130 had each insulated chambers, with a capacity of not less than 300,000 cubic feet; 32 had each not less than 250,000 cubic feet; and 190 had each not less than 80,000 cubic feet.

LARGEST STEAMERS FITTED FOR LIQUID FUEL.

**Majestic*, 56,551 tons (White Star); **Leviathan*, 59,957 tons (U.S. Shipping Board); *Berengaria*, 52,226 tons (Cunard); *Olympic*, 46,439 tons (White Star); *Aquitania*, 45,647 tons, *Mauretania*, 30,606 tons (Cunard); *Belyeland*, 27,132 tons (International Nav. Co.); *Empress of Scotland*, 25,128 tons, *Empress of Australia*, 21,861 tons, *Empress of Canada*, 21,517 tons (Canadian Pac. Rly. Co.); *Duilio*, 24,281 tons (Nav. Gen. Italiana); *Minnetonka*, 21,998 tons; *Mineraska*, 21,716 tons (Atlantic Transport); *Mooltan*, 20,847 tons, *Maloja*, 20,837 tons (P. & O.); *Cap Polonio*, 20,576 tons (Hamburg Sud Amerik); *Franconia*, 20,175 tons (Cunard); *Oronsay*, 20,001 tons (Orient Steam Nav. Co.). There were on June 30, 1925, 3,440 vessels fitted for liquid fuel, of which 1,858 were over 5,000 tons, and 280 under 1,000 tons each. Those with a gross tonnage exceeding 20,000 tons each are given above.

Carriage of Petroleum in Bulk.—1,293 steamers and 127 sailing ships were engaged in carrying petroleum in bulk.

FASTEST OCEAN-GOING STEAMERS IN THE WORLD NOT UNDER 20 KNOTS.

In order of Speed.—*Mauretania*, *Majestic*, France, *Aquitania*, *Berengaria*, *Leviathan*, *Olympic*, *Mecklenburg*, *Oranje Nassau*, *Prinses Juliana*, *Waline*, *Paris*, *La Savoie*, *Esperia*, *Duilio*, *Giulio Cesare*, *Agamemnon*, *Mount Vernon*, *Nairana*, *Maori*, *Loongana*, *Homer*, *Orama*, *Oronsay*, *Otranto*, *Empress of Asia*, *Empress of Canada*, *Empress of Russia*, *Lutetia*, *Massilia*, *Charles Roux*, *Columbus*, *Conte Rosso*, *Conte Verde*.

FASTEST SHORT-TRIP STEAMERS.

In order of Speed.—*Versailles*, *Anglia*, *Hibernia*, *Cambria*, *Scotia*, *Paris*, *Engadine*, *Riviera*, *Viking*, *Biarritz*, *Maid of Orleans*, *H. F. Alexander*, *St. Andrew*, *St. David*, *St. Patrick*, *Manxman*, *Mona's Isle*, *Snaefell*, *Victoria*, all not under 22 knots.

* See note on p. 85.

LETTERPRESS PRINTING.

NO other trade or craft holds so high and honourable a position as that attained by printing in modern times. No other power is comparable to that of the printed word.

And no other name stands for sounder reputation and more solid achievement in the annals of British printing than that of Clowes.

The house of William Clowes & Sons was founded in 1803 by a young man, William Clowes, who was just out of his apprenticeship. He came from Chichester, but decided to make his adventure in London, and accordingly opened up on his own account in Villiers Street, Strand, with a capital of £350.

From the first the business was progressively successful. The just enough of type for one day's work, which compelled him at the beginning to run off on the hand press at night what he had set during the day, so as to release the type for further service, was very speedily multiplied. His single press and one journeyman printer as assistant were soon inadequate to the requirements of a rapidly growing business.

Before very long, larger premises in Northumberland Court, Charing Cross, were taken. The work turned out—small jobbing orders at the outset—came to include the printing of Government papers and of books and periodicals for such publishers as John Murray, Longmans, and the Religious Tract Society, for which the firm still print to this day.

The printing of newspapers by steam presses was introduced into the *Times* office in 1814. William Clowes & Sons were the first to adopt steam-driven machines for book and general printing. This new departure created a sensation, and a succession of distinguished visitors came to Northumberland Court to see the new mechanical wonder.

It was this first steam press that caused William Clowes to move to Blackfriars—for the Duke of Northumberland objected to its proximity—where in Duke Street, Stamford Street, he established himself at an address which is still the headquarters of this firm, though the premises occupied have of course multiplied and extended themselves amazingly since then.

Twenty years after its modest foundation the printing works of William Clowes had become one of the sights of London to all interested in industrial organisation. They even furnished material for a long and laudatory article in the exclusive *Quarterly Review*.

William Clowes & Sons were entrusted with the printing of the famous Mulready envelopes under the strict supervision of the Post Office.

In going through old files of the firm's correspondence there are many letters from Charles Dickens, whose novels were printed for Messrs. Chapman & Hall by Clowes & Sons. When any of his books were in course of publication (and it may be recalled they were issued in fortnightly and monthly parts), Dickens visited and

spent long days at the Duke Street printing works correcting his stories in proof.

When the Great Exhibition of 1851 was being organised, Messrs. Clowes were approached by the Commission to undertake the printing of catalogues and all other matter. The task was a tremendous one, involving as it did the printing of volumes of no fewer than 5,000 pages. It was necessary that the whole matter should be standing in type at the same time—a strain on their resources of type which few firms could withstand even to-day.

Besides the Great Exhibition, Messrs. Clowes carried out the printing in connection with all the South Kensington Exhibitions.

When members of the legal profession—both barristers and solicitors—were extremely dissatisfied with the manner in which proceedings in Court were reported, the lawyers formed a committee with the object of providing their own reports, and Mr. George Clowes, of William Clowes & Sons, was consulted. When the project seemed unable to be carried on through lack of capital, the firm offered to finance the publication to the extent of £10,000. The offer was accepted, and from the issue of the first volume the accuracy of the reports and excellence of printing assured the success of the scheme. Perhaps, however, the largest undertaking of all was the printing of the British Museum Catalogue, which took twenty-seven years to do, and was full of foreign type.

As long ago as 1873 the firm had so outgrown its premises in Duke Street (in spite of the fact that neighbouring warehouses were being rented for storing paper and printed sheets), that a branch works was established at Beccles, Suffolk. Equipped with the latest type of electrically-driven machinery, this now constitutes one of the largest book-printing establishments in Great Britain.

The relief of pressure on the London works was only temporary, and increasing business necessitated, in 1897, the renting of additional land at Duke Street, where another building was erected. On the expiry of the lease of the original premises in Northumberland Court, this branch of the firm was transferred to more commodious premises in Great Windmill Street, Piccadilly Circus, where the smaller orders from West End customers are executed.

In combination with its capacity to print in any language, the firm has proved itself of incalculable advantage to British merchants and manufacturers by enabling them to translate and produce catalogues, labels, price lists, etc., for any country.

Long ago as they were established, Clowes have never allowed themselves to become old-fashioned in ideas or equipment. They have always been among the first to utilise the intermittent stream of new mechanical and other devices that have from time to time revolutionised print-craft on its technical side; and to-day as modern printers their several establishments stand second to none.

ONE OF THE VITAL NEEDS OF MODERN CIVILISATION.

TINPLATES.

"STEWARD, are these peas fresh?" "I don't know, sir." "Well, just find out, will you?" "No, sir, tinned." "They certainly are delicious; I could not have told the difference from fresh ones. I shall be glad if you will give me the name of the firm?" "Certainly, sir." The means of enjoying that appetising vegetable out of season is entirely due to tinplate, from which is made the tin container, or can. True, there is glass, that wonderful crystal material, but which for preserving and withstanding the buffets of life is unable to compete with its fellow-traveller, the tin can. The art—and it is a venerable one—of coating one metal (steel), an easy victim to rust and acid, with a thin veneer of another metal (tin) and inducing them to marry, enables them to present a solid and united front to the erstwhile easy conquerors, rust and acid. It is by this means that such a variety of foods is at the command of the world. We here append a list of some of the uses to which tinplate is put to make containers for: Milk, fruits, fish, tobacco, oils, cream, meat, utensils, sweets, vegetables, game, cigarettes, biscuits. In fact, one meets it at every turn and in the remotest parts of the world. It is interesting to note that while there are certain fruits which do not take kindly to being preserved, the number has been lately reduced by the succumbing of that succulent of citrous foods, the grapefruit for which California is so famous. The manufacture of tinplates to-day constitutes a need as great as the growing of wheat for the making of bread.

In 1000 Bohemia was making iron sheets that were tinned with tin mined in the Hartz Mountains, and enjoyed an entire monopoly of this secret art; but in 1620 the Duke of Saxony established the industry within his kingdom, where it developed and flourished to a great degree for several years. In 1670 Captain Yarrington succeeded in interesting a number of gentlemen to put up some money for the purpose of acquiring the knowledge of the secret of tinned plate making, and himself headed the expedition into the enemies' country. From all accounts he had a difficult task, but returned with the requisite information, and works were built at Pontypool, Monmouthshire, in 1675. However, when a few plates had been produced with a certain amount of success, unforeseen difficulties concerning the rights of manufacture forced the project to be dropped. Later Major John Hanbury successfully made another effort to produce tinned plates, and from that date the industry has advanced and developed. It had been established in Monmouthshire, but began to spread westwards, and finally settled in Glamorganshire.

Among the earlier sites of the manufacture was the Melingriffith Works, situated on the River Taff near Cardiff, which commenced tinning iron about 1750, though for many years previous to this iron had been worked. To-day one finds that Melingriffith is the third oldest works holding a continuity of the production of tinplates.

The name of Melingriffith is of interest in itself, as, years before any works were established, a man by the name of Griffith made use of the water-power available from the River Taff to work a water-wheel which he built to drive his flour mill. In those days everyone spoke Welsh, and as to-day the mill would be known as Griffith's Mill, so then Melingriffith (Melin being Welsh for "mill"). It is noteworthy that for the last thirty-six years the works have been immune from industrial unrest, a tribute to be shared by management and men, thereby creating an atmosphere of reliability to meet obligations, which must give to the personal consumers a distinct partiality to

ELYN tinplates.

The following is a short description of the departments in the manufacture:—(1) Hot Rolling Mills; (2) Black Pickling; (3) Black Annealing; (4) Cold Rolls; (5) White Annealing; (6) Finishing Department. So far the processes enumerated have only prepared the steel sheet to receive the coat of tin, and whereas it takes seven days to complete these operations, only a few minutes are required to change the name from "finished blackplate" to "tinplate." Thanks to the inventors of the famous Thomas and Davies Patent Automatic Combined Feeding, Pickling and Tinning Machine, at the Melingriffiths Works a sheet can now be tinned and go through the assorting room in less than five minutes, whereas by the old method a period of sixteen hours was not uncommon. By the Thomas and Davies process it is now recognised by the manufacturer that much lower costs of production are obtained, and which advantage in the future will be reaped by those far-sighted enough to provide for hard times; also by the consumer in obtaining a better plate, inasmuch as evenness of quality and tin coating are concerned, and also in flatness, a point which is of utmost importance in plates which are to be decorated.

To the home consumer we would suggest that if "seeing is believing" a visit should be paid us at Cardiff, the largest coal-exporting port in the world, and one of the finest cities in the British Isles, a mere three hours by train from London, thence four miles by car to Melingriffith, where we are at your disposal for as long as you care to remain, to convince yourself that our methods are modern, our interest sincere, and our endeavours producing good results.

ADVERTISEMENTS.

Applications for advertisement space in the 1927 Editions of WHITAKER'S ALMANACK should be made as early as possible in the year to The Advertisement Manager, WHITAKER'S ALMANACK, 12, Warwick Lane, E.C. 4.

PUBLIC SCHOOLS' SCHOLARSHIPS.

**BRADFIELD
COLLEGE.**

An Examination for Entrance Scholarships and Exhibitions (Three £100, four £50, six £40, one £30), will be held in June. Particulars can be obtained from the SECRETARY, BRADFIELD COLLEGE, BERKS.

**KING'S SCHOOL,
CANTERBURY.**

Scholarships are offered for competition twice annually, in June and November. A King's Scholarship is tenable with an Entrance Scholarship, so that a boy may at entrance win scholarships to the value of £55 15s. a year for five years. Full information from HEADMASTER, KING'S SCHOOL, CANTERBURY.

**DOVER
COLLEGE.**

Three Entrance Scholarships for Boarders are awarded in July, value £70, £50, and £30, one of each. The Common Entrance Examination is used as a Preliminary Test and selected Candidates are asked to do higher papers. The examination can be taken at the Preparatory School.

**EXETER
SCHOOL,
EXETER.**

Entrance Scholarship Examination July 1st and 2nd, 1926. Four Scholarships, £40 10, may be offered, and one Honour Scholarship of £40 for the Sons of Officers who have fallen in the War. University Endowment, £600 a year. Apply to THE HEADMASTER, EXETER SCHOOL, EXETER.

**SEDBERGH
SCHOOL.**

Entrance Scholarship Examination in May or June in London, after preliminary test at Preparatory Schools. Ten Scholarships (£100 to £40) are offered. House Exhibitions may be awarded to deserving candidates. Apply to the HEADMASTER'S SECRETARY.

UPPINGHAM.

An Examination will be held in May or June, 1926, for about Eight Open Scholarships, varying from £85 to £30 per annum. Allowance is made for age, but a candidate must be under 14 on May 1st, 1926. Apply to THE BURSAR, OLD SCHOOL HOUSE, UPPINGHAM.

**KING'S COLLEGE
SCHOOL,
WIMBLEDON COMMON,
S.W.**

An Examination is held each Summer Term. Candidates for Senior Scholarships must be under 16, and for Junior Scholarships under 14, on May 1st. The value of the Scholarships depends upon the Standard attained, but never exceeds the amount of Tuition Fees (£39 per annum). See "Public Schools' Year Book."

EDUCATION.**MESSRS. GABBITAS, THRING & CO.,****36, Sackville Street, Piccadilly, W.,**Tel. 4926
Regent.

have a department specially organised for advising Parents and Guardians as to the best Educational Establishments for Boys and Girls in the United Kingdom or on the Continent. The Firm have had experience as Educational Agents for over fifty years, and during their long career have been instrumental in sending Masters and Tutors to the leading Schools and Tutors' Establishments, and are in the closest touch with all educational matters. They can give, FREE OF CHARGE, to the Parent or Guardian information and advice as to—

SCHOOLS FOR BOYS OR GIRLS. TUTOR'S**ESTABLISHMENTS. EDUCATIONAL HOMES.****DOMESTIC ECONOMY, AGRICULTURAL AND****SECRETARIAL COLLEGES.**

**EITHER AT HOME
OR
ABROAD.**

To enable the Firm to advise efficiently it is necessary that *full particulars should be given*; especially as to the age of the Pupil, previous education, and present standard of attainments, special subjects of study, locality, whether a large or small establishment is preferred, and the fees it is intended to pay.

The Firm also can assist in procuring the services of Private Tutors and Governesses, Resident, Travelling, Non-Resident, or Visiting, of whom they always have a large number on their Lists.

Transfers of and Partnerships in Boys' and Girls' Schools are also negotiated. Masters, Tutors, and Governesses seeking Posts can have a Prospectus on application, free of charge.

Individual attention and special care of health.

Entire charge taken of Foreign and Colonial Pupils.

Pleasant Garden for Tennis and Net Ball.

Bathing under Supervision.

Fees.—From £26 to £36 per term.

BRIGHTON.

The Medical Officer of Health writes:—"Brighton has the bracing qualities of East Coast resorts, with a larger amount of sunshine and more shelter during unfavourable weather. During 1910 the record of bright sunshine was 48 per cent. in excess of London; in the winter months the excess was even more marked, being 88 per cent. Whilst Brighton has more sunshine than London, at the same time it is cooler in summer. There is an unlimited pure water-supply and perfect sanitary arrangements."

With its two piers, its immense promenade, its pavilion grounds, and numerous parks and recreation grounds, together with a fine municipal orchestra, Brighton offers attractions to meet the requirements of all tastes, and combines with the advantages of the seaside resort the amusements of the town. Sunshine (1924), 1,622 hours. See p. cvi for HOLIDAY GUIDE.

BUCKHURST HILL.

The Medical Officer of Health writes:—"Buckhurst Hill, which prides itself upon its local individuality and accessibility to London, is a modern residential district in Essex, 10½ miles from the Metropolis, well situated amidst healthy surroundings on the borders of Epping Forest."

GIRLS.

OAKLEA, BUCKHURST HILL.**BUCKHURST HILL GIRLS' SCHOOL.**

Inspected and recognised as efficient by the Board of Education, 1921. The house occupies a high position overlooking miles of open forest land. Carefully graded education for girls 8 to 18. Large and highly qualified Staff. Programmes of the Parents' Union School are followed. Preparation for higher Examinations. Local centre for Senior Oxford. Great attention is paid to health and individual physical development, outdoor life, games, gardening. Grounds nearly 7 acres. Home-like holidays for pupils from abroad.

Principal—Miss BEATRICE GARDNER.

BROADSTAIRS.

The Medical Officer of Health writes:—"Broadstairs is built on the cliffs half-way between Ramsgate and Margate. Aspect, S.E. The town, which is built upon high land on a subsoil of chalk, thus enjoying the advantages special to this geological formation, has no northerly aspect and is sheltered from cold winds. It is peculiarly fortunate in climatic fluctuations. Remarkably free from fogs and mists. Unusually high record of bright sunshine. The climate is equable and dry, bracing in summer and mild in winter, suitable for invalids and delicate children throughout the year. The drainage system is excellent, and the water-supply pure and abundant." Sunshine (1924), 1,752 hours. Pop. 15,465. Southern Railway, 75 miles from London.

[See p. cvi for HOLIDAY GUIDE.]

DOWNHAM

(Norfolk). The Medical Officer of Health writes :—"Downham is protected from east winds. Climate is bracing, healthy, and several degrees warmer than in corresponding parts. Subsoil of sand and greensand ; modern drainage ; an excellent public water-supply."

GIRLS. HILL HOUSE SCHOOL.

Patron - The Lord Bishop of Norwich.

Principals - Miss MARKHAM.
Miss ALICE MARKHAM.

Assisted by Resident Trained and Certificated Mistresses and Visiting Masters, and Domestic Science Mistress.

Course of Study includes Scripture, usual English subjects, Modern Languages, Botany, Nature Study, Class Singing, Drawing, Drilling, Needlework, Shorthand and Typewriting. Music a particularly strong feature. Pupils prepared for Cambridge Local Examinations, Royal Academy (Music) Examinations and Royal Drawing Society. Hockey and Tennis under Games Mistress. Girl Guides School Company.

Fees.—From 80 guineas inclusive.

EASTBOURNE

(Sussex). Municipal Borough. Population 62,030. Southern Railway. 62 miles from London. Elevation, from sea-level to 140 feet above; the districts of Mead and Upperton stand upon very high ground. Climate mild, invigorating; moderate rainfall. Bathing excellent.

The Medical Officer of Health writes:—"Its advantages as a health resort are much sunshine, pure air, absence of fog, clean, quickly-drying roadways, large parks and gardens with many trees, a plentiful and good water-supply from wells sunk in the deep chalk, and the proximity to the breezy, health-giving South Downs. The climate is generally beneficial in anæmia, scrofula, and early tubercular disease; and its effects are especially beneficial in the case of convalescent children. Death rate 1921, inclusive, 10·28 per 1,000. Full benefit of winter sun is secured. Warm, sunny shelter always obtainable in centre of town. Beachy Head breaks S.W. winds and diverts much rain, dryness of soil being promoted by great porosity of chalk. Always at or near the top for sunshine in official records." Sunshine (1924), 1,778 hours.

See also p. lxxxv.

[See p. cix for HOLIDAY GUIDE.]

BOYS.

ST. BEDES.

EASTBOURNE.

(Sussex). A fashionable watering place and residential town, 62 miles from London, an important educational centre, famous for its beautifully laid out gardens and fine promenade, extending 3 miles, ornamentally arranged in terraces at 3 levels on sea-wall. The streets profusely planted with trees, and many open spaces conduce to the healthiness of the town. The Downs, with their health giving invigorating air, extending east and west about 50 miles, afford excellent riding and hunting. Beachy Head, and the old-world villages of Eastdean, Alfriston, and Wannock, are great attractions to visitors. Devonshire Park, a centre for music and sports, contains theatre, concert gardens, skating rink, tennis and racquet courts, and large swimming bath. 3 golf links (18 holes) (see also p. lxxxiv).

Fees.—75 to 105 guineas per year.

Entire charge from 120 guineas per year.

FOLKESTONE.

The Medical Officer of Health writes:—"Aspect, S. & S.E. The town is one of the best-planned seaside resorts. The comparatively very healthy and dry climate is due to the porous nature of the geological formation and, in addition, the facilities for drainage make mists, damp and fogs almost unknown. The sanitation of the town is carefully guarded, and precautions taken from time to time to maintain its efficiency. For an educational centre it is particularly adapted. A fashionable holiday resort, residential town, and cross-Channel packet station, close to Shorncliffe camp, one and a half hours from London, modern Folkestone stands on a lofty cliff on the Kentish coast facing the Straits of Dover." *Sunshine* (1924), 1,700 hrs. Pop. 33,502. (See p. cxi for HOLIDAY GUIDE.

Special attention to delicate and backward boys.

Two exhibitions awarded each term, value £35 per annum.

Particulars from Headmaster.

HUNSTANTON-ON-SEA.

The Medical Officer of Health writes:—"Hunstanton shares with all the East Coast watering-places a great reputation for convalescents. Apart from this, Hunstanton seems specially adapted for children. The rapidly-drying soil, the absolutely safe bathing, the magnificent sands for exercise in wet or dry weather, perfect drainage, and splendid water, combine to make it an ideal place for them. The number of schools and the wonderful physical progress of weakly children bear testimony to these advantages."

This quiet East Coast health resort stands on the north-west coast of Norfolk, facing the Wash, between Cromer and King's Lynn. Pier, 800 feet in length, Golf Links, 18 holes. Pop. 4,282. L. & N.E. Rly. Sunshine (1924) 1,548 hours.

*Entire charge where Parents abroad.**Fees.*—35 guineas per term.**LOWESTOFT.**

The Medical Officer of Health writes:—"Has distinction of being the most easterly town in Great Britain. It has long enjoyed a great reputation as one of the leading health resorts, climate being magnificently bracing. Sunbathing (1924), 1,609 hrs."

[See p. cxlii for HOLIDAY GUIDE.]

BOYS.

SOUTH LODGE SCHOOL.

PREPARATORY (7-14) FOR PUBLIC SCHOOLS AND ROYAL NAVY.

Headmaster—

T. J. ELLIOTT SEWELL, M.C., M.A. (Cambridge University Scholar and Scholar of Rugby School)

Premises consist of 2 detached houses in grounds on sea front. Playing Field 5 acres. Gymnasium, Carpenter's Shop.

Scheme of work includes Divinity, Latin, Greek, French, Mathematics, Elementary Science and usual English Subjects.

Cricket, Football, Hockey, Swimming, Shooting.

Fees.—£33 to £36 per term.

MALVERN

(Worcester). The Medical Officer of Health writes :—" Malvern is picturesquely situated on the eastern and western slopes of the range of Malvern Hills, with extensive and magnificent views on both sides. The hills, which rise to an altitude of 1,400 feet, are easily accessible for delicate persons, either on foot or by carriage. The climate has a most beneficial effect on invalids. The houses are so placed as to receive more than the ordinary amount of sunshine. Weakly children, especially those suffering from tubercular glands or continually recurring catarrhs, in nearly all cases do remarkably well here. The rainfall is low, and the soil dries with remarkable rapidity. The water-supply is bountiful and of great purity, and the sanitary state of the district generally of a high standard. The average annual death-rate is 10.5 per 1,000 of the population. Outbreaks of infectious diseases are few and quickly suppressed, as the Urban Council are provided with every means for promptly dealing with any case that may arise."

Pop. 17,809.

[See p. cxiv for HOLIDAY GUIDE.]

BOYS. THE SCHOOL, MALVERN LINK.

W. DOUGLAS, M.A.
(Scholar, Keble Coll., Oxford).

TO

J. WHITAKER & SONS, LTD.,

12, Warwick Lane, London, E.C.4.

No Charge to Parents or Principals.

SEAFORD.

The Medical Officer of Health writes: "Pop. 5,358. On the Sussex coast, 58 miles from London, between Brighton and Eastbourne. Southern Railway. Climate of Seaford is equable, but bracing for south coast health resort. Never very cold in winter, and summer heat always tempered by cool sea breeze, so that hottest days in summer are not relaxing. It is a climate eminently suited to convalescents. The air has a true tonic effect on sick patients and produces a really marvellous improvement in a short time. The climate is dry, rainfall being small and, owing to chalky subsoil, quickly absorbed. There is a large amount of sunshine enjoyed, and nothing to intercept it." The prevailing winds are south and west, the Downs affording considerable protection from north and east. A quiet old-fashioned town and select resort. Elevation, 20 feet to 200 feet. Aspect, S.W. Water-supply constant. Drainage modern. Beach pebbly. Bathing. Golf, two clubs each with gentlemen's links (18 hole) and ladies' course. Tennis, Croquet, Fishing."

BOYS.

**NEWLANDS,
SEAFORD, SUSSEX.**

Mr. WILLIAM A. WHEELER, B.A.
(Keeble College, Oxford).

May be ordered through any Bookseller or direct from the Publishers (postage 9d. extra.)

J. WHITAKER & SONS, Ltd., 12, Warwick Lane, London, E.C.4

ALDERSHOT, HANTS. U.D.C. Southern Railway. 35 miles from London. Pop. 35,175. Climate—Bracing. Soil—Sandy. Golf (18 holes). Hunting. Fishing. Boating.

HOUSE AGENTS. THOMAS WHITE & CO., LTD., Auctioneers, Valuers for Probate, Removal Contractors, House Furnishers, Decorators, Upholsterers, Carpet Warehousemen, Drapers, Military Tailors, Outfitters, and Bootmakers. Field service equipments of all descriptions complete. Telegrams, "Whites, Aldershot." Telephone, No. 36.

BARMOUTH, MERIONETHSHIRE. U.D.C. G.W. Railway. Pop. 3,559. 234 miles from London on the river Mawddach at the entrance to Cardigan Bay. Air is bracing. Town sheltered from north and east. Seaport and fashionable watering place. Water is mild. Golf Links (18 holes). Excellent touring centre.

HENDRE HALL AND WAYSIDE HOTELS. High-class Private Hotels and Board Residence. Beautiful grounds overlooking Bay. Separate Tables. PROPRIETRESS.

BATH, SOMERSET. Episcopal city. Pop. 68,648. 107 miles from London. 11 miles from Bristol. Means of Access—G.W. Railway, London Midland and Scottish Railway, and Somerset and Dorset Railway. Elevation—60 to 750 ft. above sea-level. Neighbourhood—Woodland, hills and diversified country. Climate—Mild, equable, varies according to elevation and aspect. Sunshine (1924), 1,374 hours. Water Supply—Constant. Drainage—Modern. Soil—Oolitic limestones, clays and sands. Baths—Luxuriously appointed with every scientific application known to modern balneology. Mineral Waters—Thermal springs. Temp. 120° F.

Bath, situated in a valley, and at various levels on slopes of surrounding hills, possesses an unrivalled combination of archeological, historical, social and scenic attractions, besides the famous waters to which it owes its origin. [See p. lxxvi for SCHOOLS.]

52, PULTENEY STREET, BOARDING ESTABLISHMENT.

On level and close to Baths, Pump Room, and all Places of Amusement.
HOME COMFORTS. SMOKE ROOM.

Convenient for Sham Castle Golf Links.
Telephone, 429. Mrs. LAWRENCE, Proprietress.

"HOUSES AND ESTATES." FORTT, HATT, & BILLINGS, F.A.I., Auctioneers and Estate Agents. Special list on application. Offices, 3, Burton Street. Telephone, 1488 (2 lines).

BEDFORD, C.B. Pop. 39,183. 50 miles from London. L.M. & S. Railway. A noted educational centre on the banks of the Great Ouse, with charming riverside promenade. Golf Links (18 holes). [See p. lxxvii for SCHOOLS.]

THE PRINCIPAL HOUSE AGENTS FOR BEDFORD AND COUNTY. W. and H. PEACOCK, 10, Lime St., Bedford. (Telephone, No. 115.) The Bedford Illustrated Property Register contains Map, school fees, views and photos of Town and Schools. Post free. Weekly Sales. Auction Rooms, Lime St. Auction Mart, Horne Lane.

BEXHILL, SUSSEX. M.B. Pop. 20,363. Southern Railway. 71 miles from London, 5 miles from Hastings, 12 miles from Eastbourne. Aspect—South. Climate—Dry, invigorating. Water Supply—Constant. Soil—Sandy. A modern select seaside resort, with good educational facilities. 2 Golf Links. Public Park, 12½ acres. Excursions—Battle Abbey, 8 miles; Pevensey Castle, 7 miles; Hurstmonceux Castle, 10 miles. Sunshine (1924), 1,789 hours.

The rapid growth of Bexhill is to be attributed to its bracing air and sunny climate, and it has been found that the air possesses recuperative and stimulating qualities in a remarkable degree. It is one of the sunniest spots on the South Coast; fogs are practically unknown, while the soil is for the most part sandy, and dries quickly after rain. [See p. lxxviii and lxxix for SCHOOLS.]

AUCTIONEERS. HOUSE AND ESTATE AGENTS. STAINES & CO., 28, Devonshire Road, and Sea Road, Cooden Beach. Agents for all available Furnished and Unfurnished Houses to be Let or Sold. Special Lists, Map, and Guide gratis. Telegrams, "Property, Bexhill." Telephone, 249 and Cooden 15.

HOUSE AGENT,
ERNEST SHEATHER, F.A.I.,
14, St. Leonards Road.

The only Estate Agent a native of the Town.
Telephone, 351. Over 30 years' experience.

BIDEFORD, DEVON. M.B. Pop. 9,125. Southern Railway. 220 miles from London. 42 miles from Exeter. An ancient and interesting seaport town on the River Torridge. The centre of Kingsley's country in the midst of beautiful scenery. The town is in two portions, united by a bridge of 24 arches. [See p. lxxix for SCHOOLS.]

AUCTIONEERS, VALUERS, HOUSE AND ESTATE AGENTS. R. DYMOND & SON.
Motor and Carriage Proprietors. Telephone, 25. Established 1871.

BOGNOR, SUSSEX. U.D.C. Pop. 13,300. Southern Railway. 66 miles from London. Aspect—South. Climate—Mild, dry, equable; freedom from frost and fog. Quiet family summer resort and residential town. Sunshine (1924), 1,752 hours.

ROCK GARDENS HOTEL. First class. Unrivalled position, facing sea and Private Lawns. Close West End Bandstand. Beautifully appointed Dining, Smoking Rooms and Lounge. 40 Bedrooms. Appointed A.A. Garage. Phone, Bognor 550 (2 lines). Telegrams, "Gardens, Bognor." F. PULLIN, Resident Proprietor.

BOSCOMBE, HANTS. (In Borough of Bournemouth.) Occupies a naturally beautiful sheltered position, at good elevation. Overlooking sea. Good bathing. Pier.

GODWIN PRATT AND REA. Estate Agents, Auctioneers and Valuers, 503, Christchurch Road, Boscombe. A selected list of Properties to be Sold or Let, furnished or unfurnished, forwarded free upon application.

BOURNEMOUTH, HANTS. C.B. Pop. 91,770. 107½ miles from London. L.M. & S. Railway and Southern Railway. Aspect—South. Climate—Mild, equable temperature. Sunshine (1924), 1,633 hours. Soil—Sand and gravel. Beach—Sandy, no currents. A fashionable south coast health resort extending along a stretch of chine-broken cliffs in the wide-open bay which forms the western extremity of Hampshire. It owes its prosperity to the natural beauty of its situation, its climatic advantages and the purity of its air, laden with the aromatic health-giving exhalations of its innumerable pine trees. 2 Golf links (18 holes). 3 large Parks. Good educational facilities. [See p. lxxx for SCHOOLS.]

BRIGHTON, SUSSEX. Pop. 142,427. Means of access—Southern Railway. 51 miles from London. Elevation, 26 to 462 feet. Aspect—South. Sunshine (1924), 1,662 hours. Soil—Chalk. Front—4½ miles. Marine drive with promenade; lawns, ornamental terrace walks.

Society's liveliest seaside rendezvous; favourite resort of Londoners. Development of the town due to salubrious location, accessibility to London and resemblance thereto, excellent train service, and its enormous capacity for accommodating and amusing all tastes and all classes all the year round. Racecourse meetings; 6 golf links (18 holes); harriers, foxhounds, county cricket ground, numerous parks and recreation grounds, boating, fishing, Royal Pavilion, once a Royal residence, now used for public amusements and concerts; public library, museum, art galleries. [See p. lxxx for SCHOOLS.]

BRUCE W. KELLY, Proprietor.

DARTMOOR,

DEVON. An extensive upland tract from Brent to Okehampton, 22 miles long, 20 miles broad. Area—about 140,000 acres. Okehampton, Moretonhampstead, Tavistock, and Ivybridge indicate the four corners, and the G.W. Rly. runs up to Princetown. Two Bridges, 11 miles from Princetown, is a good spot to begin or end a tramp on the moor. The higher portions of Dartmoor are bleak, wild, and rugged, huge masses of granite culminating in fantastic peaks called tors, from 1,000 to 2,000 feet high. Hay Tor is one of the principal. Amongst the numerous places of interest are:—Cranmere Pool, the source of the rivers Tavy, Dart, Taw, and Teign; Widdecombe, with its perpendicular church and famous fair; Fingle Bridge, one of the most beautiful spots; Postbridge, with its original Clapper Bridge. There are numerous British antiquities on Dartmoor, consisting of menhirs, or long stones, circles and clam (or stone slab) bridges.

MALVERN,

WORCESTERSHIRE. U.D.C. 129 miles from London.

Pop. 17,809. Means of Access—G.W. Railway and L.M. & S.

Railway. Location—On the slopes of the Malvern Hills.

8 miles from Worcester. Elevation—300 to 900 feet above sea-level. Climate—Dry and bracing. Water Supply—Pure, constant. Drainage—Modern. Soil—Gravel. Season—Summer and winter. Annual Festivals—Shakespeare week in May; Croquet and Lawn Tennis tournaments in May and June. Malvern is an inland watering-place, important educational centre, and a pretty residential town, consisting mostly of villas standing in own grounds. The highest point of the Malvern Hills is the Worcestershire Beacon, 1,400 feet high, from the summit of which is obtained one of the most extensive panoramic views in Great Britain, embracing the Severn and Wye Valleys, the Cotswold, Mendip and Welsh hills; and in the plain below can be seen Droitwich, Worcester, Evesham, Cheltenham, Gloucester and the Bristol Channel.

The Malvern Hills being a single chain there are no lateral intervening valleys in the range. This has much to do with the dryness of the climate. The Malvern district is rich in botanical, zoological, entomological and ornithological specimens. Assembly rooms (high-class bands and theatrical companies), public library, three clubs, tennis, bowls, croquet, golf—gentlemen's course (18 holes), ladies' course (9 holes)—hunting, boating, fishing. Places of Interest—Rivers Severn (4 m.), Teme (6 m.), Avon (12 m.); boating, fishing, river scenery. Deerhurst (17 m.)—Saxon church. Tewkesbury Abbey (15 m.). Pershore Abbey (16 m.). Bosbury (8 m.)—Edna Lyall's tomb. Valley of the Wye—by rail to Liss, and boat down river to Chepstow.

[See p. xcl for SCHOOLS.]

MARGATE,

KENT. In the Isle of Thanet. Pop. 46,475. Southern Railway. 73 miles from London. Climate—Dry, bracing, unequalled for certain qualities due to geographical situation. Soil—Chalk.

Front—Promenade gardens, with bandstands, winter gardens: separated from houses by marine drive. A popular summer watering place, a special favourite with Londoners, with accommodation for all classes amidst stimulating surroundings. Cliftonville, quiet and select quarter, commands fine sea views. The unlimited supply of ozone and invigorating sea air makes Margate an ideal spot for convalescents and children. Sunshine (1924), 1,827 hours.

[See p. xcii for SCHOOLS.]

SCARLETT & GOLDSACK, House and Estate Agents, Auctioneers, Valuers, Public House Brokers, 5, Cecil Square, 7, Broadway, Cliftonville, and 38, High Street, Ramsgate. Register containing all the best properties in the district free. Telephone: 52 Margate; 291 Margate. Telegrams: Scarlett, Margate.

MATLOCK, DERBYSHIRE. Pop. 7,055. L.M. & S. Railway. 143 miles from London, 16 miles from Derby. Climate—Dry, bracing, sheltered by hills from north and east. Famous for its mineral springs and hydropathic establishments. Favourably situated as a winter resort, being sheltered from north and north-east winds. Convenient centre for the Peak district.

ROCKSIDE HYDRO. For Health and Pleasure; nearly 800 ft. alt. Modern Baths. Turkish, Electric, Plombière, Aix Vichy Douches, Pissany Mud Baths. Near Golf (18 holes). Garage. Tennis Croquet Bowls. Entertainer. Dancing. New Dining Rooms and Bedrooms. H. & C. Tariff, apply—MANAGERS. 'Phone, 12 (2 lines). Tel., "Rockside, Matlock."

MINEHEAD, SOMERSETSHIRE. U.D.C. Pop. 6,016. G.W. Railway. On south shore of Bristol Channel. 24 miles from Taunton. 167½ miles from London. Climate—Mild, equable. Elevation—12 feet to 600 feet. Soil—Red sandstone on water gravel. A favourite holiday resort in summer and great hunting centre. Good winter residence for invalids. Golf links (18 holes). [See p. xcii for SCHOOLS.]

MINEHEAD, EXMOOR AND WEST SOMERSET. Stag Hunting, Polo, Golf, Shooting, Fishing. For register of all the best Furnished and Unfurnished Houses apply—C. F. J. RICHARDSON, Estate Agent, 17, The Avenue. Telegrams, "Richardson, Auctioneer, Minehead." Telephone, 63 Minehead.

MULLION, CORNWALL. G.W. Railway to Helston, thence by motor-bus, 8 miles. On the east side of Mounts Bay. Possesses a climate very suitable for convalescents. The cove, cave and crags attract the attention of innumerable artists. Golf links (18 holes). Boating, Bathing, Fishing.

MULLION COVE HOTEL. The only first-class Licensed Hotel on the Mullion Coast. Five single fire-proof lock-up and other Garages. Sanitation and water supply unexceptionable. Safe Bathing. Good Fishing. 18-hole Golf Links. Electric Light throughout. Telephone, No. 8. Apply—MANAGERESS.

MUNDESLEY, NORFOLK. L. & N.E. Railway. A quiet little seaside resort, 8 miles S.E. of Cromer. Picturesque cliffs and extensive smooth sloping sands. Climate—Dry, bracing. Golf Links (18 holes).

GRAND HOTEL. Leading and most Modern Hotel. Accommodation for 100 visitors. Nearest to Golf Links. Hard Tennis Courts. Ballroom. Billiards. Garage. Telephone, 22. PROPRIETOR.

NEWQUAY, CORNWALL. Pop. 6,000. G.W. Railway. On coast between St. Ives and Padstow. 32 miles N.E. of Penzance. A rising modern health resort. Extensive view of the rugged coastline of North Cornwall. Neighbourhood—Cliff scenery. Water Supply—Constant. Drainage—Modern. Beach—Sands. Climate—Bracing. Places of Interest—Porth, Watergate Bay, Beacon Cove, Mawgan Porth. Good excursion centre. Golf (18 holes). Sunshine (1924), 1,527 hours. [See p. xciii for SCHOOLS.]

FOR
SUNSHINE
AND
EQUABILITY
OF
CLIMATE

Worthing is noted for the equability of its climate, which is largely due to its geographical situation. The proximity of the sea and the shelter afforded by the South Downs combine to modify the climate and avoid extremes. The absence of hills enables convalescents to take exercise without exertion, and so derive the greatest benefit from the high percentage of ozone in the air and the large amount of sunshine. A palatial Pavilion at the Pier entrance, and a commodious Bandstand Enclosure on the Parade will be opened for the 1926 summer season.

EXPRESS SERVICE (PULLMAN CARS) to LONDON, 76 minutes.

Law Reversionary Interest Society, Ltd.

ESTABLISHED 1853.

MANY persons have interests either for life or in expectation in property arising under Wills or Settlements. The operations of this Society enable such interests to be sold on most favourable terms, or loans to be obtained thereon at moderate rates of interest.

REMOTE interests which may never come into possession at all can be made available for immediate use if supported by Policies to be effected with the **EQUITY & LAW LIFE ASSURANCE SOCIETY**, which is under the same management.

For full information apply personally, or through your Solicitor, to the Secretary at the Society's Offices,

19, LINCOLN'S INN FIELDS, W.C. 2.

AUSTRALIAN MUTUAL PROVIDENT SOCIETY

(A.M.P.)

ESTD. 1849.

(A.M.P.)

THE LARGEST BRITISH MUTUAL LIFE OFFICE.

Assets	£56,000,000
Annual Income	£8,300,000

The A.M.P. Society's premium rates are lower than the average, it distributes its whole divisible surplus annually among its policy-holders, it values its liabilities on the most stringent basis and it possesses in a unique degree the combination of a low expense rate, a high interest return and a favourable mortality experience. Those who desire to obtain their life assurance cover at the lowest net cost, with perfect security, are invited to investigate these claims.

EVERY YEAR A BONUS YEAR.

Safeguarding the family ; forming an excellent investment.

(2) *" All-Cover "* :—

Insuring house and contents against practically all risks at one inclusive premium.

for Home Protection.

CHIEF OFFICES :

BROAD STREET CORNER, BIRMINGHAM

DOUBLE YOUR INCOME

ELIMINATE RISK.

Every person whose income is derived from investments knows how harassing is the anxiety entailed by the constant rise and fall in their value.

You can get a guaranteed income for life if you purchase a Canada Life Annuity. It is, humanly speaking, equivalent in safety to a Government pension. It cannot shrink. What you contract to get is paid you punctually. And you get a much larger income.

FOR INSTANCE

A man of 62 who takes out a Canada Life Annuity for £1,000 gets a yearly income of £100 12s. 1d. A woman of 67 gets a yearly income of £101 12s. 6d. for the same investment.

OVER 10% PER ANNUM.

Other ages pro rata, on equally generous terms. You can invest any amount from £100. The Funds of the Canada Life Company are over £21,000,000, and are under direct Government supervision. Write at once for full particulars to the Canada Life—the oldest Colonial Life Assurance Company and the office that gives the best value for Annuities.

Write to-night (stating age) to Annuity Department,

CANADA LIFE ASSURANCE CO.

WOULD YOU LIKE TO BE INDEPENDENT TOO?

**A Cheque for £4,500 at 55
would put you on the road.
This is how you can get it.**

THOUSANDS of men of your own age and position in life are aiming at retiring from business when they reach the age of 55 or 60. By then, thanks to the plan of Investment Insurance about to be outlined, they expect to have accumulated enough money to bring them in an income sufficient for their needs.

This is the plan.

Instead of haphazard saving and risky investment, arrange to deposit annually with the Sun Life of Canada—the great Annuity Company—a sum you can well afford to set aside for the purpose of making your future safe. This Company, with the Government supervised assets of £56,000,000, is so exceedingly prosperous that you—sharing in this prosperity—will be entitled to big profits on your annual investments. These profits accumulate to your credit until the date arranged for, when you will receive cheque for the full amount.

There's no reason whatever why you, with your income, should not qualify for a cheque for several thousand pounds, to be paid you when you are 55 or 60 years of age. Why not do it, and make certain of a comfortable "evening of life"?

If misfortune should come and through illness or accident, you are rendered permanently incapable of earning a living, no further deposits will be required, and until you reach the age agreed upon and are due to receive the full amount, the Company will pay you a generous monthly pension. So, though unable to earn a living, you would not be a financial burden on anyone, and at 55 or 60 you would get the big cheque, just as if you had made all the deposits.

Also, from your first deposit your life is insured for a large Capital Sum, and should anything happen to you this sum, together with half of every deposit you had made, would immediately be paid over to your family.

There are other great advantages connected with this plan of Investment Insurance, but let us send you detailed particulars, so that you can quietly consider them. Let us know date of your birth and the approximate amount you can deposit yearly, and we can then quote exact figure. No obligation is incurred.

Address your communication to:—

Principal Charitable Bequests of the Year.

clviii

APPENDED is a list of the principal bequests for charitable purposes recorded during the year. The amount for charitable purposes is, in considerable proportion, of the cases, approximate, owing to the bequests including a share of the residuary estate, or consisting wholly or in part of business interests, or of blocks of shares, for which a definite value cannot be given. *Residuary bequests* are included where the reversions are absolute, generally on the cession of life interests or a period of years, but, generally speaking, are not included where they are *contingent reversions*, depending on certain happenings (usually failure of issue to certain persons, or failure to secure the observance of certain conditions), unless there is reason to believe that such contingency is likely to be fulfilled. The amounts of residuary bequests are also subject to variation on the final winding-up of the estate owing to possible variations in the amount of duty payable, as the final figures may place an estate for duty purposes in a different category (either higher or lower) as compared with the original valuation submitted on obtaining the grant of probate.

This table records the chief bequests published during the year, not necessarily those becoming payable during the year, and it does not include bequests previously recorded which have since become payable, either by the winding-up of the estate, or by the falling in of reversionary or contingent reversionary interests.

The bequests recorded this year are somewhat more varied in character than usual, although hospitals and educational trusts still account for the greater part of the bequests. A curious feature is the large residuary bequest of Mr. Thomas Sharples for a trust for annuities for elderly people bearing the surnames of Sharples or Hesmondhalgh, and the late Mr. H. W. Sassoon's bequests of about £37,000 for the benefit of first offenders and for the assistance of unmarried mothers and illegitimate children. War charities (especially St. Dunstan's) are still large beneficiaries.

Name.	Gross Value of Estate.	Approx. Amount.	Objects.
	£	£	
Leverhulme, 1st Viscount	1,000,000 (Provenl.)	500,000	Principally for charities connected with commercial travellers, grocers, or chemists, their wives, widows and children, and for Employees Benefit Fund of Lever Bros. and the Staff Training College of Lever Bros., Port Sunlight, Limited.

ADDITIONAL CURATES SOCIETY

More than 700 Curates are serving in poor and burdensome parishes through the Society's help.

Every penny of the contributions received during the past 20 years has been paid out towards Curates' stipends.

The Society pleads for generous support. Letters should be addressed to the Rev. Canon Paul Petit (Secretary),

A.C.S. HOUSE, 51, Belgrave Road, London, S.W.1.

For fatherless necessitous boys and girls from all parts of the country and the Dominions, from early infancy up to 11 years. They are retained till they are 15 years of age, and are given a practical and sound education. Full particulars of the

ALEXANDRA ORPHANAGE

(Incorporated as the Orphan Working School & Alexandra Orphanage)

may be obtained from the Secretary, who will be pleased to send the Annual Report. 300 children are now in the school, and the work has been carried on continuously for 168 years. It is dependent upon voluntary gifts, and further support is urgently needed.

Subscriptions, donations, and LEGACIES will be welcomed.

CHURCH MISSIONARY SOCIETY

SALISBURY SQUARE, LONDON, E.C. 4.

Vice-Patron	-	-	-	-	THE ARCHBISHOP OF CANTERBURY
President	-	-	-	-	COL. SIR ROBERT WILLIAMS, Bart.
Treasurer	-	-	-	-	R. L. BARTLEY, Esq., C.B.E.
General Secretary	-	-	-	-	Rev. W. WILSON CASH, D.S.O.

The Church Missionary Society is helping the Home Church to "go and make disciples" in

AFRICA, INDIA, CHINA, JAPAN, PERSIA, and PALESTINE

- Through the 1241 foreign missionaries on its roll of service.
- By giving Christian education in its 4743 schools and colleges—"Character factories"—to 354,700 pupils.
- Through its Medical Missions. 77 doctors and 84 nurses ministered last year to 47,221 in-patients in 42 mission hospitals; out-patient attendances were 969,984.
- In training pastors and teachers, evangelists and Bible women for Christian service among their own people. There are about 645 ordained clergy and 14,171 men and women workers in C.M.S. Missions.

THE WORK IS EXPANDING ALL THE TIME

yet the Society has been forced to adopt a policy of retrenchment.

The only way of minimizing the duration of retrenchment is by raising the income to £500,000.

Gifts should be sent to the Financial Secretary,
C.M. HOUSE, SALISBURY SQUARE, LONDON, E.C. 4.

COLONIAL AND CONTINENTAL CHURCH SOCIETY.

(Now in its One Hundred and Third Year.)

Patron: HIS MAJESTY THE KING.

Vice-Patrons: The Archbishops of Canterbury, York, etc.

The Society exists for the purpose of supplying the means of Grace to our fellow-countrymen abroad, especially in those pioneer parts of the Empire where they are in danger of drifting into irreligion for lack of the Gospel.

Many Colonial Dioceses receive aid from the Society, including those in Western Canada, Australasia, British East Africa, and India. Many Colonial Bishops are applying for far more aid than the Society's Funds can meet.

334 Clergy and Lay Evangelists have been sent out.

Assistance is also given to ministrations among British Artisans, Sailors, and others in Continental Cities, and Services (self-supporting) are organised for visitors at health resorts.

Bankers: BARCLAYS BANK, LTD., 54, Lombard Street, London, E.C. 3.

Address: The Secretary, 9, Serjeants' Inn, Fleet Street, London, E.C. 4.

Treasurer: W. G. BRADSHAW, Esq., C.B.E.

EAST LONDON HOSPITAL FOR CHILDREN

**SHADWELL, LONDON DOCKS.
IN DIREST NEED**

Full particulars of work and need from Wm. Wilcox, Secretary at Office, Shadwell, E.

EVELINA HOSPITAL — FOR — CHILDREN, SOUTHWARK, LONDON, S.E.

Under the Patronage of THEIR MAJESTIES THE KING AND QUEEN.

Supported by Voluntary Contributions.

LARGEST CHILDREN'S HOSPITAL IN SOUTH LONDON.
Situating in its poorest District.
FUNDS GREATLY NEEDED.

**Please help this Charity, "not only because it is a Hospital,
but because it is a Hospital for Children."**

President—THE EARL OF BESSBOROUGH, C.M.G.
Chairman—D. MALCOLM SCOTT, ESQ.

Treasurer—GERALD D. SMITH, ESQ.
Secretary—H. C. STANLAND SMITH.

GENERAL LYING-IN HOSPITAL, York Road, Lambeth, S.E. 1. ESTABLISHED 1765.

Patrons—H.M. The Queen and H.M. Queen Alexandra.

This Hospital is situated in one of the poorest parts of London, in the district South of the Thames, with a population of nearly two millions.

Married women in indigent circumstances, especially the wives of Soldiers and Sailors, and certain single women (with their first child, after investigation by the Committee), are admitted to the Hospital from all parts of the kingdom, but mainly from the immediate neighbourhood, from which, owing to its poverty, little pecuniary help is obtainable.

Subscriptions and Donations thankfully received by the Treasurer, or Miss LILY HEARN, the Secretary, at the Hospital. [146]

THE GORDON BOYS' HOME

(THE NATIONAL MEMORIAL TO GENERAL GORDON).

Patron—THE KING. *Vice-Patrons*—H.M. THE QUEEN and H.M. QUEEN ALEXANDRA.

Chairman Executive Committee—H.R.H. THE DUKE OF YORK, K.G.

THE HOME IS SITUATED AT WEST END, WOKING, NEAR BROOKWOOD.

The Home is constructed to accommodate 250 Boys, chosen from the homeless and destitute, between the ages of about 14 and 15, and give them a training, up to the age of 17 or thereabouts, which will fit them alike for civil life in this country or its Colonies, and for service in the Army, Navy, Air-Force or Mercantile Marine.

CONDITIONS OF ADMISSION.—1. The age for admission is from about 14 to 15½ years. 2. A boy must, in the opinion of the Committee, be really necessitous. 3. He must be free from such physical or mental infirmity as would disqualify him for service in the Army or Navy, or for civil employment in the Colonies or elsewhere, which would require active bodily exertion. 4. Boys of known bad character are ineligible.

Free admission is given to such number of boys as above can be provided for out of the general income of the Home. A guaranteed payment of £25 annually during his stay at the Home will give a right of nomination for a lad fulfilling the conditions of admission. *Subscriptions and Donations are urgently needed in order that the above number of boys may be maintained.*

Subscriptions are received by THE WESTMINSTER BANK, LIMITED, 1, St. James's Square, S.W., and by the Commandant at the Home, from whom any further information can be obtained. For financial reasons the London Office has been abolished.

COMMANDANT:—MAJOR SIR T. E. S. PASLEY, BART.

GUY'S HOSPITAL

LONDON BRIDGE, S.E. 1,

NEEDS HELP.

President: H.R.H. THE PRINCE OF WALES, K.G.

Founded in 1724 by Thomas Guy, a Bookseller and Publisher in the City of London, Incorporated and Governed by Acts of Parliament, 11th George 1st, ch. xii., and 61st Victoria, ch. vi., as "The President and Governors of the Hospital founded at the sole costs and charges of Thomas Guy, Esquire."

The Hospital is empowered to receive gifts of, and to hold, land up to an aggregate yearly value of Sixty Thousand Pounds (exclusive of the site of the Hospital), notwithstanding the provisions of the Mortmain Acts.

BEDS
616

IN-PATIENTS (1924)
10,017

OUT-PATIENTS (1924)
124,431

Expenditure: £158,257 :: :: Income from Endowments: £63,167.

The Governors earnestly appeal for further Subscriptions and Donations. The present Subscription List is less than £5,000 a year, although the Charity is dependent upon support from sources other than its endowments to the extent of over £80,000 per annum.

To form a permanent Memorial, if desired, a Donation or Bequest should be allocated to the Re-endowment Fund, which is permanently invested and the income only applied for the general purposes of the Hospital.

A Gift of £1,000 to this Fund, or an Annual Subscription of £50, will respectively endow or support a Bed, over which a brass tablet, inscribed in accordance with the wishes of the Benefactor, can be placed.

A copy of the Annual Report of the Hospital can be obtained on application to Mr. W. J. Curry, Clerk to the Governors, Guy's Hospital, S.E. 1. Telephone: Hop 1086.

Bankers: THE BANK OF ENGLAND.

Treasurer: F. P. WHITBREAD, Esq.

THE HOSPITAL FOR DISEASES OF THE SKIN

Telephone: Hop. 1021.

70-71, BLACKFRIARS ROAD, S.E.

ESTABLISHED 1841.

Patroness—HER MOST GRACIOUS MAJESTY QUEEN ALEXANDRA.

Treasurer—THE RT. HON. THE LORD MORRIS, P.C., K.C.M.G.

This hospital, established in 1841 and the oldest Skin Hospital in London, is still unable to reopen its beds for In-patients owing to lack of funds. Donations and subscriptions are urgently desired. Since its foundation no less than 554,000 patients have been treated and the scientific equipment of the Institution has always been kept thoroughly abreast of modern developments in research and treatment. The Light Department is provided with X-rays radium and ultraviolet light apparatus. It is a centre both of dermatological therapeutics and education, and welcomes at its clinics medical practitioners and students. Patients should attend daily at 1.30 p.m., or on Fridays at 6 p.m. They are expected to contribute to the funds of the hospital according to their means.

FREDERICK HAYTER, Secretary.

Subscriptions, Donations and Legacies are earnestly solicited. Bankers—Messrs. BARCLAYS BANK Ltd., 19, Fleet Street, E.C. 4. RICHARD C. TRESIDDER, *Secretary*. [178]

Society for the Assistance of Ladies in Reduced Circumstances *Under Royal Patronage.*

THIS society is solely engaged in tending for the needs of ladies who, through the ill-timed blows of "outrageous misfortune," are dependent on voluntary contributions and gifts.

Those who are helped in this way do not come within the orbit of other great charity organisations, and therefore the Society, in carrying on a *specialised* charity, appeals directly and strongly to your generosity.

The Society needs money for essential reasons—for rents—to buy coal—to relieve weak and frail ladies—to procure necessities for those capable of home employment—and to ensure an element of comfort for those who otherwise could not obtain it. Will you help in this very human cause? Every donation, large or small, is very gratefully acknowledged.

If you cannot give a substantial amount now, will you kindly think of the Society when you make your will? Legacies help to lay a firm foundation, and an amount of £50, £100 or £500 would give very definite help in the future and do much for the benefit of the Society.
